Amount included in the proposal for all work specified under head of "Lighting fixtures"—Bid 1, \$470; 2, \$450.

Amount to be deducted from the proposal if nonconducting covering is omitted from hot water boiler and water heater and hot and cold water piping of plumbing system except covering of the ice water piping and piping concealed in furred spaces—Bid 1, \$100; 2, \$150.

Amount to be deducted from the proposal if nonconducting covering is omitted from boiler, smoke, breeching, and piping of heating apparatus, except risers in chases—Bid 1, \$175; 2, \$175.

Amount to be added to the proposal if lead-lined wrought iron or lead-lined steel piping is substituted for the galvanized water piping of plumbing system—Bid 2, \$1,600.

Amount included in the proposal for window and door screens—Bid 1, \$400; 2, \$450.

Manufacturer of plumbing fixtures—

Bid 1, Crane Co.; 2, John Douglas Co.

Manufacturer of lighting fixtures—Bid 1, Gas Fixture & Brass Co.; 2, Gas Fixture & Brass Co.

Manufacturer of direct cast-iron radiator—Bid 1, American Radiator Co.; 2, Kewanee Radiator Co.

Manufacturer of wall radiators—Bid 1, American Radiator Co.; 2, Fowler & Wolff.

Manufacturer of nonconducting coverings—Bid 1, Johns-Manville Co.; 2, Johns-Manville Co.

Manufacturer of radiator valves—Bid 1, Jenkins Bros.; 2, Jenkins Bros.

Manufacturer of cabinet and tablet—Bid 1, Frank Allen; 2, Frank Adam.

Manufacturers of conduit—Bid 1, Weir Tube Co.; 2, Mark Mfg. Co.

Manufacturer of wire, rubber covered—Bid 1, Hazard Mfg. Co.; 2, American Steel & Wire Co.

Manufacturer of plug receptacles—Bid 1, Bryant Electric Co.; 2, Bryant.

Manufacturer of snap switches—Bid 1, Arrow Electric Co.; 2, Arrow.

PORT BAKER, MARIN CO., CAL.—Fence construction, woven wire. Cost not stated. Engineer, Quartermaster Dept., Fort Baker. Owners, United States Government. Bids will be opened at Fort Baker by Lieut. R. W. Pinger on May 12th for the construction of 8,000 feet of five-strand woven wire fence. Plans and specifications can be obtained from the Quartermaster's office at Fort Baker.

HALLS AND SOCIETY BUILDINGS.

LONG BEACH, LOS ANGELES CO., CAL.—City hall, 2 story and base, reinforced concrete, \$200,000. Architect, City Engineer E. P. Dewey. Long Beach, Owners, City of Long Beach. Preliminary sketches have been prepared for a building housing all city departments, including the police and fire departments. The plan suggests a structure covering an area of 100x300 feet. Bonds are to be voted on in the near future.

ALHAMBRA, LOS ANGELES CO., CAL.—City hall, 2 story and base. Class A construction, \$35,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, City of Alhambra. This work has been mentioned here before when plans were first out for figures. All bids were rejected and plans revised. New bids are now being called for and will be opened on May 3rd. Plans and specifications can be secured from the architects or from the City Clerk.

Contracts Awarded.

TAFT, KERN CO., CAL.—Lodge hall, 2 story and base, brick, \$21,000. Architect, O. L. Clark, Bakersfield. Owners, Odd Fellows' Hall Association. Contractor, J. C. McDonald. Taft. Contract price, \$21,000.

HOSPITALS.

ASTORIA, ORE.—Hospital, 2 story and base, brick, \$25,000. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owners, Town of Astoria. The building will be built in the shape of a letter T with the main portion 40x75 feet and wing in the rear 10x10 feet. The main portion will contain a laundry, kitchen, dining and storage rooms. Upper floors will contain three large

dormitories, wards, solarium, operating rooms and private rooms. There will be steam heat and a vacuum cleaning system. Interior finish will be of tile and pine. Modern equipment will be used throughout. Exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTELS.

SAN FRANCISCO—Hotel, 5 story and base, brick and steel, \$40,000. Architect, Henry Sherrinund, Mills Bldg., S. F. Owners, Mersing Estate. The building, which has been mentioned here before, will be erected at the corner of 8th and Folsom streets, and will contain stores on the first floor and a large number of hotel rooms on the upper floors. Plans provide for steam heat and elevator service. Interior finish will be of pine with some hardwood in the office and lobby. All rooms will be supplied with hot and cold running water. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Hotel, 7 story and base, reinforced concrete, \$70,000. Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner's name withheld. This building will be erected on Taylor street between Golden Gate avenue and Turk street. The first floor will be arranged for two stores besides the hotel office and lobby. Upper floors will contain a total of 125 rooms, a number of which will have private baths. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Interior finish will be of pine and hardwood with some ornamental plaster. The exterior of the building will be faced with cement plaster. Plans are complete and figures will be taken at once.

SAN FRANCISCO—Hotel, 7 story and base, concrete and steel, \$70,000. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owners, Hunsen and Johnson. The building will be erected on Turk street west of Larkin and will cover an area of 52x137½ feet. The first floor will contain stores besides the hotel entrance and lobby. Upper six floors will be subdivided into 100 guest rooms and 68 baths. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot and cold water supply. Some wall beds will be used. Interior will be finished in pine and hardwood. Ornamental plaster will be used in the lobby. Exterior of the building will be faced with cement plaster in imitation of Caen stone. Plans are nearly complete.

LOS ANGELES, CAL.—Hotel, 12 story and base, Class A construction. Cost not stated. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. owner, N. W. Stowell. The building will be erected on Spring street just south of Fourth. There will be one store and a cafe on the first floor besides a large office, lobby and parlors. Upper floors have been arranged for a total of 275 guest rooms and 264 baths. Interior partitions will be of hollow tile and metal lath and plaster. Plans provide for three elevators, steam heat, vacuum cleaning system and circulating ice water system. The exterior of the building will be faced with glazed brick and terra cotta. Working drawings are being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 12 story and base, Class A construction, \$360,000. Architects, Parkinson & Bergstrom, Security Bank Bldg., L. A. Owners, Hart Bros. Contractors, F. O. Engstrom & Co., 5th and Seaton Sts., L. A. general construction only. Contract price not stated.

SAN FRANCISCO—Hotel, 4 or 5 story and base, brick and steel. Cost not stated. Architect, Hiram K. Lovell, 1517 Felton St., Berkeley. Owner, Mrs. Parker. Contractor, P. J. Walker Co., Monadnock Bldg., S. F. Contract price not stated.

SAN DIEGO, CAL.—Hotel, 7 story and base, reinforced concrete, \$125,000. Architect, W. S. Keller, San Diego. Owner, Rice-Landwick Co. Contractor, T. M. Russell, 30th and Redwood streets, San Diego. Contract price, \$125,000.

SEATTLE, WASH.—Hotel, 4 story and base, reinforced concrete, \$75,000. Architect, W. E. Dwyer, New York Bldg., Seattle. Owner, J. P. Jones. Contractor, C. E. Martin, New York Bldg. Contract price, \$75,000.

LIBRARIES.

PASADENA, LOS ANGELES CO., CAL.—Library, 1 story and base, Class A construction, \$30,000. Architects, Train & Williams, Exchange Bldg., L. A., associated with F. M. Ashley, Pasadena. Owners, City of Pasadena. The building will cover an area of 63x65 feet, and has been designed in the classic style. Construction will be of the Class A type throughout with exterior walls faced with cement plaster in imitation stone and pressed brick. Interior will be finished in oak and other hardwoods. A tile floor will be used. Steam heat and a vacuum cleaning system are specified. Plans are complete and figures will be opened on May 1st. Plans may be obtained from Train & Williams. A general contract, including everything except furniture and light fixtures will be let.

BAKERSFIELD, KERN CO., CAL.—Library, 2 story and base, concrete and steel. Cost not stated. Architect, O. L. Clark, Bakersfield. Owners, City of Bakersfield. As was stated in last week's issue the Library Trustees have approved the plans for this building and construction will be started as soon as bids can be taken. The building will cover an area of 54x33 feet. Exterior will be faced with cement plaster.

HUNTINGTON BEACH, LOS ANGELES CO., CAL.—Library, 1 story and base, brick, \$10,000. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Town of Huntington Beach. The architects have just been commissioned to prepare plans for this building. There will be two public reading rooms, librarian's office and stack room. Interior will be finished in pine and hardwoods. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Fire houses, 3, 1 story and base, frame, \$31,143. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids opened

for the construction of three fire houses show H. Chase low at \$31,143. He will probably be awarded the contract. A complete list of the figures appears under San Francisco in this issue. Bids have also been opened for the pile foundation for the Fine Arts Building and may be found under the same heading.

POST OFFICES.

POCATELLO, IDAHO—Post office, 3 story and base, brick, stone and steel. Cost not stated. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans have been completed and approved for a three-story fireproof structure covering a ground area of approximately 4,500 square feet. Interior will be finished in pine and hardwoods, with tile and marble wainscoting. There will be steam heat. Interior partitions will be of hollow tile. Floors will be of concrete. Plans provide for metal window sash and frames and fireproof doors. A general contract will be let which includes the plumbing, heating, electric work and lighting fixtures. Exterior of the building will be faced with cut stone, pressed brick and granite. Roof will be of tin. Bids are now being taken and will be opened on May 28th. Plans can be secured from either the Supervising Architect at Washington or from the custodian of the site at Pocatello. The official proposal appears in this issue.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Car barn, 1 story, reinforced concrete. Cost not stated. Architect, H. Alban Reeves, Chamber of Commerce Bldg., L. A. Owners, Santa Barbara and Suburban Railway Co. The building will cover an area of 80x120 feet. There will be concrete floors and repair pits, steel roof trusses and metal window sash and frames. The exterior of the building will be faced with cement plaster. Plans are being prepared.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, L. Shirar, Chronicle Bldg., S. F. The dwelling will be erected on 23rd avenue, and will contain six rooms, bath and sleeping porch. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,800. Architect, none. Owner, Marshall Diggs, 2444 Bowditch St., Berkeley. The dwelling has been designed for an eight-room house with all modern conveniences. There will be furnace heat and open fire places. Interior will be finished in pine with hardwood floors in the principal rooms. Mantels will be of brick. Tile will be

used in the bath room and kitchen. Besides the eight rooms there will also be a sleeping porch. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by the Day.

BERKELEY, ALAMEDA CO., CAL.—Residences, 2, 2 story and base, frame, \$3,500 each. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, Mr. Ochleiree. These houses will be erected at the corner of Bonita and Vine streets, and will each contain seven rooms and bath. Interiors will be finished in pine with some hardwood veneer. There will be hardwood floors in the dining rooms, living rooms and reception halls. Furnace heat and open fire places will be installed. Mantels will be of brick and tile. An automatic water heater is specified in one of the houses. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, E. L. Brock. The house has been designed for an eight-room dwelling with two baths and sleeping porch. Interior will be finished in pine and hardwoods. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, United Home Builders, 1762 Broadway, Oakland. The house will contain seven rooms, bath and sleeping porch. Interior will be finished in pine with hardwood floors in the principal rooms. There will be a hot air furnace and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster. Plans are complete and in the hands of the owners who are now purchasing all materials. Work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$6,000. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, C. E. Quigley. The dwelling will be erected at the corner of College and Rand avenues, and will contain eight rooms, sleeping porch and baths. Interior will be finished in pine and hardwood with hardwood floors in the living room, dining room and reception hall and den. There will be furnace heat and open fire places. A large brick mantel will be one of the features of the house. Tile will be used in the bath rooms and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$20,000. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Mrs. E. J. Culver. This dwelling was mentioned in last week's issue, at which time plans were nearly complete. Working drawings have been completed and bids are now being taken on the work. The house will be erected in Claremont Tract, and will

contain 12 or 11 rooms, baths and sleeping porch. Interior will be finished in pine and hardwoods. There will be a central heating system and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. An automatic water heater will be installed. A garage will be erected on the rear of the lot. Exterior of the house will be covered with cement plaster on metal lath.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owners, Jones and McGovern, 2218 Los Angeles Ave., Berkeley. The house will contain seven rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Owners are now purchasing all materials.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, Mrs. A. G. Sanderson. The house will contain eight rooms, bath and sleeping porch. Interior will be finished in pine and hardwood with hardwood floors in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath room will be wainscoted with tile. Tile will also be used in the kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. The work will be carried out by Sullivan Bros., 6456 Harmon Court, Oakland.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$25,000. Architect, Louis M. Upton, Mutual Savings Bank Bldg., S. F. Owner, George D. Greenwood. The house will contain ten or twelve rooms, several baths, sleeping porch and laundry. Interior will be finished in pine and hardwood. Hardwood floors will be used in all principal rooms. There will be furnace heat, open fire places, an automatic water heater and a vacuum cleaning system. Mantels will be of marble and tile. A garage will be erected on the rear of the lot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

VANCOUVER, B. C.—Residence, 2 story and base, tile and concrete, \$100,000. Architects, Cutler & Mahngren, Bldg., Vancouver. Owner, C. D. Stimson, White Bldg., Vancouver. The dwelling will contain eleven sleeping rooms, ball room, gymnasium, billiard room, sun porch and eight baths. Plans also provide for seven sleeping porches. Interior finish will be of pine and hardwoods and hardwood floors will be used throughout. A central heating system, probably steam, will be installed. There will be a number of open fire places with tile and marble mantels. A tile room is specified. All bath rooms will be finished in marble and tile. Exterior of the dwelling will be covered with terra cotta. Plans are being prepared.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, L. Shirar, Chronicle

Bldg., S. F. The dwelling will contain six rooms and bath. Interior finish will be of pine throughout with some oak floors. There will be an open fire place with brick mantel in the living room. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken for the materials. Owner will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, P. A. Nelson, 4333 19th St., S. F. The house has been designed for a six room dwelling with bath. Interior finish will be of pine throughout. Oak floors will be used in the living room, dining room and reception hall. There will be a large open fire place and brick mantel in the living room. An automatic water heater will be installed. Exterior of the house will be covered with brick veneer and cement plaster. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, I. W. Button, 5330 Telegraph Ave., Oakland. The dwelling has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwoods with hardwood floors in the principal rooms. Bath room will have tile wainscot. There will be furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

OAKLAND, CAL.—Residences, 4, 2 story and base, frame, \$2,500 each. Architect, W. H. Judson, Albany Bldg., Oakland. Owners, Morse Hargrave Co. These houses will be erected on Seminary avenue, and each will contain six rooms and bath. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be open fire places and brick or tile mantels. Exterior of the houses will be covered with cement plaster and shingles. Tile will be used in the bath rooms and kitchens. Plans are complete and figures are being taken for the various parts of the work.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$12,000. Architect, Harris Allen, 2514 Hillegass Ave., Berkeley. Owner, Alice Skyes. The house will be erected in the Northbrae Tract and will contain in the neighborhood of ten rooms, several baths and sleeping porch. Interior finish will be of pine and hardwoods with hardwood floors throughout. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Plans also include a vacuum cleaning system. Exterior of the building will be covered with shingles. Plans are complete and figures are being taken.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, none. Owner, M. C. Bolts, 3116 Central Ave., Oakland. The dwelling will contain six rooms, bath and sleeping porch. Interior finish will be of pine and hardwood with oak floors in the living room, dining room and recep-

tion hall. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath. Tile will be used in the bath room and kitchen. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, F. A. Muller, 663 61st St., Oakland. The dwelling has been designed for a six room house with bath and sleeping porch. Interior finish will be of pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantel will be of brick or tile. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$15,000. Architect, W. H. Ratcliffe, First National Bank Bldg., Berkeley. Owner, T. M. Siernan. The house will be erected at the corner of Dwight Way and Piedmont avenue, and has been designed to contain twelve rooms, three baths and sleeping porch. A garage will be erected on the same lot. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system and open fire places. Mantels will be of tile or brick. Tile will be used in the bathrooms and kitchens. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. A red clay tile roof will be used. Plans are complete and figures are being taken.

RICHMOND, CONTRA COSTA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, J. B. Ogborn, Richmond. Owner, A. C. Kerley. The dwelling will contain seven rooms and bath. Interior will be finished in pine throughout with hardwood floors in the living and dining rooms and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Exterior of the house will be covered with cement plaster on metal lath. Tile will be used in the bath room and kitchen. Plans are complete and figures will be called for shortly.

Contracts Awarded.

San Francisco—Residences, 3, 1½ story and base, frame, \$1,950 each. Architect, none. Owner, Tina Hinkel, 740 Castro St., S. F. Contractors, Hinkel Bros., 740 Castro St., S. F. Contract price, \$1,950 each.

Further information furnished on application to undersigned. R. W. PINGER, Second Lieut., C. A. C., Q. M.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 774—Proposals for Steel Dump Barges—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. May 19, 1913, at which time they will be opened in public for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 774) may be obtained at this office of the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps engineers, U. S. A., general purchasing officer.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 773—Proposals—Annual Estimates for the Period Ending June 30, 1914—Manila Rope, Cotton Waste, Wool Waste, White Lead, Red Lead, Turpentine, Kerosene, and Gasoline.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. May 16, 1913, at which time they will be opened in public for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 773) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps engineers, U. S. A., general purchasing officer.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 771—Proposals for Steel, Iron, Wire Cable, Nails, Nuts, Wrenches, Hack Saw Blades, Tool Handles, Solder, Hose, Packing, Rubber Belting, Asbestos, Gaskets, Manila Rope, Cotton Canvas, Soap, Candles, White Zinc, Red Lead, Chrome Green, Orange Gum, Shellac and Linseed Oil.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. May 2, 1913, at which time they will be opened in

public, for furnishing the above-mentioned articles. Blanks and general information relating to this circular (No. 771) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, general purchasing officer.

PROPOSALS FOR CANAL SUPPLIES.
CANAL CIRCULAR 772—Annual Estimate for the Period Ending June 30, 1914.—Lubricating Oils and Greases as follows: Valve Oil, Air Compressor Oil, Marine Engine Oil, Stationary Engine Oil, Locomotive Engine Oil, Turbine Engine Oil, Gas Engine Oil, Car Oil, Nonfluid Grease, Yellow Cup Grease, Black Gear Grease and Cable Grease.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until **10:30 a. m., May 13, 1913**, at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 772) may be obtained from this office or the offices of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. A., general purchasing officer.

PROPOSALS FOR CONSTRUCTING BUILDING.

TREASURY DEPARTMENT, Office of the Supervising Architect, Washington, D. C., April 17, 1913.—Sealed proposals will be received at this office until **3 o'clock p. m. on the 28th day of May, 1913**, and then opened, for the construction, complete (including plumbing, gas piping, heating apparatus, electric conduit and wiring, and lighting fixtures), of the United States post office and court house at Pocatello, Idaho. The building is three stories and basement, with a ground area of approximately 4,500 square feet; fireproof construction, stone and brick facing, tin roof. Drawings and specifications may be obtained from the custodian of site at Pocatello, Idaho, or at this office, at the discretion of the Supervising Architect. O. WENDE-ROTH, Supervising Architect.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at the Board Room No. 415, Exposition Building, Pine and Battery Streets, San Francisco, California, at **10:30 A. M., Thursday, May 1, 1913**, for Constructing a **Hotel Building** between **Division and Broadway Streets** in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company or cash in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the

contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 207 Service Building, Fillmore and Chestnut Streets, by depositing \$50.00, which amount will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM CROCKER,
Chairman. (*)

NOTICE TO CONTRACTORS.

Office Constructing Quartermaster, Fort Mason, Cal., April 22, 1913. SEALED PROPOSALS, in triplicate, for constructing a **Disinfecting and Sterilizing Building** at **Letterman General Hospital, Presidio of San Francisco, Cal.**, will be received here until **11 A. M., May 6, 1913**, and then opened. Plans, specifications, blank forms and necessary information obtained here. Deposit of \$10.00 required to insure return of plans, etc. Envelopes containing proposals to be endorsed "Proposals for Disinfecting and Sterilizing Building, Letterman General Hospital," and addressed to CAPT. E. S. WALTON, O. M. Corps.

GOOD REASON FOR EDITORIAL JOY.

"Looks like the editor of this paper is having an unusual run of good luck," says a country newspaper. "The new income tax goes clear over our head; the new license tax on automobiles never touched us; the new state license tax on dogs finds us absolutely dogless; and finally, the inheritance tax has been repealed, so if any of our rich friends leave us a wad of money we'll get every bloomin' cent of it."

The United States Constitution provides that the Constitution of the Federal Government and the treaties made thereunder shall be the supreme law of the land. So as far as the State of California is concerned it can pass no law in conflict with the federal constitution or of the treaties made thereunder.

It seems to be natural that such communities as New York and Boston should criticize California as wanting to embroil this country in a war with Japan. Suffering none of the dangers and having none of the responsibilities it is natural that they should assume to dictate to us what we should do. And so the agitation in this state to preserve its lands and its resources to those who will come after, meets with little approval from our friends in the east who know little of the situation and what little they do know is gained in large degree from unreliable sources.

How far the newspaper reports of the situation in Japan is true is hard to determine. In all probability they report the situation correctly. But if the Japanese nation is allowed to demand that her citizens shall be allowed to come into this country while our citizens are not allowed to go into Japan, why it is about time we come to a show down and fought it out.

It would be a good thing if we could sell the Philippines to them and get rid of a white elephant. They are of no good to us and would be of great importance to Japan. Probably some good will come of the discussion. In any event California is the one to be effected either in war or peace and it is up to us to decide the question.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco, Architect, none. Owner, L. Shirar, Chronicle Bldg., S. F. The dwelling will be erected on 23rd avenue, and will contain six rooms, bath and sleeping porch. All interior finish will be of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

APARTMENT HOUSE—3 story and base, frame, \$12,500. San Francisco, Architect, Edward E. Young, 251 Kearny St., S. F. Owner, Hermann Hogrefe, 1941 Hyde St., S. F. The building will cover an area of 22x70 feet, and has been arranged for seven apartments of two and three rooms each with bath. Interior will be finished in pine with some elm veneer. Hardwood floors will be used in the principal rooms. There will be a central heating system and all suites will be supplied with hot and cold running water. There will be wall beds. Exterior of the building will be covered with white cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE ALTERATIONS—Frame construction, \$2,000. Architect, Theo. Lenzen, Humboldt Bank Bldg., S. F. Owner, T. F. Kierman, 1745 Mission St., S. F. This work will include new interior finish, plumbing, plastering, electric work and tile. Interior finish will be of pine throughout. Exterior of the building, which is also to undergo considerable alteration, will be covered with shipping and rustic. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$4,000. San Francisco, Architect, none. Owner, J. Johnson, 488 9th Ave., S. F. The building will contain two modern flats of four and five rooms each with bath. Interior finish will be of pine throughout. Tile will be used in the bath rooms and kitchens. Hardwood floors are specified in the living rooms and dining rooms. There will be open fire places and tile or brick mantels. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

FLATS—2 story and base, frame, \$3,000. San Francisco, Architect, W. G. Hall, 16 Kearny St., S. F. Owner, J. Denning. The building has been designed for five small apartment flats with private baths. Each apartment will contain four rooms. Interior finish will be of pine with some hardwood panels. Hardwood floors will be used in the principal rooms. There will be a central heating system and open fire

places. Mantels will be of tile. Tile will also be used in the bath rooms. There will be wall beds. Exterior of the building will be covered with rustic and brick veneer. Plans are complete and segregated figures are being taken by the architect.

FLATS—2 story and base, frame, \$4,500. San Francisco, Architect, none. Owner, S. B. Hallett, 1359 12th Ave., S. F. The building will contain two flats of five and six rooms, and will be erected on 7th avenue north of Irving street. The interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. Both flats will have an open fire place in the living room with a brick mantel. Tile will be used in the bath rooms and kitchens. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$7,000. San Francisco, Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner, W. J. Wagner. The building will be erected on 2nd avenue, and will be arranged for two large flats and a private garage in the basement. Interior will be finished in pine and hardwood with oak floors in the principal rooms. There will be open fire places and brick mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster and brick veneer. Plans are complete and figures are being taken.

GARAGE—3 story and base, two mezzanine floors, reinforced concrete, \$80,000. San Francisco, Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, E. L. Goldstein & Co. The building will be erected at the corner of Van Ness and Oliver avenues and has been designed for a modern garage and automobile sales rooms. Interior of the front portion of the building will be finished in hardwoods, tile and marble. There will be sales rooms, repair shop and storage space. Construction will be fireproof. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. The structure will cover an area of 109x120 feet. Plans are complete and figures are being taken.

HOTEL—5 story and base, brick and steel, \$10,000. San Francisco, Architect, Henry Shermund, Mills Bldg., S. F. Owners, Mersing Estate. The building, which has been mentioned here before, will be erected at the corner of 5th and Polson streets and will contain stores on the first floor and a large number of hotel rooms on the upper floors. Plans provide for steam heat and elevator service. Interior finish will be of pine with some hardwood in the office and lobby. All rooms will be supplied with hot and cold running water. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOTEL—7 story and base, reinforced concrete, \$70,000. San Francisco, Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner's name withheld. This building will be erected on Taylor street between Golden Gate avenue and

Turk street. The first floor will be arranged for two stores besides the hotel office and lobby. Upper floors will contain a total of 125 rooms, a number of which will have private baths. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Interior finish will be of pine and hardwood with some ornamental plaster. The exterior of the building will be faced with cement plaster. Plans are complete and figures will be taken at once.

HOTEL—7 story and base, concrete and steel, \$70,000. San Francisco, Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owners, Hansen and Johnson. The building will be erected on Turk street west of Larkin, and will cover an area of 52x137½ feet. The first floor will contain stores besides the hotel entrance and lobby. Upper six floors will be subdivided into 100 guest rooms and 68 baths. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot and cold water supply. Some wall beds will be used. Interior will be finished in pine and hardwood. Ornamental plaster will be used in the lobby. Exterior of the building will be faced with cement plaster in imitation of Caen stone. Plans are nearly complete.

HOTEL—4 or 5 story and base, brick and steel. Cost not stated. San Francisco, Architect, Hiram K. Lovell, 1517 Felton St., Berkeley. Owner, Mrs. Barker. Contractor, P. J. Walker Co., Monadnock Bldg., S. F. Contract price not stated.

RESIDENCE, \$2,500. San Francisco, Architect, none. Owner, L. Shirar, Chronicle Bldg., S. F. The dwelling will contain six rooms and bath. Interior finish will be of pine throughout with some oak floors. There will be an open fire place with brick mantel in the living room. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken for the materials. Owner will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$2,000. San Francisco, Architect, none. Owner, P. A. Nelson, 4333 19th St., S. F. The house has been designed for a six-room dwelling with bath. Interior finish will be of pine throughout. Oak floors will be used in the living room, dining room and reception hall. There will be a large open fire place and brick mantel in the living room. An automatic water heater will be installed. Exterior of the house will be covered with brick veneer and cement plaster. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—5 story and base, brick and steel, \$50,000. San Francisco, Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, P. J. Gartland. This building has been mentioned here before when plans were first started. Working drawings are complete and figures will be called for at once. The structure will be erected on Geary street west of Larkin, and will contain 88 rooms and two stores. Suites will consist of two and three rooms each with wall beds and private baths. There will be steam heat, an automatic elevator, vacuum cleaning system and other modern improvements. Interior finish will be of pine and hardwoods. Tile and cement will be used in the bath rooms. Ex-

terior of the building will be faced with pressed brick. Plans are now out for figures.

APARTMENT HOUSE—4 story and base, brick and steel, \$40,000. San Francisco. Architect, John A. Eitler, Atlas Bldg., S. F. Owner, H. E. Bothin. The building will be erected at the northeast corner of Polk and Green streets. First floor will be arranged for stores. Upper floors will be divided into a number of two and three room apartments with wall beds and private baths. Interior finish will be of pine with hardwood veneer and floors. Bath rooms will have tile wainscot. There will be steam heat and elevator service. Exterior of the building will be faced with pressed brick and cement plaster. There will be a hot water supply system. Plans are complete and figures are being taken.

WAREHOUSE—3 story and base, reinforced concrete, \$30,000. San Francisco. Engineer, A. E. Hornlein, Pacific Bldg., S. F. Owners, Warehouse Investment Co. This building has been mentioned here under another architect's name. The structure will cover an area of 120x130 feet, and will be fireproof throughout with cement floors, metal window sash and frames and fireproof doors. No interior trim will be used. There will be elevators and an automatic sprinkler system. Exterior of the building will be faced with cement plaster. Excavating has been completed by Frank Holland and the owners are now putting in the retaining walls and foundation work by Day Labor. An order has been placed for the steel. All other parts of the work will be segregated.

STORES AND LOFTS—2 story and base, brick. Cost not stated. San Francisco. Architect, Maxwell G. Bugbee, Lick Bldg., S. F. Owners, J. C. Jordan Estate. The building will be erected on Oregon street east of Davis and will have a street frontage of 25 feet and a depth of 68 feet. There will be one store on the first floor and a large light loft on the upper floor. Interior will be finished in pine. There will be patent store fronts and metal window sash and frames. Exterior of the building will be faced with red brick. Plans are complete and figures are being taken by the architect.

FIRE HOUSES—3, 1 story and base, frame, \$31,143. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids opened for the construction of three fire houses show H. Chase low at \$31,143. He will probably be awarded the contract. A complete list of the figures appears under San Francisco in this issue. Bids have also been opened for the pile foundation for the Fine Arts Building and may be found under the same heading.

Contracts Awarded.

RESIDENCES—3, 1½ story and base, frame, \$1,950 each. San Francisco. Architect, none. Owner, Tina Hinkel, 740 Castro St., S. F. Contractors, Hinkel Bros., 740 Castro St., S. F. Contract price, \$1,950 each.

BUILDERS' BOND.

April 25, 1913—NE TENTH 64-6 SW Stevenson SE 65-6 NE 230 NW 130 to SE Stevenson — 100 SW 64-6 NW 130. F Thomas Parisian Dyeing & Cleaning Works with S Saari contractor. Sureties, S. Steinberg and David Strauss. Bond, \$1634

Pile Foundation For Fine Arts Building.

Exposition Company Award Contract For Pile Foundation to Contra Costa Construction Co.

Bids were opened by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company on Thursday, April 24th, for the pile foundation for the Fine Arts Building. Bids were submitted on a unit price per lineal foot. The following is a list of the figures.

Pile Foundation Fine Arts Building.
Mercer-Fraser Co., \$28½.
Contra Costa Constr. Co., \$24 8-10.
J. Monk, \$31.
Pacific Constr. Co., \$26 9-10.
Hyde-Hodges Co., \$31 9-10.
Central California Constr. Co., \$26.
Healy-Thibbitts Constr. Co., \$26 3-10.
The contract was awarded to the Contra Costa Construction Company.

Rapid Construction By Modern Methods.

American Can Company's New Building Completed in Record Breaking Time By Clinton Fireproofing Co.

The modern three-story and basement reinforced concrete factory building, which is nearing completion on the property of the American Can Co., furnishes an excellent example of the rapidity of construction made possible by present day methods.

The structure covers a large area on the block bounded by Harrison, 19th streets and Treat avenue, and was designed by Architect N. W. Looney of New York. The Turner flat slab, beamless and girderless system of concrete construction was used. When complete the structure will cost over \$100,000, and will be completed in less than three and a half months. A general contract was awarded on January 4th to the Clinton Fireproofing Co., and their work is now completed.

Concrete for the building was poured at the rate of 200 cubic yards per day. The forms alone required over one-half million feet of lumber and a half million pounds of reinforcing steel was used.

Francis Joseph Norton, the well known building superintendent and estimator, with William Hopper Jr., represented the American Can Co. F. D. Scott represented the Clinton Fireproofing Company.

Fire House Construction Attracts Many Bidders.

Fifteen Sets of Bids Opened By The Panama-Pacific Exposition Co. For Three Fire Houses.

Bids were opened by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company on Tuesday for the construction of three frame fire houses to be erect-

ed on the Exposition Grounds at Harbor View.

There were fifteen bidders who submitted offers to construct the buildings, either furnishing the lumber or without furnishing the lumber.

Following is a list of bidders on both propositions. First, the contractor to furnish the lumber, and second, the Exposition to furnish the lumber:

M. M. Finlayson (1) \$63,213; (2) \$46,761.
M. Sheehy Bros., (1) \$49,116; (2) \$41,196.
Connary-Peterson Co., Inc., (1) \$54,900; (2) \$39,900.
Newson, Wold & Kohn Co., (1) \$54,495; (2) \$44,154.
H. Chase, (1) \$37,573; (2) \$31,143.
Fred P. Fischer, (1) \$48,727; (2) \$38,571.
Chas. M. Lindsay, (1) \$62,871; (2) \$55,022.
L. L. Bergen & Son, (1) \$57,457; (2) \$49,200.
O. C. Holt, (1) \$55,540; (2) \$47,147.
J. Winderling, (1) \$51,250; (2) \$44,005.
J. Monk, (1) \$47,500; (2) \$40,000.
Howard S. Williams, (1) \$50,950; (2) \$39,473.

Peter N. Schmidt (1) \$56,500; (2) \$50,500.
Jas. Furlong, (1) \$54,700; (2) \$44,700.
Lange & Bergstrom, (1) \$52,886 (2) —

Constructing Quartermaster Awards Contracts.

Several Contracts Let For Oil Burning Equipment, Roads and Grading at Local Army Post.

The following contracts have recently been awarded by the Constructing Quartermaster, Captain Walton, officer in charge at Fort Mason. The work includes furnishing and installing oil burning equipment, pipe lines and oil tank at several army posts, grading of the parade ground at Fort Winfield Scott and constructing walks and roads at the Letterman General Hospital. Awards were made as follows:

Installation for oil burners at Presidio and Fort Winfield Scott to American Heat and Power Co., at \$20,100; installation of oil burners at Fort Baker to S. T. Johnson Co., at \$6,580; pipe line for oil at Fort Baker to Fringie, Dunn & Co., at \$1,235; concrete reservoir for oil at Fort Baker to Contra Costa Construction Co., at \$850; oil burners in commanding general's quarters at Fort Mason to American Heat and Power Co., at \$590; grading parade ground at Fort Winfield Scott to E. M. Hughie & Co., at \$6,086; construction of roads, walks and gutters at Letterman General Hospital to Francis Zoke at \$4,575.

City Bids Opened.

Three of the Eight Bids Submitted For Razing of Burnett Building Declared Void by Board.

Bids were opened at Wednesday's session of the Board of Public Works for razing the Burnett Building, located on Market street between Jones and Marshall Square. Eight bids were submitted for the work, three of which were void. In all three cases the check accompanying the bid was made out in the wrong manner, one check being

drawn to the order of the bidder and the other two to the Board of Public Works. Two bids were also received for the lubricating oil house for the Geary Street Municipal Railroad. A complete list of these figures follows:

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base, frame, \$3,800. Berkeley, Alameda Co., Cal. Architect, none. Owner, Marshall Diggs, 2444 Bowditch St., Berkeley. The dwelling has been designed for an eight-room house with all modern conveniences. There will be furnace heat and open fire places. Interior will be finished in pine with hardwood floors in the principal rooms. Mantels will be of brick. Tile will be used in the bath room and kitchen. Besides the eight rooms there will also be a sleeping porch. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by the Day.

RESIDENCES—2, 2 story and base, frame, \$3,500 each. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, Mr. Ochltree. These houses will be erected at the corner of Bonita and Vine streets, and each will contain seven rooms and bath. Interiors will be finished in pine with some hardwood veneer. There will be hardwood floors in the dining rooms, living rooms and reception halls. Furnace heat and open fire places will be installed. Mantels will be of brick and tile. An

automatic water heater is specified in one of the houses. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE — 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, E. L. Brock. The house has been designed for an eight-room dwelling with two baths and sleeping porch. Interior will be finished in pine and hardwoods. Hardwood floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile. Tile will be used in the bath rooms and kitchens. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE — 2 story and base, frame, \$3,000. Piedmont, Alameda Co., Cal. Architect, none. Owner, United Home Builders, 1762 Broadway, Oakland. The house will contain seven rooms, bath and sleeping porch. Interior will be finished in pine with hardwood floors in the principal rooms. There will be a hot air furnace and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster. Plans are complete and in the hands of the owners who are now purchasing all materials. Work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$6,000. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, C. E. Quigley. The dwelling will be erected at the corner of College and Rand avenues, and will contain eight rooms, sleeping porch and bath. Interior will be finished in pine and hardwood with hardwood floors in the living room, dining room reception hall and den. There will be furnace heat and open fire places. A large brick mantel will be one of the features of the house. Tile will be used in the bath rooms and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$20,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Mrs. E. J. Culver Bell. This dwelling was mentioned in last week's issue, at which time plans were nearly complete. Working drawings have been completed and bids are now being taken for the work. The house will be erected in the Claremont Tract, and will contain 12 or 14 rooms, baths and sleeping porch. Interior will be finished in pine and hardwoods. There will be a central heating system and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. An automatic water heater will be installed. A garage will be erected on the rear of the lot. Exterior of the house will be covered with cement plaster on metal lath.

RESIDENCE — 2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owners, Jones and McGovern, 2218 Los Angeles Ave., Berkeley. The house will contain seven rooms and bath. All interior finish will be of pine. Hardwood floors will be used

BUILDING AND INDUSTRIAL NEWS

in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Owners are now purchasing all materials.

RESIDENCE — 2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Mrs. A. G. Sanderson. The house will contain eight rooms, bath and sleeping porch. Interior will be finished in pine and hardwood with hardwood floors in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath room will be wainscoted with tile. Tile will also be used in the kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. The work will be carried out by Sullivan Bros., 6456 Harmon Court, Oakland.

RESIDENCE — 2 story and base, frame, \$25,000. Piedmont, Alameda Co., Cal. Architect, Louis M. Upton, Mutual Savings Bank Bldg., S. F. Owner, George D. Greenwood. The house will contain ten or twelve rooms, several baths, sleeping porch and laundry. Interior will be finished in pine and hardwood. Hardwood floors will be used in all principal rooms. There will be furnace heat, open fire places, an automatic water heater and vacuum cleaning system. Mantels will be of marble and tile. A garage will be erected on the rear of the lot. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

APARTMENT HOUSE — 3 story and base, frame, \$10,000. Oakland, Cal. Architect, none. Owner, Edward Olsen, 29 Westall Ave., Oakland. The building will be erected at the southeast corner of 16th and Adeline streets and has been designed to contain 18 apartments of two, three and four rooms each. Interior finish will be of pine throughout. Some hardwood floors will be used. Each apartment will have a water heater, private bath and wall beds. Tile will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

AUDITORIUM — 3 story, Class A construction, \$500,000. Oakland, Cal. Architects, J. J. Donovan, Security Bank Bldg., Oakland, associated with Palmer & Hornbostel, New York. An unusual condition developed at the opening of bids for the structural steel for the Oakland Auditorium when they were opened at Thursday's meeting of the Board of Supervisors. All bids received previously were in excess of the amount available and plans have been revised. Bids received yesterday on both the entire work and on unit prices were \$26,000 higher than the first bids. One member of the Board of Supervisors made a motion that all bids be rejected, but failed to get a second. Figures have been referred to the City Attorney and Commissioner of Public Works. Only two bids were received, one from the Pacific Rolling

Mills for \$293,959, and one from the Judson Iron Works for \$222,082. The unit prices were as follows: Straight beams with or without connections, Judson Iron Works, .05; Pacific Rolling Mills, .041; Plate girders, Judson Iron Works, .057; Pacific Rolling Mills, .047; trusses or built-up lumber, Judson Iron Works, .055; Pacific Rolling Mills, .055; rods, Judson Iron Works, .08; Pacific Rolling Mills, .073; bent work, Judson Iron Works, .084; Pacific Rolling Mills, .078.

RESIDENCE — 2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, I. W. Button, 5330 Telegraph Ave., Oakland. The dwelling has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwoods with hardwood floors in the principal rooms. Bath room will have tile wainscot. There will be furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

RESIDENCES — 4, 2 story and base, frame, \$2,500 each. Oakland, Cal. Architect, W. H. Judson, Albany Bldg., Oakland. Owners, Morse Hargrave Co. These houses will be erected on Seminary avenue and each will contain six rooms and bath. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be open fire places and brick or tile mantels. Exterior of the house will be covered with cement plaster and shingles. Tile will be used in the bath rooms and kitchens. Plans are complete and figures are being taken for the various parts of the work.

APARTMENT HOUSE — 3 story and base, frame, \$10,000. Oakland, Cal. Architect, none. Owner, Edward Olsen, 29 Westall Ave., Oakland. The building will occupy a corner site and has been designed to contain 18 rooms which will be arranged in two-room suites with baths. Interior finish will be of pine throughout. There will be wall beds, private baths and some hardwood floors. Plans provide for a central heating system and hot water supply. Bath rooms will be finished in tile. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the owner will do the work by Day Labor. He is now in the market for all materials.

APARTMENT HOUSE — 3 story and base, frame. Cost not stated. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner, J. Spellman. This building has been mentioned here before when plans were first started. The building will be erected at the corner of 25th and Telegraph avenue and has been designed to contain a number of two and three room suites. Interior finish will be of pine and hardwood veneer. Hardwood floors will be used in the principal rooms. A central heating system and hot water supply will be installed. Bath rooms will be finished in tile. The exterior of the building will be covered with rustic. Plans are complete and the architect is now taking figures on the work.

RESIDENCE — 2 story and base, frame, \$12,000. Berkeley, Alameda Co., Cal. Architect, Harris Allen, 2514

Hillegass Ave., Berkeley. Owner, Alice Skyes. The house will be erected in the Northbrae Tract, and will contain in the neighborhood of ten rooms, several baths and sleeping porch. Interior finish will be of pine and hardwoods with hardwood floors throughout. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Plans also include a vacuum cleaning system. Exterior of the building will be covered with shingles. Plans are complete and figures are being taken.

BUNGALOW — 1 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, M. C. Bolts, 3116 Central Ave., Oakland. The dwelling will contain six rooms, bath and sleeping porch. Interior finish will be of pine and hardwood with oak floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath. Tile will be used in the bath room and kitchen. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, F. A. Muller, 663 61st St., Oakland. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and an open fire place. Mantel will be of brick or tile. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$15,000. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliffe, First National Bank Bldg., Berkeley. Owner, T. M. Sherman. The house will be erected at the corner of Dwight Way and Piedmont avenue, and has been designed to contain twelve rooms, three baths and sleeping porch. A garage will be erected on the same lot. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system and open fire places. Mantels will be of tile or brick. Tile will be used in the bath rooms and kitchens. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. A red clay tile roof will be used. Plans are complete and figures are being taken.

TRESTLE CONSTRUCTION — Cost not stated. Oakland, Cal. Engineers, Engineering Department San Francisco, Oakland and San Jose R. R. Co., Oakland. Owners, San Francisco, Oakland and San Jose Railroad. Plans have been completed for extensive work which is to be carried out in the development of the company's system. Bids will be opened on May 15th. The following work is included: 15,000 linear feet temporary railway trestle, 14,700 linear feet sheetpile bulkhead, 165,000 cubic yards rock excavating, 20,000 cubic yards earth excavating, 1,250,000 cubic yards hydraulic dredg-

ing. Alternative plan: 10,000 cubic yards preparatory dredging, 15,600 linear feet of seawall containing about 365,000 cubic yards of rock and 1,250,000 cubic yards hydraulic dredging.

SCHOOL—2 story and base. Class A construction, \$160,000. Oakland, Cal. Architect, John J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Plans for the construction of the Durant School have been approved by the Board of Education and bids will be called for at once. The building will be erected on West street, between 28th and 29th streets. There will be 18 class rooms, assembly hall and other usual rooms. Construction will be of the Class A type throughout. Exterior will be faced with pressed brick. Interior finish will be of metal and hardwoods. Plans provide for steam heat and a modern system of ventilation.

Contracts Awarded.

SCHOOL—2 and 3 story and base, reinforced concrete, \$397,037. Oakland, Cal. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Contractors, Williams Bros. & Henderson, Holbrook Bldg., S. F. Contract price, \$397,037. A complete list of all figures submitted for this work appears under the heading of Oakland and Alameda County in this issue.

OFFICES—10 story and base. Class A construction, \$150,000. Oakland, Cal. Architects, Reed & Meyer, Oakland Bank of Savings, Oakland. Owner, Lucy Thompson. Contractors, P. J. Walker Co., Monadnock Bldg., S. F. Contract price not given. Note: It is understood that this contract has been taken on a percentage basis and that the building complete will cost about \$150,000.

Commercial High School Bids Opened.

Oakland Board of Education Will Probably Award Contract to Williams Bros. & Henderson.

Bids for the construction of the Commercial High School, which is to be erected on Broadway, between 41st and 45th streets in Oakland, were opened at last evening's session of the Oakland Board of Education. Figures were submitted with the following alternatives (1) oak trim in place of pine in the principal's offices (2) oak trim instead of pine in the assembly hall and stairways; (3) slack varnish instead of rubber; (4 and 5) hardwall plaster instead of Keene cement; (6) omitting west wing; (7) Niles gravel in lead of crushed rock and (8) double hung windows instead of patent. On the general construction, without consideration of the alternatives, which up to a late hour had not been compiled, Williams Bros. & Henderson had submitted the lowest figures at \$418,000. No award of contract has been made. Following is a complete list of all figures submitted:

General Construction.

Williams Bros. & Henderson, \$418,000; (1) add \$2000; (2) add \$1400; (3) deduct \$900; (4 and 5) deduct \$500; (6) deduct \$20,800; (7) deduct \$360; (8) deduct \$1056.
Newsom-Wold & Kohn, \$427,125; (1) add \$3300; (2) add \$1500; (3) deduct

\$600 (4 and 5) deduct \$200; (6) deduct \$36,555; (7) —; (8) deduct \$3000.
Lewis A. Hicks & Co., \$436,500; (1) add \$2400; (2) add \$700; (3) deduct \$600 (4 and 5) deduct \$500; (6) deduct \$40,000; (7) deduct \$500; (8) deduct \$1000.
Christenson Bros., \$425,222; (1) add \$2800; (2) add \$900; (3) deduct \$350; (4 and 5) deduct \$ —; (6) deduct \$30,866; (7) —; (8) —.

Van Sant-Houghton Co., \$462,841; (1) add \$4060; (2) add \$2123; (3) deduct \$650; (4 and 5) deduct \$200; (6) deduct \$31,700; (7) —; (8) —.
McLeran & Peterson, \$450,000 (1) add \$2000; (2) add \$1500; (3) deduct \$600; (4 and 5) deduct \$1200; (6) deduct \$27,000; (7) deduct \$2000; (8) deduct \$100.

Thurston & Co., \$439,500; (1) add \$2640; (2) add \$760; (3) deduct \$600; (4 and 5) deduct \$200; (6) deduct \$41,000; (7) —; (8) deduct \$2500.

Continental Fireproofing Co., \$444,500 (1) add \$4060; (2) add \$2070; (3) deduct \$605; (4 and 5) deduct \$ —; (6) deduct \$36,348; (7) deduct \$1000; (8) add \$530.

Auditorium Steel Bids Are Unusual.

Structural Steel Bids on Revised Plans Exceed First Proposals by Over Twenty-Six Thousand.

An unusual condition developed at the opening of bids for the structural steel for the Oakland Auditorium, when they were opened at Thursday's meeting of the Board of Supervisors. All bids received previously were in excess of the amount available and plans have been revised. Bids received yesterday on both the entire work and on unit prices were \$26,000 higher than the first bids. One member of the Board of Supervisors made a motion that all bids be rejected, but failed to get a second. Figures have been referred to the City Attorney and Commissioner of Public Works. Only two bids were received, one from the Pacific Rolling Mills for \$203,959, and one from the Judson Iron Works for \$222,082.

LOS ANGELES AND SOUTH-CALIFORNIA.

GARAGE—2 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, Charles E. Anthony. The building will cover an area of 50x156 feet, and will be arranged for sales rooms and garage. The entire building has been leased to the Packard Co. Interior of the offices and sales rooms will be finished in hardwoods, tile and marble. There will be cement floors, window sash and frames and special

gasoline storage tanks. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

FENCE CONSTRUCTION—Woven wire. Cost not stated. Fort Baker, Marin Co., Cal. Engineer, Quartermaster Dept., Fort Baker. Owners, United States Government. Bids will be opened at Fort Baker by Lieut. R. W. Pingler on May 12th for the construction of 8,000 feet of five-strand woven wire fence. Plans and specifications can be obtained from the Quartermaster's office at Fort Baker.

LIBRARY—1 story and base. Class A construction, \$30,000. Pasadena, Los Angeles Co., Cal. Architects, Train & Williams, Exchange Bldg., L. A., associated with P. M. Ashley, Pasadena. Owners, City of Pasadena. The building will cover an area of 63x65 feet and has been designed in the classic style. Construction will be of the Class A type throughout with exterior walls faced with cement plaster in imitation stone and pressed brick. Interior will be finished in oak and other hardwoods. A tile floor will be used. Steam heat and a vacuum cleaning system are specified. Plans are complete and figures will be opened on May 1st. Plans may be obtained from Train & Williams. A general contract, including everything except furniture and light fixtures, will be let.

RESIDENCE—2 story and base. **APARTMENT HOUSE**—3 story and base, frame, \$45,000. Los Angeles, Cal. Architect, Maine Building and Investment Co., Thorpe Bldg., L. A. Owner, W. W. Middlecoff. The building will contain 70 rooms, which are to be arranged in two and three room suites with private baths. Interior finish will be of pine and hardwood with hardwood floors. There will be steam heat and elevator service. A vacuum cleaning system and hot water plant will also be installed. Bath rooms will be finished in tile and cement plaster. The exterior of the building will be faced with pressed brick. All suites will have wall beds. The work will probably be carried out by the Maine Building Co.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Long Beach, Los Angeles Co., Cal. Architect, A. W. Rice, California Bldg., L. A. Owner, M. E. Perry. The building will cover an area of 35x105 feet, and will contain 42 rooms arranged in two and three room suites with baths. The interior will be finished in pine throughout with hardwood floors in the principal rooms. There will be furnace heat and a hot water system. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Garrett & Farrell, Currier Bldg., L. A. Owner, Frank Eckley. The building will be erected on an inside lot and will have a frontage of 50 feet by a depth of 124 feet. Interior has been arranged for 57 apartments of two and three rooms each. Pine and hardwoods will be used for interior finish. There will be steam heat and elevator service, a hot water system and vacuum cleaning. All suites will be equipped with wall beds. The exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—3 story and

base, brick. Cost not stated. Long Beach, Los Angeles Co., Cal. Architects, Metcalf & Davies, 43 American Ave., Long Beach. Owner, Mrs. Lucia Boyd. The building will cover an area of 66x90 feet and will contain 70 rooms arranged in two and three room apartments. All suites will have wall beds and private baths. Interior finish will be of pine and hardwood. Bath rooms will be finished in tile and cement plaster. There will be steam heat and elevator service. A vacuum cleaning system will be installed. Exterior of the building will be faced with glazed brick. Plans are now being prepared for the work.

APARTMENT HOUSE—1 story and base. Cost not stated. Los Angeles, Cal. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. Owners, William M. McCartney Co. The building will be erected at the corner of Orange and Figueroa streets and will cover an area of 75x197 feet. Plans provide for a total of 138 rooms, which are to be arranged in two and three room suites with private baths. There will be steam heat, hot and cold water supply and vacuum cleaning system. All suites will be equipped with wall beds. Interior will be finished in pine and hardwoods. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

CITY HALL—2 story and base, reinforced concrete, \$260,000. Long Beach, Los Angeles Co., Cal. Architect, City Engineer E. P. Dewey, Long Beach. Owners, City of Long Beach. Preliminary sketches have been prepared for a building housing all city departments including the police and fire departments. The plan suggests a structure covering an area of 100x300 feet. Bonds are to be voted on in the near future.

CITY HALL—2 story and base. Class A construction, \$35,000. Alhambra, Los Angeles Co., Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, City of Alhambra. This work has been mentioned here before when plans were first out for figures. All bids were rejected and plans revised. New bids are now being called for and will be opened on May 3rd. Plans and specifications can be secured from the architects or from the City Clerk.

HOTEL—12 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect Frederick Noonan, Wright and Callender Bldg., L. A. Owner, N. W. Stowell. The building will be erected on Spring street just south of Fourth. There will be one store and a cafe on the first floor besides a large office, lobby and parlors. Upper floors have been arranged for a total of 275 guest rooms and 264 baths. Interior partitions will be of hollow tile and metal lath and plaster. Plans provide for three elevators, steam heat, vacuum cleaning system and circulating ice system. The exterior of the building will be faced with glazed brick and terra cotta. Working drawings are being prepared.

LIBRARY—1 story and base, brick, \$10,000. Huntington Beach, Los Angeles Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Town of Huntington Beach. The architects have just been commissioned to prepare plans for this building. There will be two public reading rooms, librarian's office and stack room. Inter-

rior will be finished in pine and hardwoods. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans are being prepared.

CAR BARN—1 story, reinforced concrete. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Architect, H. Albion Reeves, Chamber of Commerce Bldg., L. A. Owners, Santa Barbara and Suburban Railway Co. The building will cover an area of 80x120 feet. There will be concrete floors and repair pits, steel roof trusses and metal window sash and frames. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Contracts Awarded.

HOTEL—12 story and base. Class A construction, \$360,000. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bank Bldg., L. A. Owners, Hart Bros. Contractors, F. O. Engstrom & Co., 5th and Seaton Sts., L. A. general construction only. Contract price not stated.

APARTMENT HOUSE—4 story and base, brick, \$50,000. Los Angeles, Cal. Architect, Frank M. Tyler, Hibernian Bldg., L. A. Owner, G. Rupert Johnson. Contractors, Hubbard & Gardner, Douglas Bldg., L. A. Note: The general contract only has been awarded and the work has been taken on a percentage basis.

APARTMENT HOUSE—3 story and base. Class C. Cost not stated. Los Angeles, Cal. Architects, Kysor & Higgar, Wright and Callender Bldg., L. A. Owner, J. R. Lane. Contractors, Nance & Phelps, Ferguson Bldg., L. A. Contract price not stated.

BRIDGE CONSTRUCTION—Concrete and steel. Cost not stated. San Diego, Cal. Engineer, City Engineer, San Diego. Owners, City of San Diego. The following bids were received by the city council for the construction of the old Town bridge, Woolman avenue bridge, Main street bridge, and Escondido ford: For the entire work, Chas. Steffen, \$35,900; Engineering Contracting & Construction Co., \$37,400; C. L. Hyde Construction Co., \$39,600; John Campbell, \$50,000. Separate bids were as follows: Woolman and Main street bridges, Munoz & Munoz, \$12,147; Holland Construction Co., \$12,783; Mercereau Bridge and Construction Co., \$14,880; H. D. Trounce, \$12,647, including ford; S. M. Kerns bid \$22,650 for the Old Town, and \$7,000 for the Main street bridge; J. R. McKnight, \$22,272 Old Town, \$7,288 Woolman avenue; Worcester Construction Co., \$21,600 Old Town; Robert Peyre, \$2,790 Woolman avenue; R. O. Coggeshall, \$5,910 Main street bridge and ford; S. M. Kerns, \$6,230 Woolman avenue.

HOTEL—1 story and base, reinforced concrete, \$125,000. San Diego, Cal. Architect, W. S. Keller, San Diego. Owners, Rice-Landswick Co. Contractor, T. M. Russell, 30th and Redwood streets, San Diego. Contract price, \$125,000.

PORTLAND AND OREGON.

APARTMENT HOUSE—3 story and base, brick, \$35,000. Eugene, Ore. Architect, J. R. Ford, Eugene. Owners, Bartel-Sweeney. The building will contain 23 apartments of two and three rooms. All suites will have wall beds and private bath rooms. There will be steam heat and a vacuum cleaning system. Interior will be finished in

pine throughout. Some oak floors will be used. The exterior of the building will be faced with pressed brick. Plans are being prepared.

HOSPITAL—2 story and base, brick, \$25,000. Astoria, Ore. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owners, Town of Astoria. The building will be built in the shape of a letter T with a main portion 40x75 feet and wing in the rear 40x10 feet. The main floor will contain a laundry, kitchen, dining and storage rooms. Upper floors will contain three large dormitories, wards, solarium, operating rooms and private rooms. There will be steam heat and a vacuum cleaning system. Interior finish will be of tile and pine. Modern equipment will be used throughout. Exterior of the building will be faced with pressed brick. Plans are being prepared.

OFFICES—2 story and base, brick and steel. Cost not stated. Portland, Ore. Architects, Whitehouse & Foulhoux, Wilcox Bldg., Portland. Owners, Balfour-Guthrie Co. The building will be designed in the classic style and will be devoted entirely to the business of the owners. Interior will be handsomely finished after the style of banking houses. A large amount of marble, tile and ornamental iron and bronze will be used. Plans include fireproof vaults. Exterior of the building will be faced with granite. The structure covers an area of 50x80 feet. Plans are being prepared.

CHURCH—2 story and base, brick and concrete, \$35,000. Portland, Ore. Architects, Johnson & Moyer, Commercial Club Bldg., Portland. Owners, Piedmont Presbyterian Church. The building will be erected at the corner of Jarrett and Cleveland streets and will contain a large auditorium, Sunday school rooms, pastor's study, social hall and kitchen. There will be a central heating system. Interior finish will be of pine and ornamental plaster. The exterior of the building will be faced with pressed brick. Plans are complete and figures are to be taken at once.

Contracts Awarded.

CITY HALL—2 story and base, brick and steel, \$20,000. Newberg, Ore. Architect, E. E. McClaran, Lumber Exchange Bldg., Portland. Owners, Town of Newberg. Contractor, G. E. Howland. Contract price, \$14,125. Note: This contract calls for the general construction only.

SEATTLE AND WASHINGTON.

RESIDENCE—2 story and base, tile and concrete, \$100,000. Vancouver, B. C. Architects, Cutter & Malmgren, Paulsen Bldg., Vancouver. Owner, C. D. Stimson, White Bldg., Vancouver. The dwelling will contain eleven sleeping rooms, ball room, gymnasium, billiard room, sun room and eight baths. Plans also provide for seven sleeping porches. Interior finish will be of pine and hardwoods and hardwood floors will be used throughout. A central heating system, probably steam, will be installed. There will be a number of open fire places with tile and marble mantels. A tile room is specified. All bath rooms will be finished in marble and tile. Exterior of the dwelling will be covered with terra cotta. Plans are being prepared.

AND ALTERATIONS—Reinforced concrete, \$100,000. Seattle, Wash. Architect, none. Owner, H. S. Amen. Contractors, MacRae Bros., Empire Bldg., Seattle. Contract price, \$100,000. The work consists of the addition of a two-story 60x130 feet reinforced concrete building under the present building, and changing the partitions, stairways, plumbing, heating, electric wiring, etc., in the existing structure. Specifications include either brick or stone facing on the addition, tile, glass, plaster, tinting, etc.

POST OFFICE—3 story and base, brick, stone and steel. Cost not stated. Pocatello, Idaho. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans have been completed and approved for a three-story fireproof structure covering a ground area of approximately 4,500 square feet. Interior will be finished in pine and hardwoods, with tile and marble wainscoting. There will be steam heat. Interior partitions will be of hollow tile. Floors will be of concrete. Plans provide for metal window sash and frames and fireproof doors. A general contract will be let which includes the plumbing, heating electric work and lighting fixtures. Exterior of the building will be faced with cut stone, pressed brick and granite. Roof will be of tin. Bids are now being taken and will be opened on May 28th. Plans can be secured from either the Supervising Architect at Washington or from the custodian of the site at Pocatello. The official proposal appears in this issue.

COURT HOUSE—3 story and base, Class A construction, \$950,000. Seattle, Wash. Architect, A. Warren Gould, Seattle. Owners, City of Seattle. This work has been mentioned here a number of times before. Working drawings are complete and figures will be opened on May 14th. Plans can be secured from the architect. Construction will be of reinforced concrete and steel. No bid in excess of \$950,000 will receive consideration.

Contracts Awarded.

SCHOOL—3 story and base, brick and steel, \$80,359. Hoquiam, Wash. Architects, Stephen & Stephen, New York Block, Seattle. Owners, Hoquiam High School District. Contractors, Dillefsen & Gehring, Epler Bldg., Seattle. Contract price, \$80,359.

HOTEL—4 story and base, reinforced concrete, \$75,000. Seattle, Wash. Architect, W. E. Dwyer, New York Bldg., Seattle. Owner, J. P. Jones, Contractor, C. F. Martin, New York Bldg. Contract price, \$75,000.

FOREIGN TRADE OPPORTUNITIES.

[Inquiries in which addresses are omitted are on file at Bureau of Foreign and Domestic Commerce, Washington, D. C. In applying for addresses refer to file number.]

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 10719. Furniture and draperies.—An American consular officer reports that a resident of his district, who is at present connected with a prominent furniture firm, desires to secure agencies from firms in the United States for house furniture, office pur-

niture, and draperies. Should satisfactory arrangements be made the inquirer intends opening an office for conducting this line of business. References are furnished.

No. 10751. Brick-making machinery.—A foreign coal company, through its managing director, has informed an American consulate that it has in its mines above the coal a hard shale which is well adapted to the making of high-grade bricks, and that the company is in the market to purchase a plant for the manufacture of bricks. The company will manufacture both fire and pressed brick, and will install a plant having a capacity of 20,000 bricks per day. In addressing the company all communications should be sent to the managing director, and should give particulars as to terms, discounts, etc. Prices should be given f. o. b. and delivered. Correspondence should be in English.

No. 10752. Street-sprinkling equipment.—An American consul reports that the local press of the city in which he is stationed has lately called attention to the faulty way in which the streets are watered. The present process, connecting a hose to stand pipes or streets mains, is slow and inefficient in that a uniform distribution of water is not obtainable. References have been made to the advantages of acquiring modern improved street sprinklers for municipal use, and it is thought that manufacturers of this line might do well to get in communication with municipal and sanitary officers named in the report and endeavor to secure orders for equipment of American manufacture. Catalogues of American street-sprinkling equipment are also desired for the files of the American consulate forwarding the report.

No. 10770. Persimmon wood, cornel wood, and hickory.—An American consular officer in the United Kingdom reports that a business firm in that country desires to be put in touch with American exporters of persimmon wood, cornel wood, and hickory, the last named to be cut to exact sizes. The inquirers are a well established concern, and at present handle large quantities of different timber, imported from the United States. The region in which this firm conducts its business is an important center for the sale of the above-named woods, and American shippers have in this inquiry an excellent opportunity to get into touch with one of the leading timber importing firms.

No. 10774. Machinery, hardware, furniture, oils, etc.—A report from an American consular officer states that a foreign business house, with branches in Africa, has requested his assistance in being placed in communication with manufacturers and exporters of products for which there is a market in African cities. This house is especially interested in agricultural machinery, hardware, wire fencing and netting, office furniture, mineral and vegetable oils, etc. Communication from exporters of these products, written in French if possible, and addressed to a director of this organization, would receive attention and might lead to the establishment of an export trade to a country of great natural resources, and which is now at the beginning of important development.

No. 10775. Automobile sundries.—The Bureau of Foreign and Domestic Commerce is in receipt of a communication from an American manufacturing automobiles, stating that its German representative has made known his desire to get in touch with manufacturers of automobile sundries who may desire representation in Europe. The American firm writes that this representative has disposed of a number of cars for it.

No. 10776. Tile-manufacturing machinery.—A tile manufacturer in the Far East has informed an American consular officer that he would like to receive catalogues and price lists of tile-making machinery from American firms.

No. 10778. Hardware and piece goods.—A report from an American consul states that a foreign firm desires to be put in touch with American manufacturers of hardware and piece goods, who desire to cater for the markets of British India. This firm is said to conduct a good export business in India in such goods, and also has an important business in rough tanned goat sheep skins and cow and buffalo hides.

No. 10763. Steel furniture.—The American consulate general at Cape Town, South Africa, has forwarded a copy of the notice calling for tenders for the supply, delivery, and fixing in position, where necessary, certain steel furniture for Union buildings, Pretoria. In connection with tender, which is due at or before noon of June 25, 1913, tender forms, plans, specifications, etc., may be obtained at the office of the High Commissioner for the Union of

South Africa, 32 Victoria Street, Westminster, London, England.

No. 10764. Furniture.—An American consul reports that a letter has been received from a local firm of furniture importers expressing a desire to hear from American manufacturers of furniture, consisting of bedroom and dining-room chairs, consisting of two carvers or arm chairs, six to eight small chairs, with and without couch, in various woods, unvarnished and upholstered, but in a knock-down state with slip in seats, pin-cushion style. Correspondence is also desired from a manufacturer of bas relief seats and backs, 3-ply seats and 4-ply backs. This company desires to receive catalogues prices, and terms with full trade discounts and cash discount f. o. b. American port, with measurements and particulars of packing.

UNITED STATES CIVIL-SERVICE
EXAMINATION.

LOGGING ENGINEER (MALE).

May 19, 1913.

The United States Civil Service Commission announces an open competitive examination for logging engineer, for men only. From the register of eligibles resulting from this examination certification will be made to fill vacancies in this position in the Forest Service, Department of Agriculture, at salaries ranging from \$2400 to \$3000 a year, and vacancies as they may occur in positions requiring similar qualifications, unless it is found to be in the interest of the service to fill any

Frank Neidick
Carpenter and Builder
Phone Mission 5126

2669A Howard St., Bet. 22nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

vacancy by reinstatement, transfer, or promotion.

The duties of this position will be:

1. Planning the most effective logging development of large national forest areas.
2. Determining methods and cost of logging and manufacturing national forest timber, and the market value of the products.
3. Appraising the value of stumpage for sale.
4. Inspecting and supervising the administration of timber sales.

These positions require men of broad executive capacity and initiative, and who have an established standing in regard to personal integrity and business responsibility. Applicants in answering question 28 of application and examination Form 1312 should name only persons who are able and willing to answer questions relating to their qualifications along the lines mentioned above.

It will not be necessary for applicants to appear at any place for examination. Their eligibility will be determined upon the evidence furnished in connection with the application and examination form, concerning their training and the work which they have accomplished.

At least six years' practical experience in actual woods' work and logging operations, including not less than three years' service in responsible, supervisory positions, and a thorough familiarity with the manufacturing and marketing of forest products, are prerequisites for consideration for this position.

The following, while not essential for admission to the examination, may be

Foote Mixer on building work.

and two in the vicinity of the Keena's farm.

The canal is nine feet wide at the bottom, nine feet deep and fifteen feet wide at the surface.

WEEKLY REPORT OF THE BUREAU OF BUILDING INSPECTION.

Permits issued from April 11th to April 18th, 1913:

Class	No. of Bldgs	Amount
Class "F".....	1.....	\$200.000
Class "C".....	4.....	96,500
Frames.....	14.....	225,905
Alterations.....	64.....	37,940
Total.....	115.....	\$560,345

WORK ADVANCES ON P. G. & E. CANAL.

BOWMAN (Placer Co.), April 26.—That the bonding of lands in this vicinity by the Pacific Gas and Electric Company is to secure a large reservoir site is indicated by the location of the land.

J. Adams is said to have received \$13,500 for 100 acres and George Haines \$1500 for two small farms. J. Keena is asserted to have been paid \$1000 for a right of way for a 100-foot tunnel for the canal.

A part of the Alverson farm, which has been bonded, is staked out for a power plant, it is stated, similar to the Alta and Newsaette power houses.

Mrs. Smith, of Rock Creek, has rented her large dance hall to the company for a hospital.

A steam shovel has been operating above Ragsdale's farm, south of there,

considered in the rating of the competitors: (1) Collegiate training in engineering or forest utilization; (2) Practical experience in engineering, surveying, and in the laying out and construction of railroads; (3) Practical experience in the manufacture and marketing of forest products.

Statements as to training, experience, and fitness are accepted subject to verification.

Applicants must have reached their thirtieth but not their fifty-fifth birthday on the date of the examination.

This examination is open to all men who are citizens of or owe allegiance to the United States and who meet the requirements.

Persons who meet the requirements and desire this examination should at once apply for Form 1312 to the United States Civil Service Commission, Washington, D. C., or the Secretary of the Board of Examiners, Post Office Bldg., San Francisco, Cal.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

**Bind your copies of the Building and Industrial
News in PERMANENT BOOK FORM**

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the "BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH**.

Merely send us your name and address and say: "Send us your binder." I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

Editorial Comment.

Building construction for the past month kept up a pretty even record for the year. In spite of proposed reductions in the tariff, a threatened war with Japan, and the visit of Secretary of State with reference to alien land laws the total of permits secured and contracts filed for last month amounted to \$2,249,332. This was for private construction alone and to this may be added the contracts filed for exposition work, which amounted to \$586,915 which increased these figures to \$2,836,247. But even the total fell behind the figures of last year, as April 1912 reached more than 3 million for private construction with no exposition work figured. Comparative figures for April for the past ten years are as follows:

April, 1904\$1,614,714
April, 19052,226,555
April, 1906817,084
April, 19076,556,007
April, 19083,306,676
April, 19093,330,909
April, 19103,383,269
April, 19112,139,696
April, 19123,435,334
April, 19132,249,332

As a usual thing April has figured large in the year's construction. This is presumably the close of the rainy season and marks the opening of Spring and of settled weather. So that there is assured weather conditions and plans are usually consummated for improvements that are to be undertaken during the year. Of the total of \$2,249,332 here given, \$1,221,514 was for brick and concrete construction, \$842,418 was for frame buildings and \$182,400 came under the heading of additions and alterations. At this writing the amount of work for the City and County of San Francisco for the month of April can not be given. The State Board of Harbor Commissioners let no work during April and the contracts of the United States Government within the city limits did not amount to more than \$50,000. All things considered building has been normal during the month and indications are that it will continue so throughout the year.

The Southern Pacific Company has printed and is distributing some literature relative to California and the wonders of California and the Pacific Coast. One booklet, entitled "Big Trees of California" is profusely illustrated with half tones of the most striking scenes in Big Tree groves of the State and the cover is a most artistic poster in color design of the great monarchs of the mountains. They also publish a map of California with a brief description of its resources, attractions, topography and climate. The booklets describing the trains and the country

are fine examples of the printer's art. These publications are being widely distributed and are worthy of perusal by any one.

There seems to be an attitude throughout the country to the effect that California has not a right to regulate her own affairs in the matter of immigration laws. This is true only insofar as the action of California is likely to involve other states in any action she may take.

So long as California acts within her rights and the privileges granted her by the Constitution she is not in any way involving other states any more than she has a right to involve them. The Japanese would perhaps not object if any other state in the Union enacted a law similar to that of California. The fact is that this state is peculiarly attractive to the Japanese. And in the matter of landholding the thing is all one sided. Americans can not hold lands in Japan and yet they are raising all kinds of Cain over there and threaten to come over and whip the boots off us if we presume to enact a law to prevent further holding of land by aliens.

This matter of immigration needs attention. The vast horde that lands each year at New York is mainly composed of undesirable citizens. The time is past when this country is a wilderness to be developed and a haven to be sought by any and every one.

Only such immigration should be encouraged as will assimilate with our citizenship and only those allowed to come who are capable of becoming good citizens, and taking an intelligent part in the government. America for the Americans is the primary consideration for our government to look at at the present time.

The recall of Judge Weller in the Police end of the City's department of justice ought to have a salutary effect upon the judges in general. For the practices obtaining in the police courts are any thing but commendatory and fair to the general public. The particular incident that was the basis of the recall may or may not have been sufficient ground for the action. It was but a case in point for the practices which obtain there and the movement instituted should have some effect in securing regular procedure in the courts of justice.

The completion of the Masonic Temple, at Van Ness avenue and Market street, will mark the completion of the most beautiful piece of architecture in the city. It is a monumental structure and adorns the broad avenue of the city in the vicinity of the Civic Center. If the Civic Center buildings compare with this edifice, when they are completed, the city will have a standard of architecture of which it can well feel proud.

How To Understand And Appreciate Art—The Attitude Of The Intelligent Onlooker.

By Ramsey Traquair, Royal British Institute.

I propose this evening to consider some general questions affecting art, and that as an appreciator or an onlooker rather than as a producer. The greater part of our time in this college is necessarily spent in studying and practicing the production of works of art. Such is the primary purpose of the College of Art, and we who study art look forward to spending our lives in the production of art in various forms—in buildings, pictures, statues or other objects.

But there is another point of view, and even as artists it is desirable that we should understand it. It is the attitude of the intelligent onlooker, and though he may never produce anything himself, desires to understand and appreciate the work produced by others.

Appreciation is not a mere matter of caprice, we must not be satisfied by saying, "This pleases me," "that does not." The question of what pleases us may decide what works of art we

place in our house, what kind of house we will live in, or what scenery we will admire, but our mere personal pleasure is not a sufficient standard by which to judge all art, for a work may not please us and yet be great. By a little study we learn to feel more fully and to recognize and find pleasure in qualities which at first were not apparent. Even as artists we should understand and practice appreciation, and a sympathy with others is of value in completing and in enriching our own work.

Sympathy and criticism are in some way necessary and are felt to be helpful by the artist. He is not a hermit in the desert, and I think that we may safely say that every true artist belongs to some group, however small. It may be but a group of two, himself and his critic.

But we are not only artists, we are human beings, and fellow-workers in the life of humanity. This fact is not altogether popular in some circles at the present time, yet it is an undeniable fact and must be faced. Unless it is of some use to humanity, unless it makes life better and richer, humanly, it passes by. The artist is too often presented to us as an irresponsible and an interesting alien to be regarded (as Professor Murray says) with a mixture of adulation and mistrust.

Art is a luxury to be added to ordinary common-sense life, but which we could quite well do without. The falsehood of this view is evident to every artist, but do we realize that it is the direct outcome of the artist's demand to be treated apart from humanity, and to stand apart from and above the common life? As a result he is only too often placed below it. Even genius does not so stand apart, for genius is not a quality which falls solely from Heaven, it is humanity itself. A genius is great, not because he differs from humanity, but because he embraces so much humanity. Indeed, it is commonly said of genius that it reveals us to ourselves, yet how could it do so unless it were similar to ourselves? If

genius were a separate and peculiar quality, the greatest artists would be quite incomprehensible. They would differ utterly from all men. Now we know that this is not the case. Indeed, this claim that artistic genius is something peculiar is actually degrading to the object, for it converts the genius from a great man to a mere monstrosity. And what applies to genius applies also to the lesser grades of artistic merit. The artist is and must be a fellow-worker in the state and must learn to sympathize with and to appreciate those who work beside him, must learn to criticise and to accept criticism not only from artists but from all who are honest workers in life.

I have said that art is one and that under all forms of art, there lies a common principle. The human mind is capable of two forms of knowledge, a scientific or intellectual form, and an emotional or imaginative form.

If, for instance, I use the word "tree" you will all understand what I mean, a large vegetable with roots, leaves, and a wooden stem. But if I ask you to imagine a tree each of you would imagine a different object—one a pine, one an oak, another a palm tree. The scientific concept of a tree is an intellectual idea which comprehends all trees. It is a species of intellectual "tree-ness," without individuality and incapable of being imagined. The emotional vision of a tree, on the contrary, is individual, separate and unlike every other tree. It is incapable of scientific description, but capable of artistic rendering. We cannot draw "horsiness" for instance, we can only draw a horse. No artist can convey to you the chemical means by which a tree converts air and earth into green leaves and wood. No scientist can tell you how the sunshine glints on its leaves and the wind murmurs through its branches, but the artist can tell you how these things affect him. If he does so in paint he is a painter, if in words a poet.

The actual poem or picture which we see is the record of an impression in the mind of the artist and is composed of certain materials, as paint, words or stone, according to the particular craft practiced by the artist. These materials are very largely what we study in a school of art, and it will be useful to consider strictly what they are.

First, we have the substances and tools which we manipulate. The painter has his canvas, his paints, his brushes; the sculptor his stone, his clay, and his chisel; the poet his words. Of these, we must learn the various possibilities and capabilities. The architect must learn that columns can be made of steel; the sculptor that models can be made of clay. This elementary knowledge, but necessary. Next we have technique—the manner in which the paint is put on the canvas or the pencil guided on the paper, the manner in which stone can be cut to form mouldings and to give particular effects of light and shade. This is a more difficult study. It takes many years of practice to place the paint

mark unerringly in the right place or to use the words of the poem with their fullest meaning, and all great artists have to a great extent developed and produced their own technique. Still, this is not art; no dexterity of technique will ever produce a great work of art. It is a necessary material.

Third, we have the objects of external nature. Of course we are natural objects, and the human mind is natural, but we can make the distinction between human activity and nature external to it, the sky, the fields, and the flowers, and it is in this sense that we will use the term "nature." It is easily seen that in certain arts nature may be

Two May 1 HOYT
ture is material. Although we may use natural forms in designing a cup, the form of the cup is based not on nature but on the necessity of drinking therefrom, and perhaps we do not realize that natural forms are as truly materials in art as are stones or paint. The painter studies the forms of the hills, of trees, of flowers, of the human figure, in order that he may use them to express emotion, just as the architect studies the forms of arches, of columns, or walls, the craftsman the forms of cups or chairs, the poet the forms of phrases and rhythms, in order that each may clothe therein his emotion.

We accordingly have three divisions, at least, of material—the substances of art, the technique, and the natural forms. The materials the artist must combine and arrange to form his work of art, whether he be painter, poet, or architect, and with all of them his mind must be well stocked; the painter must know how to make paint marks, the architect how to shape stones, and the poet, not unfrequently, has been known to read and to learn the dictionary.

It is generally agreed that any work of art is the creation of the artist's mind. It is not a transcript from nature; it is not a copy of a previous work; it is a new creation or arrangement made up of materials, perhaps often used before, such as we have just considered. These materials are rearranged so as to form and present the artist's idea, his vision, in the most forceable manner possible.

Now if we consider we shall see that the artist's vision is itself made up of these materials. It is conceived in his mind as made of paint, of stone, of natural form, or of what other material he pleases. We can therefore simplify our definition of a work of art. It is simply the artist's emotion inwardly realized in the materials of his craft. Being formed in the materials of the craft, it cannot be formed unless the artist has a knowledge of these materials. The "mute inglorious Milton" is, in fact, an impossibility for we cannot think like Milton without Milton's power of expression. Vague yearnings are not art. Before they can become art, they must be crystallized within the artist's brain in terms of paint, stone or other material; but if any man has clear vision, his vision includes technique and form and ma-

ed. An uncertain picture or a poor building is the result of uncertain or ignorant vision.

Every one who has ever designed knows how such a vision arises. We give some design to make, some artist-problem to solve. Our first vague format feelings work and evolve in our mind. Almost involuntarily and even at the most unexpected moments emotions suggest themselves. We try them, but at once they are seen to be satisfactory. They are not the idea that are thrown aside. Suddenly, often without warning, the solution comes. We know that the problem is solved. A rough sketch may be noted down, now as a test of the solution but later as an aid to our memory, for reality nothing now remains to be done but to copy down our work, holding firmly by our now realized ideal, striking it out, filling in the necessary details, all of which, if we hold by our first conception, will almost automatically fit themselves to their places, the visible and external work of which is finished.

So powerful is the initial impulse of work so conceived that we often feel a sensation that the picture or building is designing itself. The artist must be but the instrument in the hands of his own production. The sculptor knocks the stone away from a form which already exists within the stone; the novelist in haste writes down the events which must happen, most are happening, to his puppets. Work so done is direct, is done with art rapidly and rarely requires correction. It is usually the best of which the artist is capable, and possesses to an unlooker a curious quality of "infallibility."

We have defined a work of art as the artist's emotion realized in the materials of his craft and have considered the manner in which this realization takes place. The emotion itself must be based on or excited by something. We have heard it said that all art is based on nature—that is on external nature; but though nature is undoubtedly an important base for the fine art, the general statement is not sound consideration. We have already seen that in some cases, as in the design of a cup, nature is a material.

Architecture, for instance, is not based on natural form, it is often based on structure. The arch may occur in new isolated natural accidents, but is not used in nature as a natural form. The column and lintel are the result of the rudest effort to form a shelter, but nature never produced a column and lintel except by accident, and the combination cannot be called natural form.

Again, whilst our emotions may be stirred by nature and by structure, they may also be inspired by purely human sources. From such we gain emotions of pity, of fear, of tenderness, of pride, and as all emotion may serve as the basis or the starting point for artistic vision, so art may be based on such emotions. The arts of architecture, music, and poetry are often so. Each of the work which we have to do belongs to the past, and here historical knowledge becomes of importance. In order to understand the feelings of any period we must understand the motives which led to it.

No people do us owe more of our modern culture than to the ancient

Greeks. Not only directly through classical study, but indirectly through Greek writings in the Bible and through Greek influence on Roman and mediæval civilization, they have profoundly influenced our present life. Their art was of extraordinary perfection and the motives which produced it are well worthy of study. I have already spoken of the Greek attitude towards the artist as a fellow-worker in the state. If we examine Greek life and literature further, we find the greatest emphasis laid upon simplicity, temperance and refinement. A vulgar profusion was as objectionable as a vulgar meanness. It was as ostentatious to go clad in rags as to array oneself in gold and purple. Greek language, Greek dress, Greek poetry, and Greek architecture are alike absolutely simple.

Again the Greeks were clear and accurate thinkers and disliked anything approaching vagueness or mystery. We accordingly shall be disappointed if we seek for mystery in a Greek temple. It is not there and was never meant to be. If by chance any feeling of mystery had crept in, it would have been carefully eradicated.

We may contrast this with Oriental art. The Eastern mind loves profusion, elaboration and mystery. Persian poetry is elaborate and Persian art is florid. If we wish to understand the art of the East we must accept this; more, we must revel in it. Every thousand black slaves of surpassing beauty, loaded with basins of gigantic jewels, added to a procession in the "Arabian Nights" must be an added joy. Elaboration is not a vice in Eastern art; it is its greatest virtue.

So with mediæval art. The artist did not for a moment imagine that St. Peter went about Heaven with two enormous keys, or that St. Sebastian was condemned to an eternal salvation filled with arrows; but so they are always represented. Otherwise we should not recognize them.

In every case the artist expressed his ideal and told his story with absolute frankness and without hesitation. We must ask him for no more than he gives. We must not ask for atmosphere, for anatomy for historical realism. That such things were desirable had not even occurred to him.

Now, since mediæval times, a great change has come over our civilization.

Classicism arose, and all branches of it were wrapt in a meaningless pedantry. In architecture no forms were to be used save those sanctified by the example of the Greeks and Romans; in painting, sculpture, and even in literature, the same principle was followed and art seemed bound in an iron chain, not of tradition, but of intellect—of knowledge. Such was, of course, an impossible position, for art cannot be based on intellect, but only on emotion; and indeed we find that the great works of the Classic period are great, not because they copied faithfully the details of Classic work, but because they convey the feelings of eighteenth century artists. St. Paul's Cathedral is a great work of art, not because it is Classic, but because it is Wren. Under this weight of intellect, architecture still suffers. One critic tells us that our only hope of progress lies in a faithful study of the buildings of ancient Greece and Rome; a second plus his faith to an equally faithful study of Gothic. Apart from

his business qualities, with which we are not now concerned, the architect is expected to be rather a scholarly antiquary than an artist. Yet who would expect a modern poet to write alternately in the styles of Chaucer and of Pope, retaining with care in each case the archaisms of his model? Who would commission a portrait in the style of Van Dyke? We see from other arts that the alternative to historic "correctness" is not unlicensed eccentricity; yet from the architect is demanded alternately that strange quality of "correctness," and that even stranger phenomenon, "a new style."

Whilst recognizing that all art is founded on emotion we must not be led by this belief to despise or to underrate the power of intellect. A high intellectual training is necessary to the artist. His emotions must be trained by his intellect; they must be curbed, restrained, and developed by intellect; and only by intellect can he amass that store of material which is necessary to the realization of his completed work of art. We must also understand the quality of fine artistic emotion. It is not the mere untrammelled play of fancy or passion. The emotion of our great artists is often ascetic, always highly tempered and refined. The results of untrained and unlicensed emotionalism are at the best bad art. The results of pure intellectualism may be great, but they are not art at all.

We often hear a picture, particularly an historical picture, praised on account of its accuracy of detail, its verisimilitude, and the care with which every costume has been studied from museums, every face made to recall contemporary portraits. Now is this art? It is, indeed, art of a peculiarly modern type, for it is art flooded and submerged by intellect. In this it truly represents our present age. In fact, it is not art at all. It may be science, though even here, as the painter never saw the occurrence, it is bound to be inaccurate, and therefore only bad science. Such works depend for their value on the human emotion felt and expressed, and where such emotion is present accurate detail may go and not be missed. The mediæval artist boldly depicted monks and bishops as spectators of the Crucifixion; his work is often greater than that of the modern artist who paints his background in Jerusalem. The one painted an everlasting truth; the other, too often, merely a tortured man. Verisimilitude, archaeological and topographical accuracy are not necessary to art. They may be present in great art, but its greatness is not due to their presence. Holman Hunt, for instance, devoted years to the accumulation of accurate detail. Yet "The Scapegoat" or "The Flight into Egypt" are great pictures almost in spite of the Eastern background of the one and the accurate costuming of the other. Holman Hunt however considered that accurate detail was necessary to clothe his ideal, and whether we find pleasure in such detail or not, whether, indeed, we consider his detail always accurate, for he saw things with a peculiar vision, we need not let this blind us to the greater qualities of his work.

I have already spoken of architecture, and of the value or otherwise of "correctness" in buildings. Similarly let us think of poetry. There is no art more incorrect to the facts of nature as regarded by science. Thus

Keats in the "Ode to the Nightingale": "Happily the Queen Moon is on her Throne, clustered around by all her starry fays." As astronomy this is hopeless, as art it is great, for Keats is using nature as she was used by the mediaeval artist, as material for the expression of human emotion—the emotion which he felt in a moonlight night. In "Hamlet" Polonius, when urging Laertes to set sail, says, "the wind sits in the shoulder of your sail," a phrase not to be understood of a meteorologist, but expressing with wonderful force the urgency of Polonius' wishes. It is this touch of emotion and of imagination which is the essence of art.

What I have tried to express to you does not mean that nature is to be depicted, or that accuracy is a vice—very far from it, only that accuracy, in itself, is not an artistic virtue. It is only so in so far as it conveys and is part of the artist's vision; only that nature is not the sole motive and subject of art. It is only one motive, though a great one amongst many. Art is concerned with all human life and will be content with nothing short of that.

This introduces us to the claim of art for art's sake, a saying which can be interpreted in various ways, for it is evident that the word "art" is used in two different meanings in the one sentence. If it means that art should be exercised from the desire for external expression of a deeply felt emotion, not for the sake of notoriety or gain, nothing could be more true. Often, however, it is taken to mean picture making for the sake of the observation of nature and confined to motives directly inspired by nature. Such a claim is impossible. It is too narrow, for it excludes from art all architecture, all poetry, all drama, most mediaeval and classic art of any kind. It is not directly fatal to the artist, for great art may be created even in the narrowest of schools. It is absolutely fatal to the critic. He must understand and sympathize with varied styles and motives.

All art is one, its object is the transmission of an emotional image and thereby of the feelings which created that image. Poetry and music convey that image through the ear, for even when we read poetry we hear ourselves speak it. Architecture, sculpture and painting convey it through the eye. Such a classification is genuine, but how can we separate those arts whose appeal is made through the eye, save by the materials which they use? Painting, architecture, and sculpture are separate, because they form themselves in different materials.

Yet painting, in special, is divided into decorative painting and, again I hesitate, undecorative painting? Decorative painting, I gather, is marked by an absence of light and shade, a frequent archaism of drawing, and is, in general, an inferior article. Yet the paintings of Michael Angelo in the Sistine Chapel or the frescoes of Fra Angelico in San Marco are amongst the finest works of human genius which the world has seen. The whole of the early Italian School was decorative. The sculptures of the Parthenon were designed as decoration and can only be understood as such. Indeed, the only art which is not decorative is intellectual art, and that is not art at all. The distinction is im-

possible; even pictorial art does not gain by being surrounded by a gold frame and by having no connection with its surroundings. The artist's opportunities are as great on a church wall as in a studio, indeed they may be greater, and no art suffers by its opportunities, even we disguise them as limitations.

Both in the creation and in the appreciation of art the first essential is a clear internal vision. This is the true work of art; the appreciation of it is true criticism. This includes all material, all technique, for technique beyond the vision is mere juggling. To attain this we must study and understand not merely our own art but all art; we must not confine ourselves to the mere accumulation of material, the learning of tricks of draughtsmanship, or the collection of archaeological and scientific facts; we must train and develop our emotions. Material, tech-

nique, and knowledge are necessary without them we shall have nothing wherewith to form our works of art and the greater our knowledge or technique, the fuller will be the works which are formed from it. The purpose of art is not the exhibition either of manual dexterity or of knowledge, it is the expression of certain human emotions and must be judged and appreciated by the quality of its feeling and we must remember that the artist is a man sharing in the life work of other men. His work is no mere luxury, it is a necessary part of human life. The artist is not an alien or a hermit. He does not stand outside humanity. He is not peculiar. He is a man amongst other men, and his work has never been better expressed than it was by the Greek writer: We are here "to make gentle the life of the world."

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architect, Harry Skidmore, Foxcroft Bldg., S. F. Owner, Mr. Burnhardt. The building will be erected on Carl street near Schrader, and will be arranged for a number of three and four room suites with baths. Interior finish will be of pine and hardwood. Some hardwood floors will be used. There will be a central heating system. Tile will be used in the bath rooms. All suites will have wall beds. The exterior of the building will be covered with shingles and rustic. Plans are being prepared.

SAN FRANCISCO—Apartment house, 2 story and base, brick. Cost not stated. Architect, John J. Foley, 46 Kearny St., S. F. Owner's name withheld. The building will be arranged for a French laundry on the first floor and a number of two and three room suites above. Interior will be finished in pine. The exterior of the building will be faced with marble and brick. Special laundry machinery will be installed. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, M. S. Shaw. The building will have a frontage of 32 feet and a depth of 83 feet. The building has been arranged for six apartment flats of three and four rooms each with bath. Interior finish will be of pine with some elm panels. All suites will have wall beds. Hardwood floors will be used in the principal rooms. There will be a central heating system. The building will be erected at the northwest corner of Larkin and Green streets. The exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 4 story and base, brick and steel, \$60,000. Architects, Dunn & Kearns, Monadnock Bldg., S. F. Owner, A. Schiel-

cher. This building, which has been mentioned here before, will be erected on the north line of Geary street east of Larkin, and will cover an area of 47½ feet by 125½ feet. Plans provided for 41 apartments of two and three rooms and bath each. All modern conveniences will be installed. Plans have been out for figures and segregate contracts will be awarded within a few days.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$12,000. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, W. I. Bush. The building will be erected on a corner site, and will be arranged for two and three room suites with bath. Interior finish will be of pine and hardwood with hardwood floors. There will be a central heating system and wall beds. Tile will be used in the bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, R. J. O'Connell. The building will be erected at the corner of 40th and Diamond streets, and will cover an area of 43x105 feet. Interior will be arranged for eight suites of three room and bath each. All suites will have sleeping porches and will be fitted with wall beds. Interior will be finished in pine and hardwood with hardwood floors in the principal rooms. A central heating system will be installed. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and figures will be called for shortly.

OAKLAND, CAL.—Apartment house, 2 story and base, concrete. Cost not stated. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, R. J. Morse. The building will be erected at the corner of 40th and Op streets, and will be arranged for two stores on the first floor and two and three room suites on the upper floor. Interior will be finished in pine and hardwood. There will be connect-

(ths and wall beds. Tile will be used in the bath rooms. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

ST. HELENS, ORE.—Apartment house, 2 story and base. Cost not stated. Architect, Ernest Kroner, Forrester Bldg., Portland. Owner, J. C. Ramsey. The building will cover an area of 57x90 feet. The entire first floor will be arranged for a store and upper floor will be divided into four-room suites. All apartments will have all beds and connecting baths. Interior finish will be of pine. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

PORTLAND, ORE.—Apartment house, 1 story and base, reinforced concrete, \$70,000. Architect, J. S. Atkins, Henry Bldg., Portland. Owner, W. B. Bull, Journal Bldg. The building will cover an area of 100x100 feet. The first floor will be arranged for the office, lobby, social rooms and a public dining room. Upper floors will be divided into suites of two, three and four rooms each. All apartments will have wall beds and private bath rooms. Plans provide for steam heat, elevator service, hot and cold running water and a vacuum cleaning system. Interior finish will be of pine and hardwood. Bath rooms will have cement floors and the wainscot. The exterior of the building will be faced with cement plaster. Plans are being prepared.

LAS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architects, Frain & Williams, Exchange Bldg., L. A. Owner, Mrs. George J. Bey. The building will occupy a corner site and will cover an area of 60x115 feet. Interior has been arranged for 100 rooms, which will be divided into two and three room suites. All apartments will have connecting baths and wall beds. There will be steam heat, elevator service, hot water plant and a vacuum cleaning system. Interior finish will be of pine and hardwoods. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Apartment house, 2 story and base, brick. Cost not stated. Architect, Leonard L. Jones, I. W. Hellman Bldg., L. A. Owner, J. P. Parth. The building will cover an area of 50x100 feet and will contain 54 rooms arranged in two and three room suites. All apartments will have wall beds and private bath rooms. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are now being prepared for the work.

LOS ANGELES, CAL.—Apartment houses, 2, 3 story and base, frame, \$50,000. Architect's name not given. Owner, H. M. O'Malley, Pacific Sash and Door Co., 3310 So. Main St., L. A. Each of these buildings will be arranged for 36 suites of two and three rooms and bath. Interior will be handsomely finished in pine, mahogany and other hardwoods. There will be steam heat, elevator service and a vacuum cleaning system. All suites will have wall beds. The exteriors will be covered with ce-

ment plaster on metal lath. Plans are complete and the work will be done by Day Labor.

PORTLAND, ORE.—Factory, 4 story and base, reinforced concrete. Cost not stated. Architect, John Graham, Lyon Bldg., Seattle, associated with Doyle, Patterson & Beach, Portland. Owners, Ford Motor Car Co. Contractors, Pearson Construction Co., New York Bldg., Seattle. Contract price not stated.

Contracts Awarded.

SAN FRANCISCO.—Apartment house, 4 story and base, brick and steel, \$10,000. Architect, C. S. McNally, Mechanics' Institute Bldg., S. F. Owner, Mr. Woods. Contractor, P. J. Lynch, Mo-nadnock Bldg., S. F. Contract price not stated.

CHURCHES.

CROWS LANDING, STANISLAUS CO., CAL.—Church, 2 story and base, frame, \$20,000. Architect, John J. Foley, 46 Kearny St., S. F. Owners, Roman Catholic Church. This building has been mentioned here a number of times before. Plans for the structure are now nearly complete and figures will shortly be called. The main auditorium will have a seating capacity of 400 people. Interior finish will be of pine and ornamental plaster. The exterior of the building, which has been designed in the Spanish Colonial style, will be covered with white cement plaster on metal lath. Two galvanized iron towers will be used.

LONG BEACH, LOS ANGELES CO., CAL.—Church, 1 story and tower, brick and steel. Cost not stated. Architects, Frank T. Kogley associated with T. Foster Ena, Consolidated Realty Bldg., L. A. Owners, Roman Catholic Church, Father James A. Reardon, pastor. The building will cover an area of 84x124 feet. The main auditorium will seat 700 people. Interior finish will be of pine, hardwoods and ornamental plaster. A central heating system will be installed. Construction will be of brick and steel with two steel frame towers. The exterior will be faced with pressed brick. Plans are being prepared.

VISITATION VALLEY, SOUTH SAN FRANCISCO, CAL.—Church, 1 story and base, concrete and frame, \$25,000. Architect, John J. Foley, 46 Kearny St., S. F. Owner, Saint Elizabeth's Parish Catholic. Only a part of the building will be undertaken this year. The basement and a main hall will be built at a cost of about \$10,000. Two transepts will be added later. Plans are now being prepared and construction will be started within a month. The exterior of the building will be faced with cement plaster. Interior finish will be of pine and ornamental plaster. Plans provide for a meeting room, auditorium and gymnasium to be built first.

BAKERSFIELD, KERN CO., CAL.—Church, 1 story and base, concrete and brick, \$30,000. Architect, Edward T. Foulkes, Crunker Bldg., S. F. Owners, First Congregational Church of Bakersfield. This new building will be erected on Chester avenue and will cost in the neighborhood of \$30,000. The architect has just received the commission and no details of the work have been given out. Full particulars will appear in the next issue of the Building and Industrial News.

FRESNO, FRESNO CO., CAL.—Church, 2 story and base, frame and concrete, \$20,000. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, St. Alphonsus Church, Redemptorist Fathers. The building will be designed in the Romanesque and Mission style with the exterior covered with cement plaster on metal lath. Main auditorium will have a seating capacity of 700 people. Father Weber is in charge of the work. It is the ultimate intention of the Redemptorist Fathers to establish a Catholic college in Fresno, and plans will be prepared for a number of buildings which will be erected after the completion of the church. Plans for the church have been completed and construction will be started shortly.

Contracts Awarded.

MODESTO, STANISLAUS CO., CAL.—Church, 1 story and base, frame, \$25,000. Architect, John J. Foley, 46 Kearny St., S. F. Owners, Roman Catholic Church. Contractor, James McLaughlin, 244 Kearny St., S. F. Contract price, \$20,700. A complete list of the bids opened for this work appears under the heading of Fresno, Modesto, Stanislaus and Central California in this issue.

FACTORIES & WAREHOUSES.

SEATTLE, WASH.—Warehouse, 5 story and base, reinforced concrete, \$100,000. Architect, Capt. A. O. Powell, Central Bldg., Seattle. Owners, Port of Seattle Commission. The building will be erected at the foot of Bell street. Construction will be fireproof throughout. Freight elevators will be installed and metal window sash and frames and fireproof doors will be used. The building is the first of several big structures which will be erected by the Port of Seattle Commission. Plans are now being prepared and figures will be advertised for shortly.

SEATTLE, WASH.—Warehouse, 6 story and base, reinforced concrete, \$100,000. Architects, Franklin Engineering Co., Hoge Bldg., Seattle. Owner, Mrs. Weisner. The building will be erected at the corner of Westlake and Harrison streets and will cover an area of 120 feet square. Construction will be fireproof throughout and will embrace all of the latest devices in warehouse construction. Interior partitions will be of hollow tile and metal lath and plaster. There will be fireproof doors, metal window sash and frames and an automatic sprinkler system. Elevators and spiral chutes will be used. The exterior of the building will be faced with cement plaster. Plans are being prepared.

PORTLAND, ORE.—Factory, 5 story and base, brick and steel, \$70,000. Architects, Root & Hoose, Commercial Bldg., Portland. Owners, Modern Confectionary Co. This building has been mentioned here before when plans were first started. Working drawings are complete and bids are being taken. The building will cover an area of 70x100 feet, with a one-story addition 30x100 feet in the rear. Plans include elevator service and a steam heating plant. Interior finish will be of pine. There will be fireproof doors, metal window sash and frames and metal lath and plaster interior partitions. The exterior of the building will be faced with pressed brick. Segregated figures on all parts of the work are being taken.

FLATS.

SAN FRANCISCO. Flats, 2 story and base, frame, \$1,000. Architects, H. Gellfuss & Son, 46 Kearny St., S. F. Owner, W. Ehlers. The building will be erected at the corner of Kearny and Vallejo streets, and will cover an area of 20x51 feet. The interior has been arranged for two modern flats of four and five rooms each with bath. Interior finish will be of pine with some elm panels. There will be open fire places and tile mantels. Tile will also be used in the bath rooms. The exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

SAN FRANCISCO. Flats, 2 story and base, frame, \$3,500. Architect, none. Owner, C. S. Howe, 110 Old St., S. F. The building will cover an area of 25x 60 feet, and will contain two modern flats of five and six rooms each. All interior finish will be of pine. Some oak floors will be used. There will be open fire places and brick or tile mantels. The exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

OAKLAND, CAL. Flats, 2 story and base, frame, \$8,000. Architects, Newsum & Dixon, 312 Broadway, Oakland. Owner, Mr. Gattway. The building has been designed to contain four flats of four rooms and bath each. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

GARAGES.

LOS ANGELES, AL. Garage, 1 and 2 story and base, brick and steel, \$40,000. Architect, none. Owner, F. O. Jean, 452 Ardmore avenue, L. A. The building has been designed for a commercial garage and will cover an area of 100x 155 feet. Construction will be of brick and steel with metal window sash and frames, concrete floor and steel roof trusses. A special gasoline storage tank will be installed. Interior finish will be of pine with some marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL. Garage, 2 story and base, reinforced concrete, \$55,000. Architect, Myron Hunt, Hibernian Bldg., L. A. Owners, Huntington Land and Improvement Co. Contractors, Richards-Neustadt Construction Co., Wright & Callender Bldg., L. A. Contract price, \$55,000.

GOVERNMENT WORK AND SUPPLIES.

Pocatello, Idaho, Public Building.

All bids received February 25 by the supervising architect, Treasury Department, Washington, D. C., for the construction, complete, of the U. S. post office at Pocatello, Idaho, have been rejected. New bids for the construction of the above building will be opened May 28.

Phoenix, Ariz., Furniture.

The contracts for installing files and bookcases in the U. S. post office and court house at Phoenix, Ariz., have been awarded to the Globe-Wernicke Co. of Washington, D. C., at \$1,026 90 and the Shaw-Walker Co. of Washington, D. C., at \$1,498.15.

Reclamation, Los Angeles, Valves.

The following bids were received at the office of the U. S. reclamation service, Los Angeles, Cal., April 1 for furnishing two 48-inch butterfly valves for the Minatore reservoir, North Platte project:

Coffin Valve Co., Boston, Mass., \$920; time, 30 days.

The Chapman Valve Mfg., Indian Orchard, Mass., \$1,100; 60 days.

S. Morgan Smith Co., \$1,110; 60 days.

Pittsburgh Valve Foundry and Construction Co., Pittsburgh, Pa., \$1,450; 7 weeks

Fulton Engine Works, Los Angeles, Cal., \$2,030; 60 days.

Allis-Chalmers Co., Los Angeles, Cal., \$2,080; 75 days.

The Pelton Water Wheel Co., San Francisco, Cal., \$3,370; 60 to 90 days.

Baker City, Ore., Door.

The bid of the American Revolving Door Company, 2512 West Monroe street, Chicago, Ill., \$550 in amount, was the only one received on April 16 by the supervising architect, Treasury Department, Washington, D. C., for furnishing and installing revolving door, etc., in the U. S. post office at Baker City, Ore.

Yards and Docks, Cranes.

The contract for furnishing two cranes at the navy yard, Puget Sound, Wash., and six cranes for the naval station, Pearl Harbor, H. T., has been awarded to the Brown Hoisting Machinery Co., Cleveland, Ohio, at \$74,350.

Canal Circular 763.

The purchasing officer of the Isthmian Canal Commission has advised prospective bidders, under circular No. 763, bids for which are to be opened on May 14, that if they desire to do so data called for under the specification, except prices, may be submitted in separate sealed envelopes marked "For information of commission, not to be made public."

Prospective Bidders.

Pearl Harbor, Hospital, May 10.
Ed. O. Hamilton, 24th and Farnam streets, Omaha, Neb.

Connors Bros. Co., Lowell, Mass.
W. N. Cannon Co., Monadnock Building, San Francisco, Cal.

Crane Co., Washington, D. C.
Kearny & Mattison Co., Ambler, Pa.
Sound Construction and Engineering Co., Seattle, Wash.

Southwestern Construction Co., Los Angeles, Cal.

Pearson Construction Co., 754 New York Block, Seattle, Wash.

Federal-Huber Co., Chicago, Ill.

Killbourn & Jacobs Mfg. Co., Broad Exchange Building, New York city.

E. A. Branda & Co., 11 Broadway, New York city.

Seattle Car and Foundry Co., Seattle, Wash.

Jackson Manufacturing Co., 114 Liberty street, New York city.

Standard Steel Works, Morris Building, Philadelphia, Pa.

Norman B. Livermore & Co., Bailey Building, Seattle, Wash.

Snaubling Construction Co., Portland, Ore.

Hackfield Co., San Francisco, Cal.
Honolulu Iron Works, 29 Broadway, New York city.

Cranes, Puget Sound, May 3.

Pawling & Harnischfeger Co., Milwaukee, Wis.

Cutler-Hammer Mfg. Co., Milwaukee, Wis.

Northern Engineering Works, Detroit, Mich.

Niles-Bement-Pond Co., 111 Broadway, New York city.

Maine Electric Co., Portland, Ore.

Exeter Machine Works, Pittston, Pa.

General Electric Co., Schenectady, N. Y.

Brown Hoisting Machinery Co., Cleveland, Ohio.

Modern Steel Structural Co., Waukegan, Wis.

Butte Engineering and Electric Co., 633 Howard street, San Francisco, Cal.

William Sellers & Co., 1600 Hamilton street, Station J, Philadelphia, Pa.

Whiting Foundry and Equipment Co., Harvey, Ill.

MacArthur Concrete Pile and Foundation Co., 11 Pine street, New York city.

Wonham, Sanger & Bates, 141 Milk street, Boston, Mass.

SAN FRANCISCO. Electric work and light fixtures. Cost not stated. Architect, none. Owners, United States Government. Supervising Superintendent J. W. Roberts, Post Office Building, will receive bids on May 28th for the reconstruction of the electric conduit system and for furnishing lighting fixtures in the United States Appraisers Building. Plans can be obtained from Mr. Roberts. The official proposal appears in another column of this issue.

HALLS AND SOCIETY BUILDINGS.

PORTLAND, ORE. Lodge hall, 4 story and base, brick and steel, \$50,000. Architects, Claussen & Claussen, Macleay Bldg., Portland. Owners, Portland Social Turn Verein. The building will be erected on 13th street between Main and Jefferson streets, and will be designed with a number of large social rooms and lodge halls. A feature of the building will be the main banquet hall and gymnasium. Plans include steam heat, elevator service and a vacuum cleaning system. The exterior will be faced with pressed brick. Plans are being prepared and figures will be called for shortly.

HOSPITALS.

SAN FRANCISCO. Hospital addition, 1 story and base, reinforced concrete, \$18,000. Architect, Constructing Quartermaster, Fort Mason. Owners, United States Government. This building, which has been designed for a disinfecting building, will be erected at the Letterman General Hospital at the Presidio of San Francisco. Construction will be of reinforced concrete throughout. Considerable tile will be used. A large amount of special equipment will be installed. Plans are complete and figures are being taken. Bids will be opened at Fort Mason on May

6th. Plans and specifications can be secured from the Constructing Quartermaster's office.

SAN FRANCISCO—Nurses' quarters, 3 story and base, reinforced concrete, \$80,000. Architect, Constructing Quartermaster, Fort Mason, Owners, United States Government. This building will cover an area of 80x136 feet and will be designed in three wings with connecting passageways. Interior will be finished in pine and hardwoods. Bath rooms will have cement floors and tile wainscot. Steam heat will be furnished from the central plant at the Letterman General Hospital. Exterior of the building will be faced with cement plaster. Plans are nearly complete. Probably only one wing of the building will be erected this year.

HOTELS.

SAN FRANCISCO—Hotel, 7 story and base, reinforced concrete, \$50,000. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owners, Hansen and Johnson, 110 Jessie St., S. F. The building will be erected on Turk street east of Dodge. The first floor will be arranged for a number of stores besides the hotel entrance and lobby. Upper floors will contain 100 guest rooms and 68 baths. Plans include steam heat, hot and cold running water and elevator service. Interior finish will be of pine and hardwoods. Ornamental plaster will be used in the lobby. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with pressed brick and terra cotta. The work will be done by Day Labor.

SAN FRANCISCO—Hotel, 4 story and base, brick and steel, \$25,000. Architect, Lewis M. Garduer, Phelan Bldg., S. F. Owners, Lange Investment Co. The building will be 25x100 with an L in the rear 25x46 feet. There will be stores on the first floor and a number of single rooms on the three upper floors. All rooms will have hot and cold running water. There will be steam heat and elevator service. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN DIEGO, CAL.—Hotel, 6 story and base, reinforced concrete. Cost not stated. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owner, Dr. Fred Stauffer. The building will be erected on a corner site and will cover an area of 100x100 feet. A large hotel lobby, dining room with complete kitchen equipment and two store rooms will occupy the first floor. There will be a restaurant and storage space and heating plant in the basement. Upper floors will be arranged for 126 guest rooms and 85 baths. Plans include steam heat, elevator service, a vacuum cleaning system and hot and cold water plant. Interior finish will be of pine and hardwood. Bath rooms will have tile floors and wainscot. Patent store fronts and metal window sash and frames are specified. The exterior of the building will be faced with cement plaster. A lease on the entire building has been made with Mrs. Florence C. Thorbus.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, R. M. Jackson, Consolidated Realty Bldg., L. A. Owner, Mr. Sarotti. The building has been de-

signed for a commercial hotel and will cover an area of 50x150 feet. There will be stores besides the hotel lobby on the first floor and a number of single rooms with baths on the upper floors. Plans include elevator service, steam heat and a vacuum cleaning system. Interior finish will be of pine throughout with some ornamental plaster in the lobby. All rooms will be supplied with hot and cold running water. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 6 story and base, reinforced concrete. Cost not stated. Architect, R. M. Taylor, Douglas Bldg., L. A. Owner, Jacob Joseph. The building will be arranged for four stores and the hotel office and lobby on the first floor and 110 guest rooms on the upper floors. The building will cover an area of 100x120 feet. About 75 per cent of the guest rooms will have connecting baths. Interior finish will be of pine and hardwood. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Metal window sash and frames will be used. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

Contracts Awarded.

RICHMOND, CONTRA COSTA CO., CAL.—Hotel, 2 story and base, brick, \$20,000. Architect, James T. Narbett, Richmond. Owner, Mrs. Whiten. Contractors, T. Park Jacobs Co., Richmond. Contract price, \$20,000.

LIBRARIES.

ALBANY, ORE.—Library, 1 story and base, brick and steel. Cost not stated. Architect, W. F. Tobey, Sherlock Bldg., Portland. Owners, Albany Carnegie Library Association. The building will contain two public reading rooms. The design is in the classic style with exterior faced with pressed brick trimmed with stone. Interior finish will be of pine and hardwood. Plans are being prepared. A central heating system will be installed.

Contracts Awarded.

TORRANCE, IMPERIAL CO., CAL.—Library, 1 story and base, concrete and brick, Cost not stated. Architect, P. D. Farquhar, Van Nuys Bldg., L. A. Owners, Town of Torrance. Contractor, B. D. Krounack, 3900 So. Hill St., L. A. Note: This contract has been taken on a percentage basis.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Manufactures Building, frame construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the Manufactures Building have been completed and are now out for figures. Separate bids will be taken for the general construction and for the installing of the plumbing, water and sewer pipes. Bids will be opened on May 13th. Plans and specifications can be secured from the Director of Works at the Service Building. Official proposal appears in another column of this issue.

SAN FRANCISCO—Moving buildings. Cost not stated. Architect, Director of

Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on May 8th by the Buildings and Grounds Committee of the Panama-Pacific Exposition Co. for the removal of the four quartermaster buildings now situated on the Presidio wharf. The work will include moving the buildings and resetting the same. Plans and specifications can be secured from the Director of Works. Official proposal appears in another column of this issue.

SAN FRANCISCO—Excavating and piled road construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific Exposition Co. Two sets of bids were opened Thursday afternoon by the Buildings and Grounds Committee of the Panama-Pacific Exposition Co. One set of bids is for grading of the Municipal Auditorium, which is to be erected in the Civic Center by the Exposition Co. at a cost of over a million dollars. E. M. Huie & Co., were low for the excavating at \$32,018. Other bids were for the improvement of the Fulton basin by the construction of a piled roadway from Divisadero to Broderick street. Healy-Tibbitts Construction Co. were low at \$6,920. No contracts were awarded. A complete list of these figures appear under the heading of San Francisco in this issue.

SAN FRANCISCO—Liberal Arts building, frame construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids were opened on Tuesday afternoon by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Co. for the construction of the Liberal Arts Building and for the plumbing, water and sewer pipes on the same building. Reese & Rountree and Lange & Bergstrom were both very low on the general construction, but no award has been made. Separate bids were taken for the general construction with lumber furnished by the Exposition Co. and for the contractor furnishing both labor and lumber. A complete list of these figures appears in this issue under the heading of San Francisco.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,000. Architect, Joseph Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling has been designed for an eight-room house with bath. Interior will be finished in pine and redwood with hardwood veneer. Hardwood floors will be used throughout. Plans provide for furnace heat and an automatic water heater. There will be two open fire places with brick mantels. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic shingles and brick veneer. Plans are complete and the work will be done by Day Labor. Mr. Leonard is now purchasing all materials.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, Joseph M. Geary, 23rd and Folson Sts., S. F. Owners, Parkside Home Building Co. The house will contain seven rooms, baths and a sleeping porch. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the living room, dining

room and reception hall. Tile will be used in the bath room and kitchen. There will be furnace heat and open fire places. Mantels will be of tile or brick. The exterior of the house will be covered with shingles and klinker brick veneer. Plans are complete and work will be done by Day Labor under the direct supervision of the architect.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, Joseph Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior finish will be largely of hardwood with some pine and white enamel. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Brick mantels will be used in the living and dining rooms. Plans provide for an automatic water heater. Bath room will have tile wainscot. The exterior of the building will be covered with rustic, shingles and brick veneer. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$7,000. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, Matthew A. Little, 1347 4th Ave. The house will be erected on 17th avenue near Lake street, and will be of the two-story and attic type. Interior will be handsomely finished in pine, hardwood and white enamel. There will be furnace heat and open fire places. Hardwood floors will be used throughout. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic, cement plaster on metal lath and klinker brick veneer. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residences, 4, 2 story and base, frame, \$4,000 each. Architect, none. Owner, E. B. Hallett, 1259 12th Ave., S. F. These houses will be erected on 15th avenue east of Balboa street, and each house has been designed to contain seven rooms and bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in all of the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Tile will also be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exteriors will be covered with rustic, shingles and cement plaster on metal lath. Plans are in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story, attic and base, frame, \$10,000. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, Matthew A. Little, 1347 4th Ave., S. F. The house will be erected on 17th avenue, 200 feet north of Lake street, and has been designed for a ten-room house with baths and sleeping porch. Interior finish will be largely of hardwood with some pine and white enamel used. Hardwood floors will be used in nearly all of the rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath rooms and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath and rustic. Plans are complete

and in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$25,000. Architect, Louis M. Upton. Mutual Savings Bank Bldg., S. F. Owner, George D. Greenwood. This dwelling has been mentioned here several times before. Plans for the work have been out for figures and the architect will award a contract for the construction within the next few days.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$12,000. Architect, Harris Allen, 2514 Hillegass Ave., Berkeley. Owner, Alice Skyes. The dwelling will be erected in the Northbrae Tract and will contain in the neighborhood of nine rooms and several baths. There will also be two sleeping porches and a garage. Interior will be finished in pine, hardwoods and white enamel. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Hardwood floors will be used in the living, dining room and reception hall. Exterior of the house will be covered with shingles. Plans are complete and figures are now being taken by the architect.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$15,000. Architect, W. H. Ratcliffe, First National Bank Bldg., Berkeley. Owner, T. M. Sherman. The house will be erected at the corner of Dwight Way and Piedmont avenue, and will contain twelve rooms, two baths and a sleeping porch. Interior finish will be of pine, hardwoods and white enamel. There will be furnace heat and open fire places. Mantels will be of brick and tile. All floors will be of oak except in the bath rooms which will have composition floors and tile wainscot. An automatic water heater will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owners, Patrick Nelson Co., 2025 Addison St., Berkeley. The house will contain seven rooms and bath. Interior finish will be largely of pine with some hardwood veneer in the living and dining rooms. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor. The owners are now purchasing all materials.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$2,200. Architects, Newsom & Dixon, 812 Broadway, Oakland. Owner, R. A. McWilliams. The dwelling will contain six rooms and bath. Interior will be finished in pine throughout with hardwood floors in the living and dining rooms and reception hall. There will be open fire places and tile or brick mantels. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath and shingles. Plans are complete and the work will be done by Day Labor.

MILL VALLEY, MARIN CO., CAL.—Residence, 2 story and base, frame,

\$25,000. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name withheld. The dwelling will contain fourteen rooms, three baths and a conservatory. Interior will be finished in pine, hardwoods and white enamel. There will be hot water heating system and open fire places. Mantels will be of brick and tile. Tile will be used in all bath rooms and in the kitchen. A garage will be erected on the lot. An automatic water heater and a vacuum cleaning system will be installed. Exterior of the house will be covered with cement plaster on metal lath. A red clay tile roof is specified. Plans are being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Residences, 1 and 2 story frame. Cost not stated. The following Day Labor jobs have been reported as about to be started in Stockton: 1 story frame dwelling for J. H. Wender, 120 East Magnolia Ave., Stockton. Cost, \$1,800; 1 story frame dwelling for C. J. Wytelt, 307 West Poplar St., Stockton, cost, \$2,000; and 2 story frame dwelling for Dr. Robert Hammond, 18 East Flora St., Stockton, cost, \$8,250.

Contracts Awarded.

HOLLYWOOD, LOS ANGELES CO., CAL.—Residence, 2 story and base, frame, \$27,500. Architect, F. M. Tyler, Black Bldg., L. A. Owner, George A. Ralphs. Contractor, F. J. Phillips, 3735 South Grand Ave., L. A. Contract price, \$27,500.

SCHOOLS.

SAN FRANCISCO—School, 2 and 3 story and base. Class A construction. Cost not stated. Architects, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids for the finishing construction on the Academic Building of the Polytechnic group were opened by the Board of Public Works on Wednesday last. M. M. Finlayson was low bidder on all the alternative propositions for the general construction as follows. (a) \$156,000, (b) \$196,892, and (c) \$312,490; J. H. Pinkerton was low on the plumbing at \$24,764; the Pacific Fire Extinguisher Co. were low on the electric work at \$18,150; F. W. Walsh was low on the heating and ventilating at \$14,300, and John G. Sutton was low on the boilers and equipment at \$23,300. Awards have not been made. A complete list of the figures presented appears in this issue under the heading of San Francisco.

OAKLAND, CAL.—School, 2 story and base. Class A construction, \$160,000. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Plans have been approved for the Durant School, which is to be located on West street between 28th and 29th streets. The building will contain 18 class rooms and an assembly hall. Construction will be fireproof throughout. The exterior of the building will be faced with pressed brick and cement plaster. Bids will be called for the work very shortly.

Contracts Awarded.

OAKLAND, CAL.—School, 2 and 3 story and base, reinforced concrete, \$397,037. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Contractors, Williams Bros. & Henderson, Holbrook Bldg., S. F. Contract price, \$397,037.

SEWERS, STREET WORK AND WATER SYSTEMS.

PENDLETON, ORE.—Water system, pumping plant and mains, \$200,000. Engineer, Frank C. Kelsey, Selling Bldg., Portland. Owners, City of Pendleton. The system will embrace about sixteen miles of water mains, two reinforced concrete reservoirs of 1,000,000 gallons capacity each and a concrete pumping station. Bonds have been sold and bids for the construction will be called for within a short time. Plans, specifications and complete information can be secured from Engineer Kelsey.

STORES AND OFFICES.

SAN FRANCISCO — Office fixtures, hardwood, \$3,000 to \$1,000. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owners, Pillsbury, Madison & Sutro. Plans are being prepared for fittings, interior finish and fixtures for the elaborate offices which are to be opened on the 10th floor of the new Standard Oil Building by Attorneys Pillsbury, Madison & Sutro. All finish will be of hardwood. Plans are being prepared.

SAN FRANCISCO—Stores and lofts, 3 story and base, brick. Cost not stated. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, Mr. Jacobs. The building will be erected on Drumm street in the wholesale district. The first floor will be arranged for stores and the upper two floors for light lofts. Interior finish will be of pine. Plans provide for metal window sash and frames. There will be patent store fronts. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Stores and offices, 7 story and base. Class A construction. Cost not stated. Architects, Ross & Lurgren, 310 California St., S. F. Owners, Forbes Estate. The building will be erected on the new gore corner formed by the extension of Fulton street through the Civic Center to Market street. The building will have a frontage of 96 feet on Market street and 116 feet on the proposed extension of Fulton street. The first floor will be arranged for a number of stores fronting both Market and Fulton streets. Upper floors will be subdivided into modern offices. Construction will be Class A throughout with a complete steel frame and exterior wall faced with pressed brick or terra cotta. Preliminary plans only have been prepared.

OAKLAND, CAL.—Stores and lofts, 2 story and base, brick, \$15,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Morris and Muller. The building will be erected on 14th street east of Grove, and will contain stores on the first floor and large light lofts above. There will be a freight elevator. Interior finish will be of pine. There will be metal window sash and frames. The exterior of the building will be faced with pressed brick. Patent store fronts are specified. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

FOURTEEN MAY 3 HOYT
OAKLAND, CAL.—Office building, 11 story and base. Class A construction. Cost not stated. Architects, L. R. Dutton & Co., Chronicle Bldg., S. F. Own-

ers, First Trust and Savings Bank, Oakland. The building will be erected at the corner of 16th and San Pablo avenue, and has been mentioned in these columns before. A contract for the steel work has been let and bids are now being taken for the general construction. The building will contain the banking quarters of the owners, which will occupy nearly the entire ground floor and basement. Upper floors will be arranged for modern offices both as single offices and ensuite. Plans provide for steam heat, elevator service, mail chutes and a vacuum cleaning system. There will be a complete steel frame with concrete and brick walls faced with pressed brick and terra cotta. Interior partitions will be of hollow tile and metal lath and plaster. Some metal trim will be used. Halls and corridors will be wainscoted with tile. Interior of the banking rooms will be finished in marble, tile, hardwoods, bronze and ornamental plaster. A general contract will be let shortly.

LA GRANDE, ORE.—Stores and offices, 3 story and base, brick and steel. Cost not stated. Architects, Whidden & Lewis, Lewis Bldg., Portland. Owners, C. S. Jacobsen and N. K. West. The building will occupy a corner site and is to cover an area of 60x110 feet. Plans provide for several stores on the first floor, and offices above. Interior finish will be of pine throughout. There will be metal window sash and frames. An elevator will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

THEATRES.

TURLOCK, STANISLAUS CO., CAL.—Theatre, stores and offices, 2 story and base, brick and steel, \$45,000. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Turlock capitalists. The building will be erected on Main street and will be arranged for two stores and a theatre on the first floor. Upper floor will be subdivided into offices. The main auditorium of the theatre will have a seating capacity of 750 people. Interior will be finished in pine and ornamental plaster. Complete stage equipment will be installed. There will be a central heating system. The exterior of the building will be faced with pressed brick. Plans are being prepared.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 775—Proposals for Dynamite, Copper Wire, Ingot Copper, Brass Tubing, Bronze, Steel Chain, Track Bolts, Track Spikes, Boat Spikes, Washers, Nails, Tacks, Plate Zinc, Rope Clips, Drills, Taps, Wrenches, Files, Vises, Shovels, Chain Blocks, Buckets, Paint Brushes, Scrubbing Brushes, Machetes, Pickaxes, Grease Cups, Oilers, Water Coolers, Ladders, Chairs, Door Mats, Cars, Signal Flags, Emery Cloth, Sash Cord, Clank Line, Cheesecloth, Vitriol Sewer Pipe, Turpentine, Paints, The Plugs, Bolts, Lumber and Piles.—Sealed proposals will be received at the office of the general purchasing office, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m., May 17, 1913, at which time they will be opened in public for furnishing the above mentioned arti-

cles. Blanks and general information relating to this circular (No. 775) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles Cal. F. C. BOGGS, major, corps engineers, U. S. A., general purchasing officer.

PROPOSALS FOR STREET WORK.
OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 7th day of May, 1913, for doing the following street work, including the furnishing of the necessary labor and materials therefor, to wit:

(1) That Clayton street between Seventeenth street and Parnassus avenue be improved by constructing granite curbs where not already constructed, and by paving the roadway thereof with an asphalt pavement, consisting of a 6-inch concrete foundation and a 2-inch asphaltic wearing surface where not already constructed, except on that portion thereof required by law to be kept in repair by the railroad company having tracks thereon.

(2) That Fifth avenue, between Anza and Geary streets (except that portion required by law to be kept in repair by railroad companies having tracks thereon) be improved by the construction of granite curbs and asphalt pavement consisting of a 6-inch concrete foundation and a 2-inch asphaltic wearing surface, where not already so done.

(3) That the crossing of Third avenue and Cornwall street be improved by the construction of a bituminous rock pavement consisting of a 6-inch concrete foundation and a 2-inch bituminous rock wearing surface, and by resetting to official line and grade the existing granite curbs and brick cess pools (catchbasins) that are not already at official line and grade.

(4) That the intersection of Ashbury and Clayton streets be improved by constructing granite curbs and artificial stone sidewalks on the angular corners thereof, and by paving the roadway thereof with an asphalt pavement consisting of a 6-inch concrete foundation and a 2-inch asphaltic wearing surface, except on that portion required by law to be kept in repair by the railroad company having tracks thereon.

(5) That Ashbury street from Downey street to Clayton street be improved by constructing granite curbs where not already constructed, and by paving the roadway thereof with an asphalt pavement consisting of a 6-inch concrete foundation and a 2-inch asphaltic wearing surface, except on that portion thereof required by law to be kept in repair by the railroad company having tracks thereon.

(6) That the intersection of Ashbury street and Downey street be improved by constructing granite curbs and artificial stone sidewalks on the angular corners thereof, and by paving the roadway thereof with an asphalt pavement consisting of a 6-inch concrete foundation and a 2-inch asphaltic wearing surface, except on that portion required by law to be kept in re-

A Notable Type Of Concrete Floor Construction.

pair by the railroad company having tracks thereon.

(7) That Twenty-seventh avenue between Lake street and West Clay street, be improved by the construction of granite curbs, where not already constructed, and by paving the roadway with an asphalt pavement consisting of a six (6) inch concrete foundation and a two (2) inch asphaltic wearing surface, where not already constructed.

(8) That the crossing of Anza street and Twelfth avenue be improved by constructing granite curbs and artificial stone sidewalks on the angular corners thereof with an asphalt pavement consisting of a 6-inch concrete foundation and a 2-inch asphaltic wearing surface, and by constructing a brick cesspool (catchbasin) with cast-iron frame, grating and trap and 10-inch vitrified, salt-glazed, iron-stone pipe culverts on the northwesterly angular corner thereof.

(9) That Twenty-first avenue, between California and Clement streets, be improved by constructing granite curbs, where not already constructed, and by paving the roadway thereof with an asphalt pavement consisting of a 6-inch concrete foundation and a 2-inch asphaltic wearing surface, where not already constructed.

(10) That Sixteenth avenue, between Fulton and Cabrillo streets, be improved by constructing granite curbs, where not already constructed, and by paving the roadway thereof with a bituminous rock pavement, consisting of a 6-inch concrete foundation and a 2-inch bituminous rock wearing surface, with a 7-foot strip of basalt block pavement along the center line of the street where not already constructed.

(11) That Stanyan street opposite the intersection of Rivoli street be improved by the construction of granite curbs and a pavement of bituminous rock, consisting of a 6-inch concrete foundation and a 2-inch bituminous rock wearing surface on the roadway thereof; and by the construction of one (1) brick catchbasin with a cast-iron frame, grating and trap and 10-inch, vitrified, salt-glazed, iron-stone pipe culverts, and that the intersection of Stanyan and Rivoli streets be improved by the construction of granite curbs and artificial stone sidewalks and brick catchbasins with cast-iron frame, gratings and traps and 10-inch, vitrified, salt-glazed, iron-stone pipe culverts on the northeasterly and southeasterly angular corners thereof; and by the construction of a bituminous rock pavement, consisting of a 6-inch concrete foundation and a 2-inch bituminous rock wearing surface on the roadway thereof.

Note: Separate proposals must be submitted for each of the above described pieces of work. Official proposals can be secured from the Board of Public Works.

PROPOSALS FOR STREET WORK.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 7th day of May, 1913, for doing the following street work, including the furnishing of the necessary labor and materials therefor, to wit:

The Monumental granite bank building for the "Savings Union Bank of San Francisco," now called the "Savings Union Bank and Trust Company," was completed in 1909 by the F. M. Garden

ample for future development of the business. However, the addition of the "Trust" Department and the extremely rapid growth of the Bank, necessitated the addition of more vault

Fig. 1—"Savings Union Bank & Trust Company Building.

Co., General Contractors, Bliss & Faville being the Architects and Galloway & Markwart, Consulting Engineers. The Bank, comprising as it does, three

space and to obtain this, use was resorted to of the space under the immense Dome which is seen quite prominently, in the exterior view of the Bank, given under Fig. 1. The

Fig. 2—Showing "Self-Sentering" in place ready for concrete.

space on the third floor, which was utilized by the American Bankers Association, is now given over to the "Trust" Department, the American Bankers Association having moved to the Mills Building, and the space under the arched Dome proper, which had before this not been utilized, is now being built over into vault space for filing of records, etc., and it is with the floor which was adopted for this portion of the building, that the present article deals.

The beams for a possible floor, were put in place when the building was first constructed; the spans being six foot centers and the floor which is now under course of construction, is composed of "Self-Sentering" which serves

Sentering" being quite sufficient to withstand ordinary floor loads; 24 gauge "Self-Sentering" was used in the construction, illustration No. 3 showing the form of the metal very closely. At the six foot span mentioned, only one temporary shore was placed between beams, to avoid undue deflection during the placing of the concrete and you will note in illustration No. 3 that the metal is so stiff that the men could walk on the "Self-Sentering" with impunity during construction.

The Frank M. Garden Company, who were the General Contractors for the Bank Building in 1909, are also doing the work on the "Savings Union Bank & Trust Company" Building, under discussion in the present article.

Note: Separate proposals for each of the above described pieces of work must be submitted. Official proposals can be secured from the Board of Public Works.

PROPOSALS FOR WEATHER STRIPPING.

METAL WEATHER STRIPPING—Office Chief Quartermaster, Fort D. A. Russell, Wyo.—Sealed proposals will be received at this office until 11 a. m. May 7, 1914, for furnishing material and labor and installing approximately 14,561 linear feet of metal weather stripping in doors and windows of public buildings at this post. Further information furnished on application. J. A. COLE, maj., Q. M. corps, U. S. A.

NOTICE TO CONTRACTORS.

OFFICE OF SUPERINTENDENT OF REPAIRS, 403 Post Office Building, San Francisco, Cal., May 1, 1913. SEALED PROPOSALS will be received at this office until 12 o'clock noon on the 28th day of May, 1913, and then opened, for the reconstruction of the electric wiring system, lighting fixtures, etc., at the U. S. Appraisers Building, San Francisco, Cal. in accordance with drawings and specifications which may be obtained at this office.

J. W. ROBERTS,
Supervising Superintendent. (*)

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415 in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 10:30 A. M. Thursday, May 8, 1913, for the moving and resetting of Quartermaster's Stores Nos. 1, 2, 3 and 4, now situated at Presidio wharf, in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 208 Service Building, Fillmore and Chestnut Streets, San Francisco.

By order of the Buildings and Grounds Committee

WILLIAM H. CROCKER,
Chairman. (*)

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at the Board Room No. 415 Exposition Building, Pine and Battery Streets, San Francisco, California, at 10:30 A. M. Tuesday, May 13, 1913, for the construction of a Lath House in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied

Fig. 3.—Showing "Self-Sentering."

both as reinforcement and forms. This and the double advantage not only of saving the needless cost of wooden forms, which would be wasted once the concrete had set, but did away with the unnecessary noise of the carpenters at work, which would have been almost impossible to endure in a bank building.

The "Self-Sentering" was merely id on the beams, as will be noted in illustration No. 2, the concrete on top being done in the usual manner. Owing to the fact that the floor could be used as a vault and therefore could stand an extremely heavy load, after iron rods were added between every rib of "Self-Sentering;" or in other words, at $3\frac{1}{2}$ inch spacing. For ordinary floor, this of course would have been unnecessary, the "Self-

Bliss & Faville are the Architects and M. C. Couchot is Consulting Engineer.

It is of course, well known that wooden forms are one of the most expensive items of reinforced concrete and the most useless, inasmuch as they are no part of the building, once the concrete has set. It is therefore not surprising that "Self-Sentering" construction, which serves both as forms and reinforcing, should have attained such a wide use throughout the East and is now coming so rapidly into use on the Pacific Coast. Its economy in the case of fireproof roofs, being especially marked, a notable instance being the new Wigwam Theatre, W. H. Crim, Architect; J. R. Cahill, General Contractor, and H. A. Chalmers, Inc., doing the roof work.

(1) That an 8-inch, vitrified, salt-glazed, iron-stone pipe sewer with 24 branches and 3 brick manholes with cast-iron frames and covers and galvanized wrought-iron steps be constructed along the center line of Grandview avenue from the center line of Twenty-first street, produced, to the center line of Twenty-second street, produced; that a 12-inch vitrified, salt-glazed, iron-stone pipe sewer with 5 Y branches and one brick manhole with cast-iron frame and cover and galvanized wrought-iron steps be constructed along the center line of Twenty-first street, produced, from the center line of Grandview avenue to the westerly line of North street, produced; and that a 15-inch vitrified, salt-glazed, iron-stone pipe sewer with 2 Y branches be constructed along the center line of Twenty-first street from the westerly line of North street, produced, to a point 4 feet easterly from the easterly line of North street, produced.

(2) That the following vitrified, salt-glazed, iron-stone pipe sewers and manholes be constructed: A 12-

inch with 7 Y branches along the center line of Charter Oak avenue from the northerly line of Burrows street, produced, to a point 137.75 feet northerly therefrom; a 12-inch with one Y branch along the center line of Charter Oak avenue between the northerly and center lines of Burrows street, produced; an 18-inch with one brick manhole with cast-iron frame and cover and galvanized wrought-iron steps along the center line of Charter Oak avenue between the center and southerly lines of Burrows street, produced; an 18-inch with 14 Y branches and one brick manhole with cast-iron frame and cover and galvanized wrought-iron steps along the center line of Charter Oak avenue from the southerly line of Burrows street, produced, to the center line of Egbert avenue, produced; an 18-inch with 15 Y branches along the center line of Egbert avenue from the center line of Charter Oak avenue to the northwesterly line of Phelps street, and an 18-inch along the center line of Egbert avenue between the northwesterly and center lines of Phelps street.

by a certified check payable to the order of the Panama-Pacific International Exposition Company, or cash in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 267 Service Building, Fillmore and Chestnut Streets, by depositing \$5.00 in cash, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Brick mantels will be used in the living and dining rooms. Plans provide for an automatic water heater. Bath room will have tile wainscot. The exterior of the building will be covered with rustic shingle and brick veneer. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$7,000. San Francisco. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, Matthew A. Little, 1347 4th Ave., S. F. The house will be erected on 17th avenue near Lake street and will be of the two-story and attic type. Interior will be handsomely finished in pine, hardwood and white enamel. Tile will be furnace heat and open fire places. Hardwood floors will be used throughout. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic cement plaster on metal lath and klinker brick veneer. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$1,000. San Francisco. Architect, Joseph Leonard, Phelan Bldg., S.

F Owners, Urban Realty Co. The dwelling has been designed for an eight-room house with bath. Interior will be finished in pine and redwood with hardwood veneer. Hardwood floors will be used throughout. Plans provide for furnace heat and an automatic water heater. There will be two open fire places with brick mantels. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic shingles and brick veneer. Plans are complete and the work will be done by Day Labor. Mr. Leonard is now purchasing all materials.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, Joseph M. Geary, 23rd and Folsom Sts., S. F. Owners, Parkside Building Co. The house will contain seven rooms, baths and a sleeping porch. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. Tile will be used in the bath room and kitchen. There will be furnace heat and open fire places. Mantels will be of tile or brick. The exterior of the house will be covered with shingles and klinker brick veneer. Plans are complete and the work will be done by Day Labor under the direct supervision of the architect.

RESIDENCES—1, 2 story and base, frame, \$4,000 each. San Francisco. Architect, E. B. Hallett, 1255 12th Ave., S. F. These houses will be erected on 47th avenue east of Balboa street, and each house has been designed to contain seven rooms and bath. Interior finish will be of pine with some elm panels. Hardwood

be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—6 story and base, brick and steel, \$60,000. San Francisco. Architects, Dunn & Kearns. Monadnock Bldg., S. F. Owner, A. Schleicher. This building, which has been mentioned here before, will be erected on the north line of Geary street east of Larkin, and will cover an area of $47\frac{1}{2}$ feet by $125\frac{1}{2}$ feet. Plans provide for 41 apartments of two and three rooms and bath each. All modern conveniences will be installed. Plans have been out for figures and segregated contracts will be awarded within a few days.

APARTMENT HOUSE—3 story and base, frame, \$12,000. San Francisco. Architects, A. F. and O. M. Rousseau. Monadnock Bldg., S. F. Owner, W. K. Bush. The building will be erected on a corner site and will be arranged for two and three room suites with baths. Interior finish will be of pine and hardwood with some hardwood floors. There will be a central heating system and wall beds. Tile will be used in the bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

CHURCH—2 story and base, frame, \$20,000. Crows Landing, Stanislaus Co., Cal. Architect, John J. Foley. 46 Kearny St., S. F. Owners, Roman Catholic Church. This building has been mentioned here a number of times before. Plans for the structure are now nearly complete and figures will shortly be called. The main auditorium will have a seating capacity of 400 people. Interior finish will be of pine and ornamental plaster. The exterior of the building, which has been designed in the Spanish Colonial style, will be covered with white cement plaster on metal lath. Two galvanized iron towers will be used.

CHURCH—1 story and base, concrete and frame, \$35,000. Visitation Valley, South San Francisco, Cal. Architect, John J. Foley. 46 Kearny St., S. F. Owner, St. Elizabeth Parish, Catholic. Only a part of the building will be undertaken this year. The basement, a main hall, will be built at a cost of about \$10,000. Two transepts will be added later. Plans are now being prepared and construction will be started within a month. The exterior of the building will be faced with cement plaster. Interior finish will be of pine and ornamental plaster. Plans provide for a meeting room, auditorium and gymnasium to be built first.

FLATS—2 story and base, frame, \$4,000. San Francisco. Architects, H. Gelfuss & Son, 46 Kearny St., S. F. Owner, W. Ehlers. The building will be erected at the corner of Kearny and Vallejo streets, and will cover an area of 20x51 feet. The interior has been arranged for two modern flats of four and five rooms each with bath. Interior finish will be of pine with some elm panels. There will be open fire places and tile mantels. Tile will also be used in the bath rooms. The exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$3,500. San Francisco. Architect, none. Owner, C. S. Howe, 110 Ord St., S. F. The building will cover an area of 25x

60 feet, and will contain two modern flats of five and six rooms each. All interior finish will be of pine. Some oak floors will be used. There will be open fire places and brick or tile mantels. The exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

HOTEL—7 story and base, reinforced concrete, \$50,000. San Francisco. Architect, Charles J. Rousseau. Phelan Bldg., S. F. Owners, Hansen & Johnson, 110 Jessie St. The building will be erected on Turk street east of Lodge. The first floor will be arranged for a number of stores besides the hotel entrance and lobby. Upper floors will contain 100 guest rooms and 68 baths. Plans include steam heat, hot and cold running water and elevator service. Interior finish will be of pine and hardwoods. Ornamental plaster will be used in the lobby. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with pressed brick and terra cotta. The work will be done by Day Labor.

HOTEL—4 story and base, brick and steel, \$25,000. San Francisco. Architect, Lewis M. Gardner. Phelan Bldg., S. F. Owners, Lange Investment Co. The building will be 25x100 with an L in the rear 25x16 feet. There will be stores on the first floor and a number of single rooms on the three upper floors. All rooms will have hot and cold running water. There will be steam heat and elevator service. Interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

OFFICE FIXTURES—Hardwood, \$3,000 to \$4,000. San Francisco. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owners, Pillsbury, Madison and Sutro. Plans are being prepared for fittings, interior finish and fixtures for the elaborate offices which are to be opened on the 10th floor of the new Standard Oil building by Attorneys Pillsbury, Madison & Sutro. All finish will be of hardwood. Plans are being prepared.

STORES AND LOFTS—3 story and base, brick. Cost not stated. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, Mr. Jacobs. The building will be erected on Drumm street in the wholesale district. The first floor will be arranged for stores and the upper two floors for light lofts. Interior finish will be of pine. Plans provide for metal window sash and frames. There will be patent store fronts. Exterior of the building will be faced with pressed brick. Plans are being prepared.

STORES AND OFFICES—7 story and base, Class A construction. Cost not stated. San Francisco. Architects, Ross & Burgren, 310 California St., S. F. Owners, Forbes Estate. The building will be erected on the new gore corner formed by the extension of Fulton street through the Civic Center to Market street. The building will have a frontage of 96 feet on Market street and 116 feet on the proposed extension of Fulton street. The first floor will be arranged for a number of stores fronting both Market and Fulton streets. Upper floors will be subdivided into modern offices. Construction will be Class A throughout with a com-

plete steel frame and exterior walls faced with pressed brick or terra cotta. Preliminary plans only have been prepared.

MANUFACTURES BUILDING—Frame construction. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the Manufactures Building have been completed and are now out for figures. Separate bids will be taken for the general construction and for the installation of the plumbing, water and sewer pipes. Bids will be opened on May 13th. Plans and specifications can be secured from the Director of Works at the Service Building. Official proposal appears in another column of this issue.

MOVING BUILDINGS—Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on May 8th by the Buildings and Grounds Committee of the Panama-Pacific Exposition Co. for the removal of the four quartermaster buildings now situated on the Presidio wharf. The work will include moving the buildings and resetting the same. Plans and specifications can be secured from the Director of Works. Official proposal appears in another column of this issue.

EXCAVATING AND PILED ROAD CONSTRUCTION—Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Two sets of bids were opened Thursday afternoon by the Buildings and Grounds Committee of the Panama-Pacific Exposition Co. One set of bids is for grading of the Municipal Auditorium, which is to be erected in the Civic Center by the Exposition Co. at a cost of over a million dollars. E. M. Huie & Co. were low for the excavating at \$32,018. Other bids were for the improvement of Fulton basin by the constructing of a piled roadway from Divisadero to Broderick street. Healy-Tibbatts Construction Co. were low at \$6,920. No contracts were awarded. A complete list of these figures appears under the heading of San Francisco in this issue.

LIBERAL ARTS BUILDING—Frame construction. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids were opened on Tuesday afternoon by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Co. for the construction of the Liberal Arts Building and for the plumbing, water and sewer pipes on the same building. Reese & Rountree and Lange & Bergstrom were both very low on the general construction, but no award has been made. Separate bid were taken for the general construction with lumber furnished by the Exposition Co. and for the contractor furnishing both labor and lumber. A complete list of these figures appears in this issue under the heading of San Francisco.

HOSPITAL ADDITION—1 story and base, reinforced concrete, \$18,000. San Francisco. Architect, Constructing Quartermaster, Fort Mason. Owners, United States Government. This building, which has been designed for a disinfecting building, will be erected at the Letterman General Hospital at the Presidio of San Francisco. Construc-

tion will be of reinforced concrete throughout. Considerable tile will be used. A large amount of special equipment will be installed. Plans are complete and figures are being taken. Bids will be opened at Fort Mason on May 6th. Plans and specifications can be secured from the Constructing Quartermaster's office.

NURSES' QUARTERS.—3 story and base, reinforced concrete, \$80,000. San Francisco. Architect, Constructing Quartermaster, Fort Mason. Owners, United States Government. This building will cover an area of 80x136 feet and will be designed in three wings with connecting passageways. Interior will be finished in pine and hardwoods. Bath rooms will have cement floors and tile wainscot. Steam heat will be furnished from the central plant at the Letterman General Hospital. Exterior of the building will be faced with cement plaster. Plans are nearly complete. Probably only one wing of the building will be erected this year.

ELECTRIC WORK AND LIGHT FIXTURES.—Cost not stated. San Francisco. Architect, none. Owners, United States Government. Supervising Superintendent J. W. Roberts, Post Office Building, will receive bids on May 28th for the reconstruction of the electric conduit system and for furnishing lighting fixtures in the United States Appraisers Building. Plans can be obtained from Mr. Roberts. The official proposal appears in another column of this issue.

Contracts Awarded.

APARTMENT HOUSE.—4 story and base, brick and steel, \$40,000. San Francisco. Architect, C. S. McNally, Mechanics Institute Bldg., S. F. Owner, Mr. Woods. Contractor, P. J. Lynch, Menadnock Bldg., S. F. Contract price not stated.

Auditorium Bids Opened By Owners.

First Contract on New Municipal Auditorium Opened By Panama-Pacific Company. E. M. Hule Low.

OAKLAND AND ALAMEDA

RESIDENCE — 2 story and base, frame, \$12,000. Berkeley, Alameda Co. Cal. Architect, Harris Allen, 2514 Hilleglass Ave., Berkeley. Owner, Alice Skyes. The dwelling will be erected in the Northbrae Tract and will contain in the neighborhood of nine rooms and several baths. There will also be two sleeping porches and a garage. Interior will be finished in pine, hardwoods and white enamel. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Hardwood floors will be used in the living and dining rooms and reception hall. Exterior of the house will be covered with shingles. Plans are complete and figures are now being taken by the architect.

RESIDENCE — 2 story and base, frame, \$15,000. Berkeley, Alameda Co. Cal. Architect, W. H. Ratcliffe, First National Bank Bldg., Berkeley. Owner, T. M. Sherman. The house will be erected at the corner of Dwight Way and Piedmont avenue, and will contain 12 rooms, two baths and a sleeping porch. Interior finish will be of pine, hardwoods and white enamel. There will be furnace heat and open fire places. Mantels will be of brick and tile. All floors will be of oak except in the bath rooms, which will have composition floors and tile wainscot. An automatic water heater will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BUNGALOW—1 1/2 story and base, frame, \$3,000. Berkeley, Alameda Co. Cal. Architect, none. Owners, Patrick Nelson Co., 2025 Addison St., Berkeley. The house will contain seven rooms and bath. Interior finish will be largely of pine with some hardwood veneer in the living and dining rooms. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. The tile will be used in

the bath room and kitchen. Exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor. The owners are now purchasing all materials.

BUNGALOW—1 story and base, frame, \$2,200. Oakland, Cal. Architects, Newson & Dixon, 812 Broadway, Oakland. Owner, R. A. McWilliams. The dwelling will contain six rooms and bath. Interior will be finished in pine throughout with hardwood floors in the living and dining rooms and reception hall. There will be open fire places and tile or brick mantels. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath and shingles. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base. **APARTMENT HOUSE**—3 story and base, frame. Cost not stated. Oakland, Cal. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, R. J. O'Connell. The building will be erected at the corner of 40th and Diamond streets and will cover an area of 43x105 feet. Interior will be arranged for eight suites of three rooms and bath each. All suites will have sleeping porches and will be fitted with wall beds. Interior will be finished in pine and hardwood with hardwood floors in the principal rooms. A central heating system will be installed. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and figures will be called for shortly.

APARTMENT HOUSE—2 story and base, concrete. Cost not stated. Oakland, Cal. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, R. J. Morse. The building will be erected at the corner of 40th and Opal streets and will be arranged for two stores on the first floor and two and three room suites on the upper floor. Interior will be finished in pine and hardwood. There will be connecting baths and wall beds. Tile will be used in the bath rooms. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SCHOOL—2 story and base. Class A construction, \$160,000. Oakland, Cal. Architect, J. J. Donovan. Security Bank Bldg., Oakland. Owners, City of Oakland. Plans have been approved for the Durant School, which is to be located on West street between 28th and 29th streets. The building will contain 18 class rooms and assembly hall. Construction will be fireproof throughout. The exterior of the building will be faced with pressed brick and cement plaster. Bids will be called for the work very shortly.

SCHOOL—2 story and base, reinforced concrete. Cost not stated. Sacramento, Cal. Architect, J. J. Donovan. Security Bank Bldg., Oakland. Owners, City of Sacramento. Architect Donovan has been commissioned to prepare plans for another of the Sacramento schools. The building will be as large as the school for which Architects Shea & Lofquist are preparing plans and which is to cost \$180,000. No details of construction can be given at this time as plans have not progressed far enough. The building will be located on Cypress avenue between Rainford and Spofford avenues.

STORES AND LOFTS—2 story and base, brick, \$15,000. Oakland, Cal. Ar-

chitect, Clay N. Burrell, Albany Bldg., Oakland. Owners, Morris and Mullin. The building will be erected on 14th street east of Grove and will contain stores on the first floor and large light lofts above. There will be a freight elevator. Interior finish will be of pine. There will be metal window sash and frames. The exterior of the building will be faced with pressed brick. Patent store fronts are specified. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

OFFICE BUILDING—11 story and base. Class A construction. Cost not stated. Oakland, Cal. Architects, L. B. Dutton & Co., Chronicle Bldg., S. F. Owners, First Trust and Savings Bank, Oakland. The building will be erected at the corner of 16th and San Pablo avenue and has been mentioned in these columns before. A contract for the steel work has been let and bids are now being taken for the general construction. The building will contain the banking quarters of the owners, which will occupy nearly the entire ground floor and basement. Upper floors will be arranged for modern offices both as single offices and ensuite. Plans provide for steam heat, elevator service, mail chutes and a vacuum cleaning system. There will be a complete steel frame with concrete and brick walls faced with pressed brick and terra cotta. Interior partitions will be of hollow tile and metal lath and plaster. Interior of the banking rooms will be finished in marble, tile, hardwoods, bronze and ornamental plaster. A general contract will be let shortly.

FLATS—2 story and base, frame, \$8,000. Oakland, Cal. Architects, Newson & Dixon, 812 Broadway, Oakland. Owner, Mr. Gattinay. The building has been designed to contain four flats of four rooms and bath each. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Contracts Awarded.

SCHOOL—2 and 3 story and base, reinforced concrete, \$397,037. Oakland, Cal. Architect, J. J. Donovan. Security Bank Bldg., Oakland. Owners, City of Oakland. Contractors, Williams Bros. & Henderson, Holbrook Bldg., S. F. Contract price, \$397,037.

Building Contracts Awarded.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

CHURCH—1 story and base, frame, \$25,000. Modesto, Stanislaus Co., Cal. Architect, John J. Foley, 46 Kearny St., S. E. Owners, Roman Catholic Church. Contractor, James McLaughlin, 244 Kearny St., S. F. Contract price, \$20,700. A complete list of the bids opened for this work appear under the heading of Fresno, Modesto, Stanislaus and Central California in this issue.

THEATRE, STORES AND OFFICES —2 story and base, brick and steel, \$45,000. Turlock, Stanislaus Co., Cal. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Turlock capitalists. The building will be erected on Main street and will be arranged for two stores and a theatre on the first floor. Upper floor will be subdivided into offices. The main auditorium of the theatre will have a seating capacity of 750 people. Interior will be finished in pine and ornamental plaster. Complete stage equipment will be installed. There will be a central heating system. The exterior of the building will be faced

with pressed brick. Plans are being prepared.

CHURCH—1 story and base, concrete and brick, \$30,000. Bakersfield, Kern Co., Cal. Architect, Edward T. Foulkes, Crocker Bldg., S. P. Owners, First Congregational Church of Bakersfield. This new building will be erected on Chester avenue and will cost in the neighborhood of \$30,000. The architect has just received the commission and no details of the work have been given out. Full particulars will appear in the next issue of the Building and Industrial News.

CHURCH—2 story and base, frame and concrete, \$20,000. Fresno, Fresno Co., Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, St. Alphonsus Church, Redemptorist Fathers. The building will be designed in the Romanesque and Mission style, with the exterior covered with cement plaster on metal lath. Main auditorium will have a seating capacity of 700 people. Father Weber is in charge of the work. It is the ultimate intention of the Redemptorist Fathers to establish a Catholic college in Fresno, and plans will be prepared for a number of buildings which will be erected after the completion of the church. Plans for the church have been completed and construction will be started shortly.

Contract Awarded On Modesto Church.

Architect John J. Foley Awards Contract for New Church Edifice to James L. McLaughlin.

(By Special Wire.)

Bids for the construction of the new Catholic Church edifice, which is to be erected in Modesto were opened on Thursday afternoon and a contract for the work was awarded to James L. McLaughlin, 244 Kearny street, San Francisco, for \$20,720. Plans for the building were prepared by Architect John J. Foley, 46 Kearny Street, this city. The following is a complete list of the bids as opened:

General Construction Modesto Church.

Architect Donovan has been commissioned to prepare plans for another of the new Sacramento schools. The building will be as large as the school for which Architects Shea & Lofquist are preparing plans and which is to cost \$180,000. No details of construction can be given at this time as plans have not progressed far enough. The building will be located on Cypress avenue between Rainsford and Spofford avenues.

LOS ANGELES AND SOUTH- ERN CALIFORNIA.

APARTMENT HOUSE—4 story and
base, brick and steel. Cost not stated.
Los Angeles, Cal. Architects, Train &
Williams, Exchange Bldg., L. A. Owner,
Mrs. George J. Bey. The building
will occupy a corner site and will
cover an area of 60x115 feet. Interior
has been arranged for 100 rooms,
which will be divided into two and
three room suites. All apartments will
have connecting baths and wall beds.
There will be steam heat, elevator
service, hot water plant and a vacuum
cleaning system. Interior finish will
be of pine and hardwoods. Bath rooms
will have cement floors and tile wain-
scot. The exterior of the building will
be faced with pressed brick. Plans are
complete and figures are being taken.

APARTMENT HOUSE—3 story and
base, brick. Cost not stated. Los An-
geles, Cal. Architect, Leonard L Jones,
I. W. Hellman Bldg., L. A. Owner, J.
P. Patch. The building will cover an
area of 50x100 feet and will contain 54
rooms, arranged in two and three room
suites. All apartments will have wall
beds and private bath rooms. Interior
finish will be of pine and hardwood.
There will be steam heat, elevator
service and a vacuum cleaning
system. The exterior of the building
will be faced with pressed brick. Plans
are now being prepared for the work.

CHURCH—1 story and tower, brick
and steel. Cost not stated. Long
Beach, Los Angeles Co., Cal. Archi-
tects, Frank T. Kegley, associated with
T. Foster Ena, Consolidated Realty
Bldg., L. A. Owners, Roman Catholic
Church, Father James A. Reardon, pas-
tor. The building will cover an area of
68x125 feet. The main auditorium will
seat 700 people. Interior finish will be
of pine, hardwoods and ornamental
plaster. A central heating system will
be installed. Construction will be of
brick and steel with two steel frame
towers. The exterior will be faced
with pressed brick. Plans are being
prepared.

HOTEL—6 story and base, rein-
forced concrete. Cost not stated. San
Diego, Cal. Architects, H. M. Patter-
son, O. T. Johnson Bldg., L. A. Owner,
Dr. Fred Stauffer. The building will
be erected on a corner site and will
cover an area of 100x100 feet. A large
hotel lobby, dining room with complete
kitchen equipment and two store rooms
will occupy the first floor. There will
be a restaurant and storage space and
heating plant in the basement. Upper
floors will be arranged for 126 guest

rooms and 85 baths. Plans include
steam heat, elevator service, a vacuum
cleaning system and hot and cold water
plant. Interior finish will be of pine
and hardwood. Bath rooms will have
tile floors and wainscot. Patent store
fronts and metal window sash and
frames. The exterior of the building
will be faced with cement plaster. A
lease on the entire building has been
made with Mrs. Florence C. Thorburn.

APARTMENT HOUSES—2, 3 story
and base, frame, \$80,000. Los Angeles,
Cal. Architect's name not given. Owner,
H. M. O'Malley, Pacific Sash and
Door Co., 3310 South Main St., L. A.
Each of these buildings will be ar-
ranged for 36 suites of two and three
rooms and bath. Interior will be hand-
somerly finished in pine, mahogany and
other hardwoods. There will be steam
heat, elevator service and a vacuum
cleaning system. All suites will have
wall beds. The exteriors will be cov-
ered with cement plaster on metal lath.
Plans are complete and the work will
be done by Day Labor.

GARAGE—1 and 2 story and base,
brick and steel, \$40,000. Los Angeles,
Cal. Architect, none Owner, F. O.
Jean, 452 Ardmore Ave., L. A. The
building has been designed for a com-
mercial garage and will cover an area
of 100x115 feet. Construction will be
of brick and steel with metal window
sash and frames, concrete floor and
steel roof trusses. A special gasoline
storage tank will be installed. Inter-
ior finish will be of pine with some
marble and tile. Exterior of the build-
ing will be faced with pressed brick.
Plans are complete and the work will
be done by Day Labor.

HOTEL—4 story and base, brick and
steel. Cost not stated. Los Angeles,
Cal. Architect, R. M. Jackson, Consol-
idated Realty Bldg., L. A. Owner, Mr.
Saroti. The building has been designed
for a commercial hotel and will cover
an area of 50x150 feet. There will be
stores besides the hotel lobby on the
first floor and a number of single rooms
with baths on the upper floors. Plans
include elevator service, steam heat
and a vacuum cleaning system. Inter-
ior finish will be of pine throughout
with some ornamental plaster in the
lobby. All rooms will be supplied with
hot and cold running water. Exterior
of the building will be faced with
pressed brick. Plans are being pre-
pared.

HOTEL—6 story and base, reinforced
concrete. Cost not stated. Los An-
geles, Cal. Architect, R. M. Taylor, Dou-
glas Bldg., L. A. Owner, Jacob Joseph.
The building will be arranged for four
stores and the hotel office and lobby
on the first floor and 110 guest rooms
on the upper floors. The building will
cover an area of 100x120 feet. About
75 per cent of the guest rooms will
have connecting baths. Interior finish
will be of pine and hardwood. There
will be steam heat, elevator service, a
vacuum cleaning system and hot water
supply. Metal window sash and frames
will be used. Bath rooms will have ce-
ment floors and tile wainscot. The ex-
terior of the building will be faced
with cement plaster. Plans are now
being prepared.

PORTLAND AND OREGON.

APARTMENT HOUSE—2 story and
base, brick. Cost not stated. St.
Helens, Ore. Architect, Ernest Kroner,
Worcester Bldg., Portland. Owner, J.
R. Ramsey. The building will cover an
area of 57x90 feet. The entire first
floor will be arranged for a store and
upper floor will be divided into four
room suites. All apartments will have
wall beds and connecting baths. In-
terior finish will be of pine. There will
be steam heat and elevator service.
The exterior of the building will be
faced with pressed brick. Plans are
complete and figures are being taken.

APARTMENT HOUSE—4 story and
base, reinforced concrete, 76,000. Port-
land, Ore. Architect, J. S. Atkins, Henry
Bldg., Portland. Owner, W. B. Buell,
Journal Bldg. The building will cover
an area of 100x100 feet. The first floor
will be arranged for the office, lobby,
social rooms and a public dining room.
Upper floors will be divided into suites
of two, three and four rooms each. All
apartments will have wall beds and
private bath rooms. Plans provide for
steam heat, elevator service, hot and
cold running water and a vacuum
cleaning system. Interior finish will
be of pine and hardwood. Bath rooms
will have cement floors and tile wain-
scot. The exterior of the building will
be faced with cement plaster. Plans
are being prepared.

STORES AND OFFICES—3 story and
base, brick and steel, cost not stated.
La Grande, Ore. Architects, Whidden
& Lewis, Lewis Bldg., Portland. Own-
ers, C. S. Jacobsen and N. K. West.
The building will occupy a corner site

and is to cover an area of 60x110 feet. Plans provide for several stores on the first floor and offices above. Interior finish will be of pine throughout. There will be metal window sash and frames. An elevator will be installed. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

FACTORY—5 story and base, brick and steel, \$70,000. Portland, Ore. Architects, Root & Hoose, Commercial Bldg., Portland. Owners, Modern Confectionery Co. This building has been mentioned here before when plans were first started. Working drawings are complete and bids are being taken. The building will cover an area of 70x100 feet with a one-story addition 30x100 feet in the rear. Plans include elevator service and a steam heating plant. Interior finish will be of pine. There will be fireproof doors, metal window sash and frames and metal lath and plaster interior partitions. The exterior of the building will be faced with pressed brick. Segregated figures on all parts of the work are being taken.

LIBRARY—1 story and base, brick and steel. Cost not stated. Albany, Ore. Architect, W. F. Tobey, Sherlock Bldg., Portland. Owners, Albany Carnegie Library Association. The building will contain two public reading rooms, librarian's office, stack room and children's room. The design is in the classic style with exterior faced with pressed brick trimmed with stone. Interior finish will be of pine and hardwood. Plans are being prepared. A central heating system will be installed.

LODGE HALL—4 story and base, brick and steel, \$80,000. Portland, Ore. Architects, Clausen & Clausen, Macleay Bldg., Portland. Owners, Portland Social Turn Verein. The building will be erected on 12th street between Main and Jefferson streets, and will be designed with a number of large social and lodge halls. A feature of the building will be the main banquet hall and gymnasium. Plans include steam heat, elevator service and vacuum cleaning. The exterior will be faced with pressed brick. Plans are being prepared and figures will be called for shortly.

WATER SYSTEM—Pumping plant and mains, \$200,000. Pendleton, Ore. Engineer, Frank C. Kelsey, Selling Bldg., Portland. Owners, City of Pendleton. The system will embrace about sixteen miles of water mains, two reinforced concrete reservoirs of 1,000,000 gallons capacity each and a concrete pumping station. Bonds have been sold and bids for the construction will be called for within a short time. Plans, specifications and complete information can be secured from Engineer Kelsey.

Contracts Awarded.

FACTORY—4 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, John Graham, Lyon Bldg., Seattle, associated with Doyle, Patterson & Beach, Portland. Owners, Ford Motor Car Co. Contractors, Pearson Construction Co., New York Bldg., Seattle. Contract price not stated.

SEATTLE AND WASHINGTON.

WAREHOUSE—5 story and base, reinforced concrete, \$100,000. Seattle, Wash. Architect, Capt. A. O. Powell, Central Bldg., Seattle. Owners, Port of

Seattle Commission. The building will be erected at the foot of Bell street. Construction will be fireproof throughout. Freight elevators will be installed and metal window sash and frames and fireproof doors will be used. The building is the first of several big structures which will be erected by the Port of Seattle Commission. Plans are now being prepared and figures will be advertised for shortly.

WAREHOUSE—6 story and base, reinforced concrete, \$100,000. Seattle, Wash. Architects, Franklin Engineering Co., Hoge Bldg., Seattle. Owner, Mrs. Weisner. The building will be erected on the corner of Westlake and Harrison streets and will cover an area 120 feet square. Construction will be fireproof throughout and will embrace all of the latest devices in warehouse construction. Interior partitions will be of hollow tile and metal lath and plaster. There will be fireproof doors, metal window sash and frames and an automatic sprinkler system. Elevators and spiral chutes will be used. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Alien Land Laws Of The Japanese.

A Complete Statement of Acts of the Japanese Parliament Relative to the Rights of Foreigners.

Relative to laws of Japan concerning the rights of foreigners to hold land in that country, the Sacramento Bee has written to the Japanese Consulate at San Francisco and that official has replied thereto, stating fully the laws and practices of his country in regard to the rights of aliens. It will be noticed that the reciprocal land law passed by the Japanese Parliament in 1910 has not been put into effect as yet. The letter makes a clear statement of the whole matter and is given herewith in full:

Consulate General of Japan, San Francisco, April 26, 1913.

To the Editor of The Bee—Sir: I have your communication of the 23d inst. asking me for a statement of the present laws and practices of Japan relative to the holding or acquisition of land by aliens in that Empire.

In reply thereto, I beg to state that, under date of April 13, 1910, a law was promulgated by the Japanese Parliament, which provided as follows:

Article 1. Foreigners domiciled or resident in Japan and foreign judicial persons registered therein shall enjoy the right of ownership in land, provided always that in the countries to which they belong such right is extended to Japanese subjects and Japanese juridical persons; and provided, further, in case of foreign juridical persons that they shall obtain permission of the Minister for Home Affairs in acquiring such ownership.

The foregoing provisions shall be applicable only to foreigners and foreign juridical persons belonging to the countries to be designated by Imperial ordinance.

Article 2. Foreigners and foreign juridical persons shall not be

capable of enjoying the right of ownership in land in the following districts: First, Hokkaido; second, Formosa; third, Karafuto; fourth, districts necessary for National defense.

The districts coming under No. 4, of the preceding paragraph shall be designed by Imperial ordinance.

Article 3. In case a foreigner or a foreign juridical person owning land ceases to be capable of enjoying the right of ownership in land, the ownership of such land shall accrue to the fiscus, unless he disposes of it within a period of one year.

In case a foreigner, by reason of losing his domicile or residence in Japan, or a foreign juridical person, on account of withdrawing his business establishment or office from Japan, ceases to be capable of enjoying the right of ownership in land the period mentioned in the preceding paragraph shall be five years.

If any land owned by a foreigner or a foreign juridical person is situated within the district designated under the last paragraph of the preceding article as necessary for National defense, and if, in consequence, the ownership of such land accrues to the fiscus, the damage thereby caused to the former owner shall be compensated.

In case of the failure to arrive at an accord with regard to the amount of compensation mentioned in the preceding paragraph, a suit may be brought before an ordinary Court of Justice.

Article IV. The date for putting the present law into force shall be determined by Imperial Ordinance.

There follow four other articles which I do not quote, because they relate to details not pertinent to the main issue, viz: The desire of the Japanese Government to put aliens on a par with native subjects in the matter of land ownership.

You will please note, from the provisions of Article I, that the extension of the privilege of land ownership, to foreigners, in Japan, is conditioned upon the extension of similar rights to the subjects of Japan by the Governments of other countries. In other words, it is designed to be reciprocal in its operation.

You will please note, further, that Article IV provides that the date for putting the law into force shall be determined by Imperial Ordinance.

Such Imperial Ordinance has not, as yet, been promulgated, due, undoubtedly, to the fact that the Government is now engaged in an investigation as to the rights and privileges extended to the subjects of Japan in the matter of land ownership by other Nations. There can be no doubt that when this investigation has been completed, such Ordinance, fixing the date of operation, will be promptly issued.

With regard to the status of this matter prior to the enactment of the law of April 13, 1910, there were certain restrictions, greatly softened in their practical operation by the existence of a liberal leasing system which granted rights and privileges to foreigners which were practically equivalent to ownership in fee simple.

provides that foreigners are entitled to
all civil rights excepting such as are

denied by statute or treaty stipulation.
The only statute on the subject con-
taining a prohibition is found in Article
XL of Imperial Edict XVIII, promul-
gated under date of January 6, 1874,
and reading as follows:

"Land shall not be sold, hypothecated
or mortgaged to foreigners, nor shall
deeds or titles be passed convey-
ing to them ownership rights."

It is proper to state here that such
prohibitive clauses in the Japanese
law, running against the right of an
alien to hold land, ran against him
as an individual, not as a corporation.
(Juridical person.) A corporation, or-
ganized under Japanese law, had the
same rights as a native subject
whether its stock was held in whole or
in part by foreigners. There never
was a time when aliens, organized as a
Japanese corporation, could not hold
title to land in Japan.

The leasing system, still operative
in Japan, may be briefly outlined as
follows:

The term superficies is given to land
leases, made to either natives or for-
eigners for purposes of forestry or
general improvement. No time limit
is fixed to this class of leases. They
may run for one year or be made in
perpetuity. Payments are subject to
agreement and may be made monthly
or annually. In case of perpetuity

the entire sum agreed upon may be
paid over to the lessor at the com-
mencement of the lease term, which,
practically, amounts to purchase.

Another form of lease is known as
emphyteose, granted to natives and
aliens alike for purposes of agricul-
ture and stock raising. These leases
run for periods ranging from twenty
to fifty years, with privilege of re-
newal. The condition of payment are
subject to contract, or the whole may
be paid at commencement of contract
term.

There is, in addition, an ordinary
form of lease which runs for periods
of less than twenty years with priv-
ilege of renewal. Such leases are sub-
ject to the ordinary laws of contract
and guarantee to foreigners every
right and privilege enjoyed by native
subjects.

Such is, in brief, a statement of the
present law and practices in Japan,
relative to the ownership of land by
foreigners.

Trusting that it has been made suf-
ficiently clear to indicate the liberal
attitude of my Government, I beg to
remain, very truly yours,

Y. NUMANO,

Acting Consul General of Japan.

HOW TO USE A GAS RANGE.

When lighting the top burners, turn
the burner on full and light at the back
of the burner. This enables the burner
to fill with gas and prevents lighting
back in air mixer, commonly referred
to as "popping."

The point of the flame should be just
high enough to touch or impinge on the
bottom of the cooking vessels. In boil-
ing water it should always be re-
membered that water boils at 212 deg.
F., and it is impossible to heat it above
that temperature.

Many people are under the impression
that boiling at a gallop shortens the
time of cooking, but such is not the
case. The evaporation of the water is
accelerated and makes it necessary to
replenish the supply of water. This
makes a demand for more fuel, which
is an additional expense for heating
the water thus supplied.

There is an old saying, "Matches are
cheaper than gas." The greatest econ-
omy is exercised when burners are
turned completely off when not in use
and relighted next time they are re-
quired.

How can I bake successfully on the
gas range? Always light the oven ten
minutes before using. This method in-
volves no waste of gas, as, if the article
is put into a cold oven, the cooking will

Veneered Panels of proven merits

The most particular people use only
WYBRO panels. They know of their merits.
They have proven their lasting qualities.

Why not order the best panels when
they cost no more than inferior ones?

Ask for WYBRO panel list. There are
168 varieties to choose from.

Wybro

Veneered Panels that

White Brothers

5th and Brannan Streets

San Francisco

take just so much longer and the re-
sults will not be so good.

Use tin pans, not sheet iron nor
agate, as they absorb the heat and are
liable to burn the food at the bottom
and sides before it is done. The heat
of the gas range oven is much more in-
tense and direct than that of the coal
range.

Do not put pans on the bottom of
oven—it prevents the proper heat cir-
culation. Always use the oven racks.

Regulate the burners according to
the kind of baking. If recipe calls for
a moderate oven, reduce the flame about
one-half when the pans are put in. For
a quick oven, keep burners lighted
during all, or nearly all, of the baking.
It is important to bear in mind that
it takes less time to bake in a gas
range than in a coal range.

In baking bread the gas may be turned
entirely off ten minutes before tak-
ing from the oven. The heat retained
in the oven will "bake out." Close the
damper in the flue pipe when baking;
this holds the heat.

How can I broil successfully on a gas
range? Meat suitable for broiling
should be fairly tender and surrounded
by fat, otherwise the result will be
hard and dry. The edge of the meat
should be cut through in several places
to prevent it from curling up, as the
outer skin contracts from the heat. No
seasoning should be added until the
meat is ready to serve, as salt toughens
the meat and draws out the juice. Heat
the oven ten minutes before broiling
or meat will simmer. Place the meat
about two inches from the flame,
always leaving the oven door open
when broiling. This is important both
for the choice flavor of the meat and
to prevent burning and smoke. Sear
first one side of the meat and then
the other so that the juices of the meat
are retained. Have the meat platter hot
when the steak is put on, first adding
the seasoning.

Always leave the oven doors open
after baking and broiling; this allows
the steam to escape and prevents rust-
ing.

How can I keep food warm on a gas
range? Heat the oven for ten minutes,
then turn out the gas. Put the food in
the oven. The oven will stay hot for
at least twenty minutes.

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22nd and 23rd
San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

**Bind your copies of the Building and Industrial
News in PERMANENT BOOK FORM**

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the **"BIG BEN" BINDER**

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH**.

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders **now** and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

Editorial Comment.

The matter of flood control of rivers has received added attention this year on account of the unprecedented floods in the East and the loss of life attendant thereto. The current number of the Scientific American has some interesting facts and illustrations concerning the normal and flood discharge of the great rivers of the country. Here in the West the streams come from the high mountains a comparatively short distance away. They come from the snows and their course is through the rocky canyons of the great ranges. They have great fall and tremendous erosive power, but their bed is so hard that the sediment deposited is comparatively small, although such rivers as the Sacramento, flowing through the long interior valley, runs out into a delta and carries as much silt as a sluggish stream will hold.

It is the Mississippi and its tributaries, however, that show the big facts in regard to erosion. The Missouri river carries down into the Mississippi annually a total amount of 400 million cubic yards of sediment. The total amount of excavation on the Panama canal for one year is 210 million cubic yards.

These great rivers with their enormous volume of water running into the seas are the leveling agencies of the earth. Great as is the amount of sediment deposited it comes from so wide an area that its effect is not noticed in an appreciable length of time. But in the lower courses of the stream it becomes distinctly noticeable from year to year and becomes an important factor in flood control.

Senator Works criticisms of the newspapers of the country is in the main just and deserved. The sensationalism and unreliability of the news published by most of the papers is a fit subject for criticism. True the public likes yellow journalism else William Randolph Hearst would never have made a success of journalism. And the success of Hearst has caused most of the other papers to follow in his wake for the financial success of the newspaper depends upon its circulation.

There seems to be a reaction against yellow journalism in some degree. Senator Works, who is chiefly known as a Christian Scientist, voices the sentiment of that cult in his criticism of the press. And the Christian Science Monitor is a model of a daily newspaper without the sensationalism, the details of crime and scandal that form the principal features of the ordinary daily paper.

As a reformer in the upper House of Congress, Senator Works has not been

a howling success. His opinions and self complacency fit about as well with the party that elected him as a Swede clergyman at an Irish wake. But his criticism of the press is just and merited in the main and while it will in all probability have little effect it will call public attention to a condition wherein the public needs education.

The published plans for the new Court House for New York City, which is to cost 10 million dollars, show a structure, the perspective view of which, looks not unlike the Roman Coliseum. A circular building whose outside walls consist of rows of columns and pilasters superimposed upon each other to the extent of four stories mark the general plan. Each succeeding story is smaller than the other, so that the last has the appearance of a flattened dome.

This design is said to be practical value for the purposes to which the building will be put as it will allow easy access to all the court rooms for litigants and their lawyers. The building looks odd in the picture, but as it is to be built of brick and stone and is to be of large proportions it is probably as easily designed and constructed as if built upon rectangular plans.

A SILICIOUS WOOD PRESERVATIVE.

Technical journals have recently mentioned the impregnation of timbers with melted paraffin and naphthalene, but the new Marr process is a great advance on this method. Diatomaceous earth, a silicious material, is ground so fine that ninety-two per cent passes a two-hundred-mesh screen. This is mixed with the melted paraffin and the naphthalene and timbers immersed in the mixture for four hours. As compared with the twelve to twenty-four hours required in creosoting, this is noteworthy. Furthermore, it is an open vat process. The wood is permeated to the center and resists the attack of marine borers and decay besides gaining in resilience. Nails hold better and do not rust nor does the wood become waterlogged. Hardwoods like white oak which resist other treatment yield to this preservative. The expense is small, for the mixture costs only three cents per pound and less than two pounds of solution are required for each cubic foot of timber.

"The fly swatters tell us," says Col. Ike Bryson of the Louisiana Press-Journal reflectively, "that a single fly in April will produce 7,600,000,000 in September. If this is true it is perfectly awful to think what a married fly can do."

Comparison Of European And American Building Construction.

Paper Read Before the Canton, (O.) Builders' Exchange
By Edmond Hermann, Architect, Canton, O.

Holocausts, on the one hand, like the Chicago fire, the Collinwood disaster and the New York conflagration where 140 girls lost their lives, and, on the other hand, collapsing of buildings still under construction, which we can observe in regular turn, are arousing the public conscience, and the time will arrive when a thorough house-cleaning among some of our most cherished and moss-covered institutions and traditions will and must be started.

In reading all these accidents the thinking man will look for comparison, and nothing will be nearer than to compare our state of affairs with those in foreign countries, and, in doing so, we find that all the odds are on our side. Our statistics tell us a greswome story, laying bare how we sacrifice yearly enormous fortunes through astonishing ignorance or punishable frivolity, and, on the other hand, show us that in enforcing laws to prevent accidents and providing well stringent measures for the safety of their citizens the respective governments of the European nations must be looked at as the wise heads of their families.

To find out what methods are used to obtain the desired results I will try to show you the practice and advantages of these methods. Voluminous building laws and ordinances regulate every phase of building construction, whether intended for new buildings or remodeling and alterations. They must be carried out to the letter, and to do this every government is keeping a staff of well trained men whose lives are devoted to the service of their respective departments, and these men also have the power to bring those violating the laws before the court, where they are prosecuted to the full extent of the law, regardless of their social standing. Before we will be able to obtain the same results in this country we will have to change the policies entirely which we are following at present.

As it is our daily experience that in enforcing our very few building laws we hear too much opposition to this, which very often is called "paternalism," and we also learn about "individual rights," etc., but if the authorities had always listened to those howls we would not have gone forward one step in our civilization.

To cite just one instance: You would not have without legislation, one sidewalk on a straight level in your city, but you would have to walk over planks, bricks, tiles, cinders, etc., up and down steps, with greatest dangers to your body. Applying to these cases, where the whole community, the entire population, is interested, the old phrase, "liberty and rights," referring to some individuals, is only nonsense.

Fortunately this idea is rapidly altering and we can see a new era, where the government will protect the people against dangers of all kinds, hidden in poorly constructed buildings, by enforcing laws rigidly.

The two main periods through which

buildings have to go to a successful end are, first: Their "planning and designing," and, second, their "construction and erection." These two distinct divisions are the same all over the world, but the carrying out of their meaning and purpose is so different from each other in this country and Europe that it pays well to compare them.

Our first operation, the "planning and designing," is done by the owner with the assistance of a professional adviser. The owner describes in general to his adviser a more or less rough image of the future structure and leaves it to him to work out plans and specifications, according to which the "construction and erection" can not be done well without having the "planning and designing" brought to a successful end, it is of the utmost importance that the owner select a skillful adviser. This adviser, which we might call "architect" or "builder," is supposed to understand not only the construction of buildings, but ought to be conversant with the laws of states, have knowledge of all the materials used in every building to the minutest detail, have a true understanding of the different arts and crafts, and last, but not least, he must be trained to harmonize beauty with utility.

All this knowledge is absolutely necessary to the adviser to give the owner the proper service. Why is it then, that when the adviser is equipped with all the aforementioned knowledge that we do not get the correct results?

The architects of other nations have to go through a severe training to call themselves architects. If anyone else would undertake to call himself an architect without having the required knowledge he would be liable to prosecution. In our country an architect is in many cases simply an amateur that has nerve enough to stand up before the people and take advantage of their ignorance and give them services for just a nominal fee that leads the owner into all kinds of trouble, with the final result that the construction of a building is only a makeshift of what it really ought to be.

The two great institutes of American architects, recognizing these facts, are endeavoring to secure laws which will require every architect to have a license, just the same as licenses are required for doctors, druggists, etc. This only will do away with dilettantism.

"Under 'Planning and Building' we furthermore have to consider the laws which are made to have the buildings constructed according to certain rules and regulations. These rules embody our experience which we have gained by former accidents and which are preventive measures.

Our second operation, "the construction and erection," is just the same as transferring theory into practice. The plans are turned over to the building contractor with the intention to have him carry out the ideas as laid

down on paper. In very few cities of our country plans must be submitted to some building department for approval. In Ohio the State requires all plans which comprise the construction of theatres, assembly halls, churches, school buildings, club and lodge buildings, to be approved by the State department, and some of the larger cities, as Columbus, Toledo, etc., require the submittance to the city building department.

In smaller cities there are no authorities to look after this matter, and the submittance for approval, as we, for instance, have in our city, is nothing more than a joke. In Germany every plan, whether it is a new building or a small addition to any dwelling house, or even a stable, must be submitted for approval to the authorities. The nation is divided into inspection districts of about the same size as our counties. In every county a learned architect is standing at the head of a department. This architect is called district inspector. To him every owner has to submit plans in duplicate. The plans must show the details of construction and must be accompanied by a plain but extensive description of the construction, showing for what purpose every room and every space will be used, what loads are intended to be placed, what safety factors are used for computing the different members supporting those loads, and the fee paid to the county treasurer is figured according to the class of construction and also according to the cubic contents.

The district inspector will only approve those plans which comply with the requirements of the laws. But it is not sufficient to have plans approved by the state department; it is just as essential to have trustworthy persons look after the erection and to find out whether the owner is constructing the building according to his approved plans. This again is done by members of the same inspection department, and there are two ways to do this. There are many ordinances in every city which govern the safety of the men employed by the contractors and protecting the people from injury they might receive by entering buildings under construction or passing by them on the streets. To have these ordinances properly enforced the police in general will look after and inspect every building under construction at short intervals. To get acquainted with these ordinances the police lieutenants gather their men every morning to read new ordinances and explain the meaning of old ones, so that the men might get acquainted in a short time with the requirements which the laws provide for those purposes.

The second supervision is done by a special commission of which the district architect is the head and which furthermore consists of three more practical builders appointed by the state authorities. This commission visits every building twice during its construction, the first time after the building is made watertight; that is, after it is covered with a roof, but not

plastered, so that the members of the building commission can see the rough construction and check every detail of the carrying members. After this visit the building dare not be touched for six consecutive weeks, except for work which must be done by plumbers and steamfitters. This period of six weeks is very essential to a healthy and dry building, when you consider that all the buildings used for occupancy of people must be of slow burning or fire-proof construction, and when you consider the time it takes to dry out a brick building, as it has no wall less than thirteen inches and the joists of which are never less than 6x8 inches, with the open spaces between filled with incombustible material, you will see the reason for giving the building such a long time to dry out.

The final inspection is when the owner applies for "receipt of acceptance," that is when it is ready for occupancy. The same commission which visited the building the first time concludes its inspection with this last visit and certifies the owner the acceptance, which means that he can rent the building. No part of any building can be occupied before this commission has made its final inspection. The fee, which is paid by taking out the building permit, is used for paying the expenses of this aforementioned building commission. You, perhaps, think that this way of constructing buildings is connected with a lot of red tape, but when you compare the results which must be obtained by complying with rigid building laws and ordinances and see in what a despicable way too many of our buildings are thrown together, regardless of any appearance and safety, you will admit that the slow and sure way of Germany is far more superior to that of ours.

The material used in the construction of buildings in Germany is the same as the material which we use here. The main difference is that the work is done in a more substantial way, and that it is the endeavor of every owner and builder to build houses at last and will pay better interest in the long run, instead of trying to break records every time a new structure is to be erected.

In large cities the height of buildings is limited in proportion to the width of the street, and so it is that long streets show you all the buildings of the same height, which we call skyline. This skyline would be monotonous to look at, but the roofs are constructed under all kinds of angles and are ornamented with dormers, towers, etc., and so relieve the monotony of its skyline. The main cornice of every house, when it is constructed of wood, must be protected with metal about five feet away from the adjoining building on either side to prevent the spreading of fire over to the neighbor's cornice. Every roof must be provided with plank gangs for inspection of the chimneys, which are regularly cleaned by licensed chimney sweepers, and all the ovens, stoves, kitchen ranges, etc., are heated by coal or wood, which necessitates a cleaning out of the chimneys to avoid clogging up.

The number and size of windows is regulated in proportion to the depth of the room. Wings adjoining front buildings must be closed by fire walls extending two feet above the roof and having iron doors to connect the different stories. All the openings along

the neighbor's lot must be closed with solid glass, brick or wire glass, and no window of any kind is permitted.

This gives in general some idea of the difference between European building construction and supervision and the construction and supervision in our country, and it is hoped that it will not be long before municipal and governmental laws in our States will control the erection of our buildings, whether public or private, along the same line.

NEW AMERICAN ARCHITECTURE.

An Interesting Comparison of Some of the Old and Insurgent School of Design.

In an interesting article on some of the bold things that Western architects have undertaken on their own initiative, and especially "the out-of-the-ordinary style that has been developed by the Chicago School of Architects," Charles S. White in writing for "Country Life in America," sets out the following parallel column comparison of the ideas of the conventional and "insurgent school" which will interest all house designers professional or otherwise:

Insurgent.

(1) Main floor frequently consists of three rooms—living room, dining room and kitchen. Frequently these three are contained in one large room, with wings for dining room and kitchen, screened from the living room. The library is usually part of the living room, and all parts of the house are in close inter-relation instead of each being partitioned separately.

(2) Floor plans and elevations are in harmony that is, the exterior of the building reflects its interior arrangement, so that one viewing the building from outside, might guess its interior arrangement.

(3) Rooms are often "articulated;" that is, each department if the house is in a separate wing, the kitchen being separated from the dining room wing, the living room from the kitchen, and so on.

(4) Windows, arranged in groups—usually casements, opening outward.

(5) Windows and window groups are often integral features of the structure. A house is constructed around the windows.

(6) Interior walls and ceilings are usually tinted and treated architecturally with casings, moulded or plain, applied to the walls in patterns dividing each wall into one or more panels. Pictures are used sparingly for decoration, and then in many cases they are murals, applied architecturally.

(7) Furniture is usually designed especially for the house, ordinary commercial, "ready made" furniture being unsuited to these rooms.

(8) Frequently houses are built on a stone, concrete or wooden base, there being no "water table" or underpinning line between ground and first floor.

(9) Decorative glass is largely used at windows, consisting of conventional, geometric, or flower forms patterned in metal-bar or grille.

(10) Facades are frequently made up of piers, with curtain walls between, pierced by running groups of windows. Horizontal lines of cornices, window sills and window caps are frequently accentuated by extending these lines entirely around the building.

Regular.

(1) Any number of rooms is provided, including hall, living room, dining, kitchen, reception room and library. Each room is separated from others by partitions, though often connected by means of wide openings.

(2) In the best work of the regular school there is a close relation between the outside and inside of the building, though not so intimate as in insurgent architecture.

(3) The floor plan is usually conceived as a sequence of rooms arranged within a parallelogram with or without wings.

(4) Windows, single or in groups; may consist of ordinary windows, casements, or both.

(5) Windows and window groups float on a background formed by the walls of the house wherever the exigencies of the problem or the fancy of the designer dictate.

(6) Interior walls and ceilings are treated in hundreds of different ways—sometimes with wall paper or tint, frequently with wood panels or beams. Pictures are framed and hung as desired.

(7) Any tasteful furniture may be used, though sometimes furniture is made to order, as in insurgent houses.

(8) Houses are of all types, some with and some without an underpinning.

(9) All sorts of windows are used chiefly plain glass.

(10) Facades are handled in the variety of ways familiar to most observers.

HOW TO MAKE BLUE PRINTS.

Although it seldom becomes necessary to make additional prints from a blue print, it is possible to do so provided the original print is first converted into one in which the lines are black and the background white. The operation to change the color is neither difficult nor does it require a great amount of time. It is merely necessary that the print be immersed in a solution formed of 1/4 ounce of ordinary borax dissolved in 6 ounces of cold water. When the print has blackened, it should be removed and washed thoroughly and placed in a solution of 1/4 ounce of gallic acid, 1/4 ounce of tannic acid and 8 ounces of cold water. This will intensify the color and make the print permanent.

THREE RANCHES PURCHASED.

A. J. Rich & Co., acting for the Solano Irrigated Farms, Inc., have purchased the Alice Page, Barnes' estate and West ranches, aggregating 1,000 acres, adjoining the new town of Solano for a sum approximating \$125,000. Both these ranches are well known throughout Solano county, and have been held by the present owners since the Spanish grants. All properties are situated on the line of the Oakland and Antioch railway.

MISSION BLOCK IMPROVED.

Oscar Heyman & Brother recently purchased from Mary J. Tracey and others the property at Mission street and Mohawk avenue, and are about to subdivide it into sixty lots. Contracts have been let for blumen street, sewers and sidewalks to cost \$10,000. The property is shortly to be placed on the market for home sites, and it is situated less than a block and a half from Onondaga avenue.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$28,000. Architect, W. G. Hind, 46 Kearny St., S. F. Owner, Dr. Clyde S. Payne. The building will be erected on the south side of Washington street east of Reed, and will cover an area of 57x66 feet. Interior has been arranged for eleven suites of two and three rooms each with wall bed and private bath. Interior finish will be of pine and elm panels. Hardwood floors will be used in the principal rooms. Plans provide for steam heat and a hot water system. Vacuum cleaning system will be installed. Bath will have tile wainscot. The exterior of the building will be covered with rustic and shiplap. Plans are complete and excavating has been started. The work will be done by Day Labor.

SAN FRANCISCO—Apartment house additions and alterations, frame construction, \$10,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The present three-story frame building at the corner of Divisadero and Oak streets will be altered so as to contain two stores on the first floor and 33 rooms on the upper floors. The structure covers an area of 50x100 feet. Suites will consist of two and three room apartments with bath. Walls beds will be used in all suites. Interior finish will be of pine and elm panels. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 4 story and base, brick and steel. Cost not stated. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, James E. Reiter. The building will be erected at the northwest corner of Fulton and Franklin streets, and will cover an area of 50x60 feet. Interior has been arranged for a number of two and three room suites with private bath and wall beds. Interior finish will be of pine throughout. There will be steam heat and elevator service. Bath rooms will have cement floors and tile wainscot. A hot and cold water system will be installed. Exterior of the building will be faced with cement plaster. Plans have been revised and figures are now being taken.

SAN FRANCISCO—Apartment house, 5 story and base, reinforced concrete, \$65,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, W. J. O'Brien. This work has been mentioned here before when plans were first started. Working drawings have been completed and a contract for the excavating and concrete work has been awarded to John Spargo. Contracts for the other parts of the work are being let. The building will contain eighty rooms, which are to be arranged in two and three room suites with bath. Wall beds will be used throughout. Plans provide for a hot and cold water system, elevator service, steam heat and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. Bath rooms will have cement floors and tile wainscot.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owners, E. J. and W. J. Keenan, Hayes and Masonic Sts., S. F. This building will be erected at the northeast corner of Hayes and Masonic streets and will cover an area of 25x73 feet. There will be six apartments arranged in two and three room suites. Interior finish will be of pine with some hardwood veneer and hardwood floors in the principal rooms. Plans provide for a central heating system. All suites will have private bath rooms and wall beds. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Owner, Anna Baker. The building will cover an area of 42x142 feet and has been arranged to contain 67 rooms, which will be divided into two and three room suites. All suites will have connecting baths and wall beds. Interior will be finished in pine and hardwoods with hardwood floors in the principal rooms. Bath rooms will have cement floors and tile wainscot. Plans include steam heat and a vacuum cleaning system. Exterior of the building will be covered with brick veneer and artificial stone trim. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$25,000. Architect, none. Owners, McKillop Bros., 540 Cole St., S. F. The building will cover an area of 30x150 feet. There will be a number of two and three room suites all of which will be equipped with wall beds and private bath rooms. Interior finish will be of pine with some elm panels and hardwood floors. Plans provide for a central heating system and hot water plant. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor. The owners are now in the market for all materials.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$25,000. Architect, George L. Shreshley, Lick Bldg., S. F. Owner's name withheld. The building will be erected on 28th street between Grove and Telegraph and will be arranged for two and three room suites. There will be wall beds, private bath rooms and other modern conveniences. Interior is to be finished in pine and hardwood. Hardwood floors will be used in the dining rooms and reception halls. Plans provide for steam heat and elevator service. A vacuum cleaning plant will be installed. The exterior of the building will be covered with cement plaster and rustic. Plans are being prepared.

OAKLAND, CAL.—Apartment house, 2 story and base, frame, \$6,000. Architects, Newsom & Dixon, 812 Broadway, Oakland, Owner, De Bonis. The building will be erected on 7th avenue and East 16th street, and will contain four apartments of four rooms and

bath each. Interior will be finished in pine and hardwoods. Wall bed will be used in each apartment. Bath rooms will have tile wainscot. There will be open fire places and tile brick mantels. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, Elmore Jeffrey, Citizens' National Bank Bldg., L. A. Owner, Mrs. Ella Barker. The building has been mentioned here before when plans were first started. The structure will cover an area of 105x71 feet, and has been arranged to contain 85 rooms arranged in two and three room suites with private bath and wall beds. Plans provide for steam heat and elevator service, a hot water plant and vacuum cleaning system. Interior finish will be of pine and hardwood. Cement floors and tile wainscot will be used in the bath rooms. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

RICHMOND, CONTRA COSTA CO., CAL.—Apartment house, 2 story and base, frame, \$20,000. Architect, James T. Narbett, Richmond. Owner, Calvi E. Eib. Contractors, The Park Jacobi Co., Richmond. Contract price, \$20,000. The building will be 40x110 feet and interior will be arranged for two and three room suites. Exterior will be faced with cement plaster on metal lath.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, J. Reif, Higgins Bldg., L. A. Owner, Adolph Jahnke, Contractor, J. J. Barrett, 3826 South Hill St., L. A. Contract price not stated.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel, \$70,000. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Owner, Howard W. Squires. Contractors, The Main Building Co., Thorpe Bldg., L. A. Contract price, \$70,000.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel, \$19,000. Architect, none. Owner, Dr. T. J. Rush. Contractors, Pacific States Investment Co., 107 S. Broadway, L. A. Contract price, \$19,000.

BANKS.

Contracts Awarded.

HONOLULU, HAWAII—Bank and offices, 4 story and base. Class A construction, \$135,000. Architects, Ripley & Davis, Honolulu. Owners, Charles Brewer Estate, Ltd. Contractors, Lord Young Engineering Co., Honolulu. Contract price, \$135,000.

BRIDGES, DAMS AND HARBOUR WORK.

STONY CREEK, GLENN CO., CAL.—Bridge, steel and concrete, \$150,000. Engineer, County Surveyor, Wilcox

owners, Glenn County. This work has been mentioned here before. Bids for the construction were recently opened but have all been rejected. A dispute over the right-of-way to one of the approaches could not be settled. This question will be taken up at the next meeting of the Board of Supervisors and settled, after which new proposals will be published and a contract let. Plans and specifications can be obtained from the County Surveyor at Willows.

SEATTLE, WASH.—Bridge, steel and concrete, \$200,000. Engineer, City Department of Engineering, Seattle. Owners, City of Seattle. Bids are again being taken for the construction of the West Wheeler street bridge. The Board of Public Works will open figures for this work on May 16th. Previous bids were all in excess of the amount available.

CHURCHES.

CAMARILLO, VENTURA CO., CAL.—Chapel, 1 story and wing, reinforced concrete, \$31,600. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Mission San Juan Camarillo. Contractors, W. A. Schumacher Co., Brockman Bldg., L. A., general construction, \$31,600. Other contracts aggregating \$10,000 have also been awarded.

COURT HOUSES.

SEATTLE, WASH.—Court house, 3 and 5 story, Class A construction, \$950,000. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, King County. Final plans and specifications for the construction of this building have been approved and bids for the work are being advertised. The building will be erected on the block bounded by Jefferson, James, 3rd and 4th streets. There will be a complete steel frame and fireproof construction throughout. The main portion of the building will be three stories high and the center portion five stories. Bids will be opened on June 3rd. Alternate proposals for granite facing and terra cotta facing are being taken. Plans can be secured from the architect.

FACTORIES & WAREHOUSES.

SEATTLE, WASH.—Factory, 4 story and base, reinforced concrete, \$50,000. Architect, Hans Pederson, Madison Bldg., Seattle. Owner, Hans Pederson. Mr. Pederson is preparing plans for a four-story reinforced concrete building which will be erected at the corner of Republican and Fairview streets. Construction will be fireproof throughout, with reinforced concrete walls, concrete floors and roof and metal window sash and frames. There will be fireproof doors and an automatic sprinkler system. Exterior of the building will be faced with cement plaster. The structure has been designed for an overall factory. Bids are to be called for at once.

FIRE HOUSES AND JAILS.

PORTLAND, ORE.—Fire houses, 2, 1 story and base, brick, \$15,000 each. Engineer, Chief Engineer City Fire Department, Portland. Owners, City of Portland. Plans for two new fire houses have been completed and bids

are now being taken. One of the stations will be erected at the corner of Third and Glisan, and the other at the corner of Fourteenth and Glisan. Plans can be secured from the Chief Engineer of the Fire Department at the City Hall. Bids will be opened on May 15th.

LOS ANGELES, CAL.—Fire house, 2 story and base, brick, \$15,000. Architect, Chief Building Inspector Backus, L. A. Owners, City of Los Angeles. The building will cover an area of 46x72 feet, and is to be erected at the corner of Central avenue and 14th street. Interior will be finished in pine throughout. There will be special plumbing, including shower baths. The exterior of the building will be faced with pressed brick. Plans have been completed and bids are being taken by the Purchasing Agent of the City.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, none. Owners, C. J. and W. J. Keenan, Hayes and Masonic Sts., S. F. The building will be erected in the rear of an apartment house which is now being erected by the same owners at the corner of Hayes and Masonic streets. The building will be arranged for two modern flats of five and six rooms each. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will be finished in tile. The exterior of the building will be covered with rustic and cement plaster. Plans are in the hands of the owners and the work will be done by Day Labor.

STOCKTON, SAN JOAQUIN CO., CAL.—Flats, 2 story and base, frame, \$6,000. Architect, Walter King, Elks' Bldg., Stockton. Owner, Mrs. A. Broksch. The building will be arranged for two flats of five and six rooms each with bath. Interior finish will be entirely of pine with some oak floors. Plans provide for gas grates with brick mantels. Bath rooms will have tile wainscot. The exterior of the building will be covered with rustic. Plans are being prepared and figures will be called for shortly.

SAN FRANCISCO—Flats, 2 story and base, frame, \$6,000. Architect, August Nordin, Mills Bldg., S. F. Owner Lucia Higginbotham. The building will be erected on 16th street and will cover an area of 27x45 feet. Interior has been arranged to contain four modern flats each of which will contain four rooms and bath. Interior finish will be of pine and redwood with some hardwood floors. There will be cement floors in the bath rooms and tile wainscot. Each flat will have an open fire place and tile or brick mantel. Exterior of the building will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

GARAGES.

SAN FRANCISCO—Garage, 2 story and base, reinforced concrete. Cost not stated. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Van Ness Avenue Realty Co. This building will be erected on property owned by the San Francisco Ladies' Relief Society on Van Ness avenue be-

tween Geary and Post streets, which has been leased for a long term of years to the Realty Co. The property has a Van Ness frontage of 275 feet and extends back a distance of 150 feet. Construction will be fireproof throughout. The structure has been designed for the exclusive use of firms in the automobile business and leases totalling over \$2,000,000 have already been made. Exterior of the structure will be faced with cement plaster. Plans are being prepared.

BAKERSFIELD, KERN CO., CAL.—Garage, 2 story and base, brick and steel. Cost not stated. Architect, none. Owners, Erb and Drury, Bakersfield. Plans are complete for a two-story addition to the present Bakersfield Garage and Auto Supply Co. The addition will cover an area of 57x149 feet and will contain additional storage space, machine shop and repair department. Exterior of the building will be faced with cement plaster. Bids will be taken by the owners.

GOVERNMENT WORK AND SUPPLIES.

Pittsburg High Voltage Insulator Co., Derry, Pa., item No. 71, \$1,947.75; delivery Derry, Pa.; 60 days.

Brookfield Glass Co., New York, N. Y., item 1, glass insulators, No. 137, \$1,379; delivery New York, 30 days; item 2, \$50.40; delivery New York, 10 days.

Wire Fence, Fort D. A. Russell.

Bids for 12,550 feet barbed wire fence at Fort D. A. Russell, Wyo., were received by Major J. A. Cole, quartermaster, U. S. Army, as follows:

Wilseck & Inman, Cheyenne, Wyo., \$750.

R. N. La Fontaine, Cheyenne, Wyo., \$1,693.

HALLS & SOCIETY BLDGS.

SAN FRANCISCO—Auditorium, 3 story and base. Class A construction, \$1,000,000. Architects, John Galen Howard, John Reid, Jr., and Frederick H. Meyer, associated. Supervision of Director of Works P. P. I. E. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for furnishing, fabricating and erecting the structural steel and iron work for this building have been completed and are now out for figures. Bids will be opened by the Buildings and Grounds Committee on May 29th. Plans and specifications can be obtained from the Director of Works. The official proposal appears in another column of this issue.

OAKLAND, CAL.—Auditorium, steel. Class A construction, \$500,000. Archi-

itects, Palmer & Hornbostel, New York, associated with J. J. Donovan, Security Bank Bldg., Oakland. This work has been advertised for bids twice before. Plans have been revised and new figures will be opened on May 15th. Plans and specifications can be obtained from Architect J. J. Donovan. The official proposal appears in another column of this issue.

TILLAMOOK, ORE.—Lodge hall, 2 story and base, brick and steel, \$25,000. Architect, E. E. McClaran, Lumber Exchange Bldg., Portland. Owners, I. O. O. F. Hall Association, Tillamook. The building will be designed for stores on the first floor and lodge rooms, assembly hall and banquet room on the upper floor. The structure will cover an area of 80x100 feet and will be classical in design. Considerable structural steel will be used. Interior finish will be of pine and hardwood. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN DIEGO, CAL.—Lodge hall, 5 story and base, brick and steel, \$75,000. Architect, Del W. Harris, Timken Bldg., San Diego. Owners, Woodmen of the World. The building will be erected at the corner of 12th and G streets and will cover a considerable area. The structure will be practically fireproof. The first floor is to be arranged for stores, a separate entrance for the lodge rooms and an entrance and lobby for a hotel. Upper floors will be divided into hotel rooms and lodge halls and the offices of the organization. Interior finish will be of pine and hardwood. There will be steam heat and elevator service. A vacuum cleaning system will be installed. Exterior of the building will be faced with pressed brick and terra cotta. Construction will be started in two months.

HOSPITALS.

SAN FRANCISCO—Hospital lighting fixtures. Cost not stated. Designers, Reynolds & O'Brien, Humboldt Bank Bldg., S. F. Owners, City and County of San Francisco. Reynolds & O'Brien have been commissioned by the Board of Public Works to prepare plans for the lighting fixtures for the new San Francisco Hospital Buildings. Plans are nearly complete and figures will be taken through the Board of Public Works within a few weeks.

SAN FRANCISCO—Hospital, 2 story and base, reinforced concrete, \$25,000. Architect, State Architect Woollett. Sacramento. Owners, State of California. The recent passage of a Senate bill provides for the construction of a hospital building adjoining the Ferry House in this city. This hospital will be under the control of the State Board of Harbor Commissioners. Plans for the building have just been started in the office of the State Architect and details of construction cannot be secured at this time. Further mention will be made in these columns as the work progresses.

ASTORIA, ORE.—Hospital, 2 story and base, brick and concrete, \$25,000. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owners, Clatsop County. The building will be designed for a County Hospital and will contain wards for males and females, dining rooms, kitchens, nurses' quarters and a large operating room. Plans in-

clude steam heat, elevator service and a vacuum cleaning plant. Interior will be finished in pine and hardwood. The exterior of the building will be face with cement plaster and pressed brick. Plans are now being prepared and will be a matter of three weeks or month before figures will be taken.

HOTELS.

RIVERSIDE, RIVERSIDE CO., CAL.—Hotel additions, 2, 4 story and base reinforced concrete. Cost not stated. Architect, Myron Hunt, Hibernal Bldg., L. A. Owner, Frank Miller. These additions will be in the form of two wings, each 48x100 feet, and will be built at the Riverside Inn. Ground floors will contain dining rooms, exhibit rooms and curio rooms. Upper floors will be arranged for guest rooms, all of which will have connecting baths. Plans provide for steam heat and elevator service. Exterior will be faced with cement plaster and roofs will be covered with red clay tile. Plans are being prepared. The work will be done by Day Labor.

LIBRARIES.

ALHAMBRA, LOS ANGELES CO., CAL.—Library, 1 story and base, reinforced concrete. Cost not stated. Architect's name not given. Owners, City of Alhambra. This building was mentioned in last week's issue. The time for opening bids has been postponed until May 17th. Plans can be secured from the City Clerk.

LOS ANGELES, CAL.—Library, 2 story and base, brick and concrete, \$30,000. Architects, Train & Williams, associated with F. M. Ashley, Exchange Bldg., L. A. Owners, City of Los Angeles. All bids received for this work were in excess of the appropriation. Plans are now being revised and new figures will be called for shortly. The following is a list of the bids received: Kling Co., \$32,217; C. Karseboom, \$33,220; Alta Planing Mill Co., \$36,171; Alpetter, Hall & Alpetter, \$38,791; F. O. Engstrum Co., \$41,320.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Lath house, frame construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for a building for the storage of lath, which is to be placed at the disposal of the horticultural department, have been complete and bids for its construction are now being taken. Bids will be opened by the Buildings and Grounds Committee on May 13th. Plans and specifications can be obtained from the Director of Works. An official proposal appears in this issue.

SAN FRANCISCO—Pile foundations. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on May 22nd for the construction of a pile foundation for the Building of Mines and for the Varied Industries Building. Plans can be secured from the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

RAILROAD CONST., STATIONS
AND EQUIPMENT.

FRESNO, FRESNO CO., CAL.—Railroad station, 2 story and base, frame, \$15,000. Engineers, Engineering Department Santa Fe R. R. Co., L. A. Owners, Santa Fe R. R. Co. A contract will be let within the next few days for the construction of a Mission style addition to the company's passenger station at Fresno. The building will be covered with cement plaster on metal lath and will have a clay tile roof. Plans are now being figured.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, A. T. Morris, 616 9th Ave., S. F. The dwelling will be erected on 12th avenue, south of Anza, and has been designed for a six room house with bath. Interior finish will be of pine, with hardwood floors in the living room, dining room and reception hall. There will be an open fire place in the living room with a large brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,700. Architect, none. Owner, Frank Pegel, 306 10th Ave., S. F. The house has been designed for a seven-room dwelling with bath and will be erected on Geary street east of Palm avenue. Interior finish will be of pine with elm panels in the living room. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and an open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with brick veneer and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, James Donahue, 914 Anza St., S. F. The house will contain six rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room and dining room. There will be a large open fire place in the living room with brick mantel. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, Thomas Scobie, 363 14th Ave., S. F. This house will be similar to a number of others erected recently by Mr. Scobie in the Richmond district. The dwelling has been designed for a seven-room dwelling with hardwood floors in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal

lath. Plans are complete and the work will be done by Day Labor.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, T. J. Davis, 2052 Central Ave., Alameda. The house will be erected on a corner lot and will contain seven rooms and bath. Interior finish will be of pine with elm panels. Hardwood floors will be used in the principal rooms. Bath room will be finished in tile. An automatic water heater will be installed. Plans provide for furnace heat and open fire places. Mantels will be of brick. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the owner.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$15,000. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, John P. Maxwell. The dwelling will be erected on Lee street near Montecito, and will contain twelve rooms besides the attic. A garage will be erected on the rear of the lot. Interior finish will be of pine, hardwood and white enamel. There will be furnace heat and open fire places. Bath rooms will be finished in tile. Hardwood floors will be used in the principal living rooms, dining room and reception hall. An automatic water heater will be installed. A large sleeping porch has also been provided for in the plans. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residences, 3, 2 story and base, frame, \$2,500 each. Architect, W. H. Hudson, Albany Bldg., Oakland. Owners, Mansfield Bros. These dwellings will be erected at the corner of Brookhurst and Market streets, and each will contain six rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the living rooms, dining rooms and kitchens. Exteriors will be covered with rustic and shingles. Plans are complete and in the hands of the owners who are now purchasing all materials. The work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$15,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Mrs. A. S. O'Conner. This dwelling has been mentioned here before when plans were first started. The house will contain twelve rooms, three baths and sleeping porch. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in all of the principal rooms. Bath rooms will be finished in tile. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Roof will be covered with either clay tile or shingles. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, W. H. Hudson, Albany Bldg., Oakland. Owner, Miss L. J. Lloyd. The dwelling has been designed for a nine-room house with two baths and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal living rooms and reception hall. Bath rooms will be finished in tile. There

will be furnace heat and open fire places. Mantels will be of brick or tile. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$2,250. Architect, none. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. The house will contain seven rooms, bath and sleeping porch. Interior will be finished in pine and hardwood with oak floors in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$4,800. Architect, Ivan C. Satterlee, 470 13th St., Oakland. Owner, Mary Schwartz. The house will be erected on Villa Vista avenue near Elwood, and has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine and white enamel. There will be furnace heat and open fire places. Mantels will be of brick. Hardwood floors will be used in the principal rooms. An automatic water heater will be installed. Tile will be used in the bath rooms and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

WINSHIP PARK, MARIN CO., CAL.—Residence, 2 story and base, frame, \$4,000. Architects, Hutchinson Bros., 470 13th St., Oakland. Owner, A. A. Robertson. The dwelling has been designed for an eight-room house with bath and sleeping porch. Interior finish will be largely of pine with some hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

SAN JOSE, SANTA CLARA CO., CAL.—Cottage, 1 story and base frame, \$1,500. Architect none. Owner, F. M. Bargas, 16 West Santa Clara Ave., San Jose. The dwelling will contain six rooms and bath. All interior trim will be of pine. Hardwood floors will be used in the living room and dining room. There will be a large open fire place and tile or brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, M. Fauth, 225 South Irving St., S. F. The house will contain six rooms and bath. Interior will be finished in pine with some hardwood floors. There will be open fire place in the living room with a large brick mantel. Bath room and kitchen will have tile wainscot. The exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner

BUILDING AND INDUSTRIAL NEWS.

who will do the work by Day Labor.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$1,500. Architect, F. D. Voorhees, Central Bank Bldg., S. F. Owner, F. W. Diehl. The dwelling will be erected at the corner of 34th and West streets, and has been designed for an eight-room house with baths and sleeping porch. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. Plans provide for open fire places and furnace heat. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the baths and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

OAKLAND, CAL.—Residence, 3 story and base, frame, \$15,000. Architects, Newsom & Dixon, 812 Broadway, Oakland. Owner, Mrs. G. T. Henshaw. The dwelling is to be erected in East Piedmont Heights and will be arranged for twelve rooms, three baths and sleeping porch. Interior will be finished in hardwood, pine and white enamel. Hardwood floors will be used throughout. Bath rooms will be finished in tile. There will be several open fire places with brick or tile mantels. Furnace heat and an automatic water heater will be specified. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

STOCKTON, SAN JOAQUIN CO., CAL.—Residence, 2 story and base, frame, \$8,000. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, Frank Gurnsey. The dwelling will be erected in the Bones Tract and will contain ten rooms, baths and sleeping porch. Interior will be finished in pine and hardwood. There will be furnace heat and open fire places. Hardwood floors will be used in the principal living rooms and reception hall. Mantels will be of tile and brick. Tile will be used in the bath rooms and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Residence, 2 story and base, frame, \$25,000. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owner, Sol. Aronson. Contractors, Pacific Engineering Co., H. W. Hellman Bldg., L. A. Contract price, \$25,000.

SCHOOLS.

SAN FRANCISCO—School, 2 story and base, concrete and frame, \$65,000. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. This building will be known as the Le Conte School. Working drawings were recently out for figures and all bids received by the Board of Public Works were rejected as above the estimates. Plans are now being revised and new figures will be called for in due time. The revision of the plans and re-advertising of the work will not be accomplished before the middle of next month.

SAN JOSE, SANTA CLARA CO., CAL.—School, 1 story and base, reinforced concrete, \$65,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Hester School District. This building has been mentioned here be-

fore when plans were first out for figures. These original plans have been revised and new bids are now being taken. The building will contain fourteen class rooms and an auditorium. Interior will be finished in pine with some cement and maple floors. A central heating system, modern school plumbing and a vacuum cleaning system will be installed. The exterior of the building will be faced with cement plaster. Plans can be secured from the Clerk of the Hester School Board at San Jose.

MAXWELL, COLUSA CO., CAL.—School, 1 story and base, reinforced concrete, \$25,000. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Maxwell School District. The building has been out for figures before but all bids were rejected. Plans are now being revised and figures will be called for on the new set within two weeks. The plan includes eight class rooms and assembly hall. Separate bids will be taken for the heating, plumbing and general construction. Exterior of the building will be faced with cement plaster. Plans can be secured from the architect.

QUINCY, PLUMAS CO., CAL.—School, 2 story and base, reinforced concrete, \$30,000. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Quincy Union High School. Architect Weeks has just been selected to prepare plans for this building. The school will be designed for a Union High School and will contain a number of class rooms, assembly hall and manual training departments. Other than the fact that it will be of the reinforced concrete type of construction details cannot be given at this time. Mr. Weeks will appear before the School Trustees next Saturday to receive instructions.

HUGHSON, STANISLAUS CO., CAL. School, 1 story and base, concrete and brick, \$18,000. Architects, Stone & Wright, 24 So. California St., Stockton. Owners, Hughson School District. The Clerk of the Board may be addressed at Modesto. The building has been designed for a four-room school. Interior will be finished in pine and maple. There will be a central heating system. A metal tile roof will be used. Exterior of the building will be faced with pressed brick. Plans are now being prepared for the work.

ONTARIO, SAN BERNARDINO CO., CAL.—School, 2 story and base, brick and concrete, \$40,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Ontario School District. The building has been designed for a high school and will contain ten class rooms, auditorium, manual training and domestic science departments. Interior will be finished in pine with maple floors. Plans provide for steam heat and modern ventilating system. Exterior walls will be of brick or reinforced concrete faced with cement plaster. Plans are now being prepared.

BAKERSFIELD, KERN CO., CAL.—School addition, 2 story and base, brick. Cost not stated. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. This work has been mentioned here before when plans were first prepared. Bids will be opened by the School Board of May 15th. The building will contain four class rooms and an auditorium. Plans can be secured from the architect.

VENICE, LOS ANGELES CO., CAL.—School, 1 story and base, frame, \$25,000.

Architects, Eager & Eager, Story Bldg., L. A. Owners, Venice School District. The building will be built around three sides of a court 100x112 feet. The main portion of the building will contain the auditorium, one of the wings four class rooms and the other wing domestic science and manual training departments. Interior will be finished in pine with maple floors. There will be a central heating system and vacuum cleaning. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and bids will be opened on May 14th.

SEATTLE, WASH.—Schools, 2, 2 story and base, reinforced concrete and brick, \$75,000 and \$50,000. Architect, Edgar Blair, 901 7th Ave., Seattle. Owners, City of Seattle. Plans for these two buildings have been completed and bids will be called for at once. The \$75,000 building is to be known as the Lake School. The \$50,000 will be expended in constructing an addition to the West Woodland School. Plans can be secured from the architect.

TACOMA, WASH.—School, 3 story and base, reinforced concrete, \$50,000. Architects, Heath & Grove, National Realty Bldg., Tacoma. Owners, City of Tacoma. Plans for the construction of a five-room brick school, known as the Hawthorne School, have been completed and figures will be called for at once. This work is estimated to cost \$22,000. Plans for the boys' and girls' gymnasium, two separate buildings, which are to be erected at the Stadium School, are also complete and bids will be taken shortly. Each of these buildings will cost in the neighborhood of \$50,000. Plans and specifications can be obtained from the architects. Construction of the gymnasium buildings will be of reinforced concrete.

SEWERS, STREET WORK AND WATER SYSTEMS.

OXNARD, VENTURA CO., CAL.—Water System, \$200,000. Engineers, Olmstead & Gillette, Wright and Callender Bldg., L. A. Owners, City of Oxnard. Plans for the construction of a municipal water system have been approved by the City Council and bids have been called. Bonds to the extent of \$200,000 have been voted for this work. Plans can be secured from either the City Clerk or from the engineers. The official proposal appears in another column of this issue. Bids will be opened at Oxnard on May 27th.

HALF MOON BAY, SAN MATEO CO., CAL.—Water tank and well drilling. Cost not stated. Engineer, none. Owners, Half Moon Bay High School. Bids will be opened on June 1st for furnishing and erecting a water tank and for drilling a well for the water supply of the Half Moon Bay High School District. Plans can be secured from Dr. W. A. Brooke, Half Moon Bay.

TULARE, TULARE CO., CAL.—Water System and tank. Cost not stated. Engineers, Sloan & Rohson, Nevada Bank Bldg., S. F. Owners, City of Tulare. Bids opened by the City Trustees for the construction of a water system in Tulare show the Des Moines Bridge and Iron Works low for the steel tank and tower at \$9,840, and they were awarded the contract. O. D. Vincent was low at about \$37,617.70 for the water system. Next low on this work was the Coalga Tank and Pumping Co. No action was taken.

STORES & OFFICE BUILDINGS

SAN FRANCISCO—Stores and lofts, 2 story and base, brick and steel. Cost not stated. Architect, Albert Pissis, Flood Bldg., S. F. Owner, Albert Pissis. The building will replace a present frame building occupying this corner. Leases have been made on a part of the building, the ground floor and basement, which will be designed for a modern bakery. Upper floor will be subdivided into lofts or offices. Interior finish will be of pine. There will be metal window frames and sash. Exterior will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Stores, additions and alterations, 2 story, brick, \$10,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners name withheld. This work is to be done on the building now located on the north side of Clay street east of Drumm. An elevator will be installed, patent store fronts and considerable structural steel and iron. Exterior will be faced with pressed brick. The building covers an area of 39x115 feet. Plans are complete and figures are being taken for the work.

SAN FRANCISCO—Stores, 1 story and base, concrete and frame, \$5,000. Architect, none. Owners, Stockholm & Allyn, Monadnock Bldg., S. F. The building will be erected on Ellis street west of Fillmore and will be arranged for three small stores. The structure covers an area of 50x80 feet. Interior finish will be of pine throughout. There will be large plate glass display windows. Exterior of the building will be faced with rustic and cement plaster. Plans are in the hands of the owners and the work will be done by Day Labor.

SAN FRANCISCO—Store and office alterations, brick and steel construction. Cost not stated. Architects, Righetti & Headman, Phelan Bldg., S. F. Owners, Montgomery Block Association. The building on Washington street just east of Montgomery will undergo extensive alterations. Plans for this work provide for structural steel and iron, elevators patent store fronts, electric work and plumbing. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Stores and flats, 3 story and base, reinforced concrete, \$12,000. Architects, E. A. Schumacher, associated with William Mosser, Nevada Bank Bldg., S. F. Owner, Louise Neppert. The building will be designed for a bakery and stores on the first floor and flats above. The structure will be erected on Stockton street south of Broadway. Interior finish will be of pine with some hardwood floors. Plans provide for patent store fronts and sidewalk doors. The exterior of the building will be faced with white cement plaster. Plans are complete and figures are being taken.

OAKLAND, CAL.—Stores, 1 story and base, brick, \$10,000. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owner, Hugo Abrahamson. The building will be erected at the corner of 26th and Broadway and will cover an area of 70x100 feet. There will be several modern retail stores with large

display windows in patent fronts. Interior finish will be of pine. There will be sidewalk doors. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for within a week or ten days.

OAKLAND, CAL.—Stores and lofts, 7 story and base. Class C construction, \$85,000. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owner, H. A. Powell. The building is to be erected at the corner of 13th and Webster streets and will cover an area of 50x100 feet. The first floor will contain stores and an attractive entrance to the upper floors. Upper floors will be subdivided into light lofts equipped in the most modern manner. There will be elevator service, metal window sash and frames and fireproof doors. Interior will be finished in pine and hardwood. Patent store fronts and sidewalk doors are to be specified. Exterior of the building will probably be faced with pressed brick. Working drawings have just been started.

STOCKTON, SAN JOAQUIN CO., CAL.—Store and office alterations, 4 story, brick and steel. Cost not stated. Architect, Walter King, Elks' Bldg., Stockton. Owners, Citizens' Investment Co. This work will include the installation of modern elevator equipment, oil burning furnaces and steam heat. New electric wiring, plumbing and store fronts will also be installed. Exterior of the building will be faced with pressed brick. Considerable structural steel and iron will be used. Plans for this work are now being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Stores and lofts, 9 story and base. Class A construction, \$225,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Metropolitan Fireproof Building Co. Contractor, O. F. Engstrom, 5th and Seaton Sts., L. A., general construction only. Contract price not stated. Plumbing, electric work, heating, marble and tile work, elevators and ornamental iron work will be let separately.

LOS ANGELES, CAL.—Store and office addition, 4 story and base, reinforced concrete, \$82,000. Architect, Harrison Albright, Laughlin Bldg., L. A. Owner, John D. Spreckels. Contractors, The John Roberts Co., Lankershim Bldg., L. A. Contract price, \$82,000.

LOS ANGELES, CAL.—Stores and lofts, 6 story and base, reinforced concrete, \$60,500. Architect, W. J. Saunders, International Bank Bldg., L. A. Owner, P. W. Braun. Contractors, Gavanagh-McCutcheon Co., Union Oil Bldg., L. A. Contract price, \$60,500.

SAN FRANCISCO—Stores and offices, 3 story and base, brick and steel, \$74,000. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owner, Santa Christiana Investment Co. Contractors, Mathies & Griffiths, 180 Jessie St., S. F., general construction. Contract price, \$70,000.

PORTLAND, ORE.—Offices, 5 story and base. Class A construction, \$80,000. Architects, MacNaughton & Raymond, Concord Bldg., Portland. Owners, Title and Trust Building. Contractors, Boyajohn-Arnold Co., Wilcox Bldg., Portland, general construction. Contract price, \$80,000.

SEALED PROPOSALS.

PROPOSALS FOR STRUCTURAL STEEL.

Pursuant to Resolution No. 5336 N. S., passed April 30, 1913, the Council of the City of Oakland will receive bids for furnishing of all of the materials, labor and workmanship required in connection with the fabrication, erection and completion of all structural cast iron and steel for the Auditorium to be erected on the grounds of Peralta Park, located on the southerly side of Twelfth street, between Fallon street and Lake Shore avenue or the proposed extension of said avenue, in the City of Oakland, California.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City through the Supervising Architect, and shall be enclosed in sealed envelopes endorsed "Bid for the fabrication, erection and completion of all Structural Cast Iron and Steel for the Auditorium," addressed to the Council and deposited by the bidder, or his agent, with said Council, while in session, between eleven o'clock a. m. and twelve o'clock Noon, Pacific Time, on the 15th day of May, 1913, in the room of the Council in the City Hall, Fourteenth and Washington streets, Oakland, and at the expiration of the time named the bids will be opened, examined, and publicly declared in open session of the Council.

Each bid shall bear the affidavit of the bidder as required by Section 126 of the Charter of the City of Oakland, and of the form which will be furnished by the City with the Form of Proposal.

No proposal or bid will be received or considered which is not accompanied by a check, certified by a responsible bank, payable to the order of H. E. Magill, City Clerk, in an amount not less than ten per centum (10%) of the aggregate amount of the proposal. Said check shall be forfeited to and be retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish bonds of the forms to be provided by the City and as required by the Charter of the City of Oakland, within twenty (20) days after receiving notice of the award.

After the award and upon the execution of the agreement, the contractor shall at the same time execute to the City of Oakland, and deliver to the Auditor a bond guaranteeing to the City of Oakland the faithful performance of the contract, and in an amount equal to twenty-five per centum (25%) of the amount named in the agreement. He shall likewise execute and deliver at the same time another and separate bond to protect any and all persons performing labor upon or furnishing materials to be used upon said work, and in an amount equal to fifty per centum (50%) of the amount named in said agreement.

The contractor will be required to begin work within five (5) days from the execution of the contract—unless otherwise notified in writing by the Owner or Architect—and to fully complete the entire work in accordance with the requirements of the agreement, plans, drawing and specifications prepared therefor to the entire satisfaction of the Commissioner of Public Works and the Council within the space of eight (8) calendar months.

from the date of execution of the bonds.

A bound set of the Forms of Proposal, and of the required Affidavits, Agreement, Bonds, Acknowledgments and Specifications will be furnished the contractors on demand at the office of Supervising Architect of the City of Oakland, Security Bank Building, corner 11th and Broadway. The plans and drawings may be had at the said office of the Supervising Architect after April 30th, 1913, within a reasonable time after application, and upon the deposit of Twenty-five Dollars (\$25.00); which deposit will be returned to the applicant when the said plans and drawings are returned to the Architect in good condition; one complete set of Plans and Drawings required for the work will be furnished each applicant complying with the above.

Each bidder shall submit a formal bid in strict accordance and without deviation from the plans and specifications, unless such deviation shall have been previously authorized by, and written permission therefor obtained from the Supervising Architect; in case any such deviation shall be allowed as aforesaid for the submission of the bid or award of contract notice thereof will be served upon all the bidders by the Architect.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved by the Council in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

H. E. MAGILL,
City Clerk.

By E. F. HOLLAND, Deputy.
Oakland, May 1, 1913.

NOTICE OF SALE OF MUNICIPAL BONDS OF THE CITY OF OXNARD, CALIFORNIA.

NOTICE IS HEREBY GIVEN: That sealed bids or proposals will be received by the Clerk of the City of Oxnard, California, until **eight o'clock p. m. on Tuesday, the 27th day of May, 1913**, for the purchase of two hundred (200) of the "Municipal Water Works Bonds, 1912" of said City of Oxnard; each of said bonds are of the denomination of five hundred dollars (\$500.00), are serials in character, are dated May 1st, 1912, bear interest at the rate of five per cent per annum, payable semi-annually on the first day of May and the first day of November of each year, principal and interest payable in gold coin of the United States at the office of the Treasurer of said City of Oxnard, eight of said bonds will be due on the first day of May, 1922, and eight of said bonds on the same day and date of each and every year thereafter until all of said bonds are paid.

Said bonds are issued under the authority of an act of the Legislature of the State of California, entitled "An Act authorizing the incurring of indebtedness by Cities, Towns and Municipal Corporations for municipal improvements and regulating the acquisition, construction and completion thereof," which became a law February 25th, 1901, and in accordance with the provisions of law and the ordinances of said City.

No bids or proposals for said bonds will be entertained at less than their face value, together with the accrued interest at the date of their delivery, and all bids or proposals submitted will be construed by the Board of Trustees to mean par and accrued interest to the date of delivery of said bonds, in addition to the premium offered, whether the bids or proposals set forth the same explicitly or not.

Said bonds are now ready for delivery, and will be delivered at the City Treasurer's office in said City of Oxnard, or at any designated place upon the payment by the purchaser of all the expenses incurred in the delivery of the bonds and transfer of the money necessary to make delivery and payment equivalent to a transaction at the office of said City Treasurer in said City of Oxnard. All bids or proposals providing for delivery at any place other than the said City of Oxnard will be construed by said Board of Trustees to mean the price bid in addition to the expenses of delivery, whether the bid sets forth the same explicitly or not.

Each proposal or bid shall be enclosed in a sealed envelope, addressed to the City Clerk of said City and endorsed "Proposal for Bonds." With each bid or proposal must be submitted a certified or cashier's check drawn upon some responsible bank of the State of California, and payable to the order of the Clerk of the City of Oxnard for an amount equal to five per cent of the face value of the bonds for which said bid or proposal is made, as a guarantee that the successful bidder will take up and pay for said bonds in accordance with his bid within twenty days after said Board of Trustees shall have passed a resolution awarding said bonds to said bidder; and said check and the amount represented thereby will be forfeited to said City on the failure of such successful bidder so to take up and pay for said bonds in the event the bid or proposal is accepted. Said Board of Trustees reserves the right to reject any or all bids or proposals, and to waive any informality in any bid as the interest of said City may require.

All bids must be unconditional and will be considered as such whether specifically so stated in the bid or not **IN AS MUCH AS THE VALIDITY OF SAID BONDS HAS BEEN FULLY ESTABLISHED BY A FINAL JUDGMENT OF THE DISTRICT COURT OF APPEAL, SECOND DISTRICT OF THE STATE OF CALIFORNIA.**

By order of the Board of Trustees of said City of Oxnard.

Dated April 29, 1913.

(Seal) G. R. BELLAH,
City Clerk and ex-officio Clerk of the Board of Trustees of the City of Oxnard. (*)

NOTICE TO CONTRACTORS.

NOTICE is hereby given that sealed bid will be received by the Clerk of the City of Oxnard, California, until **eight o'clock p. m. on the 27th day of May, 1913**, for the construction of a **Municipal Water Plant**. Plans and specifications may be seen at the office of the City Clerk, or obtained at the office of Obnstead & Gillean, 604 Wright and Candler Building, Los Angeles, California, on payment of \$2.50, the cost of printing. These plans and specifications are to become the

property of the purchaser. Each bid shall be accompanied by a certified check for twenty (20%) per cent of the amount of each bid which is less than One Thousand (\$1000) Dollars; or ten (10%) per cent of the amount of each bid which is more than One Thousand (\$1000) Dollars, payable to the said City Clerk, which check shall be forfeited to the City of Oxnard if the successful bidder fails to enter into a contract for the construction of the work with said city, or fails to furnish acceptable surety bonds within ten days after the award.

Bonds for the sum of \$100,000.00 have been voted for this work. All bids shall be on the form provided in the specifications. The Board of Trustees reserve the right to accept any or all bids.
G. R. BELLAH,
Clerk. (*)

PROPOSALS FOR GYMNASIUM EQUIPMENT.

SEALED BIDS WILL BE RECEIVED for the Equipment and Installation of the Gymnasias of the Lowell High School and the Girls High School. Specifications may be had at the office of the undersigned.

Sealed proposals will be received at open session of the Board of Education **Wednesday, May 21, 1913, at 2 o'clock p. m.**
M. R. NORRIS,
Acting Secretary Board of Education.

PROPOSALS FOR ROCK CRUSHER. OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of **2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 14th day of May, 1913**, for furnishing and delivering the following material:

The furnishing and delivering of one portable Rock Crusher with elevator and operating power for the use of the Street Repair Department.

Said material must be in accordance with the specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and shipment must be commenced within ten (10) calendar days and completed within sixty (60) calendar days from the date of the contract.

The amount of the bond for faithful performance of the contract has been fixed at \$500.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal, and no proposal will be considered unless accompanied by such check.

F. J. CHURCHILL,
Secretary.

PROPOSALS FOR BUILDING.

BUILDING, ETC.—Office of Constructing Quartermaster, Fort Huachuca, Ariz.—Sealed proposals, in triplicate, will be received here until **10 a. m. May 23, 1913**, for constructing, complete, including plumbing, heating, electric wiring, where required; three double captains' quarters, one troop barrack, one double lavatory, additions to buildings Nos. 19, 20 and 30 and installation of sewer extension at this post. Deposit of \$10 required to insure return of plans and specifications. Plans and specifications may also be

master, San Francisco. For further information address JOHN A. WAGNER, constructing quartermaster.

PROPOSALS FOR STONE.

STONE.—U. S. Engineer Office, Portland, Ore.—Sealed proposals for furnishing and delivering stone for jetty construction, mouth of Columbia River, Oregon and Washington, will be received at this office until 11 a. m., May 15, 1913, and then publicly opened. Information on application. J. F. McINDOE, maj., engs.

PROPOSAL FOR OIL TANK.

OIL TANK.—Sealed proposals indorsed "Proposals for Oil Tank" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m., May 24, 1913, and then and there publicly opened, for one steel oil storage tank at the naval station, Pearl Harbor, Hawaii. Estimated cost, \$20,500. Plans and specifications can be obtained on application to the bureau. WM. M. SMITH, acting chief of bureau.

PROPOSALS FOR PAVING BRICK.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 14th day of May, 1913, for furnishing and delivering the following material:

A quantity of vitrified paving brick, estimated at one hundred thousand (100,000).

Said material must be in accordance with the specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and delivery must be commenced within ten (10) calendar days and completed within thirty (30) calendar days from the date of the contract.

The amount of the bond for faithful performance of the contract has been fixed at \$1,000.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal, and no proposal will be considered unless accompanied by such check.

By order of the Board of Public Work.

F. J. CHURCHILL,
Secretary.

PROPOSAL FOR CANAL SUPPLIES.

CANAL CIRCULAR 775-B—Isthmian Canal Commission, Office of the General Purchasing Officer, Washington, D. C.—Sealed proposals will be received at his office until 2:30 p. m., May 20, 1913, under circular 775-B for furnishing bolting cable, galvanized wrought steel pipe, sewer pipe, files, hinges, pipe files, blocks, differential and tackle; carpenters' braces, garden hose, door frames, windows and screen windows, waste baskets, library paste, memorandum hooks, cardboard, bond paper and writing paper. Further information may be had upon application to F. C. ROGGS, major, corps of engineers, U. S. Army, general purchasing officer.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

PROPOSAL FOR BUILDING.

BRICK HOSPITAL.—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly marked on the outside of the sealed envelope "Proposals for Brick Hospital, Wahpeton Indian School, North Dakota," and addressed to the commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m., June 2, 1913, for furnishing materials and labor for the erection of a brick hospital at the Wahpeton Indian School, North Dakota, in strict accordance with the plans, specifications and instructions to bidders, which may be examined at this office, the offices of the supervisor of construction, Denver, Colo., and at the school. For further information apply to the superintendent of the Wahpeton Indian School, Wahpeton, N. D. F. H. ABBOTT, acting commissioner.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415 in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 10:30 A. M., Thursday, May 23rd, 1913, for the construction of a Pile Foundation for the Mines Building and Varied Industries Building in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the surties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$50.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415, in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11 A. M., Tuesday, May 27, 1913, for the installation of Plumbing, Sewer and Water Pipes of the Transportation Building in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount

examined at offices of chief quartermaster, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the surties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$50.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Fifty Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415, in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 11 A. M., Tuesday, May 27, 1913, for the Construction of the Transportation Building in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the surties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$50.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Fifty Dollars to the Exposition Company.

Items dealing with news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, and carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—3 story and base, frame, \$28,000. San Francisco. Architect, W. G. Hind, 46 Kearny St., S. P. Owner, Dr. Clyde S. Payne. The building will be erected on the south side of Kearny street east of Reed, and will cover an area of 57x66 feet. Interior has been arranged for eleven suites of two and three rooms each with wall bed and private bath. Interior finish will be of pine and elm panels. Hardwood floors will be used in the principal rooms. Plans provide for steam heat and a hot water system. Vacuum cleaning system will be installed. Baths will have tile wainscot. The exterior of the building will be covered with rustic and shiplap. Plans are complete and excavating has been started. The work will be done by Day Labor.

APARTMENT HOUSE ADDITIONS AND ALTERATIONS—Frame construction, \$10,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The present three-story frame building at the corner of Divisadero and Oak streets will be altered so as to contain two stores on the first floor and 32 rooms on the upper floors. The structure covers an area of 50x100 feet. Suites will consist of two and three room apartments with bath. Wall beds will be used in all sites. Interior finish will be of pine and elm panels. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—4 story and base, brick and steel. Cost not stated. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, James E. Reiter. The building will be erected at the northwest corner of Fulton and Franklin streets and will cover an area of 50x60 feet. Interior has been arranged for a number of two and three room suites with private bath and wall beds. Interior finish will be of pine throughout. There will be steam heat and elevator service. Bath rooms will have cement floors and tile wainscot. A hot and cold water system will be installed. Exterior of the building will be faced with cement plaster. Plans have been raised and figures are now being taken.

APARTMENT HOUSE—5 story and base, reinforced concrete, \$65,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, W. J. O'Brien. This work has been mentioned here before when plans were first started. Working drawings have been completed and a contract for the excavating and concrete work has been awarded to John Spargo. Contracts for the other parts of the work are being let. The building will contain eighty rooms which are to be arranged in two and three room suites with bath. Wall beds will be used throughout. Plans provide for a hot and cold water system, elevator service, steam heat and a vacuum cleaning system. The exterior of the build-

ing will be faced with cement plaster. Bath rooms will have cement floors and the wainscot.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, none. Owners, E. J. and W. J. Keenan, Hayes and Masonic Sts., S. F. This building will be erected at the northeast corner of Hayes and Masonic streets and will cover an area of 25x73 feet. There will be six apartments arranged in two and three room suites. Interior finish will be of pine with some hardwood veneer and hardwood floors in the principal rooms. Plans provide for a central heating system. All suites will have private bath rooms and wall beds. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

LATH HOUSE—Frame construction. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for a building for the storage of lath, which is to be placed at the disposal of the horticultural department, have been completed and bids for its construction are now being taken. Bids will be opened by the Buildings and Grounds Committee on May 13th. Plans and specifications can be obtained from the Director of Works. An official proposal appears in this issue.

PILE FOUNDATIONS—Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on May 22nd for the construction of a pile foundation for the Building of Mines and for the Varied Industries Building. Plans can be secured from the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

FLATS—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owners, C. J. and W. J. Keenan, Hayes and Masonic Sts., S. F. The building will be erected in the rear of an apartment house which is now being erected by the same owners at the corner of Hayes and Masonic streets. The building will be arranged for two modern flats of five and six rooms each. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will be finished in tile. The exterior of the building will be covered with rustic and cement plaster. Plans are in the hands of the owners and the work will be done by Day Labor.

ATTICATORIUM—3 story and base, Class A construction, \$1,000,000. San Francisco. Architects, John Golden Howard, John Reld, Jr., and Frederick H. Meyer, associated. Supervision of Director of Works, P. P. I. E. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for furnishing, fabricating and erecting the structural steel and iron work

for this building have been complete and are now out for figures. Bids will be opened by the Buildings and Grounds Committee on May 29th. Plans and specifications can be obtained from the Director of Works. The official proposal appears in another column of this issue.

HOSPITAL LIGHTING FIXTURES—Cost not stated. San Francisco. Designers, Reynolds & O'Brien, Humboldt Bank Bldg., S. F. Owners, City and County of San Francisco. Reynolds & O'Brien have been commissioned by the Board of Public Works to prepare plans for the lighting fixtures for the new San Francisco Hospital buildings. Plans are nearly complete and figures will be taken through the Board of Public Works within a few weeks.

HOSPITAL—2 story and base, reinforced concrete, \$25,000. San Francisco. Architect, State Architect Woollett; Sacramento. Owners, State of California. The recent passage of a Senate bill provides for the construction of a hospital building adjoining the Ferry House in this city. This hospital will be under the control of the State Board of Harbor Commissioners. Plans for the building have just been stated in the office of the State Architect and details of construction cannot be secured at this time. Further mention will be made in these columns as the work progresses.

RESIDENCE—3 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, A. T. Morris, 61 9th Ave., S. F. The dwelling will be erected on 12th avenue south of Anza and has been designed for a six-room house with bath. Interior finish will be of pine with hardwood floors in the living room, dining room and reception hall. There will be an open fire place in the living room with large brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$4,700. San Francisco. Architect, none. Owner, Frank Pegel, 30 10th Ave., S. F. The house has been designed for a seven-room dwelling with bath and will be erected on Geary street east of Palm avenue. Interior finish will be of pine with elm panels in the living room. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat, an open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with brick veneer and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, James Donahue, 91 Anza street, S. F. The house will contain six rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room and dining room. There will be a large open fire place in the living room with brick mantel. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, Thomas Sobhe, 363 14th Ave., S. F. This house will be similar to a number of others erected by Mr. Sobhe recently in the Richmond District. The dwelling has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine and hardwood with hardwood floors in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath room will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$25,000. San Francisco. Architect, none. Owners, McKillop Bros., 540 Cole St., S. F. The building will cover an area of 30x150 feet. There will be a number of two and three room suites, all of which will be equipped with wall beds and private bath rooms. Interior finish will be of pine with some elm panels and hardwood floors. Plans provide for a central heating system and hot water plant. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor. The owners are now in the market for all materials.

FLATS—2 story and base, frame, \$6,000. San Francisco. Architect, August Nordin, Mills Bldg., S. F. Owner, Lucia Higginsbotham. The building will be erected on 16th street and will cover an area of 27x45 feet. Interior has been arranged to contain four modern flats each of which will contain four rooms and bath. Interior finish will be of pine and redwood with some hardwood floors. There will be cement floors in the bath rooms and tile wainscot. Each flat will have an open fire place and tile or brick mantel. Exterior of the building will be covered with rustic and cement plaster. Plans are complete and the work will be done by Day Labor.

GARAGE—2 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Van Ness Avenue Realty Co. This building will be erected on the property owned by the San Francisco Ladies' Relief Society on Van Ness avenue between Geary and Post streets, which has been leased for a long term of years to the Realty Co. The property has a Van Ness avenue frontage of 275 feet and extends back a distance of 150 feet. Construction will be fireproof throughout. The structure has been designed for the exclusive use of firms in the automobile business, and leases totaling over \$2,000,000 have already been made. Exterior of the structure will be faced with cement plaster. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, M. Fauth, 225 South Irving St., S. F. The house will contain six rooms and bath. Interior will be finished in pine with some hardwood floors. There will be open fire place in the living room with a large brick mantel. Bath room and kitchen will have tile wainscot. The exterior

of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SCHOOL—2 story and base, concrete and frame, \$65,000. San Francisco. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. This building will be known as the Le Conte School. Working drawings were recently out for figures and all bids received by the Board of Public Works were rejected as above the estimates. Plans are now being revised and new figures will be called for in due time. The revision of the plans and re-advertising of the work will not be accomplished before the middle of next month.

STORES AND LOFTS—2 story and base, brick and steel. Cost not stated. San Francisco. Architect, Albert Pissis, Flood Bldg., S. F. Owner, Albert Pissis. The building will replace a present frame building occupying this corner. Leases have been made on a part of the building, the ground floor and basement, which will be designed for a modern bakery. Upper floor will be subdivided into lofts or offices. Interior finish will be of pine. There will be metal window frames and sash. Exterior will be faced with pressed brick. Plans are being prepared.

STORES, ADDITIONS AND ALTERATIONS—2 story, brick, \$10,000. San Francisco. Architects, O'Brien Bros., Clinic Bldg., S. F. Owner's name withheld. This work is to be done on the building now located on the north side of Clay street east of Drumm. An elevator will be installed, patent store fronts and considerable structural steel and iron will be used. Exterior will be faced with pressed brick. The building covers an area of 39x115 feet. Plans are complete and figures are being taken for the work.

STORES—1 story and base, concrete and frame, \$5,000. San Francisco. Architect, none. Owners, Stockholm & Allyn, Monadnock Bldg., S. F. The building will be erected on Ellis street west of Pillmore, and will be arranged for three small stores. The structure covers an area of 50x50 feet. Interior finish will be of pine throughout. There will be large plate glass display windows. Exterior of the building will be faced with rustic and cement plaster. Plans are in the hands of the owners and the work will be done by Day Labor.

STORE AND OFFICE ALTERATIONS—Brick and steel construction. Cost not stated. San Francisco. Architects, Riggett & Headman, Phelan Bldg., S. F. Owners, Montgomery Block Association. The building on Washington street just east of Montgomery will undergo extensive alterations. Plans for this work provide for structural steel and iron, elevators, patent store fronts, electric work and plumbing. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

STORES AND FLATS—3 story and base, reinforced concrete, \$12,000. San Francisco. Architects, E. A. Schumacher associated with William Mooser, Nevada Bank Bldg., S. F. Owner, Louise Neppert. The building will be designed for a bakery and stores on the first floor and flats above. The structure will be erected on Stock-

ton street south of Broadway. Interior finish will be of pine with some hardwood floors. Plans provide for patent store fronts and sidewalk doors. The exterior of the building will be faced with white cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

STORES AND OFFICES—3 story and base, brick and steel, \$70,000. San Francisco. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owner, Santa Christina Investment Co. Contractors, Matthies & Griffiths, 180 Jessie St., S. F., general construction. Contract price, \$70,000.

BANK AND OFFICES—4 story and base. Class A construction, \$135,000. Honolulu, Hawaii. Architects, Ripley & Davis, Honolulu. Owners, Charles Brewer Estate, Ltd. Contractors, Lord-Young Engineering Co., Honolulu. Contract price, \$135,000.

OAKLAND AND ALAMEDA COUNTY.

AUDITORIUM STEEL—Class A construction, \$500,000. Oakland, Cal. Architects, Palmer & Hornbostel, New York, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. This work has been advertised for bids twice before. Plans have been revised and new figures will be opened on May 15th. Plans and specifications can be obtained from Architect J. J. Donovan. The official proposal appears in another column of this issue.

RESIDENCE—2 story and base, frame, \$3,000. Alameda, Alameda Co., Cal. Architect, none. Owner, T. J. Davis, 2652 Central Ave., Alameda. The house will be erected on a corner lot and will contain seven rooms and bath. Interior finish will be of pine with elm panels. Hardwood floors will be used in the principal rooms. Bath room will be finished in tile. An automatic water heater will be installed. Plans provide for furnace heat and open fire places. Mantels will be of brick. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the owner.

RESIDENCE—2 story and base, frame, \$15,000. Oakland, Cal. Architects, Milvain Bros., Delger Bldg., Oakland. Owner, John P. Maxwell. The dwelling will be erected on Lee street near Montecito and will contain twelve rooms besides the attic. A garage will be erected on the rear of the lot. Interior finish will be of pine, hardwood and white enamel. There will be furnace heat and open fire places. Bath rooms will be finished in tile. Hardwood floors will be used in the principal living rooms, dining room and reception hall. An automatic water heater will be installed. A large sleeping porch has also been provided for in the plans. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCES—3, 2 story and base, frame, \$2,500 each. Oakland, Cal. Architect, W. H. Hudson, Albany Bldg., Oakland. Owners, Mansfield Bros. These dwellings will be erected at the corner of Brockhurst and Market streets and each will contain six rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and brick or tile mantels. Tile will be used in the bath rooms and

kitchens. Exteriors will be covered with rustic and shingles. Plans are complete and in the hands of the owners who are now purchasing all materials. The work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$15,000. Berkeley, Alameda Co., Cal. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Mrs. A. S. Conner. This dwelling has been mentioned here before when plans were first started. The house will contain twelve rooms, three baths and sleeping porch. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in all of the principal rooms. Bath rooms will be finished in tile. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Roof will be covered with either clay tile or shingles. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, W. H. Judson, Albany Bldg., Oakland. Owner, Miss L. J. Lloyd. The dwelling has been designed for a nine-room house with two baths and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal living rooms and reception hall. Bath rooms will be finished in tile. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$3,250. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co, 2025 Addison St., Berkeley. The house will contain seven rooms, bath and sleeping porch. Interior will be finished in pine and hardwood with oak floors in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BUNGALOW—1½ story and base, frame, \$4,500. Oakland, Cal. Architect, Ivan C. Satterlee, 470 13th St. Oakland. Owner, Mary Schwartz. The house will be erected on Villa Vista avenue near Elwood, and has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine and white enamel. There will be furnace heat and open fire places. Mantels will be of brick. Hardwood floors will be used in the principal rooms. An automatic water heater will be installed. Tile will be used in the bath rooms and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$25,000. Oakland, Cal. Architect, George L. Streshley, Lick Bldg., S. F. Owner's name withheld. The building will be erected on 28th street between Grove and Telegraph, and

will be arranged for two and three room suites. There will be wall beds, private bath rooms and other modern conveniences. Interior is to be finished in pine and hardwood. Hardwood floors will be used in the dining rooms and reception halls. Plans provide for steam heat and elevator service. A vacuum cleaning plant will be installed. The exterior of the building will be covered with cement plaster and rustic. Plans are being prepared.

APARTMENT HOUSE—2 story and base, frame, \$6,000. Oakland, Cal. Architects, Newson & Dixon, 812 Broadway, Oakland. Owner, De Bonis. The building will be erected on 7th avenue and East 16th street, and will contain four apartments of four rooms and bath each. Interior will be finished in pine and hardwoods. Wall beds will be used in each apartment. Bath rooms will have tile wainscot. There will be open fire places and tile or brick mantels. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—1 story and base, frame, \$4,500. Oakland, Cal. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owner, F. W. Diehl. The dwelling will be erected at the corner of 34th and West streets, and has been designed for an eight-room house with baths and sleeping porch. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. Plans provide for open fire places and furnace heat. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the baths and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—3 story and base, frame, \$15,000. Oakland, Cal. Architects, Newson & Dixon, 812 Broadway, Oakland. Owner, Mrs. G. T. Henshaw. The dwelling is to be erected in East Piedmont Heights and will be arranged for twelve rooms, three baths and sleeping porch. Interior will be finished in hardwood, pine and white enamel. Hardwood floors will be used throughout. Bath rooms will be finished in tile. There will be several open fire places with brick or tile mantels. Furnace heat and an automatic water heater will be specified. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

STORES—1 story and base, brick, \$10,000. Oakland, Cal. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owner, Hugo Abramson. The building will be erected at the corner of 26th and Broadway, and will cover an area of 70x100 feet. There will be several modern retail stores with large display windows in patent fronts. Interior finish will be of pine. There will be sidewalk doors. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for within a week or ten days.

STORES AND LOFTS—7 story and base, Class C construction, \$85,000. Oakland, Cal. Architect, F. D. Voorhees, Central Bank Bldg., Oakland.

Owner, H. A. Powell. The building is to be erected at the corner of 13th and Webster streets and will cover an area of 50x100 feet. The first floor will contain stores and an attractive entrance to the upper floors. Upper floors will be subdivided into light lofts equipped in the most modern manner. There will be elevator service, metal window sash and frames and fireproof doors. Interior will be finished in pine and hardwood. Patent store fronts and sidewalk doors are to be specified. Exterior of the building will probably be faced with pressed brick. Working drawings have just been started.

SAN JOSE AND THE SANTA CLARA VALLEY.

COTTAGE—1 story and base, frame, \$1,500. San Jose, Santa Clara Co., Cal. Architect, none. Owner, F. M. Bargas, 16 West Santa Clara Ave., San Jose. The dwelling will contain six rooms and bath. All interior trim will be of pine. Hardwood floors will be used in the living room and dining room. There will be a large open fire place and tile or brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

WATER TANK AND WELL DRILLING—Cost not stated. Half Moon Bay, San Mateo Co., Cal. Engineer, none. Owners, Half Moon Bay High School. Bldg will be opened on June 1st for furnishing and erecting a water tank and for drilling a well for the water supply of the Half Moon Bay High School District. Plans can be secured from Dr. W. A. Brooke, Half Moon Bay.

SCHOOL—1 story and base, reinforced concrete, \$65,000. San Jose, Santa Clara Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owens, Hester School District. This building has been mentioned here before when plans were first out for figures. These original plans have been revised and new bids are now being taken. The building will contain fourteen class rooms and an auditorium. Interior will be finished in pine with some cement and maple floors. A central heating system, modern school plumbing and a vacuum cleaning system will be installed. The exterior of the building will be faced with cement plaster. Plans can be secured from the Clerk of the Hester School Board at San Jose.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

GARAGE—2 story and base, brick and steel. Cost not stated. Bakersfield, Kern Co., Cal. Architect, none. Owners, Erb & Drury, Bakersfield. Plans are complete for a two-story addition to the present Bakersfield Garage and Auto Supply Co. The addition will cover an area of 51x149 feet, and will contain additional storage space, machine shop and repair department. Exterior of the building will be faced with cement plaster. Bids will be taken by the owners.

SCHOOL ADDITION—2 story and base, brick. Cost not stated. Bakersfield, Kern Co., Cal. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. This work has been mentioned here before when plans were first prepared. Bids will be opened by the School Board on May 15th. The building will contain four class rooms and an auditorium. Plans can be secured from the architect.

RAILROAD STATION—2 story and base, fr. m. \$15,000. Fresno, Fresno Co., Cal. Engineers, Engineering Department Santa Fe R. R. Co., L. A. Owners, Santa Fe R. R. Co. A contract will be let within the next few days

for the construction of a Mission style addition to the company's passenger station at Fresno. The building will be covered with cement plaster on metal lath and will have a clay tile roof. Plans are now being figured.

SCHOOL—1 story and base, concrete and brick, \$18,000. Hughson, Stanislaus Co., Cal. Architects, Stone & Wright, 24 So. California St., Stockton. Owners, Hughson School District. Clerk of the Board may be addressed at Modesto. The building has been designed for a four-room school. Interior will be finished in pine and maple. There will be a central heating system. A metal tile roof will be used. Exterior of the building will be faced with pressed brick. Plans are now being prepared for the work.

WATER SYSTEM AND TANK—Cost not stated. Tulare, Tulare Co., Cal. Engineers, Sloan & Robson, Nevada Bank Bldg., S. F. Owners, City of Tulare. Bids opened by the City Trustees for the construction of a water system in Tulare show the Des Moines Bridge and Iron Works low for the steel tank and tower at \$9,840 and they were awarded the contract. O. D. Vincent was low at about \$37,647.70 for the water system. Next low on this work was the Coalinga Tank and Pumping Co. No action was taken.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

FLATS—2 story and base, frame, \$6,000. Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owner, Mrs. A. Boksch. The building will be arranged for two flats of five and six rooms each with bath. Interior finish will be entirely of pine with some oak floors. Plans provide for gas grates with brick mantels. Bath rooms will have tile wainscot. The exterior of the building will be covered with rustic. Plans are being prepared and figures will be called for shortly.

RESIDENCE — 2 story and base, frame, \$8,000. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Odd Fellows' Bldg., Stockton. Owner, Frank Gurnsey. The dwelling will be erected in the Bones Tract and will contain ten rooms, baths and sleeping porch. Interior will be finished in pine and hardwood. There will be furnace heat and open fire places. Hardwood floors will be used in the principal living rooms and reception hall. Mantels will be of tile and brick. Tile will be used in the bath rooms and

Kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

SCHOOL—2 story and base, reinforced concrete, \$30,000. Quincy, Plumas Co., Cal. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Quincy Union High School. Architect Weeks has just been selected to prepare plans for this building. The school will be designed for a Union High School and will contain a number of class rooms, assembly hall and manual training departments. Other than the fact that it will be of the reinforced concrete type of construction details cannot be given at this time. Mr. Weeks will appear before the School Trustees next Saturday to receive instructions.

STORE AND OFFICE ALTERATIONS—4 story, brick and steel. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owners, Citizens' Investment Co. This work will include the installation of modern elevator equipment, oil burning furnaces and steam heat. New electric wiring, plumbing and store fronts will also be installed. Exterior of the building will be faced with pressed brick. Considerable structural steel and iron will be used. Plans for this work are now being prepared.

BRIDGE—Steel and concrete, \$150,000. Stony Creek, Glenn Co., Cal. Engineer, County Surveyor, Willows. Owners, Glenn County. This work has been mentioned here before. Bids for the construction were recently opened but have all been rejected. A dispute over the right-of-way to one of the approaches could not be settled. This question will be taken up at the next meeting of the Board of Supervisors and adjudicated, after which new proposals will be published and a contract let. Plans and specifications can be obtained from the County Surveyor at Willows.

SCHOOL—1 story and base, reinforced concrete, \$25,000. Maxwell, Colusa Co., Cal. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Maxwell School District. The building has been out for figures before but all bids were rejected. Plans are now being revised and figures will be called for on the new set of plans within two weeks. The plans include eight class rooms and assembly hall. Separate bids will be taken for the heating, plumbing and general construction. Exterior of the building will be faced with cement plaster. Plans can be secured from the architect.

LOS ANGELES AND SOUTH CALIFORNIA.

HOTEL ADDITIONS—2, 4 story and base, reinforced concrete. Cost not stated. Riverside, Riverside Co., Cal. Architect, Myron Hunt, Hibernian Bldg., L. A. Owner, Frank Miller. These additions will be in the form of two wings, each 48x100 feet and will be

built at the Riverside Inn. Ground floors will contain dining rooms, exhibit rooms and curio rooms. Upper floors will be arranged for guest rooms, all of which will have connecting baths. Plans provide for steam heat and elevator service. Exterior will be faced with cement plaster and roofs will be covered with red clay tile. Plans are being prepared. The work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Owner, Anna Baker. The building will cover an area of 42x142 feet, and has been arranged to contain 67 rooms, which will be divided into two and three room suites. All suites will have connecting baths and wall beds. Interior will be finished in pine and hardwoods with hardwood floors in the principal rooms. Bath rooms will have cement floors and tile wainscot. Plans include steam heat and a vacuum cleaning system. Exterior of the building will be covered with brick veneer and artificial stone trim. Plans are complete and figures are being taken.

LODGE HALL—5 story and base, brick and steel, \$75,000. San Diego, Cal. Architect, Del W. Harris, Timken Bldg., San Diego. Owners, Woodmen of the World. The building will be erected at the corner of 12th and G streets and will cover a considerable area. The structure will be practically fireproof. The first floor is to be arranged for stores, a separate entrance for the lodge rooms and an entrance and lobby for a hotel. Upper floors will be divided into hotel rooms and lodge halls and the offices of the organization. Interior finish will be of pine and hardwood. There will be steam heat and elevator service. A vacuum cleaning system will be installed. Exterior of the building will be faced with pressed brick and terra cotta. Construction will be started in two months.

SCHOOL—2 story and base, brick and concrete, \$40,000. Ontario, San Bernardino Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Ontario School District. The building has been designed for a high school and will contain ten class rooms, auditorium, manual training and domestic science departments. Interior will be finished in pine with maple floors. Plans provide for steam heat and modern ventilating system. Exterior walls will be of brick or reinforced concrete faced with cement plaster. Plans are now being prepared.

WATER SYSTEM—\$200,000. Oxnard, Ventura Co., Cal. Engineers, Olmstead & Gillean, Wright and Callender Bldg., L. A. Owners, City of Oxnard. Plans for the construction of a municipal water system have been approved by the City Council and bids have been called. Bonds to the extent of \$200,000 have been voted for this work. Plans can be secured from either the City Clerk or from the engineers. The official proposal appears in another column of this issue. Bids will be opened at Oxnard on May 27th.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Elmore R. Jeffry, Citizens' National Bank Bldg., L. A. Owner, Mrs. Ella Barker. This building

BUILDING AND INDUSTRIAL NEWS.

has been mentioned here before when plans were first started. The structure will cover an area of 105x79 feet and has been arranged to contain 55 rooms arranged in two and three room suites with private baths and wall beds. Plans provide for steam heat, elevator service, a hot water plant and vacuum cleaning system. Interior finish will be of pine and hardwood. Cement floors and tile wainscot will be used in the bath rooms. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

FIRE HOUSE—2 story and base, brick, \$15,000. Los Angeles, Cal. Architect, Chief Building Inspector Backus, L. A. Owners, City of Los Angeles. The building will cover an area of 40x72 feet, and is to be erected at the corner of Central avenue and 14th street. Interior will be finished in pine throughout. There will be special plumbing, including shower baths. The exterior of the building will be faced with pressed brick. Plans have been completed and bids are being taken by the Purchasing Agent of the City.

LIBRARY—1 story and base, reinforced concrete. Alhambra, Los Angeles Co., Cal. Architect's name not given. Owners, City of Alhambra. This building was mentioned in last week's issue. The time for opening bids has been postponed until May 17th. Plans can be secured from the City Clerk.

LIBRARY—2 story and base, brick and concrete, \$30,000. Los Angeles, Cal. Architects, Train & Williams, associated with F. M. Ashley, Exchange Bldg., L. A. Owners, City of Los Angeles. All bids received for this work were in excess of the appropriation. Plans are now being revised and new figures will be called for shortly. The following is a list of the bids received: Kling Co., \$32,217; C. Karseboom, \$33,229; Alta Planing Mill Co., \$36,177; Alpetter Hall & Alpetter, \$38,791; F. O. Engstrum Co., \$41,320.

SCHOOL—1 story and base, frame, \$23,000. Venice, Los Angeles Co., Cal. Architect, Eager & Eager, Story Bldg., L. A. Owners, Venice School District. The building will be built around three sides of a court 100x112 feet. The main portion of the building will contain the auditorium, one of the wings four class rooms and the other wing domestic science and manual training departments. Interior will be finished in pine with maple floors. There will be a central heating system and vacuum cleaning. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and bids will be opened on May 14th.

Positions Wanted

YOUNG MAN, 30 years, wants a job of any kind. Solicitor's job preferred. Salary no object. Future promotion of more consequence than present salary. H. R. SCOTT, 1239 7th Ave., Sunset Dist., S. F. Tel. Sunset 1829.

PORTLAND AND OREGON.

LODGE HALL—2 story and base, brick and steel, \$25,000. Tillamook, Ore. Architect, E. E. McClaran, Lumber Exchange Bldg., Portland, Owners, I. O. O. F. Hall Association, Tillamook. The building will be designed for stores on the first floor and lodge rooms, assembly hall and banquet room on the upper floor. The structure will cover an area of 80x100 feet and will be classic in design. Considerable structural steel will be used. Interior finish will be of pine and hardwood. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

FIRE HOUSES—2, 1 story and base, brick, \$15,000 each. Portland, Ore. Engineer, Chief Engineer, City Fire Department, Portland, Owners, City of Portland. Plans for two new fire houses have been completed and bids

are now being taken. One of the stations will be erected at the corner of 3rd and Glisan and the other at the corner of 14th and Glisan. Plans can be secured from the Chief Engineer of the Fire Department at the City Hall. Bids will be opened on May 15th.

HOSPITAL—2 story and base, brick and concrete, \$25,000. Astoria, Ore. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owners, Clatsop County. The building will be designed for a County Hospital and will contain wards for males and females, dining rooms, kitchens, nurses' quarters and a large operating room. Plans include steam heat, elevator service and a vacuum cleaning plant. Interior will be finished in pine and hardwood. The exterior of the building will be faced with cement plaster and pressed brick. Plans are now being prepared and it will be a matter of three weeks or a month before figures will be taken.

Contracts Awarded.

OFFICES—5 story and base. Class A construction, \$80,000. Portland, Ore. Architects, MacNaughton & Raymond, Concord Bldg., Portland. Owners, Title and Trust Building. Contractors, Boyajohn-Arnold Co., Wilcox Bldg., Portland, general construction. Contract price, \$80,000.

SEATTLE AND WASHINGTON.

BRIDGE—Steel and concrete, \$200,000. Seattle, Wash. Engineer, City Department of Engineering, Seattle. Owners, City of Seattle. Bids are again being taken for the construction of the West Wheeler street bridge. The Board of Public Works will open figures for this work on May 16th. Previous bids were all in excess of the amount allowable.

COURT HOUSE—3 and 5 story, Class A construction, \$550,000. Seattle, Wash. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, King County. Final plans and specifications for the construction of this building have been approved and bids for the work are being advertised. The building will be erected on the block bounded by Jefferson, James, 2nd and 4th streets. There will be a complete steel frame and fireproof construction throughout. The main portion of the building will be three stories high and the center portion five stories. Bids will be opened on June 3rd. Alternate proposals for granite facing and terra cotta facing are being taken. Plans can be secured from the architect.

FACTORY—4 story and base, reinforced concrete, \$50,000. Seattle, Wash. Architect, Hans Pederson, Madison Bldg., Seattle. Owner, Hans Pederson. Mr. Pederson is preparing plans for a four-story reinforced concrete building which will be erected at the corner of Republican and Fairview streets. Construction will be fireproof throughout with reinforced concrete walls, concrete floors and roof and metal window sash and frames. There will be fireproof doors and an automatic sprinkler system. Exterior of the building will be faced with cement plaster. The structure has been designed for an overall factory. Bids are to be called for at once.

Consuls are requested to contribute to
this department, and in doing so
should in each instance state in what
language correspondence should be
conducted.

No. 10788. Agencies for American goods.—One of the commercial agents of the Department of Commerce reports that a firm of commission agents in a European country desires to represent American manufacturers of the following articles: Paraffin, phosphates of ammonia, glues, and special glues for the manufacture of velveteen, hardware, turpentine, acetate of lead, chemicals in general, raw cotton in bales, upper leather, glazed kid glove and patent leather, silk stockings and socks, hams, lard, casings, motor cars and accessories, wooden staves, handkerchiefs, paper for newspapers, metals for making umbrellas, etc. This firm also desires to get in touch with importers of raw sheepskins, vegetable tanned sheepskins, olive oil, grapes, wines, and cork.

No. 10790. Cement machinery.—A report from an American consular officer states that a business man in Italy desires to represent on the market American manufacturers of cement machinery, particularly that used in cement factories, such as pulverizers, mixers, and machinery adapted for packing cement in sacks, all to be of the most modern improved types. The inquirer, who is an engineer, states that he makes a specialty of this class of machinery, and has hitherto handled that of German make. He is in touch with the cement manufacturing plants of the country. He desires illustrated catalogues in French or German, if possible. Prices f. o. b. New York, discounts, and terms. References can be furnished, and correspondence should be in French, Italian, German, or English, the first three preferred.

No. 10791. Electrical goods and gasoline lighting appliances.—A foreign business firm has requested an American consulate to put it in communication with American manufacturers of electrical goods, and gasoline lighting appliances. Offers giving full details in regard to prices, discounts, and credits should, if possible, be accompanied by samples. Prices should preferably include packing expenses and delivery c. i. f. city of destination, or at least f. o. b. New York.

No. 10796. Galvanized sheets and wire nails.—An American consul reports that a business firm in the United Kingdom, which is interested in supplying the Straits Settlements and Malay States with galvanized sheets and wire nails, would like to secure informa-

tion from manufacturers as to the landed cost of such articles at Penang and Singapore. It would also like manufacturers who might consider doing business with it in this section to furnish an analysis if their galvanized sheets and wire nails, as well as cost price. This firm is also ready to handle American cotton goods and tinned salmon through Penang and Singapore, but states that it is a question of price as to whether or not such American goods can be successfully promoted there. This firm ordinarily makes its purchases direct for export to this market, but in some instances might handle it on a commission.

No. 10800. Typewriters, automobiles, and mechanical supplies.—A business man, who has already placed a number of American articles on the British market, informs an American consulate that he would like to correspond with manufacturers of a typewriter which can be sold at retail for about \$50. There is a demand for such a machine, and it is stated that \$50 can be placed the first year, with a large increase subsequently, if the machine should prove satisfactory. He is also interested in a two-seated runabout automobile, retailing for about \$500, and a high-power petroleum oil lamp in separate units, for use in textile and dyeing factories, to easily determine differences in color of cloth at night. The inquirer is said to be familiar with trade conditions in the United States and England and is ready to consider the introduction of any useful mechanical article manufactured in the United States, which can be placed on the English market at from \$25 to \$30.

No. 10801. Gas ranges.—A report from an American consular officer in a Mediterranean country states that a resident of his district wishes to secure the local representation of American manufacturers of gas ranges. Catalogues, prices, f. o. b. New York, and terms are desired. References can be furnished, and correspondence may be in French, German, Italian, or English.

NOTICE TO CONTRACTORS.

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22nd and 23rd
San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

Bind your copies of the Building and Industrial News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the "BIG BEN" BINDER.

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH**.

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

Editorial Comment.

Building operations for the month of April show an aggregate loss throughout the country. Returns from 64 building centers of the United States made to the American Contractor, Chicago, show a loss of something like 6 per cent. This is not surprising owing to the unprecedented floods in the middle west and also from the fact that New York last year showed an unprecedented building record for the month of April. Portland and Los Angeles lead the record of the Pacific Coast, both these cities being tabulated with permits of more than 5 millions in the aggregate. Seattle also coming along with a total of more than 3 million for the month. San Francisco, so far as private construction is concerned, had only something over 2 million, including the Panama Pacific and city work it included more than three million. So outside of New York the country generally showed a normal gain. Particulars are to be found in the following table:

City	April 1913. Cost.	April, 1912. Cost.
Akron	\$ 1,119,300	\$ 704,387
Albany	480,100	904,635

Whatever difference of opinion there may have been about the compromise and agreement for the use of the lower Market Street tracks by the City and the United Railroads there is little difference of opinion as to the advisability and necessity of building more municipal car lines. While it is not advisable to incur indebtedness in a city already heavily burdened with taxes, yet anything that will relieve the city from the domination of the traction monopoly is to be desired. The proposal to vote $3\frac{1}{2}$ million dollars of a bond issue for extension of the municipal lines puts it well within the limit of the charter provisions. And there can be no question but the municipal lines will pay. If the Geary street road, with no transfer privileges and no access to the ferry piers, when it is not built up at either end of the line, a dividend each month of a substantial nature what can be expected of a municipal line that will connect principal places of business and have transfer and terminal facilities.

In efficiency the American workmen ranks all others. Statistics compiled by the Department of Commerce show that to produce a given net output requiring a certain amount of power and a certain number of workmen in the United States, the British manufacturer must use one-sixth more power and two and a half times as many workmen. This will perhaps show some relation between wages and the better condition of labor here than in other countries. So that it would appear that the cry about protecting American labor has been merely a catspaw by which the manufacturer has been enabled to secure higher prices and make larger profits while in reality paying no more for labor.

Some Notes On Causes Of Failure Of Stucco Work.

By A. G. CUTTING, New York, in "Cement and Engineering News."

A number of years ago stucco was quite generally used in certain localities, but owing to failures of the material to withstand the action of the elements and other causes, this type of construction was almost entirely abandoned. During the last few years, however, there has been a marked tendency by the building public to take up this class of construction again, therefore this word of caution.

We do not want to have the same experience with this type of construction, as the concrete block industry has had, and yet unless due care is used in drawing specifications and in their application, there are going to be a great many failures as in the past. Our architectural friends are very partial to stucco exterior, and if it is properly mixed and applied will come up to their expectations in every way. So much depends on the selection of the material, proper mixing and proper application that only skilled mechanics who are familiar with this class of work should be employed.

The writer has had opportunities to inspect a great many stucco residences in the past few years and is very sorry to say that the greater percentage of them are unsightly, due to cracks, discolorations caused by improper application, and lack of proper ingredient, etc. I wish to illustrate briefly by stating facts regarding two or three of the houses that have come to my attention.

I remember one residence in particular, where there were a great many horizontal cracks in the stucco running almost the entire length of one side of the building. These cracks were about two feet apart and were very pronounced. The whole area of sides and ends was very unsightly. After a careful investigation it was found that in nearly every instance where the cracks had developed that they were at a point where the wire lath was lapped and in many places less than $\frac{1}{4}$ -inch thickness of stucco was over these laps. In some instances by cutting out the cracks it was found that the metal lath was not even tacked solidly in place, and yet stucco work in general was condemned by a number of parties on the results obtained on this one building. It was quite apparent that the trouble was not due to any fault of the material, but in this particular instance was due entirely to the application of the wire lath and stucco. In addition to the large cracks at the laps of the wire lath, there were a number of hair cracks throughout the entire area, which apparently were caused by too much troweling of the concrete mass, and as was found by investigation there was a coating or frosting of Portland cement on some of the areas and the cracks penetrated just through this frosting. Other areas were entirely smooth and cracks had not developed.

In another case regular lime and mortar plaster without any Portland

cement was used for the scratch coat. The second and finishing coat consisted of a poor mixture of Portland cement and sand. The finish coat was only about $\frac{1}{4}$ inch thick. Moisture penetrated through the finish coat and the mortar composing the scratch coat being subjected to continued moisture disintegrated and the stucco came off in sheets.

The third case was very similar to the second, although wood lath was used instead of wire lath on a small building near the sea shore. The scratch coat material consisted of regular interior plaster and the second coat consisted of Portland cement, asbestos rock and asbestos fiber. The second coat was very thin and the damp salt air and moisture penetrated through to the first coat. The lath became swelled and the stucco came off in sheets. The stucco on this work was condemned and the faults were laid at the door of the asbestos and Portland cement. Upon investigating the matter thoroughly, it was readily proven that the entire trouble was due to the nature of the lath and the materials entering into the first coat.

I have referred to these buildings with a view of cautioning people interested in stucco construction to see that this particular part of the building is given proper attention. In the past stucco has been applied in two coats, the total thickness being about $\frac{1}{2}$ inch to $\frac{3}{4}$ inch. Past experience is teaching us, however, that 1 inch is by far better and if the material is applied in this thickness, house owners and architects should not have reason to regret its use.

Another point of considerable importance is the color. A uniform color is rather difficult to obtain on smooth surfaces particularly, but it can be obtained if proper attention is given to the selection and mixing of the ingredients and if the stucco is properly applied. When Portland cement and sand are used it is very essential that the sand should be absolutely free from any organic materials which have a tendency to discolor. It is also of vast importance that the ingredients be mixed very accurately and carefully and that a sufficient amount be mixed at one time to cover certain areas exposed to the same lights and shadows.

For example the work should not be left in an uncompleted condition half way between windows or half way down the side walls, for just as certain as this is done, there will be a streak showing where the latter work was started. If it is necessary to do a certain given area at two operations, care should be used to get the materials properly blended and the new stucco floated or troweled to correspond exactly to that already done. By using a little care on details of this kind the ultimate results will be much more satisfactory.

Portland cement and sand as a stucco mixture has been used with fair success where work has been carefully supervised, but there has been

such a lack of proper attention to the mixing and application that there have been some very bad failures. The use of asbestos rock and fiber to take the place of sand is meeting with considerable success. The asbestos fibers have a tendency to hold the water which is used to mix the concrete mass longer, thus giving the Portland cement ample opportunity to become properly set and in this way stucco mixtures are possible that are more uniform in color and less liable to crack as the fiber also furnishes additional bond.

There is one point which is frequently lost sight of, that is it is possible to make concrete slabs that are free from cracks and that can be exposed to the elements for an indefinite period without discoloration. Therefore, should cracks develop in a well constructed stucco work it can be invariably traced to settling of the building or the shrinking of the frame. By insisting upon thicker stucco walls the liability of the stucco cracking is reduced to a minimum.

The price of lumber is rapidly advancing and the desire for fireproof exteriors, especially in the suburban districts as well as artistic effects that may be obtained from stucco are creating a universal demand for this type of construction and while the initial cost may be slightly more it is such a small part of the total outlay and such an important part of the structure that the best is the cheapest in the end.

HOW THE SUN AFFECTS BRICKS.

Draining Power of the Planet Pulls Tower Out of Plumb Says Expert.

Everything in nature is more or less affected by the rays of the sun, from the articles of material which compose the surface of the earth and the tiniest blade of grass up to the finest specimens of man or woman, in fact, all creation is indebted for its existence to this marvelous orb of day, writes Owen B. Naginnis an expert on sunshine.

In the primitive days brick were molded by hand to the shape desired and then baked hard by the action of the air and sun but this has long been superseded by the intense heat of the drier and kiln, making the process more rapid. However, the intent and purpose of this article is to inquire into the effect of the sun on brick when laid in walls, chimneys, etc. Have you ever observed the condition of the ordinary brick chimneys which project above the roofs of frame or brick houses? These comparatively humble details of modern architecture play a part in the promotion of human happiness which has never been appreciated, except by those initiated into the science of building construction; yet they are just as indispensable as any other part of the component details of a building. The sun, however, like all other elements, constantly existent, either improves or injures

anything exposed to its influence, and the effect of its rays on these, the uppermost parts of buildings, is most deleterious and baleful, for the following reasons:

Let us briefly trace the course of the sun in its daily orbit. Commencing in the east it rises above the horizon and, its rays gradually passing from a horizontal to an oblique direction immediately commence to exert a heating and absorptive influence on all things terrestrial, and brickwork is in the natural order subject to this influence. Presuming that the sun's rays have been without diminution or lack of power for even one day, it is safe to infer that it has altered the condition of everything on earth to a greater or less degree, and so it likewise affects brickwork as we will endeavor to explain. The sun's orbit is from east to west, and its course is in a southerly oblique direction, so that its rays are continually concentrated on all objects having an easterly, westerly and southerly exposure, and it is here we have the effect it has on such simple details as chimneys, etc. The observer will note that all hollow chimneys of such thickness as four, eight or twelve inches of brickwork and ranging in height from two to twelve feet, are invariably out of plumb, and camber or bend towards the west if their widest elevation is thus exposed, or to the south if the elevation be thus, or to be more explicit, houses, the front elevation of which run east and west and have their chimneys at right angles to the front or street line always bend to the north and those having their front elevations directly north and south bend to the west, the reason being that the side removed from the action of the sun's rays is cool, and contracted, and the drawing power tends to make the mass bulge and expand to the east and south and contract to the west and north, also to lean out of plumb, the tops overhanging in a westerly and northerly direction.

The shell of ordinary domestic chimneys being very thin, it follows that there is, on account of the flues, hollow spaces in the section. There is no mass strong enough to resist successfully the tremendous influence of the rays or the counteracting influence of the cold, which according to the laws of expansion and contraction must of necessity change the form of the brickwork. As cold contracts all materials and heat expands, then it follows that the north and west sides of the chimneys, or rather surfaces, being continuously cold, and in the winter or cold seasons being extremely cold, the contraction is in proportion to the extent of the lowness of the temperature. From this it can be assumed that every form of construction changes its shape to a more or less degree according to its ability to resist the influence exerted. Masses of brickwork of whatever thickness they may be, are compelled to yield to the forces acting on them and it is not uncommon to see, in northern latitudes, such details as belfries, isolated towers, pinnacles, turrets, piers, etc., overhanging and out of plumb in the direction as heretofore described.

As to the influence of the sun on the surface of brickwork of extensive area such as gable walls, elevations or tall smoke stacks, it is to be said that it is in these cases that its effects are most

perceptible and frequently dangerous, for the reason that, as the attraction is in direct proportion to the area exposed, its power will be more active and deleterious on large, than small, areas.

To illustrate this we will give an example. During the winter months, the sun in northern latitudes has little or no absorptive and expansive power, and brick work constructed in this season of the year will remain firm during the continuance of cold weather, but when spring arrives and the heat of the sun becomes active and dominant it will work havoc. It must be remembered that while the cold weather lasted both sides of the wall or walls were subject to the same temperature, before the building was enclosed or any kind of artificial heat introduced within its walls, but in spring and summer the sun's rays spread daily unrelentingly over the outside surface, gradually and slowly expanding and drawing the mass towards itself so that the wall being tied only by bonding or anchoring at the edges or corners becomes warped, bulged, out of plumb and generally distorted. This is much more evident when the brickwork is laid in cold, frosty, or snowy weather, as the porosity of the bricks in their minute perforations having absorbed frost to a great degree will expand, not to mention the expansion of water in the mortar, which has not yet dried out but has remained dormant in the form of ice all through the winter. It has been proved that beam anchors have not sufficient strength to resist the bulging or warping of walls.

It is therefore a rational conclusion that the side unexposed to the sun would retain its original condition, while that on which the rays of the sun beat must expand and increase its superficial area in proportion to the extent of the expansion and such a wall will become out of plumb and unsafe.

The same inference might be drawn in regard to structures of great height or width such as the plain surfaces of lofty office or apartment buildings, smokestacks, etc., especially if the latter be of a square or horizontal construction. On this account the use of a circular, horizontal or octagonal section is now almost universal for smokestacks of great height, this being the safest for resisting all solar and climatic influences.

The question of mortar enters largely into the consideration of the permanent stability of brickwork, in every condition, and it must be admitted that the introduction and use of Portland cement as an ingredient has done much to offset the evils which were formerly so prevalent in lime mortar, for not only does it give greater adhesion and density, but also greater imperviousness, thus preventing early damage or decay.

In conclusion it might be said that the method and value of good workmanship helps to regulate, to a certain extent, the result of the sun's damaging action, good workmanship with first class materials, doing much to offset the injurious effect of the sun's rays. Even then some changes will take place during the lapse of time, but if walls be well anchored and braced, the change is so slight as to be of no serious consequence.

ABOUT REMOVING FRAMES.

The concrete builder is always anxious to know the approximate time for removing forms. A month or so ago we offered some suggestions for this practice and the Building Age offers the following:

As a guide to practice in concrete work, the following rules are suggested:

Walls in Mass Work: One to three days or until the concrete will bear pressure of the thumb without indentation.

Thin Walls: In summer, two days; in cold weather, five days.

Column Forms: In summer, two days; cold weather, four days, provided girders are shored to prevent appreciable weight reaching columns.

Slabs up to 7-ft. Span: In summer, six days; in cold weather, two weeks.

Beams and Girder Sides: In summer, six days; in cold weather, two weeks.

Beam and Girder Bottoms and Long Span Slabs: In summer, ten days or two weeks; in cold weather, three weeks to one month. Time to vary with the conditions.

Arches: If not small size, one week; large arches with heavy dead load, one month.

All these times are, of course, simply approximate; the exact time varying with temperature and moisture of the air and the character of the construction. Even in summer, during a damp, cloudy period, wall forms cannot be removed inside of five days, with other members in the same proportion. Occasionally, too, batches of concrete will set abnormally slow, either because of slow setting cement or impurities in the sand, and the foreman and inspector must watch very carefully to see that the forms are not removed too soon. Trial with a pick may help to determine the right time.

In removing forms, one large bulldozer requires that a 20-penny spike driven into the concrete must double up before it has penetrated one inch.

ENGINEERING IN THE ALPS.

Work is going on at present upon a tunnel through the mountains between France and Switzerland in order to give a more direct railroad connection. What is remarkable in this case is that unusually large quantities of water were met with, and the piping which had been laid in the tunnel was not sufficient to take care of the great outflow from the underground springs, so that the tunnel was flooded up to two feet height and quite a large cascade flowed out at the entrance. This also caused the neighboring springs to fail more or less. The somewhat curious result follows that an output of 100 to 250 gallons per second will be taken away from the basin of the Rhone or the French region and is now to be added to the Rhine basin in the Swiss region and thence to German territory. Owing to this unforeseen event, the expense of the work will be increased to a great extent, and the cost of the tunnel, reckoned at first at \$3,500,000, will now be at least tripled. It is stated that but little previous work was done in the way of geological survey, and this is now regretted. In fact, the accident occurred exactly at the point predicted by M. Fournier, professor of geology at the Besancon university, according to his examination of the geological conditions of the tunnel region.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 7-story and base, brick and steel, \$55,000. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owner, W. B. G. This building has been mentioned here before when plans were first started. Working drawings have been completed and figures are now being taken. The structure will be erected on Sutter street west of Powell, and will contain a number of two and three room suites with wall beds and private bath rooms. Interior finish will be of pine and hardwood. Cement will be used in the bath rooms. There will be steam heat, elevator service and a vacuum cleaning system. Exterior will be faced with pressed brick and cement plaster.

SAN FRANCISCO—Apartment house, 3-story and base, frame. Cost not stated. Architects, H. Gelfuss & Son, 46 Kearny St., S. F. Owner's name withheld. The building will be erected in the Western Addition and will contain six suites of four rooms and bath. Interiors will be finished in pine with some elm panels. There will be a central heating system and wall beds. Bath rooms will have Keene's cement plaster on the walls. Exterior of the building will be covered with cement plaster, rustic and klinker brick veneer. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3-story and base, frame, \$15,000. Architects, H. Gelfuss & Son, 46 Kearny St., S. F. Owner's name withheld. The building will be designed to contain twelve suites of two and three rooms each. All apartments will have private bath rooms and will be equipped with wall beds. Interior finish will be of pine with some elm panels. There will be a central heating elevator. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be covered with cement plaster, klinker brick veneer and rustic. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 9-story and base. Class A construction, \$500,000. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, Burlingame Court Investment Co. This building is to be erected at the corner of Sacramento and Mason streets, and when completed will be one of the largest and the most handsomely finished apartment houses in the west. The building will be arranged for suites, six, seven and eight rooms each, which have already been planned to high-class tenants. Each suite will be finished to meet the special taste of the occupant, and plans provide for many unique features. There will be a steam heating system, water cooling system, vacuum cleaning, elevators, dumb waiters. Construction will be fireproof throughout with a complete steel frame. Exterior will be faced with pressed brick and terra cotta. Plans are complete and a preliminary estimate is now being made.

SAN FRANCISCO—Apartment house, 3-story and base, frame, \$5,000. Architect, none. Owner, F. C. Cook, 983 14th

St., S. F. The present frame building will be altered and additions made so as to provide for five three-room suites with baths. The work will require new plumbing, electric work, plastering and interior trim. Wall beds are specified. The exterior of the building will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Apartment house, 3-story and base, frame, \$11,000. Architect, Charles J. Rousseau, Monadnock Bldg., S. F. Owner, John Fletcher. This building will be erected on Fell street west of Pierce and will cover an area of 25x137½ feet. Plans provide for six suites of four rooms and bath each. All suites will have wall beds. Interior finish will be of pine and hardwood. There will be a central heating system and hot water plant. Bath rooms will be finished in cement plaster. The exterior of the building will be covered with cement plaster and brick veneer. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3-story and base. Class C construction. Cost not stated. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Mr. Schmiedel. The property at the corner of Post and Leavenworth streets is about to be improved by the construction of a modern apartment house. Interior will be arranged for two, three and four room suites, which will have private bath rooms and wall beds. There will be steam heat, elevator service, a vacuum cleaning system and dumb waiters. Bath rooms will be finished in tile and will have cement floors. Interior finish will be of pine and hardwood. A large lobby will be a feature of the building and it will be finished in hardwoods with ornamental plaster. The exterior of the building will probably be faced with pressed brick. Plans are being prepared.

OAKLAND, CAL.—Apartment house, 2-story and base, frame, \$17,000. Architect, M. I. Diggs, 944 Bowditch St., Berkeley. Owner, W. J. Schmidt. The building will be erected at the corner of 35th and Telegraph avenue, and will be arranged for stores on the first floor and a number of two and three-room suites on the upper floor. Interior finish will be of pine throughout. All apartments will have connecting bath rooms and wall beds. The exterior of the building will be covered with cement plaster. Some marble wainscot will be used. Plans are complete and figures are being taken.

PORTLAND, ORE.—Apartment house, 4-story and base, brick and steel, \$65,000. Architects, Bennes & Hendricks, Henry Bldg., Portland. Owner, A. C. Callan. The building is to be erected in Portland Heights and will cover an area of 60x90 feet. Each of the four floors will be subdivided into three modern apartments with wall beds and private baths. Interiors will be finished in pine and hardwood. Plans provide for steam heat, automatic elevators, dumb waiters and a vacuum cleaning system. Main en-

trance and lobby will be finished in marble, ornamental plaster and hardwoods. Baths will have tile wainscot and tile floors. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

LOS ANGELES, CAL.—Apartment house, 3-story and base, brick. Cost not stated. Architect, Western Building Co., Lankershim Bldg., L. A. Owner, G. A. Thiele, 1129 Trenton St., L. A. The building will have a street frontage of 40 feet and a depth of 130 feet. Interior will be arranged for 65 rooms, divided into two and three room suites. All apartments will have private bath rooms and will be equipped with wall beds. Plans include steam heat, an automatic elevator and vacuum cleaning system. Interior finish will be of pine and hardwoods. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken by the owner.

LOS ANGELES, CAL.—Apartment house, 4-story and base, brick and steel. Cost not stated. Architect, Arthur G. Lindley, I. W. Hellman Bldg., L. A. Owners, Los Angeles Securities Co. The building will be erected on a corner site and will cover an area of 73x128 feet. Plans provide for a total of 140 rooms, which will be arranged in two and three room suites with baths and wall beds. Interior finish will be of pine and hardwood. Bath rooms will have cement floors and tile wainscot. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 and 4 story, brick and steel. Cost not stated. Architect, Leonard L. Jones, I. W. Hellman Bldg., L. A. Owner, Richard Webb. The building will cover an area of 50x95 feet. Interior will contain 65 rooms arranged in suites of two and three rooms each with baths and wall beds. Interior finish will be of pine and hardwood. Bath rooms will have cement floors and tile wainscot. Plans provide for elevator service, steam heat and a vacuum cleaning system. Entrance will be finished in tile and marble. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

SEATTLE, WASH.—Apartment house, 6-story and base, reinforced concrete, \$325,000. Architect, James H. Shack, T. S. Lippy Bldg., Seattle. Owner, Bogue Brown. The building will be erected on 6th avenue between Pike and Pine streets, and will have a frontage on the avenue of 120 feet and will extend back 180 feet. Construction will be fireproof throughout with reinforced concrete floors, walls and roof. Interior partitions will be of hollow tile and metal lath and plaster. The first floor will be arranged for stores and the entrance and lobby of the apartment house. Each of the upper five floors will be divided into 25 suites of two rooms each and five suites of three rooms. Mechanical equipment will embrace steam heat, elevator service, vacuum cleaning system and a water cooling plant. Interior finish will be of pine and hardwoods. Marble and tile will be used extensively. All suites will have wall beds and private baths.

Exterior of the building will be faced with cement plaster. Plans are to be completed at once and construction will be started this summer.

PORTLAND, ORE.—Apartment house, 4 story and base, reinforced concrete, \$50,000. Architect, J. S. Atkins, Henry Bldg., Portland. Owner, M. J. Buell. The building will cover an area of 48x140 feet. There will be a number of two and three room suites with wall beds and private bath rooms. Plans include steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine and hardwood with some ornamental plaster used in the amusement room. Exterior of the building will be faced with cement plaster. Bath rooms will be finished in tile with cement floors. Plans are complete and figures are being taken for the work.

Contracts Awarded.

LONG BEACH, LOS ANGELES CO., CAL.—Apartment house, 7 story and base, reinforced concrete, \$125,000. Architect, Paul C. Pape, Union League Bldg., L. A. Owner, Edward Tisnerat. Contractors, Dutro-Wren Construction Co., 10 American Ave., Long Beach. Contract price, \$125,000.

BANKS.

SAN LEANDRO, ALAMEDA CO., CAL.—Bank, 2 story and base, concrete and stone, \$50,000. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Bank of San Leandro. The building will be erected at the corner of Haywards and Estudillo streets and will cover a considerable ground area. Design is in the classic style with exterior faced with cut stone. The entire first floor will be arranged for the banking rooms, public space and private offices. Upper floor will contain a number of modern offices. Interior finish will be of hardwoods, marble and tile. Ornamental plaster and ornamental iron and bronze will also be used. Special vaults are specified. Plans are complete and figures are now being taken.

REDONDO BEACH, LOS ANGELES CO., CAL.—Bank and offices, 2 story and base. Class A construction. Cost not stated. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, Farmers' and Merchants' National Bank of Redondo. The building will be erected at one of the important corners. The entire first floor is to be occupied by the bank. Second floor will be arranged for a number of offices. Interior finish of the first floor will be of hardwood, marble, tile and ornamental plaster and bronze. Upper floor will be finished in pine and hardwood. Construction will be of the reinforced concrete type and fireproof throughout. Special bank fixtures, bank vaults and safe deposit vaults will be installed. Exterior of the building will be faced with matt glazed terra cotta. Plans are being prepared.

BURBANK, LOS ANGELES CO., CAL.—Bank, 1 story and base, brick. Cost not stated. Architects, Krenpel & Erkes, Henne Bldg., L. A. Owners, Farmers' and Merchants' National Bank. The building will be designed in the classic style and will cover an area of 26x60 feet. The entire structure will be devoted to the use of the bank. Interior will be finished in hardwoods and marble. Reinforced concrete vaults will be constructed. The exterior of the building will be

faced with glazed terra cotta. Plans are being prepared.

SEATTLE, WASH.—Bank, 3 story and base, brick and stone. Cost not stated. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owners, Broadway State Bank. The building will be erected at the corner of Broadway and East Pike street, and will cover an area of 34x52 feet. Interior of the first floor will be divided into public space, work space, private offices and vault rooms. Upper floors will be arranged for president's office and directors' rooms. Interior finish will be of hardwood, marble, tile and ornamental plaster and bronze. There will be steam heat and a vacuum cleaning system. Special vaults will be constructed. The exterior of the building will be faced with pressed brick. Bids will be called for about the first of June.

CASTLE ROCK, WASH.—Bank, 2 story and base, brick and concrete, \$35,000. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owners, Castle Rock Bank. The building will be erected on a corner lot and is of the classic design. The first floor will be fitted up for the banking rooms and will be handsomely finished in tile, marble and hardwoods. Concrete vaults will be constructed. Upper floor will be arranged for offices. There will be a central heating system. The exterior of the building will be faced with pressed brick and cement plaster. Plans are complete and figures are being taken.

BRIDGES AND DAMS.

CEDAR RIVER, WASH.—Masonry dam, \$1,500,000. Engineer, City Engineer Dimock, Seattle. Owners, City of Seattle. Plans and specifications have been approved and bids will be opened on June 13th for the construction of the Cedar River Gravity Dam. Plans and specifications may be secured from the Board of Public Works. The structure, on which about \$400,000 has already been expended by force account under the supervision of City Engineer Dimock, will cost about \$1,500,000, the part to be constructed under this call for bids costing \$1,000,000. The specifications call for the construction of a masonry dam 200 feet high, 800 feet long, 200 feet wide at the bottom and 15 feet wide at the top and containing about 150,000 cubic yards of concrete. The work also includes the construction of an outlet tunnel about 1600 feet long, and 11 feet in diameter, inside dimension, also of concrete construction. The elevation under this contract will be 1550 feet to be developed later to an elevation of 1600 feet at an additional cost of about \$300,000.

COURT HOUSES.

MODESTO, STANISLAUS CO., CAL.—Court house alterations, brick construction, \$15,000. Architect, Ralph P. Morrell, Odd Fellows' Bldg., Stockton. Owners, Stanislaus County. Plans for extensive alterations to the old court house building have been completed and bids are now being taken. The work will include considerable exterior alteration as well as interior rearrangement of offices, new plastering, plumbing and electric work and painting. Steam heat will be installed. The exterior of the building will be faced

with pressed brick and cement plaster. Bids will be opened on July 20th. Plans can be secured from the architect.

SAN FRANCISCO—Structural steel for City Hall, \$1,500,000. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Bids will be opened on June 11th by the Board of Public Works for furnishing and fabricating the structural steel for the new City Hall. A clause in the proposal requiring the eight hour law and \$3 wage scale, is causing protests from the local bidders who wish to be assured that eastern firms will be held to the same requirements. The official proposal appears in another column of this issue. The contract will call for about 7,000 tons of fabricated material.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Stable, 1 story, brick and steel, \$12,500. Architect, none. Owner, Ernest Hoover, 520 Eddy St., S. F. The building will be erected on 11th street south of Market and will cover an area of 100x205 feet. A cement floor will be used except in the stalls, which will be planked. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who is now doing the work by Day Labor. He is in the market for all kinds of materials.

FLATS.

SAN FRANCISCO—Flats, 3 story and base, frame, \$10,000. Architects, Salfeld & Kohlberg, Clunie Bldg., S. F. Owner, Charles Ellis. The building will be erected at the southwest corner of Lake street and 11th Avenue, and will cover an area of 32½x45 feet. Interior has been arranged for six modern flats of four and five rooms each with bath. Interior finish will be of pine with some hardwood floors and panels. There will be open fire places and tile or brick mantels. Bath rooms will be finished in cement plaster on metal bath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 3 story and base, frame, \$5,750. Architect, L. Traverso, 554 Union St., S. F. Owner, E. Ratto. The building will be erected on Jasper Place and will contain three flats of five and six rooms each with bath. Interior finish will be of pine throughout. There will be gas grates and tile mantels. Tile will be used in the bath rooms and kitchens. The exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now purchasing all materials.

GOVERNMENT WORK AND SUPPLIES.

Panama Canal Commission.

The time is rapidly approaching, if it did not arrive some time since, for the recall of the Panama Canal Commission. It is understood that Colonel Goethals has been for some time desirous that a change in administration in the Canal Zone shall be made. The work hitherto devolving on the commission was completed, to all practical purposes, two years ago. In that period the commission has had but

one meeting. Some of the representatives and senators who have visited the Isthmus believe it would be in the interest of economy and efficiency to recall the members of the commission, retaining Colonel Goethals as chief engineer to superintend the finishing touches and as governor of the Canal Zone. It is understood that the members of the commission are desirous of staying on the Isthmus until the formal opening of the canal in 1915, but the legislators who have looked into the situation believe that the extra compensation above service pay received by the members of the commission could be saved. The remainder of the work on the canal is nerve-racking enough, because it represents the rush and turmoil of getting the dock completed at a given date, but the real engineering and construction problems have been solved, and there is nothing more to be done by the heads of departments who have served under Colonel Goethals. It is estimated that the only problem now to be faced in the Canal Zone is the organizing and training of the force of 2,600 men required for the permanent maintenance and operation of the completed canal, and Colonel Goethals estimates that steps toward that organization should be taken at once, with the idea of having everything in readiness by January 1, 1915, the date fixed by Colonel Goethals as that for the formal opening of the canal.

Grand Junction, Colo., Public Building.

All bids received by the supervising architect for the construction, complete, of the U. S. public building at Grand Junction, Colo., have been rejected.

Electric System, Fort Mason.

The contract for the installation of an electric-light system at Fort Mason, Cal., has been awarded to the Newberry-Bendheim Electric Co., of San Francisco, Cal., at \$15,700; time, 140 days.

Wire Fence, Fort Russell.

The bid of Wilseck & Inman, \$750 in amount, has been accepted for furnishing 12,550 lineal feet barbed wire fence at Fort D. A. Russell, Wyo.; delivery to be made in 30 days.

Reclamation Canal.

The Reclamation Service is asking for proposals for earthwork on the first five miles of the main canal, Grand Valley project, Colo. This work involves the excavation of approximately 365,000 cubic yards of material and is situated near the main line of the Denver & Rio Grande and Colorado Midland Railways and between two and seven miles northeast of Palisade, Colo. The bids will be opened on June 2 at the office of the U. S. Reclamation Service, Grand Junction, Colo.

Salem, Indiana School.

The following bids were received by the Commissioner of Indian Affairs, Washington, D. C., for the construction of a brick industrial building at the Salem Indian School, Ore.:

Item 1, for the building, complete; 2, omitting stud cross partition and substituting 9-inch brick wall; 3, omitting steam heating system.

John Almeter, Portland, Ore., Item 1, \$7,034; 2, \$7,184; 3, \$6,434.

R. A. Erixon, Salem, Ore., Item 1, \$1,070; 2, \$4,643; 3, \$4,019.

W. D. Lovell, Minneapolis, Minn., Item 1, \$5,300; 2, add \$150; 3, deduct \$600.

Denison & McLaren, Salem, Ore., Item 1, \$5,360.80; 2, \$5,560.80.

Southwick & Headrick, Salem, Ore., Item 1, \$4,734.13; 2, \$4,900; 3, \$4,137.14.

W. D. Pugh, Salem, Ore., Item 1, \$5,100; 2, \$5,172; 3, \$4,493.

Dredging, Oakland Harbor.

Bids were opened by the U. S. engineer, San Francisco, Cal., for dredging about 1,038,450 cubic yards from Oakland Harbor, Cal., as follows:

Standard American Dredging Co., Merchants Exchange Bldg., San Francisco, Cal., 151-3c.

San Francisco Bridge Co., Nevada Bank Bldg., San Francisco, Cal., 12.8c.

N. R. Harris, 21 California street, San Francisco, Cal., 13.45c.

Puget Sound, Traveling Cranes.

The chief of the bureau of yards and docks, Navy Department, Washington, D. C., received the following bids for furnishing four electric traveling bridge cranes and two electric traveling wall cranes for the general foundry, navy yard, Puget Sound, Wash.:

Item 1, price for six cranes, complete; 2, price for six cranes, complete, in accordance with the spirit of the plans and specifications with such modifications of methods and details as may be desired.

Northern Engineering Works, 2 South Cherie street, Detroit, Mich., Item 1, \$27,650.

Niles-Bement-Pond Co., 111 Broadway, New York City, item 2, \$28,700.

Pearl Harbor Towers.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for constructing two coal hoisting towers at the naval station, Pearl Harbor, H. T.:

Item 1, price for one tower, complete; 2, price for two towers, complete.

Robbins Conveyor Belt Co., 13 Park Row, New York city, item 1, \$41,000; 2, \$75,000.

McMyler Interstate Co., Bedford, O., item 2, \$99,200.

C. W. Hunt Co., West New Brighton, N. Y., item 1, \$38,700; alternate, add, \$3,700; 2, \$70,500; alternate, add, \$7,100.

Mead-Morrison Manufacturing Co., 149 Broadway, New York city, item 1, \$75,058 and \$60,480; 2, \$116,498 and \$94,650; deduct \$1,800 for each grab bucket deducted.

Exeter Machine Works, West Pittston, Pa., item 1, including three grab buckets, \$45,200; 2, including six grab buckets, \$84,750; deduct \$1,720 for each grab bucket not desired.

Cement, Portland, Ore.

The following bids were opened by the U. S. engineer, Portland, Ore., for furnishing 100,000 barrels Portland cement:

Union Portland Cement Co., Ogden, Utah, f. o. b. mill, \$1.45; Red Devil sacks, 10c.

Three Forks Portland Cement Co., Ogden, Utah, f. o. b. mill, \$1.55; Red Devil sacks, 10c.

F. P. Crowe & Co., Portland, Ore., f. o. b. Celilo, Ore., \$2.54; manufactured at Davenport, Cal.; sacks, \$10c, or Stand-

ard brand manufactured at Napa Junction, Cal., sacks, 10c.

Riverside Portland Cement Co., Riverside, Cal., f. o. b. Celilo, Riverside brand, sacks, 10c.

The following firms have applied for plans and specifications for the work at Pocatello, Idaho. Bids will be opened on May 28.

Hiram Lloyd Building and Construction Co., St. Louis, Mo.

D. T. McCarthy, 411 Walnut street, Philadelphia, Pa.

K. E. Deering, Portland, Ore.

Campbell Building Co., Salt Lake City, Utah.

M. Yeager & Son, Baum Bldg., Danville, Ill.

King Lumber Co., Charlottesville, Va.

Misho & Grant, Globe Bldg., Seattle, Wash.

Wm. H. Maxwell, Auburn, Ind.

F. S. Pal 11915, Bl

F. P. Salih, 519 Overland Bldg., Boise, Idaho.

Palmberg & Mattson, Astoria, Ore.

E. Ralph Evans, Cooding, Idaho.

J. H. Wiese, Omaha, Neb.

Whiteway-Lee Construction Co., Boise, Idaho.

HALLS AND SOCIETY BUILDINGS.

SAN FRANCISCO — Hall, 1 story, frame, \$3,000. Architect, none. Owners, Richmond Park Improvement Club, 674 8th avenue. The building has been designed for a meeting place and will cover an area of 30x75 feet. Interior will be finished in pine throughout. The exterior of the building will be covered with rustic. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Auditorium, steel. Cost not stated. Architects, Palmer & Hornbostel, New York, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids opened on Thursday last for the structural steel for the \$500,000 auditorium building show Dyer Bros. of San Francisco low at \$177,000. A complete list of the figures submitted both for all work and unit prices appears under the heading of Oakland and Alameda County in this issue.

REDWOOD CITY, SAN MATEO CO., CAL.—Lodge hall, 2 story and base, frame, \$15,000. Architects, Warren Skilling and Le Baron R. Olive, associated, Garden City Bank Bldg., San Jose. Owners, Foresters of America. The building will be designed for the exclusive use of the order and will contain a large dance hall, banquet room, meeting rooms and offices of the organization. Interior will be finished in pine and hardwood. A central heating system will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken. Bids will be opened on May 21st.

RIVERSIDE, RIVERSIDE CO., CAL.—Lodge hall, 3 story and base, brick and steel, \$80,000. Architects, S. I. Gilliar and Welmer P. Lamar, Crescent Bldg., Riverside. Owners, Riverside Elks' Hall Association. The building will be erected at the corner of Market and Whittier Place, and will cover a large area. The first floor will contain the entrance and lobby, finished

HOTELS.

In marble and tile besides a large library, billiard room, parlors and offices, which will be finished in oak. A large auditorium with a gallery seating 500 people will occupy the second floor. Third floor will be arranged for lodge rooms, eight single rooms and ten apartments. Plans also provide for a roof garden. The basement of the building will contain a banquet hall, cafe and gymnasium. There will be steam heat, elevator service, a vacuum cleaning plant and hot water system. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

LOS ANGELES, CAL.—Lodge hall, 4 story and base. Class B construction, \$75,000. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Knights of Columbus. The building will cover an area of 62½x160 feet. The first and second floors will be devoted to the auditorium with completely equipped stage, gallery and lounging rooms. The third floor will contain lodge rooms, parlors, dining room and kitchen. The fourth floor will be subdivided into apartments for the members. Interior finish will be of pine and hardwood. There will be steam heat, elevator service and a vacuum cleaning system. A large and well equipped gymnasium will occupy the basement. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and bids are being taken for the work.

LOS ANGELES, CAL.—Lodge hall, 2 story and base, brick and steel. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Westlake Masonic Lodge Association. This work has been mentioned here before when plans were first started. Working drawings are nearly complete and bids will be called for shortly. The building will cover an area of 40x95 feet. The first floor will contain a banquet room and ball room, basement several large club rooms, and the lodge rooms will occupy the second floor. Interior finish will be of pine and hardwood. A central heating system will be installed. Exterior of the building will be faced with pressed brick.

Contracts Awarded.

ROSEBURG, ORE.—Lodge hall, 2 story and base, brick and steel, \$31,000. Architect, Earl A. Roberts, Selling Bldg., Portland. Owners, Roseburg Elks' Hall Association. Contractors, W. C. Arthur & Sons, Lumber Exchange Bldg., Portland. Contract price, \$31,000.

HOSPITALS.

SAN FRANCISCO.—Hospital wiring and conduit system. Cost not stated. Architect, Supervising Superintendent Roberts, Post Office Bldg., S. F. Owners, United States Government. Plans and specifications for the rearrangement of the conduit system and rewiring in the United States Marine Hospital building have been completed and bids are now being taken. Figures will be opened by Mr. Roberts on June 5th. Plans can be secured from Supervising Superintendent Roberts in this city. The official proposal appears in this issue.

SAN FRANCISCO.—Hotel, 3 story and base, reinforced concrete, \$15,000. Architect, Joseph Cahen, 45 Kearny St., S. P. Owner, J. Rudee. The building will be erected on 4th street north of Polson street, and will be arranged for stores and the hotel entrance on the first floor. Upper two floors will contain about sixty guest rooms and several baths. Interior finish will be of pine throughout. There will be hot and cold running water in all rooms. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken by the architect.

SAN FRANCISCO.—Hotel, 4 story and base, brick and steel, \$30,000. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner Eisenbach Co. The building will be erected at the corner of Sacramento and Stockton streets, and will contain three stores besides the hotel entrance and lobby on the first floor. Upper floors will be arranged for sixty guest rooms and ten baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service and a hot water plant. Bath rooms will be finished in cement plaster. The exterior of the building will be faced with cement plaster and pressed brick. Plans are now being prepared.

SAN FRANCISCO.—Hotel, 3 story and base, brick, \$20,000. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner's name withheld. This building will be erected on a lot adjoining a four-story hotel building, plans for which are being prepared by the same architects. The building will contain in the neighborhood of thirty guest rooms and several baths. All rooms will have steam heat and hot and cold running water. Interior finish will be of pine. The exterior of the building will probably be faced with cement plaster. Plans are being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Hotel alterations, brick construction, \$10,000. Architect, A. L. Phillips, Hotel Stockton. Owner, Mrs. Carrie Bishop. This work will include considerable structural iron, new plastering, plumbing and painting. Wall beds will be installed. Interior finish will be of pine. Some marble work is also specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SEATTLE, WASH.—Hotel, 4 story and base, brick and steel, \$70,000. Architect, A. Wickersham, Lyon Bldg., Seattle. Owners, Yesler Estate. This building will be erected at the corner of Yesler Way and Post street and will cover a large area. The building has been designed for a commercial hotel with stores on the first floor besides a barber shop, cafe and hotel offices and lobby. Upper floors will contain in the neighborhood of 150 guest rooms about half of which will have private baths. There will be steam heat, elevator service, a hot water plant and vacuum cleaning system. Interior finish will be of pine and hardwood with ornamental plaster used in the lobby and offices. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

TACOMA, WASH.—Hotel, 16 story and base. Class A construction, \$600,000. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owners,

National Realty Co., L. D. Pratt, President. This building will be erected at the corner of 12th avenue and Pacific street and will contain a total of 250 rooms, all of which will have connecting baths. Construction will be fireproof throughout. Working drawings have just been started and it will be sometime before bids are called. Further mention of the work will be made in these columns.

LIBRARIES.

WATT'S, LOS ANGELES CO., CAL.—Library, 1 story and part base, brick, \$10,000. Architect, Elmore R. Jeffery, Citizens' National Bank Bldg., L. A. Owners, Town of Watts. The building will cover an area of 70x30 feet and will be designed in the classic style. There will be two main readings rooms and a stack room. Interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick trimmed with artificial stone. A central heating system will be installed. Plans are being prepared.

PANAMA-PACIFIC EXPOSITION WORK.

SAN FRANCISCO.—Transportation building, frame construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the construction of the Transportation Building are now out for figures. The building will be erected in the Exhibit Section of the Harbor View site. Bids will be opened on May 27th. Separate bids are being taken for the general construction and for the installation of plumbing, water and sewer pipes. Plans can be secured from the Director of Works. Official proposal appears in this issue.

SAN FRANCISCO.—Exposition work, lath, Manufactures Building and plumbing on same. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids were opened on Tuesday last by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Co. for three different jobs. The Gordon Construction Co. were awarded the contract for constructing a lath house in Tennessee Hollow at \$1,995. McLeran & Peterson were low for the general construction of the Manufactures Building at \$217,000, and J. Doherty was low for the plumbing work on the same building at \$19,630. Wittan-Lyman Co. were also very close bidders on the plumbing at \$19,811. A complete list of these figures appears in this issue under the heading of San Francisco.

POST OFFICES.

GRAND JUNCTION, COLO.—Post Office, 2 story and base, fireproof construction. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. This building has been out for figures previously, but all bids were rejected. New figures are now being called for and will be opened on June 24th. The structure will cover an area of approximately 5,600 square feet and will be fireproof

throughout except roof and ceilings. There will be steam heating, modern plumbing and hardwood interior finish. Exterior of the building will be faced with stucco, stone and marble. Plans can be secured from the Supervising Architect at Washington, D. C., or from the custodian of the site at Grand Junction. Official proposal appears in this issue.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SPOKANE, WASH.—Depot, 2 story and base. Class A construction. Cost not stated. Engineer, J. R. Holman, care of O.-W. Ry. and N. Co., Seattle. Owners, Oregon-Washington Railroad and Navigation Co. and the C. M. and P. S. Ry. Co. A union depot is to be erected by the two above named railroads in Spokane, and it is stated that plans are complete and have been approved. Engineer Holman of Seattle will soon issue a call for bids.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling will be erected on 10th avenue north of Fulton street, and will contain seven rooms and bath. Interior finish will be of pine throughout with hardwood floors in the living rooms, dining room and reception hall. Bath room will have tile wainscot. There will be a large open fire place in the living room with brick or tile mantel. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and he will construct the building by Day Labor.

SAN FRANCISCO—Bungalow, 1 story and base, frame, \$2,500. Architect, none. Owners, Homeland Building Co., Merchants' Exchange Bldg., S. F. The house will contain six rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residences, 4, 2 story and base, frame, \$3,500 each. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owners, Empire Land Co., Mills Bldg., S. F. These dwellings will be erected on 24th avenue north of Kirkham street. Each has been designed to contain seven rooms and bath. Interiors will be finished in pine with some elm panels and hardwood floors. There will be open fire places and brick or tile mantels. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with rustic and metal lath and plaster. Plans are complete and work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architect, C. H. Miller, Foxcroft Bldg., S. F. Owner, Dr. R. T. Southerland. The dwelling has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood with hardwood floors in the principal rooms. Bath room will be

finished in cement plaster. Tile will be used in the kitchen. There will be furnace heat and open fire places. Mantels will be of tile or brick. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame \$15,000. Architect, William Knowles, Central Bank, Oakland, and Hearst Bldg., S. F. Owner, F. Hall, Key Route Inn, Oakland. This dwelling has been mentioned here before when plans were being prepared. Working drawings are now completed and work has been started by Day Labor. The dwelling will contain fifteen living rooms, several baths and sleeping porches. Interior finish will be of pine, hardwood and white enamel. Bath rooms will be finished in tile. Plans provide for furnace heat, open fire places, a vacuum cleaning system and automatic water heaters. Hardwood floors will be used in all principal rooms. The exterior of the house will be covered with cement plaster on metal lath.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architects, United Home Builders, 1762 Broadway, Oakland. Owner, George D. Slater. The house will be designed for a six-room dwelling with bath. Interior will be finished in pine and redwood with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,500. Architect, Harris Allen, 2514 Hille-gass Ave., Berkeley. Owner, W. G. White. The dwelling will contain seven or eight rooms with bath and sleeping porch. All interior finish will be of pine or white enamel. Hardwood floors will be used in the principal rooms. Plans include furnace heat and open fire places. Mantels will be of brick. Bath room will be finished in cement plaster with some tile floors. Tile will be used in the kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans for this work are now being prepared.

OAKLAND, CAL.—Bungalows, 30, 1 and 1½ story and base, frame dwellings, \$2,000 to \$2,500. Architect, none. Owner, G. B. Hollenbeck, 5210 Fairfax, Oakland. These houses will be erected on the Wadean Tract, and each house will be arranged for either five or six rooms and bath. Interiors will be finished in pine with hardwood floors in the living room and dining room. There will be open fire places and tile or brick mantels. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster, rustic and shingles. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, E. Massberg, 5301 Dover St., Oakland. The dwelling has been designed for an eight-room house with bath and sleeping porch. Interior fin-

ish will be of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick or tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1½ story and base, frame, \$3,250. Architect, none. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. The house will be erected in the Northbrae Tract, and has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine with hardwood floors in the principal rooms. There will be a large open fire place with brick or tile mantel in the living room. Tile will also be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

FAIR OAKS, SAN MATEO CO., CAL.—Residence, 2 story and base, frame, \$50,000. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner, William Kumpf. The dwelling will be designed for a large country home, containing fourteen living rooms, five baths and sleeping porches. A two-story frame garage with accommodations for three machines and living room above will also be erected on the site. The grounds also will be laid out in beautiful garden plots, lily ponds, pergolas and road ways. The exterior of the building will be in modern classic style. The house will contain a large living room, 20x30; dining room, 15x15; kitchen, 15x14; butler's pantry, servants' dining rooms, 12x14; breakfast room, 12x12; billiard room, 18x20; main bed room, 24x24 with boudoir adjoining, children's bed room, 15x15; three guests' rooms about 12x15; five bath rooms and three servants' rooms. The rooms will all be artistically finished in hardwoods and will be richly wall papered. Floors will be of oak. Gas and electricity will be installed also steam heat, hot water circulating system and vacuum cleaner. The exterior of the building will be faced with cement plaster. Plans for the work are now being prepared.

LAPAYETTE, CONTRA COSTA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, Harris Allen, 2514 Hille-gass Ave., Berkeley. Owner, Miss M. S. Dyer. The dwelling will contain eight rooms, bath and sleeping porch. Interior will be finished in pine throughout. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with clapboards. Plans are complete and figures are being taken.

SAN FRANCISCO—Residence, 2 story, attic and base, frame, \$8,000. Architect, Edward G. Bolles, Foxcroft Bldg., S. F. Owners, S. A. Born Building Co. This dwelling will be erected

on West Clay east of 24th avenue and will contain ten rooms, baths and sleeping porch. Interior finish will be of pine and hardwood with hardwood floors in all principal rooms. Bath rooms will be finished in tile. There will be a central heating system and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$6,500. Architect, Earl B. Scott, Humboldt Bank Bldg., S. E. Owner's name withheld. The dwelling will be erected in Ashbury Terrace and will contain eight rooms and bath. Interior finish will be largely of pine with some hardwood in the living and dining rooms. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Residence, 3 story and base, frame, \$10,000. Architect, Edward G. Rolles, Foxcroft Bldg., S. E. Owners, S. A. Born Building Co. The house has been designed for a ten-room dwelling with three baths, and will be erected at the corner of 24th avenue and West Clay Park. Interior will be finished in pine, white enamel and hardwoods. There will be furnace heat and open fire places. Mantels will be of tile or brick. Hardwood floors are to be used in the principal rooms. Baths will be finished in tile with cement floors. An automatic water heater will be used. The exterior of the building will be covered with cement plaster on metal lath. Work will be started by Day Labor as soon as plans can be completed. Mr. Born will purchase all materials.

HOLLYWOOD, LOS ANGELES CO., CAL.—Residence, 2 story and base, brick. Cost not stated. Architects, Krucker & Deckbar, Ferguson Bldg., L. A. Owner, Mrs. R. Thomas. The dwelling has been designed for a fourteen-room house with sleeping porches and several baths. A brick garage will be erected on the same lot. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. Plans provide for a central heating system and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile with cement floors. An automatic water heater will be installed. Exterior of the dwelling and garage will be faced with pressed brick and cement plaster. A clay tile roof will be used. Plans are complete and figures are being taken.

SAN JOSE, SANTA CLARA CO., CAL.—Residence, frame construction. Cost not stated. Architects, none. The following Day Labor jobs are reported about to be started in San Jose: P. E. Peterson, 452 San Fernando St., 1½ story and base, frame, \$2,500; S. G. Pelton, 445 South 3rd St., 6 room, frame cottage, \$2,000.

SEALED PROPOSALS.

PROPOSALS FOR BUILDING.

BUILDING—Office of Constructing Quartermaster, Fort D. A. Russell, Wyo.—Sealed proposals, in triplicate, for remodeling bakery building No. 266 will be received here until 11 a. m., Monday, June 2, 1913, and then opened. Information furnished on application. A deposit of five dollars (\$5) will be required to insure return of plans and specifications if removed from the office. Envelopes containing proposals should be indorsed "Proposals for Remodeling Bakery Building" and addressed to J. A. COLE, maj., Q. M. corps, constructing Q. M.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at the Board Room No. 415, Exposition Building, Pine and Battery Streets, San Francisco, California, at 10:30 A. M., Thursday, May 22, 1913 for the Construction and Installation of Runways for Gravel and Crushed Stone, in ac-

cordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check, payable to the order of the Panama-Pacific International Exposition Company, or cash in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which, check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 207 Service Building, Fillmore and Chestnut Streets, by depositing \$5.00 in cash, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

PROPOSALS FOR BUILDING.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 28th day of May, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The general construction of the Edison School Building, to be located on the westerly side of Church street, between Hill and Twenty-second streets.

Note—The work hereinbefore referred to is to be paid for out of the proceeds of the sale of School Bonds of the issue of 1904, and contract will not be made or entered into until the awarded shall have purchased or caused to be purchased, bonds to the amount of the contract, together with the estimated incidental expenses.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within one hundred and eighty (180) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$15,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposals.

Proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works,
F. J. CHURCHILL,
Secretary.

BIDS WANTED FOR THE EQUIPMENT AND INSTALLATION OF THE GYMNASIA OF THE LOWELL HIGH SCHOOL AND THE GIRLS' HIGH SCHOOL.

SEALED BIDS WILL BE RECEIVED for the Equipment and Installation of the Gymnasias of the Lowell High School and the Girls' High School. Specifications may be had at the office of the undersigned.

Sealed proposals will be received at open session of the Board of Education, Wednesday, May 21, 1913, at 2 o'clock p. m. M. R. NORRIS, Acting Secretary Board of Education.

PROPOSALS FOR STEEL

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 11th day of June, 1913. The furnishing and fabricating of structural steel and iron for the New City Hall, to be located on City Property bounded by Grove, Polk and McAllister streets and Van Ness avenue.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the date of the contract to be made and entered into therefor, and completed within the time limits set forth in the specifications hereinbefore referred to.

The amount of bond for faithful performance of contract has been fixed at \$125,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposal forms will be furnished gratuitously upon application at the office of the Architects of said Board, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

F. J. CHURCHILL,
Secretary.

INVITATION FOR PROPOSALS.

TREASURY DEPARTMENT—Office of the Supervising Architect, Washington, D. C., May 13, 1913—Sealed proposals will be received at this office until 3 o'clock p. m. on the 24th day of June, 1913, and then opened, for the construction (including plumbing, gas piping, heating apparatus, electric conduits and wiring, interior lighting fixtures, and approaches) of the United States post office at Grand Junction, Colo. The building is to be two stories high with a basement, and will have a ground area of approximately 3,600 square feet; fireproof construction, except ceiling and roof, stone or marble and stucco facing; and slate and tin roof.

Drawings and specifications may be obtained from the custodian of site at

Grand Junction, Colo., or at this office, at the discretion of the Supervising Architect.

O. WENDEROTH,
Supervising Architect.

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Office of the Supervising Architect, Washington, D. C., May 9, 1913—SEALED PROPOSALS will be received in this office until 3 o'clock p. m. on the 20th day of June, 1913, and then opened, for the construction complete of latrine buildings, sewage purification tanks, and connected piping at quarantine station, Honolulu, Hawaii, in accordance with the specification and the drawing. Drawing and specification may be obtained from the custodian of the station at Honolulu, Hawaii, or at this office, at the discretion of the Supervising Architect. O. WENDEROTH, Supervising Architect. (5)

SEWERS, STREET WORK AND WATER SYSTEMS.

HONOLULU, HAWAII—Latrines, sewage and purification tanks. Cost not stated. Architect, Supervising Architect, Washington, D. C. Owners, United States Government. Plans have been completed and bids are now being taken for the construction of latrines and sewage and purification tanks for the Quarantine Station at Honolulu. Bids will be opened on June 20th. Plans and specifications can be secured from the Supervising Architect, Oscar Wenderoth, Washington, D. C. The official proposal appears in another column of this issue.

SALEM, ORE.—Water system. Cost not stated. Engineers not selected. Owners, Santiam Water Co., Salem. For the purpose of supplying water from the Little North Fork of the Santiam River to Salem and other valley towns the Santiam Water Company has been organized and articles of incorporation will be filed immediately. The company is capitalized at \$300,000. The incorporators are W. E. Pierce, a capitalist of Boise, Idaho; Charles Theis, of Spokane, and John D. Turner, a Salem lawyer. The principal offices of the company will be at Salem. It is announced that the company will lay a pipe line from the Little North Fork of the Santiam to Salem and the State institutions and also supply water to Stayton, Turner, Aumsville and Sublimity.

SCHOOLS.

SAN FRANCISCO—School, 2 story and base, frame and concrete. Cost not stated. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, City and County of San Francisco. This building will be erected at the corner of Lombard and Jones streets, and is to be known as the Cooper School. Mr. Sawyer has only started preliminary plans and details of construction can not be given at this time. Plans are to provide for 16 class rooms and an assembly hall. Halls and stairways will be of concrete construction. Interior trim will be of pine. There will be a modern system of heating and ventilation. Exterior of the building will probably be covered with cement plaster. Bids will be taken through the office of the Board of Public Works.

SAN FRANCISCO—School, 2 story and base, brick and steel. Cost not stated. Architect, Albert Pissis, Flood Bldg., S. F. Owners, City and County of San Francisco. Mr. Pissis has just been commissioned to prepare plans

for the new school which is to be erected on Washington street west of Kearny. When completed this building will be known as the Oriental School. Plans will provide for twelve or fourteen class rooms and an assembly hall. A modern system of heating and ventilation will be installed. Interior finish will be of pine. Exterior of the building will probably be faced with pressed brick. Plans are now being prepared and when complete bids will be taken through the office of the Board of Public Works.

LOS ANGELES, CAL.—School group, 9 buildings, brick and concrete construction. Cost not stated. Architect, State Architect Woollett, Sacramento. Owners, State of California. Plans for the State Normal School which is to be erected at Los Angeles have been completed and are now in the hands of the contractors for figures. Bids will be opened in the offices of the State Board of Control on June 5th at 12 o'clock. Plans and specifications can be secured from the State Engineer at Sacramento. The official proposal appears in another column of this issue.

SAN FRANCISCO—School, 2 story and base, frame and concrete. Cost not stated. Architects, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. This building, which is to be known as the Edison School, will be located on the west side of Church street between Hill and 22nd streets. All halls and stairways will be of reinforced concrete. Plans provide for twelve class rooms. Interior finish will be of pine with some hardwood floors. A hot water system of heating will be installed. Exterior of the building will be covered with cement plaster and brick. Plans are complete and bids are now being taken. Bids for the general construction will be opened on May 28th. Plans can be secured from the Department of Architecture.

SANTA MONICA, LOS ANGELES CO., CAL.—School gymnasium, 2 story and base, brick. Cost not stated. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Santa Monica High School District. This work has been mentioned here before. Plans provide for two separate buildings, one for the boys and one for the girls. A brick wall which is to be erected around the athletic field will also be included in this contract. Plans may be secured from the architects. Bids are now being taken and will be opened on May 28th.

Contracts Awarded.

PORTERVILLE, TULARE CO., CAL.—School, 1 story and base, brick and frame, \$24,000. Architect, F. W. Griffin, First National Bank Bldg., Porterville. Owners, Porterville School District. Contractor, C. Griffin, Fresno. Contract price, \$15,500. Other bidders on the work were: G. A. Noble, Visalia, \$15,850; Trewitt & Shields, Hanford, \$16,000; S. H. MacKen, Terra Bella, \$16,625; Graham, Lapp & Kirkpatrick, Exeter, \$17,210; C. R. Greenough, Porterville, \$17,887; Marlow & Sons, Lindsay, \$21,158.

STORES AND OFFICES.

SAN FRANCISCO—Store and restaurant, 1 story and base, frame, \$10,000. Architect, W. H. Crim, Jr., 125 Kearny St., S. F. Owner, Milton S. Eisner. The

Building will be erected at the southeast corner of Bush and Hyde streets, and will cover an area of 35x137 1/2 feet. The front portion will be occupied as a saloon and the rear for restaurant purposes. Interior will be finished in pine. The exterior of the building will be covered with cement plaster. Plans are complete and figures are now being taken.

SAN FRANCISCO—Store front alteration, brick construction, \$5,000. Architect, none. Owner, Frank P. McMan, 1199 Market street. This work will include the construction of new store fronts, new interior finish, electric work and plumbing. The exterior of the Class C building will not be changed above the first floor. Plans are complete and in the hands of the owner who will do the work by Day labor.

SAN FRANCISCO—Stores and lofts, or 4 story and base. Class C construction. Cost not stated. Architect, Henry Gelfuss, 46 Kearny St., S. F. Owner's name withheld. This building will be erected on one of the best corners of the waterfront and will have three street frontages. Plans provide for a pile foundation. Considerable structural steel will be used. Exterior walls will be faced with pressed brick. The first floor will be arranged for three stores and upper floors for light lofts or may be subdivided into rooms for offices. Interior finish will be of pine throughout. Elevator service will be installed. Plans are now being prepared for the work.

OAKLAND, CAL.—Stores, 1 story and base, brick. Cost not stated. Architect, none. Owner, P. J. Walker, Modoc Bldg., S. F. The building will be erected on Franklin street between 9th and 13th streets. There will be three stores with patent fronts and large glass windows. Interior finish will be of pine. The exterior of the building will be faced with pressed brick. It is stated that the owner contemplates constructing an eight-story Class A building on this site at a later date. Construction will be done by Day Labor. Mr. Walker is now purchasing all materials.

OAKLAND, CAL.—Stores and offices, 1 story and base. Class A construction. Cost not stated. Architect, Benjamin McDougall, Sheldon Bldg., S. F. Owners, Carlson & Snyder. This building, which is to be erected at the corner of 15th and Broadway, has been mentioned here a number of times before. The steel work has been let and figures are now being taken for all other parts of the building. Segregated bids are being taken.

OAKLAND, CAL.—Bank and offices, 1 story and base. Class A construction. Cost not stated. Architects, L. H. Dutton & Co., Chronicle Bldg., S. F. Owners, First Trust and Savings Bank. The architect is now taking figures from three or four low men on certain alternate propositions in connection with the construction of this building. The building will be erected at the corner of 16th and San Pablo avenue. Bids on the alternate propositions were opened last Friday and a award of contract will be made this week.

LOS ANGELES, CAL.—Stores and lofts, 3 story and base, brick. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Dunn-Wright-Ames Co. The building will

cover an area of 33x77 feet and will be arranged for stores on the first floor and lofts above. Interior finish will be of pine throughout. Entrance and vestibule will be wainscoted in tile and marble. There will be metal lath partitions, metal window sash and frames and fireproof doors. Patent store fronts are specified. The exterior of the building will be faced with pressed brick. Plans are complete and ready for figures.

LOS ANGELES, CAL.—Lofts, 5 story and base, reinforced concrete. Cost not stated. Architects, Krempel & Erkes, Henne Bldg., L. A. Owner, Carl Kurtz. The building will be erected on Los Angeles street between 7th and 8th streets and will cover an area of 30x136 feet. Construction will be of reinforced concrete, including walls, floors and roof slabs. There will be metal lath partitions, fireproof doors and metal window sash and frames. Interior finish will be of pine. Plans provide for elevator service, spiral chutes and sidewalk doors, lifts and lights. Exterior of the building will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Offices, 12 story and base. Class A construction. Cost not stated. Architect, Myron Hunt, Hibernian Bldg., L. A. Owner, H. E. Huntington. This work has been mentioned here before when plans were first started. The structure will be erected at the northwest corner of 12th and Main streets and will cover an area of 120x172 feet. Construction will be fireproof throughout with a complete steel frame, concrete floors, roof and metal interior finish. The basement and sub-basement and foundation will be constructed at once, and will be used as a substation by the Pacific Light and Power Co. Work on the superstructure will be started the first of next year. Bids will be called for shortly on the foundation work.

LOS ANGELES, CAL.—Offices, 14 story and base. Class A construction, \$500,000. Architect, A. Martin Haenke, Story Bldg., L. A. Owners, Los Angeles Home Builders. This building will be erected at the corner of 8th and Spring streets and will contain 400 modern offices. The work has been described in these columns before. Specifications include reinforced concrete floors and roof slabs, brick filler walls and glazed terra cotta facing. Interior partitions will be of metal lath and plaster and hollow tile. Lobby and corridors will be finished in marble and tile. Interior trim will be of metal and mahogany. Metal window sash and frames will be used. Separate bids will be taken on the general construction, marble and tile work, elevators, steam heating, electric wiring, etc.

PORTLAND, ORE.—Stores and offices, 8 story and base. Class A construction. Cost not stated. Architects, Doyle & Patterson, Portland. Owners, H. L. Pittcock. The building will cover the entire city block bounded by Washington, Stark, West Park and Tenth streets, and while designed for an eight-story structure, only the first three floors will be erected at the present time. Construction will be fireproof throughout. The basement and sub-basement will be occupied as a substation by the Northwestern Electric Co. Preliminary sketches were originally prepared by a San Francisco architect, and at that time the building, which was to have been of the

reinforced concrete type of construction, contained a large theatre to be used by the Hielg Theatre. Present plans include no theatre. Construction will be undertaken as soon as plans can be completed.

BAKERSFIELD, KERN CO., CAL.—Stores and offices, 2 story and base, brick, \$20,000. Architect's name not given. Owner, H. H. Fish, Bakersfield. The building will occupy a corner site and will cover an area of 65x115 feet. There will be several stores on the first floor with plate glass display windows in patent fronts. Upper floors will be arranged for offices. Interior finish will be of pine throughout. Exterior of the building will be faced with pressed brick. Bids will be called for at once.

Contracts Awarded.

PORTLAND, ORE.—Stores and offices, 2 story and base, reinforced concrete, \$50,000. Architects, Whitehouse & Foulhoux, Wilcox Bldg., Portland. Owners, Balfour-Guthrie Co. Contractors, Boyajohn-Anold Co., Wilcox Bldg., Portland. Contract price, \$50,000.

LOS ANGELES, CAL.—Lofts, 6 story and base, reinforced concrete, \$75,000. Architects, California Real Estate and Building Co., 631 South Spring St., L. A. Owners, California Real Estate and Building Co. Contractors, Somers & Lund, Security Bank Bldg., L. A. Contract price, \$75,000.

LOS ANGELES, CAL.—Lofts, 3 story and base, brick, \$30,000. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, S. W. Newmark. Contractors, Alta Planing Mill Co., 820 McGarry St., L. A. Contract price \$30,000.

THEATRES.

TURLOCK, STANISLAUS CO., CAL.—Theatre, 2 story and base, brick and steel, \$15,000. Architect, W. H. Weeks, 73 Post St., S. F. Owners, Turlock capital. This building has been mentioned here before when plans were first started. The building will contain stores and the theatre on the first floor and offices and lodge rooms on the upper floors. The main auditorium of the theatre will have a seating capacity of 750 people. Interior will be handsomely finished. A complete stage, equipment will be installed. Exterior of the building will be faced with pressed brick. Plans are complete and the architect is now taking figures for the work.

Contracts Awarded.

SEATTLE, WASH.—Theatre, 2 story and base, reinforced concrete. Cost not stated. Architect, John Creutzer, New York Bldg., Seattle. Owner, Colonial Theatre Co. Contractors, Pearson Construction Co., New York Bldg., Seattle. Contract price not stated.

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Office of the Supervising Architect, Washington, D. C., May 5, 1913.—SEALED PROPOSALS will be received at this office until 3 o'clock P. M. on the 9th day of June, 1913, and then opened, for a conduit and wiring system in the United States Marine Hospital, San Francisco, Cal., in accordance with drawing and specification, copies of which may be had at this office or at the office of the Supervising Superintendent of Construction, U. S. Post Office, San Francisco, Cal., at the discretion of the Supervising Architect.

O. WENDEROOTH,
Supervising Architect. (*)

Firms dealing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—7 story and base, brick and steel, \$55,000. San Francisco. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owner, W. B. Grosh. This building has been mentioned here before when plans were first started. Working drawings have been completed and figures are now being taken. The structure will be erected on Sutter street west of Powell and will contain a number of two and three room suites with wall beds and private bath rooms. Interior finish will be of pine and hardwood. Cement will be used in the bath rooms. There will be steam heat, elevator service and a vacuum cleaning system. Exterior will be faced with pressed brick and cement plaster.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architects, H. Gellfuss & Son, 46 Kearny St., S. F. Owner's name withheld. The building will be erected in the Western Addition and will contain six suites of four rooms each and bath. Interiors will be finished with pine with some elm panels. There will be a central heating system and wall beds. Bath rooms will have Keene's cement plaster on the walls. Exterior of the building will be covered with cement plaster, rustic and klinker brick veneer. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame, \$15,000. San Francisco. Architects, H. Gellfuss & Son, 46 Kearny St., S. F. Owner's name withheld. The building will be designed to contain twelve suites of two and three rooms each. All apartments will have private bath rooms and will be equipped with wall beds. Interior finish will be of pine with some elm panels. There will be a central heating system and probably an automatic elevator. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be covered with cement plaster, klinker brick veneer and rustic. Plans are now being prepared.

APARTMENT HOUSE—9 story and base. Class A construction, \$500,000. San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, Burlingame Court Investment Co. This building is to be erected at the corner of Sacramento and Mason streets, and when completed will be one of the largest and most handsomely finished apartment houses in the west. The building will be arranged for large suites, six, seven and eight rooms each, which have already been leased to high class tenants. Each suit will be finished to meet the special taste of the occupant and plans provide for many unique features. There will be a steam heating system, water cooling system, vacuum cleaning, elevators and dumb waiters. Construction will be fireproof throughout with a complete steel frame. Exterior will be faced with pressed brick and terra cotta. Plans are complete and a preliminary estimate is now being made.

APARTMENT HOUSE—3 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, F. C. Cook, 983 14th St., S. F. The present frame building will be altered and additions made so as to provide for five three-room suites with baths. The work will require new plumbing, electric work, plastering, painting and interior trim. Wall beds are specified. The exterior of the building will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$11,000. San Francisco. Architect, Charles J. Rousseau, Monadnock Bldg., S. F. Owner, John Fletcher. This building will be erected on Fell street west of Pierce, and will cover an area of 25x137½ feet. Plans provide for six suites of four rooms and bath each. All suites will have wall beds. Interior finish will be of pine and hardwood. There will be a central heating system and hot water plant. Bath rooms will be finished in cement plaster. The exterior of the building will be covered with cement plaster and brick veneer. Plans are complete and figures are being taken.

STABLE—1 story, brick and steel, \$12,500. San Francisco. Architect, none. Owner, Ernest Hoover, 520 Eddy St., S. F. The building will be erected on 11th street south of Market and will cover an area of 100x205 feet. A cement floor will be used except in the stalls which will be planked. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who is now doing the work by Day Labor. He is in the market for all kinds of materials.

HALL—1 story, frame, \$3,000. San Francisco. Architect, none. Owners, Richmond Park Improvement Club, 674 8th Ave., S. F. The building has been designed for a meeting place and will cover an area of 30x75 feet. Interior will be finished in pine throughout. The exterior of the building will be covered with rustic. Plans are complete and the work will be done by Day Labor.

HOTEL—2 story and base, reinforced concrete, \$15,000. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, J. Ruden. The building will be erected on 4th street north of Folsom street, and will be arranged for stores and the hotel entrance on the first floor. Upper two floors will contain about 60 guest rooms and several baths. Interior finish will be of pine throughout. There will be hot and cold water in all rooms. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken by the architect.

HOTEL—4 story and base, brick and steel, \$30,000. San Francisco. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owners, Eisenbach Co. The building will be erected at the corner of Sacramento and Stockton streets, and will contain three stores besides the hotel entrance and lobby on the first floor.

Upper floors will be arranged for 60 guest rooms and 10 baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service and a hot water plant. Bath rooms will be finished in cement plaster. The exterior of the building will be faced with cement plaster and pressed brick. Plans are now being prepared.

HOTEL—3 story and base, brick, \$20,000. San Francisco. Architect, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner's name withheld. This building will be erected on a lot adjoining a four-story hotel building, plans for which are being prepared by the same architects. The building will contain in the neighborhood of thirty guest rooms and several baths. All rooms will have steam heat and hot and cold running water. Interior finish will be of pine. The exterior of the building will probably be faced with cement plaster. Plans are being prepared.

FLATS—3 story and base, frame, \$10,000. San Francisco. Architects, Salfeld & Kohlberg, Clunie Bldg., S. F. Owner, Charles Ellis. The building will be erected at the southwest corner of Lake street and 11th avenue and will cover an area of 32½x45 feet. Interior has been arranged for six modern flats of four and five rooms each with bath. Interior finish will be of pine with some hardwood floors and panels. There will be open fire places and tile or brick mantels. Bath rooms will be finished in cement plaster. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling will be erected on 10th avenue north of Fulton street, and will contain seven rooms and bath. Interior finish will be of pine throughout with hardwood floors in the living rooms, dining rooms and reception hall. Bath room will have tile wainscot. There will be a large open fire place in the living room with brick or tile mantel. Exterior of the building will be covered with cement plaster on metal lath. Plans are in the hands of the owner and he will construct the building by Day Labor.

WINGALOW—1 story and base, frame, \$2,500. San Francisco. Architect, none. Owners, Homeland Building Co., Merchants' Exchange Bldg., S. F. The house will contain six rooms and bath. Interior finish will be of pine throughout. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

RESIDENCES—4, 2 story and base, frame, \$3,500 each. San Francisco. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owners, Empire Land Co., Mills Bldg., S. F. These dwellings will be erected on 24th avenue north of Kirkham street. Each has been designed to contain seven rooms and bath. Interiors will be finished in pine with some elm panels and hardwood floors. There will be open fire places and

brick or tile mantels. Tile will be used in the bath rooms and kitchens. Plans are complete and work will be done by Day Labor.

RESIDENCE—2 story, attic and base, frame, \$8,000. San Francisco. Architect, Edward G. Bolles, Foxcroft Bldg., S. F. Owners, S. A. Born Building Co. This dwelling will be erected on West Clay east of 24th avenue, and will contain ten rooms, baths and sleeping porch. Interior finish will be of pine and hardwood with hardwood floors in all principal rooms. Bath rooms will be finished in tile. There will be a central heating system and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$6,500. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The dwelling will be erected in Ashbury Terrace and will contain eight rooms and bath. Interior finish will be largely of pine with some hardwood in the living and dining rooms. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—3 story and base, frame, \$10,000. San Francisco. Architect, Edward G. Bolles, Foxcroft Bldg., S. F. Owners, S. A. Born Building Co. The house has been designed for a ten room dwelling with three baths, and will be erected at the corner of 24th avenue and West Clay Park. Interior will be finished in pine, white enamel and hardwoods. There will be furnace heat and open fire places. Mantels will be of tile or brick. Hardwood floors are to be used in the principal rooms. Bath will be finished in tile with cement floors. An automatic water heater will be used. The exterior of the building will be covered with cement plaster on metal lath. Work will be started by Day Labor as soon as plans can be completed. Mr. Born will purchase all materials.

APARTMENT HOUSE—6 or 8 story and base. Class C construction. Cost not stated. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Mr. Schmiedel. The property at the corner of Post and Leavenworth streets is about to be improved by the construction of a modern apartment house. Interior will be arranged for two, three and four room suites which will have private bath rooms and wall beds. There will be steam heat, elevator service, a vacuum cleaning system and dumb waiters. Bath rooms will be finished in tile and will have cement floors. Interior finish will be of pine and hardwood. A large lobby will be a feature of the building which will be finished in hardwoods with ornamental plaster. The exterior of the building will probably be faced with pressed brick. Plans are being prepared.

LATRINES, SEWAGE AND PURIFICATION TANKS—Cost not stated. Honolulu, Hawaii. Architect, Supervising

Architect, Washington, D. C. Owners, United States Government. Plans have been completed and bids are now being taken for the construction of latrines and sewage and purification tanks for the Quarantine Station at Honolulu. Bids will be opened on June 20th. Plans and specifications can be secured from the Supervising Architect, Oscar Wenderoth, Washington, D. C. The official proposal appears in another column of this issue.

SCHOOL—2 story and base, frame and concrete. Cost not stated. San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, City and County of San Francisco. This building will be erected at the corner of Lombard and Jones streets, and is to be known as the Cooper School. Mr. Sawyer has only started preliminary plans and details of construction cannot be given at this time. Plans are to provide for 16 class rooms and an assembly hall. Halls and stairways will be of concrete construction. Interior trim will be of pine. There will be a modern system of heating and ventilation. Exterior of the building will probably be covered with cement plaster. Bids will be taken through the office of the Board of Public Works.

SCHOOL—2 story and base, frame and concrete. Cost not stated. San Francisco. Architects, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. This building, which is to be known as the Edison School, will be located on the west side of Church street between Hill and 22nd streets. All halls and stairways will be of reinforced concrete. Plans provide for twelve class rooms. Interior finish will be of pine with some hardwood floors. A hot water system of heating will be installed. Exterior of the building will be covered with cement plaster and brick. Plans are complete and bids are now being taken. Bids for the general construction will be opened on May 28th. Plans can be secured from the Department of Architecture.

STORES AND RESTAURANT—1 story and base, frame, \$10,000. San Francisco. Architect, W. H. Crim, Jr., 425 Kearny St., S. F. Owner, M. S. Eisner. The building will be erected at the southeast corner of Bush and Hyde streets and will cover an area of 35x137½ feet. The front portion will be occupied as a saloon and the rear for restaurant purposes. Interior will be finished in pine. The exterior of the building will be covered with cement plaster. Plans are complete and figures are now being taken.

STORE FRONT ALTERATION—Brick construction, \$5,000. San Francisco. Architect, none. Owner, Frank P. McCann, 1199 Market street. This work will include the construction of new store fronts, new interior finish, electric work and plumbing. The exterior of the Class C building will not be changed above the first floor. Plans are complete and in the hands of the owner who will do the work by Day Labor.

STORES AND LOFTS—3 or 4 story and base. Class C construction. Cost not stated. San Francisco. Architect, Henry Gelfuss, 46 Eary St., S. F. Owner's name withheld. This building will be erected on one of the best corners on the waterfront, and will have three street frontages. Plans provide for a pile foundation. Considerable

structural steel will be used. Exterior walls will be faced with pressed brick. The first floor will be arranged for three stores and upper floors for light lofts or may be subdivided into rooms or offices. Interior finish will be of pine throughout. Elevator service will be installed. Plans are now being prepared for the work.

TRANSPORTATION BUILDING—Frame construction. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the construction of the Transportation Building are now out for figures. The building will be erected in the Exhibit Section of the Harbor View site. Bids will be opened on May 27th. Separate bids are being taken for the general construction and for the installation of plumbing, water and sewer pipes. Plans can be secured from the Director of Works. Official proposal appears in this issue.

EXPOSITION WORK—Lath house, Manufactures Building and plumbing on same. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids were opened on Tuesday last by the Building and Grounds Committee of the Panama-Pacific International Exposition Co. for three different jobs. The Gordon Construction Co. were awarded the contract for constructing a lath house in Tennessee Hollow at \$1,935. McLeran & Peterson were low for the general construction of the Manufactures Building at \$217,000, and J. Doherty was low for the plumbing work on the same building at \$19,650. Wittman-Lyman Co. were also very close bidders on the plumbing at \$18,811. A complete list of these figures appears in this issue under the heading of San Francisco.

STRUCTURAL STEEL FOR CITY HALL—\$1,500,000. San Francisco. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Bids will be opened on June 11th by the Board of Public Works for furnishing and fabricating the structural steel for the new City Hall. A clause in the proposal requiring the eight-hour law and \$3 wage scale is causing protests from the local bidders who wish to be assured that eastern firms will be held to the same requirements. The official proposal appears in another column of this issue. The contract will call for about 7,000 tons of fabricated material.

FLATS—3 story and base, frame \$5,750. San Francisco. Architect, L. Traverso, 854 Union St., S. F. Owner, E. Ratto. The building will be erected on Jasper place and will contain three flats of five and six rooms each with bath. Interior finish will be of pine throughout. There will be gas grates and tile mantels. Tile will be used in the bath rooms and kitchens. The exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now purchasing all materials.

SCHOOL—2 story and base, brick and steel. Cost not stated. San Francisco. Architect, Albert Pissis, Flood Bldg., S. F. Owners, City and County of San Francisco. Mr. Pissis has just been commissioned to prepare plans for the new school which is to be erect-

ed on Washington street west of Kearny. When complete this building will be known as the Oriental School. Plans will provide for 12 or 14 class rooms and an assembly hall. A modern system of heating and ventilation will be installed. Interior finish will be of pine. Exterior of the building will probably be faced with pressed brick. Plans are now being prepared and when complete bids will be taken through the office of the Board of Public Works.

HOSPITAL WIRING AND CONDUIT SYSTEM—Cost not stated. San Francisco. Architect, Supervising Superintendent Roberts, Post Office Bldg., S. F. Owners, United States Government. Plans and specifications for the rearrangement of the conduit system and rewiring in the United States Marine Hospital building have been completed and bids are now being taken. Figures will be opened by Mr. Roberts on June 9th. Plans can be secured from Supervising Superintendent Roberts in this city. The official proposal appears in this issue.

POST OFFICE—2 story and base, fireproof construction. Cost not stated. Grand Junction, Col. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. This building has been out for figures previously but all bids were rejected. New figures are now being called for and will be opened on June 24th. The structure will cover an area of approximately 5,600 square feet and will be fire proof throughout except roof and ceilings. There will be steam heating, modern plumbing and hardwood interior finish. Exterior of the building will be faced with stucco, stone and marble. Plans can be secured from the Supervising Architect at Washington, D. C., or from the custodian of the site at Grand Junction. Official proposal appears in this issue.

Interesting Lecture On Waterproofing.

August Gross, of New York, Entertains
San Francisco Architectural Club
With Interesting Talk.

Between a hundred and a hundred and fifty members of the San Francisco Architectural Club and their invited guests listened to an informal talk last Friday evening at the Club rooms on the subject of Waterproofing, given by August Gross of the firm of Toch Bros., New York, and represented in this city by J. E. Dwan & Co.

Mr. Gross proved exceptionally interesting to his audience, possessing a wealth of fundamental facts and technical knowledge of his subject coupled with a most pleasing manner of imparting it to others. His talk covered the question of waterproofing from its inception to present day methods, a comparison of the different methods employed at present and in that earlier period when the subject was less thoroughly understood, and much interesting detail as to how the entire field of waterproofing has been changed by the introduction of new types of construction. At the conclusion of his talk Mr. Gross was complimented by the officers and members of the Club on having furnished a most enjoyable

and instructive evening's entertainment.

Mr. Gross is completing a trip over the Pacific Coast and Rocky Mountain states in the interest of his company. He has recently visited Portland, Seattle and other cities in the north and states that building prospects look exceptionally bright for the coming year. He will remain in San Francisco for some time.

City Bids Opened.

Bids for furnishing one portable rock crusher were opened by the Board of Public Works at Wednesday's session. A. L. Young Machine Company submitted the lowest bid at \$1,935. Two other bids were received as follows: Austin-Western Road Machine Co., \$2,160 and Langford-Bacon & Meyers at \$2,593.10.

Exposition Company Opens Many Bids.

Panama-Pacific Work is Attracting Much Attention. Figures Opened For Manufactures Palace.

Bids were opened on Tuesday, last, by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company for three different jobs. Gordon Construction Company were awarded the contract for constructing a lath house in Tennessee Hollow at \$1,995. McLaren & Peterson were low for the general construction of the Manufactures Building at \$217,000 and J. Doherty was low for the plumbing work on the same building at \$19,811. The following bids were received:

Constructing Lath House.

Wilson & Christensen.....	\$3,073
J. Wendering	2,450
B. J. Duffy	2,370
Max Geist Constr. Co.....	3,430
Gordon Constr. Co.....	1,995
J. Monk	3,382
J. Pringle	2,727

Contract awarded to the Gordon Construction Company at the price mentioned.

Manufactures' Building.

Commary-Peterson Co., Inc., Exposition to furnish lumber, \$218,933; Contractor to furnish lumber, \$299,233. McLaren & Peterson, Exposition to furnish lumber, \$217,000; Contractor to furnish lumber, \$—.

J. Monk, Exposition to furnish lumber, \$234,558; Contractor to furnish lumber, \$326,500.

Strehlow, Freese & Peterson, Exposition to furnish lumber, \$236,000; Contractor to furnish lumber, \$301,000.

Lange & Bergstrom, Exposition to furnish lumber, \$242,153; Contractor to furnish lumber, \$345,937.

F. Roland, Exposition to furnish lumber, \$239,000; Contractor to furnish lumber, \$323,000.

Plumbing For Manufactures' Building

OAKLAND AND ALAMEDA COUNTY.

BANK—2 story and base, concrete
and frame, \$50,000. San Leandro, Al-
ameda Co., Cal. Architect, W. H.
Weeks, 75 Post St., S. F. Owners,
Bank of San Leandro. The building
will be erected at the corner of Hay-
wards and Estudillo streets and will
cover a considerable ground area.
Design is in the classic style with ex-
terior faced with cut stone. The en-
tire first floor will be arranged for
the banking rooms, public space and
private offices. Upper floor will contain
a number of modern offices. Interior
finish will be of hardwoods, marble
and tile. Ornamental plaster and or-
namental iron and bronze will also be
used. Special vaults are specified.
Plans are complete and figures are
now being taken.

AUDITORIUM STEEL—Cost not
stated. Oakland, Cal. Architects,
Palmer & Hornbostel, New York, as-
sociated with J. J. Donovan, Security
Bank Bldg., Oakland. Owners, City
of Oakland. Bldg opened on Thursday
last for the structural steel for the
\$500,000 auditorium building show
Dyer Bros. of San Francisco low at
\$177,000. A complete list of the fig-
ures submitted both for all work and
unit prices appears under the head-
ing of Oakland and Alameda County in
this issue.

RESIDENCE—2 story and base
frame, \$5,000. Oakland, Cal. Archi-
tect, C. H. Miller, Foxcroft Bldg., S. F.
Owner, Dr. R. T. Southerland. The
dwelling has been designed for an
eight-room house with bath and sleep-
ing porch. Interior will be finished in
pine and hardwood with hardwood
floors in the principal rooms. Bath

room will be finished in cement plas-
ter. Tile will be used in the kitchen.
There will be furnace heat and open
fire places. Mantels will be of tile or
brick. Exterior of the house will be
covered with cement plaster on metal
lath. Plans are complete and figures
are being taken.

RESIDENCE—2 story and base,
frame, \$15,000. Piedmont, Alameda Co.,
Cal. Architect, William Knowles,
Central Bank, Oakland, and Hearst
Bldg., S. F. Owner, F. Hall, Key Route
Inn, Oakland. This dwelling has been
mentioned here before when plans
were being prepared. Working draw-
ings are now completed and work has
been started by Day Labor. The dwell-
ing will contain fifteen living rooms,
several baths and sleeping porches.
Interior finish will be of pine, hard-
wood and white enamel. Bath rooms
will be finished in tile. Plans provide
for furnace heat, open fire places, a
vacuum cleaning system and auto-
matic water heaters. Hardwood floors
will be used in all principal rooms.
The exterior of the house will be cov-
ered with cement plaster on metal
lath.

RESIDENCE—2 story and base,
frame, \$2,000. Oakland, Cal. Archi-
tects, United Home Builders, 1762
Broadway, Oakland. Owner, George
D. Slater. The house will be designed
for a six-room dwelling with bath.
Interior will be finished in pine and
redwood with hardwood floors in the
living room, dining room and recep-
tion hall. There will be furnace heat
and open fire places. Mantels will be
of brick or tile. Tile will be used in
the bath room and kitchen. Exterior
of the house will be covered with ce-
ment plaster on metal lath. Plans are
complete and work will be done by
Day Labor.

RESIDENCE—2 story and base,
frame, \$4,500. Berkeley, Alameda Co.,
Cal. Architect, Harris Allen, 2514
Hillegass Ave., Berkeley. Owner, W.
G. White. The dwelling will contain
seven or eight rooms with bath and
sleeping porch. All interior finish will
be of pine or white enamel. Hard-
wood floors will be used in the prin-
cipal rooms. Plans include furnace
heat and open fire places. Mantels
will be of brick. Bath room will be
finished in cement plaster with some
tile floors. Tile will also be used in
the kitchen. An automatic water
heater will be installed. Exterior of
the house will be covered with cement
plaster on metal lath. Plans for this
work are now being prepared.

BUNGALOWS—30, 1 and 1 1/2 story
and base, frame dwellings, \$2,000 to
\$2,500. Oakland, Cal. Architect, none.
Owner, G. B. Hollenbeck, 5210 Fairfax,
Oakland. These houses will be erect-
ed in the Wadean Tract and each
house will be arranged for either five
or six rooms and bath. Interiors will
be finished in pine with hardwood
floors in the living room and dining
room. There will be open fire places
and tile or brick mantels. Tile will
be used in the bath rooms and kitch-
ens. Exteriors will be covered with
cement plaster, rustic and shingles.
Plans are complete and the work will
be done by Day Labor.

RESIDENCE—2 story and base,
frame, \$3,500. Oakland, Cal. Architect,
none. Owner, E. Massberg, 5301 Dover
St., Oakland. The dwelling has been
designed for an eight-room house
with bath and sleeping porch. Inte-

floor finish will be of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick or tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

BUNGALOW—1½ story and base, frame, \$3,250. Berkeley, Alameda Co. Cal. Architect, none. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. The house will be erected in the Northbrae Tract and has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine with hardwood floors in the principal rooms. There will be a large open fire place with brick or tile mantel in the living room. Tile will also be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—2 story and base, frame, \$17,000. Oakland, Cal. Architect, M. I. Diggs, 9444 Bowditch St., Berkeley. Owner, W. J. Schmidt. The building will be erected at the corner of 55th and Telegraph avenue, and will be arranged for stores on the first floor and a number of two and three room suites in the upper floor. Interior finish will be of pine throughout. All apartments will have connecting bath rooms and wall beds. The exterior of the building will be covered with cement plaster. Some marble wainscot will be used. Plans are complete and figures are being taken.

STORES—1 story and base, brick. Cost not stated. Oakland, Cal. Architect, none. Owner, P. J. Walker, Monadnock Bldg., S. E. The building will be erected on Franklin street between 12th and 13th streets. There will be two stores with patent store fronts and plate glass windows. Interior finish will be of pine. The exterior of the building will be faced with pressed brick. It is stated that the owner contemplates constructing an eight-story class A building on this site at a later date. Construction will be done by Day Labor. Mr. Walker is now purchasing all materials.

STORES AND OFFICES—1½ story and base. Class A construction. Cost not stated. Oakland, Cal. Architect, Benj. G. McDougall, Sheldon Bldg., S. E. Owners, Carlson and Snyder. This building, which is to be erected at the corner of 15th and Broadway, has been mentioned here a number of times before. The steel work has been let and figures are now being taken for all other parts of the building. Segregated bids are being taken.

BANK AND OFFICES—11 story and base. Class A construction. Cost not stated. Oakland, Cal. Architects, L. B. Dutton & Co., Chronicle Bldg., S. E. Owners, First Trust and Savings Bank. The architect is taking figures from three or four low men on certain alternative propositions in connection with the construction of this building. The building is to be erected at the corner of 16th and San Pablo avenue. Bids on the alternate propositions were opened last Friday and an award of contract will be made this week.

Auditorium Steel Bids At Oakland.

**Dyer Bros. Low for Work Which Has
Here Figured Three Times. Bids
Referred to City Attorney.**

Bids were opened Thursday for the third time for the structural steel on the Oakland Auditorium. Three firms submitted bids. Bids were received as follows for the entire work:

Pacific Constr. Co.	\$134,990
Dyer Bros.	177,000
Pacific Rolling Mills.	203,959

Unit Prices.

Straight beams, with or without connections, Pacific Constr. Co., .038; Dyer Bros., .035; Pacific Rolling Mills, .041. Plate girders, Pacific Constr. Co., .046; Dyer Bros., .04; Pacific Rolling Mills, .0475.

Trusses or built up lumber, Pacific Constr. Co., .047; Dyer Bros., .045; Pacific Rolling Mills, .056.

Rods, Pacific Constr. Co., .068; Dyer Bros., .04; Pacific Rolling Mills, .0505. Bent work, Pacific Constr. Co., .074; Dyer Bros., .045; Pacific Rolling Mills, .078.

All bids were referred to the City Attorney.

Open Bids For The Durant School Job.

**Oakland Board of Education Receive
Six Sets of Figures at Meeting Last
Monday.**

Bids were opened Monday between 5:30 and 6 o'clock by the Oakland Board of Education for the construction of the Durant School, which is to be erected on West street at the corner of 29th street. Plans for the building were prepared by Architect J. J. Donovan. Amweg & Co., 244 Kearny street, San Francisco, presented the lowest bid at \$99,500 with an alternate of \$101,000. No award of contract has been made. Besides the bids on the general construction four alternative propositions were asked for as follows: (A) making all construction Class "C" and adding wing on west side. (B) deduct for interior finish. (C) substituting terra cotta for sheet metal window trim and (D) substituting Mission tile for tar and gravel roof.

Construction Durant School

LOS ANGELES AND SOUTHERN CALIFORNIA.

SCHOOL GROUP—9 buildings, brick and concrete construction. Cost not stated. Los Angeles, Cal. Architect, State Architect Woollett, Sacramento. Owners, State of California. Plans for the State Norman School which is to be erected at Los Angeles have been completed and are now in the hands of the contractors for figures. Bids will be opened in the offices of the State Board of Control on June 5th at 12 o'clock. Plans and specifications can be secured from the State Engineer at Sacramento. The official proposal appears in another column of this issue.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Western Building Co., Lankershim Bldg., L. A. Owner, G. A. Thiele, 1129 Trenton St., L. A. The building will have a street frontage of 40 feet and a depth of 130 feet. Interior will be arranged for 65 rooms divided into two and three room suites. All apartments will have private bath rooms and will be equipped with wall beds. Plans include steam heat, an automatic elevator and vacuum cleaning system. Interior finish will be of pine and hardwoods. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken by the owner.

APARTMENT HOUSE—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Arthur G. Lindley, 1. W. Hellman Bldg., L. A. Owners, Los Angeles Securities Co. The building will be erected on a corner site and will cover an area of 73x128 feet. Plans provide for a total of 140 rooms, which will be arranged in two and three room suites with baths

and wall beds. Interior finish will be of pine and hardwood. Bath rooms will have cement floors and tile wainscot. There will be steam heat, elevator service, a vacuum cleaning system and hot water plant. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared.

APARTMENT HOUSE—3 and 4 story brick and steel. Cost not stated. Los Angeles, Cal. Architect, Leonard L. Jones, 1. W. Hellman Bldg., L. A. Owner, Richard Webb. The building will cover an area of 50x95 feet. Interior will contain 65 rooms arranged in suites of two and three rooms each with baths and wall beds. Interior finish will be of pine and hardwood. Bath rooms will have cement floors and tile wainscot. Plans provide for elevator service, steam heat and a vacuum cleaning system. Entrance will be finished in tile and marble. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

BANK AND OFFICES—2 story and base. Class A construction. Cost not stated. Redondo Beach, Los Angeles Co., Cal. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, Farmers' and Merchants' National Bank of Redondo. The building will be erected at one of the important corners. The entire first floor is to be occupied by the bank. Second floor will be arranged for a number of offices. Interior finish of the first floor will be of hardwood, marble, tile and ornamental plaster and bronze. Upper floor will be finished in pine and hardwood. Construction will be of the reinforced concrete type and fireproof throughout. Special bank fixtures, bank vaults and safe deposit vaults will be installed. Exterior of the building will be faced with matt glazed terra cotta. Plans are being prepared.

LODGE HALL—4 story and base. Class B construction, \$75,000. Los Angeles, Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Knights of Columbus. The building will cover an area of 62½x160 feet. The first and second floors will be devoted to the auditorium with completely equipped stage, gallery and lounging rooms. The third floor will contain lodge rooms, smoking rooms, parlors, dining room and kitchen. The fourth floor will be subdivided into apartments for the members. Interior finish will be of pine and hardwood. There will be steam heat, elevator service and a vacuum cleaning system. A large and well equipped gymnasium will occupy the basement. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and bids are being taken for the work.

SCHOOL GYMNASIUMS—2, 1 story and basement, brick. Cost not stated. Santa Monica, Los Angeles Co., Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Santa Monica High School District. This work has been mentioned here before. Plans provide for two separate buildings, one for the boys and one for the girls. A brick wall which is to be erected around the athletic field will also be included in this contract. Plans may be secured from the architects. Bids are now being taken and will be opened on May 28th.

RESIDENCE—2 story and base, brick. Cost not stated. Hollywood, Los Angeles Co., Cal. Architects, Krucker & Deckbar, Ferguson Bldg., L. A. Owner, Mrs. R. Thomas. The dwelling has been designed for a fourteen room house with sleeping porches and several baths. A brick garage will be erected on the same lot. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. Plans provide for a central heating system and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile with cement floors. An automatic water heater will be installed. Exterior of the dwelling and garage will be faced with pressed brick and cement plaster. A clay tile roof will be used. Plans are complete and figures are being taken.

STORES AND LOFTS—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Albert C. Martin. Higgins Bldg., L. A. Owners, Dunn-Albright-Ames Co. The building will cover an area of 33x75 feet and will be arranged for stores on the first floor and lofts above. Interior finish will be of pine throughout. Entrance and vestibule will be wainscoted in tile and marble. There will be metal lath partitions, metal window sash and frames and fireproof doors. Patent store fronts are specified. The exterior of the building will be faced with pressed brick. Plans are complete and ready for figures.

LOFTS—5 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Krempel & Erkes, Henne Bldg., L. A. Owner, Carl Kurtz. The building will be erected on Los Angeles street between 7th and 8th streets, and will cover an area of 50x136 feet. Construction will be of reinforced concrete, including walls, floors and roof slabs. There will be metal lath partitions, fireproof doors and metal window sash and frames. Interior finish will be of pine. Plans provide for elevator service, spiral chutes and sidewalk doors, lifts and lights. Plans are being prepared.

OFFICES—12 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, Myron Hunt. Hibernian Bldg., L. A. Owner, H. E. Huntington. This work has been mentioned here before when plans were first started. The structure will be erected at the northwest corner of 12th and Main streets and will cover an area of 120x172 feet. Construction will be fireproof throughout with a complete steel frame, concrete floors, roof and metal interior finish. The basement and sub-basement and foundation will be constructed at once, and will be used as a substation by the Pacific Light and Power Co. Work on the superstructure will be started the first of next year. Bids will be called for shortly on the foundation work.

OFFICES—14 story and base. Class A construction, \$500,000. Los Angeles, Cal. Architect, A. Martyn Haenke. Story Bldg., L. A. Owners, Los Angeles Home Builders. This building will be erected at the corner of 8th and Spring streets and will contain 400 modern offices. The work has been described in these columns before. Specifications include reinforced concrete floors and roof slabs, brick filler walls and glazed terra cotta facing. Interior partitions will be of metal lath

and plaster and hollow tile. Lobby and corridors will be finished in marble and tile. Interior trim will be of metal and mahogany. Metal window sash and frames will be used.

BANK—1 story and base, brick. Cost not stated. Burbank, Los Angeles Co., Cal. Architects Krempel & Erkes, Henne Bldg., L. A. Owners, Farmers' and Merchants' National Bank. The building will be designed in the classic style and will cover an area of 26x60 feet. The entire structure will be devoted to the use of the bank. Interior will be finished in hardwoods and marble. Reinforced concrete vaults will be constructed. The exterior of the building will be faced with glazed terra cotta. Plans are being prepared.

LODGE HALL—2 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Westlake Masonic Lodge Association. This work has been mentioned here before when plans were first started. Working drawings are nearly complete and bids will be called for shortly. The building will cover an area of 40x95 feet. The first floor will contain a banquet room, ball room, basement, several large cub rooms, and the lodge rooms will occupy the second floor. Interior finish will be of pine and hardwood. A central heating system will be installed. Exterior of the building will be faced with pressed brick.

LIBRARY—1 story and part base, brick, \$10,000. Watts, Los Angeles Co., Cal. Architect, Elmore R. Jeffery. Citizens' National Bank Bldg., L. A. Owners, Town of Watts. The building will cover an area of 70x30 feet and will be designed in the classic style. There will be two main reading rooms and a stack room. Interior finish will be of pine and hardwood. The exterior of the building will be faced with pressed brick trimmed with artificial stone. A central heating system will be installed. Plans are being prepared.

LODGE HALL—3 story and base, brick and steel, \$30,000. Riverside, Riverside Co., Cal. Architects, S. L. Gilhar and Welmer P. Lamar, Crescent Bldg., Riverside, L. A. Owners, Riverside Elks' Hall Association. The building will be erected at the corner of Market and Whittier Place, and will cover a large area. The first floor will contain the entrance and lobby, finished in marble and tile, besides a large library, billiard room, parlors and offices, which will be finished in oak. A large auditorium with a gallery seating 500 people will occupy the second floor. Third floor will be arranged for lodge rooms, eight single rooms and ten apartments. Plans also provide for a roof garden. The basement of the building will contain a banquet hall, cafe and gymnasium. There will be steam heat, elevator service, a vacuum cleaning plant and hot water system. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

Contracts Awarded.

LOFTS—6 story and base, reinforced concrete, \$75,000. Los Angeles, Cal. Architects, California Real Estate and Building Co., 631 South Spring St., L. A. Owners, California Real Estate and Building Co. Contractors, Somers & Lund, Security Bank Bldg., L. A. Contract price, \$75,000.

LOFTS—3 story and base, brick, \$30,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, S. W. Newmark Contractors, Alta Planning Mill Co., 820 McGarry St., L. A. Contract price, \$30,000.

APARTMENT HOUSE—7 story and base, reinforced concrete, \$125,000. Long Beach, Los Angeles Co., Cal. Architect, Paul C. Pape, Union League Bldg., L. A. Owner, Edward Tinsert. Contractors, Dutro-Wren Construction Co., 10 American Ave., Long Beach. Contract price, \$125,000.

PORTLAND AND OREGON.

APARTMENT HOUSE—4 story and base, brick and steel, \$55,000. Portland, Ore. Architects, Bennes & Hendricks, Henry Bldg., Portland. Owner, A. C. Callan. The building is to be erected in Portland Heights and will cover an area of 60x90 feet. Each of the four floors will be subdivided into three modern apartments with wall beds and private baths. Interiors will be finished in pine and hardwood. Plans provide for steam heat, automatic elevators, dumb waiters and a vacuum cleaning system. Main entrance and lobby will be finished in marble, ornamental plaster and hardwoods. Baths will have tile wainscot and tile floors. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

APARTMENT HOUSE—4 story and base, reinforced concrete, \$50,000. Portland, Ore. Architect, J. S. Atkins, Henry Bldg., Portland. Owner, M. J. Buell. The building will cover an area of 48x140 feet. There will be a number of two and three room suites with wall beds and private bath rooms. Plans include steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine and hardwood with some ornamental plaster used in the amusement room. Exterior of the building will be faced with cement plaster. Bath rooms will be finished in tile with cement floors. Plans are complete and figures are being taken for the work.

WATER SYSTEM—Cost not stated. Salem, Ore. Engineers not selected. Owners, Santiam Water Co., Salem. For the purpose of supplying water from the Little North Fork of the Santiam River to Salem and other valley towns, the Santiam Water Company has been organized and articles of incorporation will be filed immediately. The company is capitalized at \$300,000. The incorporators are W. E. Pierce, a capitalist of Boise, Idaho; Charles Theis, of Spokane, and John D. Turner, a Salem lawyer. The principal office of the company will be at Salem. It is announced that the company will lay a pipe line from the Little North Fork of the Santiam to Salem and the State institutions and also supply water to Stayton, Turner, Aumsville and Sublimity.

STORES AND OFFICES—8 story and base. Class A construction. Cost not stated. Portland, Ore. Architects, Doyle & Patterson, Portland. Owner, H. L. Pittock. The building will cover the entire city block bounded by Washington, Stark, West Park and Tenth streets, and while designed for an eight-story structure, only the first three floors will be erected at the present time.

ent time. Construction will be fireproof throughout. The basement and sub-basement will be occupied as a substation by the Northwestern Electric Co. Preliminary sketches were originally prepared by a San Francisco architect, and at that time the building, which was to have been of the reinforced concrete type of construction, contained a large theatre to be used by the Hielg Theatre. Present plans include no theatre. Construction will be undertaken as soon as plans can be completed.

Contracts Awarded.

LODGE HALL—2 story and base, brick and steel, \$31,000. Roseburg, Ore. Architect, Earl A. Roberts, Selling Bldg., Portland. Owners, Roseburg Elks' Hall Association. Contractors, W. C. Arthur & Sons, Lumber Exchange Bldg., Portland. Contract price, \$31,000.

STORES AND OFFICES—2 story and base, reinforced concrete, \$50,000. Portland, Ore. Architects, Whitehouse & Foulhoux, Wilcox Bldg., Portland. Owners, Balfour-Guthrie Co. Contractors, Boysjohn-Arnold Co., Wilcox Bldg., Portland. Contract price, \$50,000.

SEATTLE AND WASHINGTON.

HOTEL—4 story and base, brick and steel, \$70,000. Seattle, Wash. Architect, A. Wickham, Lyon Bldg., Seattle. Owners, Yesler Estate. This building will be erected at the corner of Yesler Way and Post street and will cover a large area. The building has been designed for a commercial hotel with stores on the first floor besides a barber shop, cafe and hotel offices and lobby. Upper floors will contain in the neighborhood of 150 guest rooms about one-half of which will have private baths. There will be steam heat, elevator service, a hot water plant and vacuum cleaning system. Interior finish will be of pine and hardwood with ornamental plaster used in the lobby and offices. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

APARTMENT HOUSE—6 story and base, reinforced concrete, \$325,000. Seattle, Wash. Architect, James H. Schaak, T. S. Lippy Bldg., Seattle. Owner, Eugene Brown. The building will be erected on 6th avenue between Pike and Pine streets and will have a frontage on the avenue of 120 feet and will extend back 150 feet. Construction will be fireproof throughout with reinforced concrete floors, walls and roof. Interior partitions will be of hollow tile and metal lath and plaster. The first floor will be arranged for

stores and the entrance and lobby of the apartment house. Each of the upper five floors will be divided into 25 suites of two rooms each and five suites of three rooms. Mechanical equipment will embrace steam heat, elevator service, vacuum cleaning system and a water cooling plant. Interior finish will be of pine and hardwoods. Marble and tile will be used extensively. All suites will have wall beds and private baths. Exterior of the building will be faced with cement plaster. Plans are to be completed at once and construction will be started this summer.

BANK—3 story and base, brick and stone. Cost not stated. Seattle, Wash. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owners, Broadway State Bank. The building will be erected at the corner of Broadway and East Pike streets, and will cover an area of 34x52 feet. Interior of the first floor will be divided into public space, work space, private offices and vault rooms. Upper floors will be arranged for president's office and directors' rooms. Interior finish will be of hardwood, marble, tile and ornamental plaster and bronze. There will be steam heat and a vacuum cleaning system. Special vaults will be constructed. The exterior of the building will be faced with pressed brick. Bids will be called for about the first of June.

BANK—2 story and base, brick and concrete, \$35,000. Castle Rock, Wash. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owners, Castle Rock Bank. The building will be erected on a corner lot and is of the classic design. The first floor will be fitted up for the banking rooms and will be handsomely finished in tile, marble and hardwoods. Concrete vaults will be constructed. Upper floor will be arranged for offices. There will be a central heating system. The exterior of the building will be faced with pressed brick and cement plaster. Plans are complete and figures are being taken.

MASONRY DAM—\$1,500,000. Cedar River, Wash. Engineer, City Engineer Dimock, Seattle. Owners, City of Seattle. Plans and specifications have been approved and bids will be opened on June 13th for the construction of the Cedar River Gravity Dam. Plans and specifications may be secured from the Board of Public Works. The structure on which about \$400,000 has already been expended by force account under the supervision of City Engineer Dimock, will cost about \$1,500,000, the part to be constructed under this call for bids costing \$1,000,000. The specifications call for the

construction of a masonry dam 200 feet high, 800 feet long, 200 feet wide at the bottom and 15 feet wide at the top and containing about 150,000 cubic yards of stone. The work also includes the construction of an outlet tunnel about 1600 feet long, and 11 feet in diameter, inside dimension, also of concrete construction. The elevation under this contract will be 1,550 feet to be developed later to an elevation of 1600 feet at an additional cost of about \$300,000.

HOTEL—16 story and base. Class A construction, \$600,000. Tacoma, Wash. Architects, Heath & Gove, National Realty Bldg., Tacoma. Owners, National Realty Co., L. D. Pratt, President. This building will be erected at the corner of 12th avenue and Pacific street and will contain a total of 250 rooms, all of which will have connecting baths. Construction will be fireproof throughout. Working drawings have just been started and it will be sometime before bids are called. Further mention of the work will be made in these columns.

DEPOT—2 story and base. Class A construction. Cost not stated. Spokane, Wash. Engineer, J. R. Holman, care of O.-W. Ry. and N. Co., Seattle. Owners, Oregon-Washington Railroad and Navigation Co. and the C. M. and P. S. Ry. Co. A union depot is to be erected by the two above named railroads in Spokane, and it is stated that plans are complete and have been approved. Engineer Holman of Seattle will soon issue a call for bids.

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

Bind your copies of the Building and Industrial News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the "BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH**.

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

Editorial Comment.

Governor Johnson has waited a reasonable time for protesters after which he has signed the Anti-Alien land bill just as he said he would do. Which reminds one of the able magistrate who announced "I will now take this case under advisement until next Monday, at which time I shall render my decision in favor of the plaintiff."

And which in the case of Johnson was the perfectly proper thing to do. He definitely stated his position in the matter, clearly outlined the policy and duty of his state and waited to see if there was any urgent reason why he should not sign the bill. Hearing nothing new he has signed it just as he said he would and the Eastern papers can say what they please.

The attitude of many of the Eastern papers is absolutely unintelligible to a person living here. For instance many of them say it is because the Californians are lazy and shiftless farmers that they object to a more thrifty and industrious race. If such is the case and a living is easy here why not import farmers from New England and the middle states. Surely we are glad to welcome all good citizens and are seeking, and have sought that kind of immigration.

It now remains to be seen what is to be done by the political shysters and agitators in the matter of the referendum. The Governor well states that to invoke the referendum means a delay of all such legislation and nullifies the effect of the law till the general election in 1914. If those who profess to be sincere in the leasing clause are sincere in their contention they will invoke the Initiative and leave the law as it stands.

The Chronicle publishes a financial statement to show that the Geary street road is running behind and cautions the public against voting any more bonds for building municipal railroads. As an item of this debt contracted by the city it cites \$251,804 as expense incurred by bond elections and delays before the city got started on the road or before it earned a dollar. It might be stated that a lot of the delay was caused by the enemies of the municipal railroad, such as the Chronicle and that needless expense was incurred by the activity of such patriots. If the United Railroads can pay a dividend on a capitalization that is three-fourths water, why in heaven's name can not the city pay a dividend on a road legitimately built, even if it has to be built at additional expense because of the pernicious activity of some of the enemies of the people.

President Ripley, of the Santa Fe Railroad, is quoted as saying that the Wilson administration is a failure and that California is the worst governed state in the union. That is a natural opinion of a man who does not believe in direct legislation or popular government, but in representative government as he terms it. And by representative government is meant the old order of things when political bosses appointed the representatives and they in turn were the creatures of big business.

One thing that the president of the Santa Fe praises and that is the Public Utilities Commission. This commission is certainly the creation of the present administration and certainly it would have been a hundred years before we would have gotten such a commission under the old order of things. If Mr. Ripley would sum up the things that have been accomplished by the present state government and weigh them against the things that have been done which are of doubtful merit he would find this to be one of the best governed states instead of one of the worst. Of course, from his viewpoint of government by a governing class it is the worst, but not when viewed by the only logical way to view a government, and that is the greatest good to the greatest number.

The Chronicle says that it with nineteenth of the people of the State is opposed to Japanese ownership of land in this State. And it further goes on to say that it is very inadvisable to pass the alien land bill at this time. And gives as a reason that "California should not take the time when we are inviting all nations to visit us to do any act that any nation may consider unfriendly." And it further states that "Almost the entire eastern part of the country is solidly and energetically against California in this question and there are influences far more potent than any in California ready to urge Congress to confer at once the right of naturalization on the Japanese."

Why does not the Chronicle state just what those "Influences" are? Surely they are not the Christian missionaries. And it cannot be an inherent desire of the white race to mingle with the mongolian. If there is any influence at work it must be purely mercenary. On this ground only can all this active interest in the situation be explained; on this ground only can the interest of the mercenary press be attributed.

If the land law is of sufficient importance to be passed at all, there is no excuse for putting it off till after the Exposition. If this is to be a white man's country keep it a white man's country. The slave owners of the south had a hundred times better argument on the slave question than do these proponents for an admixture of races have for their side of the question.

Necessity Of Technical Education.

T. B. Kldder, Director of Technical Education, Calgary, at the C. N. A. B. Convention, Calgary.

The very fact that your committee in arranging its program for this convention invited a worker in the field of technical education to address you is a remarkable testimony to the large place which my subject occupies in the minds of thoughtful men today. An association of keen business men, meeting to consider the manifold problems of such a highly complex and difficult profession as that represented here today, thus formally recognizes that technical education is within such an association's purview and worthy of some attention amongst the many subjects which are considered at such gatherings. Technical education is today a feature of all similar conventions, and I venture to prophesy that in the future it will occupy an increasing amount of attention and will become one of the most vital things to be considered wherever employers and manufacturers may assemble to discuss their affairs.

What are the reasons which may be assigned for the necessity of technical education nowadays? There are many, but one of the chief, that "The old order changeth and giveth place to new," is of particular application in this present day and generation. The introduction of machinery, the decay of handwork, the practical abandonment of the old system of apprenticeship with its close relation between the learner and the master of the craft, the specialization which has followed the development of factory work—all of these have had their effect, and there are many other causes which could be cited. But side by side with this, the very complexity of modern industrial life is demanding a higher degree of efficiency on the part of the workers every day. The need for trained intelligence, a knowledge of machinery and processes, or art and science increases with every advance and specialization of industry. Efficiency today has come to mean a very complex thing, and we cannot get efficiency without training, and that training must be of the broadest and, at the same time, most intensive in many respects. Training and efficiency go hand in hand. Listen to what an investigator from this side says of a recent visit he paid to Europe.

"Abroad we seen training and efficiency go hand in hand. In the countries where technical education is most highly developed, efficiency strikes you at every turn; the cleanliness of the streets; the even quiet movement of the street cars; the perfection of machines; the artistic lines and durable construction of the houses; the beauty of the stained glass, the quality and design of the linoleum you walk on, the planning of city extensions, of garden cities; the wealth of industrial countries like England, France, Belgium, Germany, the revival of Italian commerce. In Italy, the movement of technical education is now turning the convents and palace and fortresses of the Middle Ages into art-industrial schools and museums. In Prato you pass from the work of Donatello and Dell Robbia

to the vital life of today's under new conditions of industry, of the professional school of dyeing and weaving. In the Castello di Milan, once the stronghold of the Sforzas, now reign the school director and the curator. You get the conviction driven home and pressed in, that behind all that you see and experience, behind the whole improvement for the betterment of the nations wherever you go in Europe, the new directing force is technical education.

"Everywhere in Europe technical education is regarded as an essential factor in industrial efficiency. To develop a new industry or revive one that is languishing they institute schools for the industry. We raise the tariff; they raise the schools. The Swiss make the most perfect watches; the oldest technical trade school is said to be the school for watchmaking of Geneva. German chemical industries lead the world; the des of the tries lead the world; the dyes of the artist, the inks for fine printing (especially color printing), are German. Germany has over six thousand school-trained chemists in her chemical industries. The industrial rehabilitation of Italy is accompanied by the parallel establishment of technical schools, for the soap industry, for the paper industry in Milan, for the textile industry at Prato, for the art industries at Rome, Florence, Venice, Milan, for the mechanic arts in every important town."

In Great Britain enormous developments have taken place in recent years in technical education, and even greater things are foreshadowed in the far-reaching program now being considered by the government.

In Canada, too, a beginning has been made, and we are daily expecting with high hopes the report of the Royal Commission on Industrial and Technical Education as the forerunner of great and valuable schemes of preparation and training for industrial efficiency in this dominion. In fact, a number of cities have not even waited for the report of the commission, but have already entered upon the work of technical education for themselves. The field is ready and waiting throughout the land, for the need of technical education is everywhere recognized, although the methods of supplying the need are not always clearly discernible. It may, therefore, be of advantage to consider some of the ways and means whereby this, as Shakespeare might call it, "A consummation devoutly to be wished" may be brought about.

First, let me lay down as an axiom that technical education should be the affair of the state. In saying this I am not unmindful of the great things that have been done in this field by private individuals, by great firms and corporations, by associations of employers and others. But we already recognize education as the business of the state, though perhaps there are some who would not go as far as Stein, the great German educator, who said

It was the chief business of the state. It is therefore only a change in the kind of education which need be considered, and in the last analysis it merely means that our complex modern civilization has changed the degree of the demands made upon the four great educational agencies of a generation or so ago, the home, the school, the church and the workshop. I need scarcely elaborate this, for it is patent to the most casual observer that more and more is being asked from the school and less is being obtained from the other agencies today than was the case a generation or two ago. The school has been called upon in turn for moral education, for physical training, and, having met these, the school is now called upon by society for industrial and vocational education, and the obligation to train for industrial efficiency is thrust upon the schools.

I am equally sure, however, that if the schools are to succeed in this matter, a great broadening of the administration of education must take place and the fullest co-operation be assured between educators, employers and manufacturers. That this co-operation will be forthcoming there is a possible doubt, for it is already in existence in hundreds of places in ways on which I shall touch briefly later on and is susceptible of enormous development everywhere.

The question of the best and most adequate forms in which the ideals of industrial and vocational education shall be developed is occupying a tremendous amount of study all over this continent today, and out of the welter of ideas and theories which have presented themselves, some few basic principles are emerging.

First and foremost it is being generally recognized that the basis of any satisfactory system of training for industry must be laid in the common schools of the land. For the large majority of children never reach the secondary or higher schools, and, indeed all too many in our cities do not even complete the elementary school course.

The beginning or elements of industrial education are already in many elementary schools, although the matter is often misunderstood. We teach our older girls sewing and cookery; our older boys get woodwork and metalwork; and in the best systems handwork and drawing are taught to children throughout the schools. These are essentially industrial in their bearing, though not introduced for that purpose. These things are taught to the pupils in our schools because the average natural aptitude of a child is towards things and not ideas. All children love to do and handle things, and the newer methods in elementary education aim to make living, active thinkers by means of concrete work with the hands which calls into action a wide range of the child's powers and activities.

The Pre-Vocational School.

But though in many elementary school systems much good has been

achieved by the introduction of manual training methods such as I have briefly outlined, it is now recognized that these do not go far enough to influence the larger matter of industrial education. In the more advanced centers of education a new type of school is being evolved, termed the pre-vocational school.

In such schools, boys and girls from the ages of eleven or twelve up to fourteen years, take a two years' course in which about half the time is devoted to practical training in the broad, basic elements of industrial vocations, and the other half to instruction in the ordinary academic subjects of the school course.

The aim is not to teach a trade, but to provide a basis for specialized training later on whether in the school or in the workshop, better still in a combination of both. Chiefly, however, the aim is to give the pupils a bias and a liking for industrial pursuits, so that on leaving school they may enter on some proper trade or calling, instead of entering the ranks of nondescript employments which may mean the immediate dollar but all too soon lead into the "blind alley" of unskilled labor and casual employment in which hundreds of young men entering into manhood find themselves.

Vocational or Elementary Trade Schools.

The next type of a school which is being evolved is the vocational or elementary trade school which takes care of the pupils during the years from fourteen to sixteen, the most critical period of youth today. The best schools of this type unite a minimum of general education with a maximum of vocational training. A typical school of this kind which I visited recently offered courses in commercial subjects, carpentry, cabinet-making, machine shopwork, pattern-making, mechanical drawing, dressmaking, millinery and cookery. The subjects of general education, such as English, history, civics, mathematics, science, hygiene, etc., are taught in such schools by selected teachers of academic training, but are consciously organized in methods and material to meet the vocational needs of the pupils. The shop and office subjects are taught by trade experts in conditions as like as possible to actual commercial workshops and business establishments. The graduates of such schools are readily accepted by employers as special apprentices and invariably earn good wages from the beginning.

Part Time and Evening Schools.

There are, however, many limitations to the development of such schools, such as the need of self-support of the wage-earning class, the cost of equipment, and the high specialization in many trades today which renders actual experience in a commercial shop a prime necessity. Other means must therefore be found, and chief among these is the part-time industrial and continuation school. It is to such schools especially I referred earlier in my paper when I spoke of the great necessity of co-operation on the part of the employers. For this form of training must of necessity meet the needs of the workers without detaching them from the occupations to which they look for their support. This type of school is chiefly represented on this continent at present by the night school, but already exam-

ples are not wanting to show that as we develop our facilities for industrial training we shall offer more and more of this in the hours of the day through the co-operation of the employers.

Many of the great industrial corporations already provide facilities for instruction and require their apprentices to attend during certain working hours each week; notably the great railway companies and many of the metal industries. You may say, perhaps, that it would be difficult to do this in the building trades and there is something to be said for the objection; it is likely that these trades will have to depend more largely than some others on evening schools. But as facilities for technical education in the shape of buildings and equipment, such as the polytechnic and trade schools, increase, I am sure that the employers will be found in your trades who will be only too ready to grant their learners the opportunity of attending such institutions for a few hours at least in the day time. Why, also, could we not have short courses during the winter when the building trades are idle, just as every college of agriculture now provides courses for farmers' sons at the period of the year when work on the farm is at its minimum. In the depth of winter, hundreds of men would, I feel confident, be glad to take short courses in special subjects related to their trade occupation, with resulting benefit all round.

The part-time or evening continuation school need not be confined to large towns or cities, though in smaller centers of population it may be limited in its scope to the teaching of drawing, mathematics and elementary science. But I am firmly of the opinion that the co-operative part-time school, both day and evening, will go a very long way towards a solution of the problem of technical education, especially in the trades represented here today. For we must regard it that the lad working at his job is being educated by it, and if we supplement this by a special kind of school training, to be carried on during a part of the time, we have a double schooling. The English industrial education leaders believe in the theory that while a trade cannot be taught in a school, neither can it be taught without a school, and this is resulting in the evolution and development of a satisfactory form of general and vocational education for industrial workers.

Germany, too, has done a great deal with part-time technical schools. The report of the national association of manufacturers of the United States in industrial education recently issued says of Germany in this connection:

"After forty years of this kind of double schooling in Germany, the high places in her industries, engineering and commerce, are filled by the sons of toil, the product of the day's work plus the continuation school. Germany has plenty of graduates of the old-time engineering and industrial schools and colleges. Great numbers of these graduates are out of work or are employed in subordinate positions, the leading positions there being generally occupied by the boys who quit the all-day school at about fourteen years of age."

I am not considering in this paper the matter of the higher training of

the leaders of industry, for which fine institutions of technology exist; such as the applied science divisions of the universities of McGill and Toronto, the Massachusetts Institute of Technology and numerous kindred institutions in other parts of the United States. The training of highly specialized leaders of industry is being well provided for and the problem everywhere is how best to train the rank and file.

I believe the solution will, while varying in detail in different localities and trades, be found ultimately in the fullest co-operation between the workshop and the school, in all grades of technical training. Co-operative schemes of education are already in operation in several parts of the United States and are proving very successful. In Wisconsin the new law provides that any contracts of the nature of apprenticeship shall state the number of hours to be spent in instruction weekly, and also limits the total number of hours to fifty-five in any one week. This law further stipulates that not less than five hours weekly shall be given to instruction, and that the subjects must be approved by the State Board of Industrial Education. The instruction may be given in a public school or in such other manner as may be approved by the board. Recent enquiries show that these requirements meet the favor of many of the largest employers in Wisconsin, and "there is reason to believe that the apprenticeship system as now provided will develop materially in ways advantageous to employer and employee." It is possible that this law might be improved if, as in Germany, an examination was made at the end of the course to see that the apprentice has received his due. As the right to take apprentices in Germany depends upon this, it is needless to say that German employers keep tab, so to speak, on the local school, and see that it is doing its duty by the apprentice. A recent visitor to Germany says of this dual training of shop and school: "There is no more potent element in the success of the German system."

One or two practical suggestions and I have done. As practical business men, start something, however small, in the way of industrial education in your community, or, better still, do all possible to help your local education authorities to undertake it with your co-operation and advice. If technical education already exists in your town or city, more than ever is your co-operation and help necessary if it is to become a real and vital thing in the business of the nation. Here in Calgary we have made a beginning and have instituted evening technical classes which have attracted numerous students. But the point I wish to emphasize is that while these are carried on by the public school board at public expense, they are largely under the management and direction of such bodies as yours. The Calgary Builders' Exchange has each year nominated one of its members to serve on the advisory board, and at least three other members of the exchange are on the advisory board representing special branches of the construction trades, such as the sanitary and heating engineers, the electrical engineers and others.

We have also representatives of labor on our committee and thus have,

I believe, an ideal body to direct industrial and technical education. For in it we have the three great social interests working together, employers, workers and school men, all devoted to one common cause.

May I also ask that you preserve a sympathetic attitude towards the many attempts at broadening our elementary school course. It is so easy to raise the cry of "Fads" when an earnest and thoughtful superintendent of a school system wants to introduce art teaching, manual training, cooking, sewing and other modern methods of developing the latent powers within the children. All of these will help us to create an industrial intelligence, while at the same time broadening and enriching the life of the pupils in many ways.

Another agency for the education of the worker that is worthy your heartiest support is the public library. Here in Calgary, the technical education committee is in very close touch with our public library, and the latest works of technical reference are constantly being obtained. The library records show that the students make

full use of these books, and thus it is a very real and practical part of the work of technical education in this city.

But technical education is a many-sided problem which will call for all our efforts to solve. Experiments must be made and several kinds of schools will probably be evolved before finality is reached, and an open mind and clear thinking on the part of all concerned are prime necessities. Of one thing we may be certain, however, and it is that our present schools, both elementary and high, will be modified in many ways to meet the demands of industry. For we are learning today that wonderful natural resources alone do not avail a nation, but that industrial efficiency is the prime factor in a nation's commercial supremacy. Efficiency involves training, and the nations that will be in the forefront in the years to come will be those that have done most to provide this training for their people. For efficiency in work means happiness for the individual and efficient individuals will mean a contented and prosperous nation in the widest sense.

ranged for a total of 102 rooms. These will be arranged in two and three room suites with private baths and wall beds. Interior finish will be of pine and hardwood. Bath rooms will be finished in cement. There will be steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures are to be called for shortly.

LOS ANGELES, CAL. — Apartment house, 4 story and base, brick. Cost not stated. Architect, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, G. A. Melsing. The building will be erected on a corner site and will cover an area of 117x150 feet. Interior will contain a total of 125 rooms, arranged in two and three room suites with private baths and wall beds. Interior finish will be of pine and hardwood. Tile wainscot and cement floors will be used in the bath rooms. Plans provide for steam heat, elevator service and vacuum cleaning system. Exterior of the building will be faced with pressed brick and artificial stone. Plans are being prepared.

SAN PEDRO, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, Thomas Preston, Higgins Bldg., L. A. Owner, J. J. Connor. The building has been designed to contain 21 suites of two and three rooms each with bath and will cover a lot 50x90 feet. Interior finish will be of pine and hardwood. Plans provide for steam heat and a vacuum cleaning system. Bath rooms will be finished in tile and cement plaster. Wall beds will be used in all suites. The exterior of the building will be faced with blue pressed brick. Plans are now being prepared.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick. Cost not stated. Architect, Leonard L. Jones, 1 W. Hellman Bldg., L. A. Owner, Mrs. A. G. Thompkins. The building will cover an area of 50x135 feet and will contain 55 rooms arranged in two and three room suites with private bath and wall beds. Interior finish will be largely of pine with some hardwood trim in the living rooms and hardwood floors. Bath rooms will have tile wainscot and cement floors. There will be steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

LONG BEACH, LOS ANGELES CO., CAL.—Apartment house, 7 story and base, reinforced concrete, \$215,000. Architect, Paul C. Pape, Union League Bldg., L. A. Owner, E. Tinsner. Contractors, Dittro-Wren Construction Co., 10 American Ave., Long Beach, general construction. Contract price, \$125,000.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,500. Architect, John J. Foley, 46 Kearny St., S. F. Owner, Mr. Solari. Contractor, Patrick Fahy, 518 Noe St., S. F., general construction, \$10,545. Plumbing to H. Kunst and plumbing to E. Crutic.

PORTLAND, ORE.—Apartment house, 4 story and base, reinforced concrete. Cost not stated. Architect J. S. Atkins, Henry Bldg., Portland. Owner, W. A. Buell. Contractors, Griffith & Roslar, Hamilton Bldg., Portland. Contract price not stated.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, W. K. Bush. The building will cover an area of 24x55 feet and will be arranged for one store on the first floor and five apartment flats on the upper floors. Interior finish will be of pine with some elm veneer. Hardwood floors will be used in the principal rooms. There will be open fire places of gas grates in the in the suites. All apartments will be equipped with wall beds and will be supplied with hot and cold running water. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, Sylvia Perazza. The building will be erected on Pacific street near Hyde street, and has been arranged to contain six suites of two and three rooms each and bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living room and reception hall. There will be open fire places or gas grates. Mantels will be of tile. Tile will be used in the bath rooms. Wall beds will be installed in all suites. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner's name withheld. This building will be erected at the northeast corner of 18th and Guerrero streets, and will contain a number of two and three room suites on the second and third floors. Several modern stores will occupy the

first floor. Interior finish will be of pine with some hardwood veneer. Oak floors will be used in the reception halls and living rooms. There will be a central heating system. Bath rooms will be finished in cement plaster. The exterior of the building will be covered with rustic and klinker brick veneer. Plans are complete and figures are being taken.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$10,000. Architect, none. Owner, A. G. McNeill, 1424 9th Ave., Oakland. The building will be erected at the southeast corner of 9th avenue and East 14th street, and will be arranged for a store on the first floor and 24 rooms above. These rooms will be arranged in two and three room suites with bath and wall beds. Interior will be finished in pine and all living rooms will have hardwood floors. Baths will be finished with cement plaster. The exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

RICHMOND, CONTRA COSTA CO., CAL.—Apartment house, 2 story and base, brick. Cost not stated. Architect, J. B. Oghorn, 611 Macdonald Ave., Richmond. Owner, C. G. Blake. The building will be arranged for stores on the first floor and the entrance to apartments above. Upper floor will be subdivided into two and three room suites with baths. Interior finish will be of pine throughout. There will be wall beds in all apartments. Cement plaster will be used in the bath rooms. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LONG BEACH, LOS ANGELES CO., CAL.—Apartment house, 4 story and base. Class C. Cost not stated. Architect, Leonard L. Jones, 1 W. Hellman Bldg., L. A. Owner, Fred Dennie. The building will cover an area of 50x144 feet, and the interior has been ar-

BANKS.

KALAMA, WASH.—Bank, 1 story and base, reinforced concrete. Cost not stated. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owners, Kalama Bank. The building will be designed in the classic style and will cover an area of 25x65 feet. There will be a large public space, private offices and work rooms. Interior partitions will be of hollow tile. Interior finish will be of pine and hardwood with ornamental plaster. Considerable ornamental iron will also be used. There will be a central heating system and coin and safe deposit vaults. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

REDLANDS, SAN BERNARDINO CO., CAL.—Bank and offices, 2 story and base, reinforced concrete and steel, \$75,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, First National Bank of Redlands. The building will cover an area of 40x118 feet. The entire first floor will be occupied by the bank. Upper floor will be subdivided into modern offices. Interior of the banking rooms will be handsomely finished in pine and hardwoods. Tile floor will be used in the public room. There will be steam heat. Special coin and safe deposit vaults will be installed. The exterior of the building will be faced with artificial stone. Plans are being prepared.

Contracts Awarded.

FOWLER, FRESNO CO., CAL.—Bank and offices, 2 story and base, brick, \$5,000. Architect's name not given. Owners, Fowler National Bank. Contractors, Trewhitt & Shields, Hanford. Contract price, \$14,800. Note: This contract does not include bank fixtures or vaults.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Warehouse, 1 story and base, reinforced concrete. Cost not stated. Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner, Gonzales. The building will be erected on Washington street in the heart of the commission district. The floor will be of concrete. Building will be carried on a pile foundation. Entire structure will cover an area of 40x60 with an L 20x60. Interior finish will be of pine. Patent store fronts and metal window sash and frames will be used. The exterior of the building will probably be faced with cement plaster. Plans are being prepared and bids will be called for shortly.

SAN FRANCISCO—Shop, 1 story, frame and corrugated iron, \$2,500. Architect, none. Owners, Fliegner & Hoffman, Howard street east of 12th, S. F. The building when completed will be used for an ornamental iron works. No interior finish will be installed. The exterior of the building will be covered with corrugated iron. Plans are in the hands of the owners and the work is now being done by Day Labor.

SACRAMENTO, CAL.—Flour mill, 5 story and base, reinforced concrete. Cost not stated. Architect, P. J. Herold, Forum Bldg., Sacramento. Owner's name withheld. The architect has just completed working drawings for the largest flour mill to be erected in the interior. The structure will be fireproof throughout and will be equipped with the most modern machinery. Considerable steel will be used. Metal

window sash and frames are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken by Mr. Herold.

SACRAMENTO, CAL.—Grain elevator, reinforced concrete construction. Cost not stated. Architect, P. J. Herold, Forum Bldg., Sacramento. Owner's name withheld. Bids are now being taken for a reinforced concrete grain elevator which is to be erected in connection with the flour mill described above. This elevator will have a capacity of 75,000 bushels and will be fireproof throughout. Exterior will be faced with cement plaster. Bids are now being taken.

SAN FRANCISCO—Laundry, 1 and 2 story and base, brick. Cost not stated. Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner, Edward E. Rolkin. This building has been mentioned here before. The structure will cover an area of 86½x275 feet. The greater portion of the building will be occupied by the laundry and stables. The two-story part will be arranged for flats. A contract for the grading and brick work has been let. Mr. Rolkin is now taking figures for the other parts of the work.

FIRE HOUSES AND JAILS.

SAN FRANCISCO—Police station, 2 story and base, brick and steel. Cost not stated. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. This building will be erected at the corner of Commercial and Drumm streets and will contain the general office, guard room and cell block. Upper floor will be arranged for a rest room. There will be a central heating system. Interior finish will be of pine and hardwoods. A cement floor will be used. Exterior of the building will probably be faced with pressed brick. Plans are being prepared. Bids will be called for shortly through the office of the Board of Public Works.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$2,500. Architect, J. C. Plugger, Crocker Bldg., S. F. Owner, H. Borge, 165 Noe St., S. F. These flats will be erected on 18th avenue north of Clement and each flat will contain five or six rooms. Interiors will be finished in pine with some hardwood veneer. Hardwood floors will be used in the living rooms. There will be open fire places and tile or brick mantels. Baths will have cement wainscot. The exterior of the building will be covered with rustic and klinker brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$7,000. Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner's name withheld. The building will be erected on Parassus avenue, and will contain two large flats and a garage in the basement. Interior finish will be of pine with hardwood veneer and panels. Oak floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchens. Exterior of the building will

be covered with shiplap and cement plaster on metal lath. Plans are nearly complete and bids will be called for shortly.

SAN FRANCISCO—Flats, 3 story and base, frame, \$9,000. Architect, none. Owner, Thomas E. Barry, 3641 20th St., S. F. The building will be erected on Green street west of Larkin, and has been designed to contain six apartment flats of three and four rooms each with bath. Interior will be finished in pine and elm. Hardwood floors will be used in the living rooms. A central heating system will be installed. Each flat will be equipped with a wall bed. Tile and cement plaster will be used in the bath rooms. The exterior of the building will be covered with rustic. Plans are in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

SAN FRANCISCO—Flats, 4 story and base, reinforced concrete, \$15,000. Architect, none. Owner, Kincannon Construction Co., 3676 Fulton St., S. F. The building will be erected on Bush street east of Larkin and will have a frontage of 27 feet and a depth of 37 feet. Interior has been arranged for eight small flats with baths. There will be pine interior finish. A central heating system will be installed. Bath rooms will have cement floors and tile wainscot. Some hardwood floors will be used. Exterior of the building will be faced with cement plaster. Plans are complete and the owners will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Flats, 3 story and base, frame, \$5,000. Architect, none. Owner, Gustave Spitz, 232A Langton St., S. F. The building will be erected on Langton street near Folsom, and will contain three modern flats of five and six rooms each and bath. Interior finish will be of pine throughout. There will be some oak floors. Bath rooms will be finished in Keene's cement. Entrance vestibules will have terrazzo steps and tile wainscot. The exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

GOVERNMENT WORK AND SUPPLIES.**Pearl Harbor Dry Dock.**

Civil Engineer H. R. Stanford, U. S. Navy, chief of the bureau of yards and docks, is in San Francisco and will proceed to Washington at once, unless he takes advantage of his presence on the west coast to pay a visit in inspection to the Puget Sound naval station. He is returning from Honolulu, where he went with Civil Engineer F. R. Harris, who is attached to the New York navy yard as public works officer, to examine the damaged dry dock at Pearl Harbor. The latter officer remains at Pearl Harbor to serve on a board of officers which has been convened to ascertain the extent of the damage to the dock, the cause of the disaster, the responsibility for it, and to recommend a method of continuing the work. No official advice has reached Washington concerning the observations made and the conclusions reached by Civil Engineers Stanford and Harris. It is intimated, however, that the damage is greater than the experts had been led to believe; at all events, it is appreciated that the sit-

uation is a serious one, and it may be necessary to make some radical changes in the system of construction. Probably the Navy Department will not be in possession of much information upon which to base action until it receives the report of the board of officers.

General Specifications.

The representatives of the bureaus of the Navy Department who have been engaged in the revision of specifications for supplies have completed a set of general specifications for the guidance of manufacturers. These will probably be published in pamphlet form. These specifications are of a character which apply to all supplies as far as possible, and by this arrangement it is expected to modify the special specifications.

Drainage Work, Pioneer Project.

The Secretary of the Interior has approved the form of contract and authorized the Reclamation Service to execute same with the Pioneer Irrigation District and the Payette-Boise Water Users' Association for the construction of certain drainage works within the district in connection with the Boise irrigation project, Idaho. In constructing the drainage works provided for by the contract it is proposed to use drainage excavators. To secure power for the operation of the same the power line of the Idaho-Oregon Light & Power Co. will be tapped in the vicinity of the work and an equivalent amount of power will be returned to the company generated by the Reclamation Service at Arrowrock dam. A payment of \$25 per month will be made to the company for the use of its line in connection with the operation of the excavators. The contract provides in case it becomes desirable to install another drag line excavator that there will be an increase in the amount of power taken from the company and a corresponding increase in the power delivered to the company and in payments made to it. The electric current will be furnished to the Pioneer Irrigation District under the contract of February 27, 1913, at 1 cent per kilowatt hour without any service charge.

Spokane, Wash., Painting.

The Grohne contracting Co., Joliet, Ill., has received the contract for certain interior and exterior painting of the U. S. post office, Spokane, Wash., at \$7,765.

Power Development, Arrowrock Dam.

The Secretary of the Interior has allotted \$38,000 from the funds now available for the construction of Arrowrock dam, Boise irrigation project, Idaho, for power development. Three of the outlets provided through the dam will be slightly modified in form and so placed that they can be conveniently used as penstocks for future power development. The power house, to be constructed later, will be located a few feet from the down-stream toe of the dam in an excavation in the lava bench nearly in line with the discharge of these outlets, so as to conveniently receive these penstocks and bordering on the margin of the diversion tunnel so as to utilize this conduit as a tail race. In case future conditions should justify the development of a large amount of power in excess of that afforded by

these outlets this could be economically accomplished by running a tunnel through the basalt over the site of the present divers' tunnel, in which one or more penstocks could be placed delivering water to an extension of the powerhouse.

Gunnery Quarters, Pearl Harbor.

Bids are to be opened at the bureau of yards and docks, Navy Department, for the construction of two gunnery quarters at the naval magazine, Kua-hua, Pearl Harbor, Hawaii. The quarters shall be frame buildings, with concrete piers, board and batten sides, asbestos shingle roof, composition board interior walls and partitions, and complete plumbing and electric lighting system. The building shall be fully screened and of the following dimensions, including porches: 45 feet 10 inches by 51 feet 10 inches, with a kitchen extension 21 feet 7 inches by 28 feet 8 inches.

Salem Indian School.

The contract for the construction of a brick industrial building at the Salem (Ore.) Indian School, bids for which were opened May 7, has been awarded to F. A. Erixon, Salem, Ore., at \$4,645.

Canal Zone, Radio Station.

The bureau of yards and docks will invite supplementary proposals under specifications No. 1948 for three 600-foot self-supporting steel towers for the high-power radio station at the naval reservation, San Pablo site, Caimito, Canal Zone, no satisfactory bids having been received at the opening of May 10, 1913. The supplementary proposals will be opened at the bureau of yards and docks at 11 o'clock a. m. on Saturday, June 7 next. Plans and specifications can be obtained upon application to the bureau.

Roads and Walks, Fort Stevens.

The contract for the construction of roads and walks at Fort Stevens, Ore., has been awarded to Olaf Boren, of Astoria, Ore., at \$8,229.60.

Canal Requisitions.

The Isthmian Canal Commission has received requisitions for the purchase of the following material and supplies for use on the Panama Canal:

A sufficient number of cross-roted wood blocks for paving 14,600 square yards of floor space.

One oil burning furnace for annealing various sizes and kinds of steel castings. The furnace must also be suitable for handling forged steel.

One oil-burning core oven for drying large cores of steel, iron and brass castings.

Three oil-burning core ovens for drying small cores of steel, iron, and brass castings: 300 brass cylinder cocks, 3,000 pounds sash cord, 75,000 pounds sea-coal facing, 2,600 railway signal flags, 300 machinists' hammers, 900 galvanized cable clips, 216 timber carrier handles, 1,308 hasps, 300 feet steam rubber hose, 6,000 pounds galvanized wire nails, 50 bed room mats, 240 hand rollers, 2,450 pounds square flax braided packing, 2,175 pounds square spiral packing, in graphite, 900 pounds sheet rubber packing, no insertion; 252 zigzag rules, 408 long-handled, long-pointed shovels; 600 scoop coal shovels, 2,200 pounds copper tacks, 94 machinists' taps, 500 pounds flax twine, 300 pounds candle wicking.

Radio Station, Caimito, C. Z.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., on May 3 for steel towers for high-power radio station to be erected at Caimito, Canal Zone:

Item 1, net price for towers and foundations covered by section A of specifications, complete, in accordance with plans and specifications; 2, net price for radio power equipment covered by section B in accordance with plans and specifications; 3, net price for the work covered by items 1 and 2 if awarded to the same bidder.

Des Moines Bridge and Iron Co., 4th and Ross streets, Pittsburgh, Pa., item 1, \$123,941.

August Dietz, 128 Mott street, New York city, oil engines only, item 1, \$7,350; 2, \$7,966; 3, \$8,340.

Atlantic Communication Co., 47 Vest street, New York city, item 1, if awarded entire contract, \$293,200; 2, alternate No. 1, \$178,950; alternate 2, \$478,900; alternate 3, \$345,450; alternate 4, \$610,700.

National Electrical Signaling Co., Farmers' Bank Building, Pittsburgh, Pa., item 1, see bid of Brown Hoisting Machinery Co.; 2, \$146,950; 3, \$275,000.

Marconi Wireless Telegraph Co. of America, Woolworth Building, New York city, item 1, \$77,000; 2, alternate, \$74,091; alternate, \$108,225; alternate, \$83,668; alternate \$109,816; proposition No. 2, delivery Colon, \$66,198; erected \$113,698; item 2, proposal No. 1, \$62,000; proposal No. 2, \$120,000.

Federal Telegraph Co., Merchant Exchange Building, San Francisco, Cal., item 1, \$73,778.81; 2, \$52,691.33; 3, \$124,970.14.

Brown Hoisting Machinery Co., 4403 St. Clair avenue, Cleveland, Ohio, item 1, \$107,800.

Officers' Quarters, Pearl Harbor.

On June 28 the bureau of yards and docks, Navy Department, will open bids for the construction of two officers' quarters at the naval station, Pearl Harbor, Hawaii. The buildings shall be constructed of wood on rock and concrete foundation. The walls shall be of board and batten and wood shingle finish, and the roofs shall be covered with wood shingles. Interior walls and beams shall be covered in general with painted compo board. Exterior woodwork shall be stained. The quarters shall be fully screened.

A Crematory Near Ancon Hospital.

It is the intention of the Canal Commission, in circular 776, bids opened June 5, to purchase burners and all necessary mechanical apparatus, fronts, doors, and all fixtures to equip two retorts for a crematory to be built for use at the Ancon cemetery. The contract includes complete plans for constructing the retorts and installing the equipment, with the rights to build and operate the same. It also includes the services of an expert to supervise the construction and, after completion, to instruct the employees of the commission in the operation of the crematory. The retorts are to be specially designed for incinerating human remains. The specifications provide that the time required for the complete incineration of an adult human body and preparation of the retort for the reception of another body shall not exceed two hours. No design of a retort will be considered that has not been thoroughly

tested and found satisfactory in actual service. Bidders are to furnish a complete list of all recent installations of erecories built by them. The commission will provide, at its own expense, all common building material, such as concrete, reinforcing rods, building and fire bricks, fire clay, and all labor required to build the erecories. The burners and oil heater and oil pump shall be designed for handling California crude oil, with asphaltum base, of gravity of about 17½ degrees Baume at 60 degrees Fahrenheit. The oil pump and air blower are to be driven by an electric motor. The motor is to be wound for alternating current, 220 volts, 25 cycle, 3 phase, and equipped with rheostat and switches mounted on a suitable panel board. The burners are to be of improved type, designed so that the mixture of air and oil can be properly regulated. The oil line is to be fitted with two duplex strainers, one placed on the suction line between storage tank and pump and the other under the discharge line between pump and heater.

Bids will also be asked for 200 copper cans, two quarts each, 4½ inches diameter and 6½ inches high, suited for the ashes of an adult; also 100 copper cans, one quart each, 4 inches diameter and 4½ inches high, suited for the ashes of a child. All the cans are to be made of polished copper.

HALLS AND SOCIETY BUILDINGS.

LOS GATOS, SANTA CLARA CO., CAL.—Town hall, 2 story and base, frame, \$10,000. Architect, William H. Crim, Jr., 425 Kearn St., S. F. Owners, Town of Los Gatos. Architect Crim has just been commissioned to prepare plans for this building, which has been designed in the Spanish Renaissance style. There will be offices for the City Clerk, Marshall, Fire Chief and Tax Collector. An auditorium seating 150 people is also provided. Interior of the building will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

HOSPITALS.

SAN FRANCISCO—Hospital additions, 2, 2 story and base, reinforced concrete, \$20,000 each. Architect, Constructing Quartermaster Department, Fort Mason. Owners, United States Government. Plans for a hydrotherapeutic ward and for a nurses' dormitory, both of which are to be erected at the Letterman General Hospital in the Presidio of San Francisco, have been completed and bids will be opened on June 10th. The hydrotherapeutic ward will be 79x26 feet and the dormitory 80x31 feet with an L 21x18 feet. Construction will be of the reinforced concrete type throughout. Roof will be of clay tile. Interior will be finished in marble and pine. Exterior of both buildings will be faced with cement plaster. Plans can be secured from the Constructing Quartermaster, Capt. E. S. Walton, Fort Mason.

SAN FRANCISCO—Hospital painting, 2 story. Class A construction. Cost not stated. Architect, City Dept. of Architecture, Temporary City Hall Bldg., 3 E. Owners, City and County of San Francisco. Plans for the painting on

the San Francisco Hospital group have been completed and bids will be opened for this work on June 11th. Plans can be secured from the Department of Architecture. Bids will be taken by the Board of Public Works.

SEATTLE, WASH.—Hospital, 2 story and base, brick and concrete. Cost not stated. Architects, Daniel Huntington, Colman Bldg., Seattle. Owners, City of Seattle. The building is to be erected in Richmond Heights and will cover a ground area of 160x190 feet. The institution will be one of the most modern and completely equipped municipal institutions in the west. Plans and specifications are complete and bids will be called for in the near future. Nine alternate propositions are to be submitted to the bidders as follows: Interlocking tile walls, brick walls or concrete walls, slate, terra cotta, shingle or asbestos shingle roof. Plans can be secured from the architect.

PEARL HARBOR, HAWAII—Hospital group, concrete construction. Cost not stated. Architects, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Bids for the construction of this work as opened in Washington on May 10th show Spalding Construction Co., Commerce Bldg., Portland, Ore., low on the entire work at \$237,939, and W. N. Concanon, Monalnock Bldg., S. F., second low at \$241,975. No award of contract has been made. A complete list of the segregated bids appears under the heading of San Francisco in this issue.

PASADENA, LOS ANGELES CO., CAL.—Sanatorium, 5 story and base, reinforced concrete, \$130,000. Architect, Louis Du P. Millar, St. Louis Bldg., L. A. Owner, Dr. Franklin Balzer, 11 South Euclid Ave., L. A. The building is to be erected near Pasadena, the main building being 240x140 feet with two wings each 40x70 feet. The ground floor will contain the administration department, tile and marble entrance lobby, library and parlors. The upper floors will contain physicians' quarters, laboratories, special treatment rooms, and seventy rooms with forty baths. The top story will contain a dining room, kitchen, service rooms and roof garden, and the two wings will contain baths and massage rooms, one for the use of men and the other for women. A heating plant and laundry will be provided in a separate building. Working drawings are being prepared.

Contracts Awarded.

FULLERTON ORANGE CO., CAL.—Hospital, 1 story and base, reinforced concrete, \$35,000. Architect, Charles E. Shattuck, Mason Bldg., L. A. Owners, Fullerton Hospital Association. Contractors, Kling Company, Union League Bldg., L. A., general construction, \$24,000. W. F. McArthur, 731 West 3rd St., L. A., steam heat, \$7,000.

HOTELS.

SAN FRANCISCO—Hotel, 2 story and base, brick and steel, \$35,000. Architect, A. R. Denke, Humboldt Bank Bldg., S. F. Owner's name withheld. The building is to be erected in Chinatown, and will be arranged for two stores besides the hotel entrance on the first floor. Upper floor will be arranged for a total of 75 guest rooms and several baths. Interior finish will be of pine. There will be a hot and cold water supply. Patent store fronts

and plate glass windows will be specified. The exterior of the building will be faced with pressed brick and cement plaster. Plans are now being prepared.

SAN FRANCISCO—Hotel, 8 story and base, Class A construction. Cost not stated. Architects, A. F. and O. M. Rousseau, Monalnock Bldg., S. F. Owner's name withheld. The building will be erected on Geary street and has been designed to contain a total of 136 guest rooms, all of which will be designed with a private bath. Interior will be finished in pine and hardwood. Ornamental plaster and hardwood and tile will be used in the hotel lobby. Bath rooms will have cement floors and tile wainscot. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Interior partitions will be of metal lath and plaster or hollow tile. A complete steel frame will be erected. Metal window sash and frames will be used. The exterior of the building will probably be faced with pressed brick and terra cotta. Plans are being prepared.

SAN FRANCISCO—Hotel and stores, 7 story and base, brick and steel, \$120,000. Architect, A. R. Denke, Humboldt Bank Bldg., S. F. Owner's name withheld. This building will be erected in the district south of Market street and close to Mission. The structure will cover a large area and when complete will be one of the best appointed hotels in the district. Plans provide for three stores besides the hotel entrance and lobby on the ground floor. Upper six floors will be arranged for a total of 125 guest rooms and a large number of baths. Interior finish will be of pine and hardwood. Tile and cement will be used in the bath rooms. There will be steam heat, elevator service and hot water system. Metal window sash and frames will be used. Exterior of the building will probably be faced with cement plaster. Plans are being prepared.

SAN FRANCISCO—Hotel and store, 3 story and base, reinforced concrete, \$14,000. Architect, William H. Crin, 425 Kearny St., S. F. Owner, J. A. McKenzie. Bids for this work have been taken by the architect and a contract will be awarded this week. The building is to be erected on Powell street, between Jackson and Pacific streets, and will be arranged for two stores on the first floor and 26 rooms above. Exterior will be faced with cement plaster. Hot and cold running water will be supplied to all rooms.

SAN FRANCISCO—Hotel, 5 story and base, reinforced concrete, \$35,000. Architect, A. R. Denke, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on 6th street near Mission and has been designed to contain a store and the hotel lobby on the first floor. Upper floors will be arranged for a total of seventy rooms and a number of baths. There will be steam heat, elevator service and hot water supply. Interior will be finished in pine with some hardwood veneer. Patent store fronts and sidewalk doors and lights will be used. Exterior of the building will probably be faced with cement plaster. Plans are being prepared.

OAKLAND, CAL.—Hotel, 6 story and base, reinforced concrete and steel, \$60,000. Architect, William Wilde, Albany Bldg., Oakland. Owner, Charles Street. The building will be erected at the northeast corner of 11th and

Franklin streets. Plans for the building are complete and bids are now being taken for the excavating, concrete work and steel. There will be stores on the first floor besides the lobby and offices. Upper floors will be arranged for a number of single rooms, many of which will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Bids are being taken.

RICHMOND, CONTRA COSTA CO., CAL.—Hotel and stores, 3 story and base, brick. Cost not stated. Architect, J. B. Ogborn, 611 MacDonald Ave., Richmond. Owner, E. B. Anderson. The first floor of the building will be arranged for stores and the hotel lobby. Upper floors will be divided into 40 guest rooms and one housekeeper's suite. Interior finish will be of pine. Plans provide for a steam heating system and hot water supply. The exterior of the building will be faced with pressed brick. A contract for the brick and steel work has been awarded to James Cruickshank for \$1,120. Bids are now being taken for other parts of the work.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architects, California Real Estate and Building Co., 631 So. Spring St., L. A. Owner, Edwin W. Pascol. The building will be erected on Wall street near 9th, and will be arranged with stores on the first floor and rooms above. A number of baths will be located on each of the upper floors. Interior finish will be of pine throughout. Plans provide for elevator service, metal lath and plaster partitions and steam heat. A hot water system will also be installed. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

VANCOUVER, B. C.—Hotel, 10 story and base, reinforced concrete, \$200,000. Architect, Emil Guenther, Northwest Trust Bldg., Vancouver. Owner's name withheld. This building is to be erected on Hastings street and will be absolutely fireproof throughout. Upper floors will contain in the neighborhood of 300 guest rooms, nearly all of which will have connecting baths. There will be steam heat, elevator service, a vacuum cleaning system and all other modern conveniences. Interior trim will be of metal, hardwoods and marble. Entrance, lobby, offices and parlors will be elaborately finished. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for at once.

VANCOUVER, B. C.—Hotel, 6 story and base, reinforced concrete, \$100,000. Architect, Emil Guenther, Northwest Trust Bldg., Vancouver. Owner's name withheld. The building has been designed for a commercial hotel and will cover a large ground area. There will be a total of some 160 guest rooms, besides the main lobby, offices and parlors. Plans include steam heat, elevator service, a vacuum cleaning system and hot water supply. Interior will be finished in pine and hardwood. The exterior of the building will be faced with tile and pressed brick. Plans are complete and figures will be called for shortly.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, J. B. Nicholson, Wright and Callender Bldg., L. A. Owner, Henry Laub. The building will

cover an area of 32x100 feet. There will be a total of 120 guest rooms, nearly all of which will have connecting baths. Plans provide for steam heat, elevator service and a vacuum cleaning system. Hot water supply will also be installed. Interior finish will be of pine and hardwood. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with cement plaster. Plans are being prepared.

LIBRARIES.

Contracts Awarded.

LOS ANGELES, CAL.—Library, 1 story and base. Class A construction, \$30,000. Architects Train & Williams, associated with F. M. Ashley, Exchange Bldg., L. A. Owners, City of Los Angeles. Contractor, C. Karseboom, 1445 Dana St., L. A. Contract price, \$29,417.

PANAMA -- PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Varied Industries Building, frame construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the Varied Industries Building have been completed and are now out for figures. The building will be erected in the Exhibit Section of the Harbor View site. Separate bids are being taken for the general construction and for the installation of plumbing, sewer and water pipes. Plans can be secured from the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

SAN FRANCISCO—Pile foundations and rock and gravel bunkers. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids were opened by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company on Thursday for constructing crushed rock and gravel bunkers on the Exposition site and also for pile foundations for two of the exhibit buildings, the Mines Building and Varied Industries Building. A contract for the construction of the bunkers was awarded to Pringle-Dunn & Co. at \$2,341, and foundation work on both buildings above mentioned was awarded to Healy-Tibbitts Construction Co. at 233-10 cents per lineal foot. A complete list of the bids appears in this issue under the head of San Francisco.

POST OFFICES.

GRASS VALLEY, NEVADA CO., CAL. Postoffice, 1 story, mezzanine and base, fireproof construction. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans are complete and bids will be opened on June 30th for the construction of this building. The building will cover a ground area of approximately 4,900 square feet. Construction will be fireproof throughout with the exception of the roof. Interior finish will be of pine and hardwood. A central heating system will be installed. Exterior of the building will be faced with stone and stucco. A general contract will be let. Plans may be secured from

the Supervising Architect at Washington or from the custodian of the site at Grass Valley. An official proposal appears in another column of this issue.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architect, none. Owners, Leigh and Schultz, 330 8th Ave., S. F. The dwelling will be erected on 18th avenue near Clement and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be an open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath and rustic. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling will contain six rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and an open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work is to be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residences, 3, 2 story and base, frame, \$4,000 each. Architects, Cook-La Motte Co., Rialto Bldg., S. F. Owner, Georgiana McCuskey. These houses will be erected on Spruce street and each has been designed to contain nine rooms and bath. Basement will be arranged for billiard room and servants' room. Interior finish will be of pine and elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and an open fire place. Mantels will be of brick. Bath room will be finished in cement plaster and tile wainscot. Exteriors will be covered with cement plaster on metal lath. Plans are complete and the work is being done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$2,000. Architect, none. Owners, Western Union Home Builders, 1617 Telegraph Ave., Oakland. This house will contain six rooms and bath. Interior will be finished in pine and elm with hardwood floors throughout. There will be a large open fire place in the living room with a brick or tile mantel. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owners, Bel- & Jones, 2142½ Shattuck Ave., Berkeley. The dwelling will be erected on Shattuck avenue near Los Angeles street and will contain seven rooms, sleeping porch and bath. Interior finish will be of pine and hardwoods with oak floors in the living room, dining room and reception hall. Plans pro-

vide for furnace heat, open fire places and an automatic water heater. Bath room will have tile wainscot. Tile will also be used in the kitchen. Mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work is to be done by Day Labor.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$3,000. Architect, none. Owner, Mary A. Connell. The house has been designed for a seven room dwelling with bath and sleeping porch. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$4,000. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owner, F. W. Diehl. The dwelling is to be erected at the corner of 34th and West streets and has been designed for an eight-room house with bath. Interior finish will be of pine and hardwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$2,500. Architect, J. C. Kincade, 6604 Dana St., Oakland. Owner, Mrs. Alberta Fountain. The dwelling will contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, J. C. Kincade, 6604 Dana St., Oakland. Owner, Mrs. Lulu Case. The house will be erected on Posen avenue and has been designed for a six room dwelling with bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$4,500. Architect, none. Owner, S. G. Dunn, 829 Phelan Bldg., S. F. The dwelling will be erected in Claremont Park and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine and hardwood. Interior finish will be of pine and hardwood veneer with hardwood and tile floors used in the principal rooms and bath rooms. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans will be ready for figures about July 1st.

—SCHOOLS—

SAN FRANCISCO—School, 2 story and base, concrete and frame, \$65,000. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans for this building, which is to be erected on Church street between Hill and 24th streets are complete and have been approved. Bids for the construction will be opened on May 28th. The building will contain ten class rooms. Interior will be finished in pine with some maple floors. A central heating system will be installed. All stairways and corridors will be of concrete. Exterior will be covered with cement plaster on metal lath. Plans can be secured from the Department of Architecture. Bids will be opened by the Board of Public Works.

BERKELEY, ALAMEDA CO., CAL.—Campanile, Class A construction, \$250,000. Architect, John Gales Howard, 602 Mission St., S. F. Owners, Regents of the University of California. Plans for the Jane K. Sather Campanile have been completed and bids for its construction are now being taken. There will be a complete steel frame with exterior walls faced with marble and granite. Elevator service is provided. One of the most complete and costly set

of chimneys will be installed. Bids will be opened on June 19th by the Board of Regents of the University. Plans can be secured from the architect. An official proposal appears in this issue.

FULLERTON, ORANGE CO., CAL.—School, 1 story and base, brick, \$50,000. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Fullerton School District. The building is designed in the shape of a letter T and will cover an area of 180x200 feet. Plans provide for twelve class rooms and an assembly hall. Interior will be finished in pine with some maple floors. There will be a central heating system. Exterior of the building will be faced with cement plaster. Bids are being taken on the general contract and for the heating and plumbing. Bids will be opened on June 7th. Plans can be secured from the architects or from the Clerk of the School Board at Fullerton.

CAMAS, WASH.—School, 2 story and base, brick, \$35,000. Architects, Fred A. Legg and George L. Kingsberry, Ainsworth Bldg., Portland. Owners, Camas School District. The building has been designed to contain twelve class rooms and an auditorium. The interior will be finished in pine with some maple floors. Plans provide for a central heating system and vacuum cleaning. The exterior of the building will be faced with cement plaster. Plans are complete and bids will be opened on June 2nd. Plans can be secured from the architects or from the Clerk of the Board of Education.

HUNTINGTON PARK, LOS ANGELES CO., CAL.—School, 1 story and base, brick and concrete, \$25,000. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Huntington School District. This building has been mentioned here before when plans were first started. Working drawings have been completed and bids will be opened on June 7th. The building will contain six class rooms and an assembly hall seating 400 people. A central heating system will be installed. Interior will be finished in pine with some maple floors. Exterior of the structure will be faced with cement plaster. Plans can be secured from the architects.

Contracts Awarded.

VENICE, LOS ANGELES CO., CAL.—School, 1 story and base, frame, \$27,000. Architects, Eager & Eager, Story Bldg., L. A. Owners, Venice School District. Contractors, Bay Wrecking and Improvement Co., 1500 Trolleyway. Venice, general construction, \$25,000. C. McNeil, Stimson Bldg., L. A., heating, \$2,300.

STORES AND OFFICES.

SAN FRANCISCO—Stores and lofts, 3 story and base, reinforced concrete, \$35,000. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owners, California Poultry Co. The building will be erected on Washington street west of Front, and will have a frontage of 30 feet and a depth of 120. The first floor will be arranged for a large store and market. Upper floors will contain the cold storage rooms and the basement a complete cold storage system. Interior of the market will be finished in tile and marble. Metal window frames and sash are specified. Exterior of the building will be faced with pressed brick and cement plaster. There will be both freight and sidewalk elevators. Plans are being prepared.

SAN FRANCISCO—Store, 1 story and base, brick. Cost not stated. Architect, Woodworth Wethered, 142 Second St., S. F. Owners, Wethered Estate. The building will be erected on the south side of Market street east of New Montgomery and will be arranged for one store. There will be patent store fronts and interior finish of pine. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL.—Stores and lofts, 9 story and base. Class A construction, \$275,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Metropolitan Fireproof Building Co. Contractors, F. O. Engstrom Co., 5th and Seaton Sts., L. A., general construction. Contract price, \$275,000.

LOS ANGELES, CAL.—Stores and lofts, 8 story and base. Class A construction, \$225,000. Architects, none. Owners, Isaacs Bros. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A., general construction. Contract price, \$225,000. Note: Subcontracts are now being let on all parts of the work.

LA GRANDE, ORE.—Stores and offices, 3 story and base, brick. Cost not stated. Architects, Whidden & Lewis, Lewis Bldg., Portland. Owner, C. S. Jacobsen. Contractor, A. E. Sykes, Hillsboro, Ore. Contract price not stated.

BAKERSFIELD, KERN CO., CAL.—Stores and offices, 2 story and base, brick, \$25,000. Architect, J. M. Saffell, New Fish Bldg., Bakersfield. Owner, Mr. Taylor. Contractor, F. L. Gribble, Bakersfield. Contract price, \$22,621. Other bidders on this project were George M. Wilkins, \$27,929; M. F. Kean, \$26,980; Busby, \$26,145; J. Yancy, \$25,884; Dupes & Hansen, \$24,899; Brown & Paynter, \$23,135, and F. Amwig, \$23,000.

FRESNO, FRESNO CO., CAL.—Stores, 3 story and base, brick and steel, \$350,000. Architect, C. A. Meussdorfer, Humboldt Bank Bldg., S. F. Owners, Gottschalk Department Store. Contractors, Central Iron Works, S. F., structural steel and iron work. Contract price not stated.

THEATRES.

BERKELEY, ALAMEDA CO., CAL.—Theatre, 2 story and base. Class A construction, \$100,000. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Williamson and Mason, leased to the Turner and Dahnken Circuit. The building will be erected on Shattuck avenue south of University avenue, and will cover an area of 60x175 feet. The greater portion of the building will be taken up by the theatre, which will have a main auditorium with a seating capacity of 2,000 people. Plans provide for two stores, one on either side of the main entrance. Construction will be fireproof. A completely equipped stage will be installed, but the theatre is intended for use principally as a moving picture show house. Exterior will be faced with cement plaster. Plans are being prepared.

VISALIA, TULARE CO., CAL.—Theatre alterations, brick construction, \$50,000. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owners, Visalia Amusement Co. The present brick building will be altered so as to

contain an auditorium seating 800 people. Interior trim, plastering and decoration will be entirely new. New plumbing and electric work will also be installed. Exterior work will consist of new marble and tile wainscot in the lobby. Plans are being prepared.

Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be an open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath and rustic. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, E. Neilson, 30 Precident Terrace, S. F. The dwelling will contain six rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and an open

fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work is to be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner, W. K. Bush. The building will cover an area of 24x58 feet and will be arranged for one store on the first floor and five apartment flats on the upper floors. Interior finish will be of pine with some elm veneer. Hardwood floors will be used in the principal room. There will be open fire places or gas grates in the suites. All apartments will be equipped with wall beds and will be supplied with hot and cold running water. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San

of Clement and each flat will contain five or six rooms. Interiors will be finished in pine with some hardwood veneer. Hardwood floors will be used in the living rooms. There will be open fire places and tile or brick mantels. Baths will have cement wainscot. The exterior of the building will be covered with rustic and klinker brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FLATS—2 story and base, frame, \$7,000. San Francisco, Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner's name withheld. The building will be erected on Parnassus avenue and will contain two large flats and a garage in the basement. Interior finish will be of pine with hardwood veneer and panels. Oak floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchens. Exterior of the building will be covered with shiplap and cement plaster on metal lath. Plans are nearly complete and bids will be called for shortly.

FLATS—3 story and base, frame, \$9,000. San Francisco, Architect, none. Owner, Thomas F. Barry, 2641 20th St., S. F. The building will be erected on Green street west of Larkin, and has been designed to contain six apartment flats of three and four rooms each with bath. Interior will be finished in pine and elm. Hardwood floors will be used in the living rooms. A central heating system will be installed. Each flat will be equipped with a wall bed. Tile and cement plaster will be used in the bath rooms. The exterior of the building will be covered with rustic. Plans are in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

FLATS—4 story and base, reinforced concrete, \$15,000. San Francisco, Architect, none. Owner, Kincaid Construction Co., 1676 Fulton St., S. F. The building will be erected on Bush street east of Larkin and will have a frontage of 27 feet and a depth of 37 feet. Interior has been arranged for eight small flats with baths. There will be pine interior finish. A central heating system will be installed. Bath rooms will have cement floors and tile wainscot. Some hardwood floors will be used. Exterior of the building will be faced with cement plaster. Plans are complete and the owners will do the work by Day Labor. All materials are now being purchased.

FLATS—3 story and base, frame, \$5,000. San Francisco, Architect, none. Owner, Gustave Spitz, 232A Langton St., S. F. The building will be erected on Langton street near Folsom, and will contain three modern flats of five and six rooms and bath. Interior finish will be of pine throughout. There will be some oak floors. Bath rooms will be finished in Keene's cement. Entrance vestibules will have terrazzo steps and the wainscot. The exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

LAUNDRY—1 and 2 story and base, brick. Cost not stated. San Francisco, Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner, Edward E. Rolkin. This building has been mentioned here before. The structure will

cover and area of 86½x275 feet. The greater portion of the building will be occupied by the laundry and stables. The two-story part will be arranged for flats. A contract for the grading and brick work has been let. Mr. Rolkin is now taking figures for the other parts of the work.

HOSPITAL ADDITIONS—2, 2 story and base, reinforced concrete, \$20,000 each. San Francisco, Architect, Constructing Quartermaster's Dept., Fort Mason. Owners, United States Government. Plans for a hydrotherapeutic ward and for a nurses' dormitory, both of which are to be erected at the Letterman General Hospital in the Presidio of San Francisco, have been completed and bids will be opened on June 10th. The hydrotherapeutic ward will be 79x26 and the dormitory 80x31 feet with an L 21x18 feet. Construction will be of the reinforced concrete type throughout. Roof will be of clay tile. Interior will be finished in marble and pine. Exterior of both buildings will be faced with cement plaster. Plans can be secured from the Constructing Quartermaster, Capt E. S. Walton, Fort Mason.

HOSPITAL PAINTING, ETC.—Class A construction. Cost not stated. San Francisco, Architects, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans for the painting on the San Francisco Hospital group have been completed and bids will be opened for this work on June 11th. Plans can be secured from the Department of Architecture. Bids will be taken by the Board of Public Works.

HOSPITAL GROUP—Concrete construction. Cost not stated. Pearl Harbor, Hawaii, Architects, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Bids for the construction of this work as opened in Washington on May 10th show Spalding Construction Co., Commerce Bldg., Portland, Ore., low on the entire work at \$237,939, and W. N. Concanon, Monadnock Bldg., S. F., second low at \$241,975. No award of contract has been made. A complete list of the segregated bids appears under the heading of San Francisco in this issue.

HOTEL—2 story and base, brick and steel, \$35,000. San Francisco, Architect, A. R. Denke, Humboldt Bank Bldg., S. F. Owner's name withheld. The building is to be erected in Chinatown and will be arranged for two stores besides the hotel entrance on the first floor. Upper floor will be arranged for a total of 75 guest rooms and several baths. Interior finish will be of pine. There will be a hot and cold water supply. Patent store fronts and plate glass windows will be specified. The exterior of the building will be faced with pressed brick and cement plaster. Plans are now being prepared.

HOTEL—8 story and base, Class A construction. Cost not stated. San Francisco, Architects, A. F. and O. M. Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on Geary street and has been designed to contain a total of 136 guest rooms, all of which will be designed with a private bath. Interior will be finished in pine and hardwood. Ornamental plaster and hardwood and tile will be used in the hotel lobby. Bath rooms will have cement floors and tile wainscot. There will be steam heat, elevator service, a vac-

uum cleaning system and hot water supply. Interior partitions will be of metal lath and plaster or hollow tile. A complete steel frame will be erected. Metal window sash and frames will be used. The exterior of the building will probably be faced with pressed brick and terra cotta. Plans are being prepared.

HOTEL AND STORES—1 story and base, brick and steel, \$120,000. San Francisco, Architect, A. R. Denke, Humboldt Bank Bldg., S. F. Owner's name withheld. This building will be erected in the district south of Market street and close to Mission. The structure will cover a large area and when complete will be one of the best appointed hotels in the district. Plans provide for three stores besides the hotel entrance and lobby on the ground floor. Upper six floors will be arranged for a total of 125 guest rooms and a large number of baths. Interior finish will be of pine and hardwood. Tile and cement will be used in the bath rooms. There will be steam heat, elevator service and a hot water system. Metal window sash and frames will be used. Exterior of the building will probably be faced with cement plaster. Plans are being prepared.

HOTEL AND STORE—3 story and base, reinforced concrete, \$14,000. San Francisco, Architect, William H. Crim, Jr., 425 Kearny St., S. F. Owner, J. A. McKenzie. Bids for this work have been taken by the architect and a contract will be awarded this week. The building is to be erected on Powell street, between Jackson and Pacific streets and will be arranged for two stores on the first floor and 26 rooms above. Exterior will be faced with cement plaster. Hot and cold running water will be supplied to all rooms.

HOTEL—5 story and base, reinforced concrete, \$35,000. San Francisco, Architect, A. R. Denke, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on 6th street near Mission, and has been designed to contain a store and the hotel lobby on the first floor. Upper floors will be arranged for a total of seventy rooms and a number of baths. There will be steam heat, elevator service and hot water supply. Interior will be finished in pine with some hardwood veneer. Patent store fronts and sidewalk doors and lights will be used. Exterior of the building will probably be faced with cement plaster. Plans are being prepared.

SCHOOL—2 story and base, concrete and frame, \$65,000. San Francisco, Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans for this building, which is to be erected on Church street between Hill and 24th streets are complete and have been approved. Bids for the construction will be opened on May 28th. The building will contain ten class rooms. Interior will be finished in pine with some maple floors. A central heating system will be installed. All stairways and corridors will be of concrete. Exterior will be covered with cement plaster on metal lath. Plans can be secured from the Department of Architecture. Bids will be opened by the Board of Public Works.

STORE—1 story and base, brick. Cost not stated. San Francisco, Architect, Woodworth Wethered, 142 Second St., S. F. Owners, Wethered Es-

tate. The building will be erected on the south side of Market street east of New Montgomery, and will be arranged for one store. There will be patent store fronts and interior finish of pine. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

STORES AND LOFTS—3 story and base, reinforced concrete, \$35,000. San Francisco. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owners, California Poultry Co. The building will be erected on Washington street west of Front, and will have a frontage of 30 feet by a depth of 120 feet. The first floor will be arranged for a large store and market. Upper floors will contain the cold storage rooms and the basement a complete cold storage system. Interior of the market will be finished in tile and marble. Metal window frames and sash are specified. Exterior of the building will be faced with pressed brick and cement plaster. There will be both freight and sidewalk elevators. Plans are being prepared.

VARIED INDUSTRIES BUILDING—Frame construction. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the Varied Industries Building have been completed and are now out for figures. The building will be erected in the Exhibit Section of the Harbor View site. Separate bids are being taken for the general construction and for the installation of the plumbing, sewer and water pipes. Plans can be secured from the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

PILE FOUNDATIONS AND ROCK AND GRAVEL BUNKERS—Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids were opened by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company on Thursday for constructing crusher rock and gravel bunkers on the Exposition site, and also for pile foundations for two of the exhibit buildings, the Mines Building and Varied Industries Building. A contract for the construction of the bunkers was awarded to Pringle-Dunn & Co. at \$2,341, and foundation work on both buildings above mentioned was awarded to Healy-Tibbitts Construction Co. at 23-10 cents per lineal foot. A complete list of the bids appears in this issue under the head of San Francisco.

Contracts Awarded.

APARTMENT HOUSE—3 story and base, frame, \$10,500. San Francisco. Architect, John J. Foley, 46 Kearny St., S. F. Owner, Mr. Solari. Contractor, Patrick Fahy, 518 Noe St., S. F., general construction, \$10,545. Painting to H. Kunst and plumbing to E. Crustic.

Another Modern Skyscraper.

The building which the Hohart Estate Company is about to erect on the north line of Market street, opposite Second, will be twenty stories in height, with a tower-like projection surmounted by a dome and lantern. In all of which there will be about five more floors, some of which will be finished stores.

This announcement was made in the offices of the architects, Willis Polk & Co., after the preliminary contracts had been made with the Hohart Estate Company providing for immediate construction of the building. When the first intimation of the prospective construction of a big office building on the Hohart property was given, it was understood that the height of the structure would be twelve stories. Since then, however, the scheme was changed materially, so that the owners added eight more stories upon deciding to erect a monumental office building intended as one of the most commanding structures of San Francisco.

The site of the building is vacant, and put little grading will be necessary to place the land in readiness for laying the foundations. The schedule in the architects' offices provides for completion of the structure within one year from the date of commencement of the working drawings, and it is consequently expected that tenants may occupy offices in the building as early as June, 1914. Construction is to be rushed upon the structure, as it is done now on the new insurance building on California street.

For the greater part the building will be twelve stories above the street level, and the higher elevation will rise from it, a symmetrical shaft of eight more stories, changing the sky line of Lower Market street. Its front is almost 100 feet wide, and the depth about 210 feet, being a little less on the east line of the lot. The building will have a front on Sutter street, from which there will be a hallway connecting with the main lobby on the Market street front. At present the plans contemplate leaving the Sutter street frontage for lofts, with a separate entrance, although practically all the building will be devoted to offices.

With a full steel frame covered with reinforced concrete and floors and roof of the same material, the building will be of the highest structural type, officially designated in San Francisco as "class A." Its exterior will be finished either in pressed brick or terra cotta as decided on later.

The Market street facade will be treated with a massive base supporting a colonnade two stories high, and then an ornamented belt course, above which the shaft rises plain to the eighteenth story, where another colonnade two stories high is seen. Above this is the cornice. Rising behind the tops of the walls is a central tower, in which there will be a great clock that will be visible all over the city. Smaller cupolas at either side complete the design.

It is aimed to have a first-class office building, the lobby will be finished in marble, bronze and tile, and the offices will be in hardwood with all the latest equipment and comforts.

Bids For Hospital At Pearl Harbor.

Portland Firm Low Bidder and Concannon Next for Quarter of a Million Dollar Job.

Four sets of figures were opened on May 10th in the Bureau of Yards and Docks at Washington, D. C., for the

construction of the Hospital Building at the Naval Training Station at Pearl Harbor, Hawaii. The following is a complete list of the bids as opened. An award of contract has not yet been made:

OAKLAND AND ALAMEDA
COUNTY.

RESIDENCES—3, 2 story and base,
frame, \$4,000 each. Berkeley, Alameda
Co., Cal. Architects, Cook-Latta Motte
Co., Rialto Bldg., S. F. Owner, Geo-
fiana McCluskey. These houses will
be erected on Spruce street and each
has been designed to contain nine
rooms and bath. Basement will be ar-
ranged for billiard room and servants'
room. Interior finish will be of pine
and elm panels. Hardwood floors will
be used in the principal rooms. There
will be furnace heat and open fire
places. Mantels will be of brick. Bath
rooms will be finished in cement plas-
ter and tile wainscot. Exterior will
be covered with cement plaster on
metal lath. Plans are complete and the
work is being done by Day Labor.

RESIDENCE—2 story and base,
frame, \$2,000. Piedmont, Alameda Co.,
Cal. Architect, none. Owners, West-
ern Union Home Builders, 1617 Tele-
graph Ave., Oakland. The house will
contain six rooms and bath. Interior
will be finished in pine and elm with
hardwood floors throughout. There
will be a large open fire place in the
living room with a brick or tile man-
tel. Tile will be used in the bath room
and kitchen. Exterior of the dwell-
ing will be covered with cement plas-
ter on metal lath. Plans are complete
and in the hands of the owners who
will do the work by Day Labor.

BUNGALOW—1½ story and base,
frame, \$3,000. Berkeley, Alameda Co.,
Cal. Architect, none. Owners, Belvel
and Jones, 2142½ Shattuck Ave., Ber-
keley. The dwelling will be erected
on Shattuck avenue near Los Angeles
street, and will contain seven rooms,
sleeping porch and bath. Interior fin-
ish will be of pine and hardwoods with
oak floors in the living room, dining
room and reception hall. Plans pro-
vide for furnace heat, open fire places
and an automatic water heater. Bath
room will have tile wainscot. Tile
will also be used in the kitchen. Man-
tels will be of brick. The exterior of
the dwelling will be covered with ce-
ment plaster on metal lath. Plans are
complete, and the work is to be done
by Day Labor.

BUNGALOW—1½ story and base,
frame, \$3,000. Oakland, Cal. Architect,
none. Owner, Mary A. Connell. The
house has been designed for a seven-
room dwelling with bath and sleeping
porch. Interior finish will be of pine
and hardwood. Oak floors will be used
in the principal rooms. There will be
furnace heat and open fire places. Man-
tels will be of brick and tile. Tile
will be used in the bath room and
kitchen. Exterior of the house will
be covered with cement plaster on
metal lath. Plans are complete and the
work will be done by Day Labor.

BUNGALOW—1 story and base,
frame, \$4,000. Oakland, Cal. Archi-
tect, F. D. Voorhees, Central Bank
Bldg., Oakland. Owner, F. W. Diehl.
The dwelling is to be erected at the
corner of 34th and West streets, and
has been designed for an eight-room
house with bath. Interior finish will
be of pine and hardwood. Oak floors
will be used in the living room, dining
room and reception hall. There will
be furnace heat and open fire places.
Mantels will be of brick. Tile will be
used in the bath room and kitchen. An
automatic water heater will be in-
stalled. Exterior of the house will be
covered with cement plaster on metal
lath. Plans are complete and figures
are being taken.

BUNGALOW—1 story and base,
frame, \$2,500. Berkeley, Alameda Co.,
Cal. Architect, J. C. Kincade, 6604
Dana St., Oakland. Owner, Mrs. Alberta
Fountain. The dwelling will contain
six rooms and bath. Interior will be
finished in pine throughout. Hard-
wood floors will be used in the prin-
cipal rooms. There will be a large open
fire place in the living room with brick
mantel. Tile will be used in the bath
room and kitchen. Exterior of the
dwelling will be covered with cement
plaster. Plans are complete and fig-
ures are being taken.

BUNGALOW—1 story and base,
frame, \$3,000. Berkeley, Alameda Co.,
Cal. Architect, J. C. Kincade, 6604
Dana St., Oakland. Owner, Mrs. Lulu
Case. The house will be erected on
Posen avenue, and has been designed
for a six-room dwelling with bath.
All interior finish will be of pine or
redwood. Hardwood floors will be used
in the living room, dining room and
reception hall. There will be furnace
heat and open fire place. Mantel will
be of brick. Tile will be used in the
bath room and kitchen. Exterior of
the house will be covered with cement
plaster on metal lath. Plans are com-
plete and figures are being taken.

BUNGALOW—1 story and base,
frame, \$4,500. Berkeley, Alameda Co.,
Cal. Architect, none. Owner, S. G.
Doun, 839 Phelan Bldg., S. F. The
dwelling will be erected in Claremont
Park and has been designed to contain
seven rooms, bath and sleeping porch.
Interior will be finished in pine and
hardwood. Hardwood floors will be
used in the living room, dining room
and reception hall. There will be
furnace heat and open fire places. Man-
tels will be of brick. Tile will be
used in the kitchen and bath room.
The exterior of the house will be cov-
ered with cement plaster on metal
lath. Plans are complete and figures
are being taken by the owner.

RESIDENCE—2 story and base,
frame. Cost not stated. Berkeley,
Alameda Co., Cal. Architect, Olin S.
Grove, 2911 Telegraph Ave., Berkeley.
Owner, Mr. Fish. The dwelling will be

erected at the corner of Ashby and Elmwood street, and will contain in the neighborhood of eight rooms and bath. Interior finish will be of pine with some hardwood veneer. Plans provide for furnace heat and open fire places. An automatic water heater will be installed. Hardwood floors will be used in the principal rooms. Mantels will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, H. L. Wood, 2300 Seminary Ave., Oakland. The dwelling has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood with oak floors in the principal rooms. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Plans provide for an automatic water heater. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$4,500. Oakland, Cal. Architect, none. Owner, Edward Olsen, 23 West-all Ave., Oakland. The house will be erected on Bay View avenue and has been designed for an eight-room dwelling with bath and sleeping porch. All interior finish will be of pine or elm veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner who is now purchasing all materials. The work will be done by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$10,000. Oakland, Cal. Architect, none. Owner, A. G. McNeill, 1424 9th Ave., Oakland. The building will be erected at the southeast corner of 9th avenue and East 14th street, and will be arranged for a store on the first floor and 24 rooms above. These rooms will be arranged in two and three room suites with bath and wall beds. Interior will be finished in pine and all living rooms will have hardwood floors. Baths will be finished with cement plaster. The exterior of the building will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

HOTEL—6 story and base, reinforced concrete and steel, \$60,000. Oakland, Cal. Architect, William Wilde, Albany Bldg., Oakland. Owner, Charles Street. The building will be erected at the northeast corner of 11th and Franklin streets. Plans for the building are complete and bids are now being taken for the excavating, concrete work and steel. There will be stores on the first floor besides the lobby and offices. Upper floors will be arranged for a number of single rooms, many of which will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Bids are being taken.

CAMPANILE—Class A construction, \$250,000. Berkeley, Alameda Co., Cal. Architect, John Galen Howard, 602 Mission St., S. F. Owners, Regents of the University of California. Plans for the Jane K. Sather Campanile have been completed and bids for its construction are now being taken. There will be a complete steel frame with exterior walls faced with marble and granite. Elevator service is provided. One of the most complete and costly set of chimneys will be installed. Bids will be opened on June 19th by the Board of Regents of the University. Plans can be secured from the architect. An official proposal appears in this issue.

THEATRE—2 story and base. Class A construction, \$100,000. Berkeley, Alameda Co., Cal. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Williamson & Masen, leased to the Turner & Dahnen Circuit. The building will be erected on Shattuck avenue south of University avenue, and will cover an area of 60x175 feet. The greater portion of the building will be taken up by the theatre, which will have a main auditorium with a seating capacity of 2,000 people. Plans provide for two stores, one on each side of the main entrance. Construction will be fireproof. A completely equipped stage will be installed, but the theatre is intended for use principally as a moving picture show house. Exterior will be faced with cement plaster. Plans are being prepared.

SAN JOSE AND THE SANTA CLARA VALLEY.

COTTAGES AND RESIDENCES—
Frame. Cost not stated. San Jose,
Santa Clara Co., Cal. The following Day
Labor jobs are reported as about to be
started in San Jose: V. Pieracci, S. W.
Rosa and 21st Sts., San Jose, 5 room
cottage, \$1,500; F. O. Nelson, Imperial
Hotel, San Jose, 5 room frame cottage,
\$2,500; J. F. Cambiano, 858 So. 7th St.,
San Jose, 6 room frame cottage, \$2,000.

TOWN HALL—2 story and base,
frame, \$10,000. Los Gatos, Santa Clara
Co., Cal. Architect, William H. Crim,
Jr., 425 Kearny St., S. F. Owners,
Town of Los Gatos. Architect Crim
has just been commissioned to prepare
plans for this building, which is to be
designed in the Spanish Renaissance
style. There will be offices for the
City Clerk, Marshall, Fire Chief and
Tax Collector. An auditorium seating
150 people is also provided. Interior
will be finished in pine. Exterior of
the building will be covered with ce-
ment plaster on metal lath. Plans are
complete and figures will be called for
shortly.

MARIN, CONTRA COSTA AND SONOMA COUNTIES

BUNGALOWS—6, 1 story and base,
frame, \$2,500 each. Crockett, Contra
Costa Co., Cal. Architect, William H.
Crim, Jr., 425 Kearny St., S. F. Owners,
American-Hawley Sugar Co. These
bungalows are the first of a number of
similar buildings which will be erected
by the sugar company for its em-
ployees at Crockett. Each of the
houses will contain six rooms and bath.
Interior finish will be of pine through-
out. There will be open fire places
and tile or brick mantels. Some hard-
wood floors will be used. Tile will be
used in the bath rooms and kitchens.
Exteriors will be covered with rustic
shingles and cement plaster. Plans
are being prepared and when complete
the work will be done by Day Labor.

APARTMENT HOUSE—2 story and
base, brick. Cost no' stated. Rich-
mond, Contr. Costa Co., Cal. Architect,
J. B. Ogborn, 611 Macdonald Ave.,
Richmond. Owner, C. G. Blake. The
building will be arranged for stores on
the first floor and the entrance to
apartments above. Upper floor will be

BUILDING AND INDUSTRIAL NEWS.

subdivided into two and three room suites with baths. Interior finish will be of pine throughout. There will be wall lene in all apartments. Cement plaster will be used in the bath rooms. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOTEL AND STORES—3 story and base, brick. Cost not stated. Richmond, Contra Costa Co., Cal. Architect, J. B. Oghorn, 611 MacDonald Ave., Richmond. Owner, E. B. Anderson. The first floor of the building will be arranged for stores and the hotel lobby. Upper floors will be divided into forty guest rooms and one housekeeper's suite. Interior finish will be of pine. Plans provide for a steam heating system and hot water supply. The exterior of the building will be faced with pressed brick. A contract for the brick and steel work has been awarded to James Cruickshank for \$1,120. Bids are now being taken for other parts of the work.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

BUNGALOWS AND RESIDENCES—1 and 2 story frame. Cost not stated. Stockton, San Joaquin Co., Cal. The following Day Labor jobs are reported as about to be started in Stockton: H. M. Harkness, Stockton, 2 story frame dwelling, \$3,000; E. C. Cullums, 822 So. Ophir, Stockton, 1 story frame cottage, \$1,800; L. Freitas, 505 West Vine St., Stockton, addition to frame dwelling, \$2,700; Carl Hohkolt, 215 East Fremont, Stockton, 1 story frame cottage, \$1,600; William E. Eddy, Stockton, 1 story frame cottage, \$1,850, and A. Godsil, 516 West Park, Stockton, 1 story frame cottage, \$2,000.

FLOUR MILL—5 story and base, reinforced concrete. Cost not stated. Sacramento, Cal. Architect, P. J. Herold, Forum Bldg., Sacramento. Owner's name withheld. The architect has completed working drawings for the largest flour mill to be erected in the interior. The structure will be fireproof throughout and will be equipped with the most modern machinery. Considerable steel will be used. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken by Mr. Herold.

GRAIN ELEVATOR—Reinforced concrete construction. Cost not stated. Sacramento, Cal. Architect, P. J. Herold, Forum Bldg., Sacramento. Owner's name withheld. Bids are now being taken for a reinforced concrete grain elevator which is to be erected in connection with the flour mill described above. This elevator will have a capacity of 75,000 bushels and will be fireproof throughout. Exterior will be faced with cement plaster. Bids are now being taken.

POSTOFFICE—1 story, mezzanine and base, fireproof construction. Cost not stated. Grass Valley, Nevada Co., Owners, United States Government. Oscar Venderoth, Washington, D. C. Plans are complete and bids will be opened on June 30th for the construction of this building. The building will cover a ground area of approximately 4,900 square feet. Construction will be fireproof throughout with the exception of the roof. Interior finish will be of pine and hardwood. A central heating system will be installed. Exterior of the building will be faced with stone and stucco. A general contract will be let. Plans may be secured from the Supervising Architect at Washington or from the custodian of the site at Grass Valley. An official proposal appears in another column of this issue

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—4 story and base. Class C. Cost not stated. Long Beach, Los Angeles Co., Cal. Architect, Leonard L. Jones, I. W. Hellman Bldg., L. A. Owner, Fred Dennie. The building will cover an area of 50x144 feet and the interior has been arranged for a total of 102 rooms. These will be arranged in two and three room suites with private baths and wall beds. Interior finish will be of pine and hardwood. Bath rooms will be finished in cement. There will be steam heat.

elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures are to be called for shortly.

APARTMENT HOUSE—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Milwaukee Building Co., Wright & Callender Bldg., L. A. Owner, G. A. Melsing. The building will be erected on a corner site and will cover an area of 117x150 feet. Interior will contain a total of 125 rooms, arranged in two and three room suites with private baths and wall beds. Interior finish will be of pine and hardwood. The wainscot and cement floors will be used in the bath rooms. Plans provide for steam heat, elevator service and vacuum cleaning system. Exterior of the building will be faced with pressed brick and artificial stone. Plans are being prepared.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. San Pedro, Los Angeles Co., Cal. Architect, Thomas Preston, Higgins Bldg., L. A. Owner, J. J. Connor. The building has been designed to contain 21 suites of two and three rooms each with bath and will cover a lot 50x90 feet. Interior finish will be of pine and hardwood. Plans provide for steam heat and a vacuum cleaning system. Bath rooms will be finished in tile and cement plaster. Wall beds will be used in all suites. The exterior of the building will be faced with blue pressed brick. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Leonard L. Jones, I. W. Hellman Bldg., L. A. Owner, Mrs. A. G. Thompkins. The building will cover an area of 50x135 feet, and will contain 55 rooms arranged in two and three room suites with private bath and wall beds. Interior finish will be largely of pine with some hardwood trim in the living rooms and hardwood floors. There will be steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are being prepared.

BANK AND OFFICES—2 story and base, reinforced concrete and steel, \$75,000. Redlands, San Bernardino Co., Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, First National Bank of Redlands. The building will cover an area of 40x118 feet. The entire first floor will be occupied by the bank. Upper floor will be subdivided into a number of modern offices. Interior of the banking rooms will be handsomely finished in pine and hardwoods. The floor will be used in the public room. There will be steam heat. Special coin and safe deposit vaults will be installed. The exterior of the building will be faced with artificial stone. Plans are being prepared.

SCHOOL—1 story and base, brick, \$50,000. Fullerton, Orange Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Fullerton School District. The building is designed in the shape of a letter T and will cover an area of 180x200 feet. Plans provide for twelve class rooms and an assembly hall. Interior will be finished in pine with some maple floors. There will be a central heating system. Exterior of the building will be faced with cement plaster. Bids are being taken on the general contract and for

the heating and plumbing. Bids will be opened on June 7th. Plans can be secured from the architects or from the Clerk of the School Board at Fullerton.

SANATORIUM—3 story and base, reinforced concrete, \$130,000. Pasadena, Los Angeles Co., Cal. Architect, Louis Bu P. Millar, St. Louis Bldg., L. A. Owner, Dr. Franklin Balzar, 11 South Euclid Ave., L. A. The building is to be erected near Pasadena, the main building being 240x140 feet with two wings each 40x70 feet. The ground floor will contain the administration department, tile and marble entrance lobby, library and parlors. The upper floors will contain physicians' quarters, laboratories, special treatment rooms and seventy rooms with forty baths. The top story will contain a dining room, kitchen, service rooms and a roof garden, and the two wings will contain baths and massage rooms, one for the use of men and the other for women. A heating plant and laundry will be provided in a separate building. Working drawings are being prepared.

HOTEL—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, J. B. Nicholson, Wright and Callender Bldg., L. A. Owner, Henry Laub. The building will cover an area of 80x140 feet with an L 32x 100 feet. There will be a total of 120 guest rooms, nearly all of which will have connecting baths. Plans provide for steam heat, elevator service and a vacuum cleaning system. Hot water supply will also be installed. Interior finish will be of pine and hardwood. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with cement plaster. Plans are being prepared.

SCHOOL—1 story and base, brick and concrete, \$25,000. Huntington Park, Los Angeles Co., Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Huntington Park School District. This building has been mentioned here before when plans were first started. Working drawings have been completed and bids will be opened on June 7th. The building will contain six class rooms and an assembly hall seating 400 people. A central heating system will be installed. Interior will be finished in pine with some maple floors. Exterior of the structure will be faced with cement plaster. Plans can be secured from the architects.

HOTEL—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, California Real Estate and Building Co., 631 So. Spring St., L. A. Owner, Edwin W. Pascol. The building will be erected on Wall street near 9th, and will be arranged with stores on the first floor and rooms above. A number of baths will be located on each of the upper floors. Interior finish will be of pine throughout. Plans provide for elevator service, metal lath partitions and steam heat. A hot water system will also be installed. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

APARTMENT HOUSE—7 story and base, reinforced concrete, \$125,000. Long Beach, Los Angeles Co., Cal. Architect, Paul C. Pape, Union League Bldg., L. A. Owner, E. Tisnerat. Contractors, Dutro-Wren Construction Co., 10 American Ave., Long Beach, general construction. Contract price, \$125,000.

STORES AND LOFTS—9 story and base. Class A construction, \$275,000. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Metropolitan Fireproof Building Co. Contractors, F. O. Engstrom Co., 5th and Sinton Sts., L. A., general construction. Contract price, \$275,000.

neighborhood of sixteen rooms, five baths and a laundry. A garage will also be erected on the lot. Interior trim will be of pine and hardwoods. Hardwood floors will be used throughout. There will be steam heat and open fire places. Mantels will be of brick and tile. Tile will be used in all bath rooms. Exterior of the dwelling will be faced with veneered brick. Plans are now being figured.

RESIDENCE—2 story and base, frame, \$10,000. Seattle, Wash. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owner, A. Hambach. This dwelling will contain eight rooms, bath and sleeping porch. Interior finish will be of pine and hardwood veneer with hardwood and tile floors used in the principal rooms and bath rooms. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans will be ready for figures about July 1st.

BANK—1 story and base, reinforced concrete. Cost not stated. Kalama, Wash. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owners, Kalama Bank. The building will be designed in the classic style and will cover an area of 25x65 feet. There will be a large public space, private offices and work rooms. Interior partitions will be of hollow tile. Interior finish will be of pine and hardwood with ornamental plaster. Considerable ornamental iron will also be used. There will be a central heating system and coin and safe deposit vaults. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

HOTEL—10 story and base, reinforced concrete, \$200,000. Vancouver, B. C. Architect, Emil Guenther, Northwest Trust Bldg., Vancouver. Owner's name withheld. This building is to be erected on Hastings street and will be absolutely fireproof throughout. Upper floors will contain in the neighborhood of 300 guest rooms, nearly all of which will have connecting baths. There will be steam heat, elevator service, a vacuum cleaning system and all other modern conveniences. Interior trim will be of metal, hardwoods and marble. Entrance, lobby, offices and parlors will be elaborately finished. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for at once.

HOTEL—6 story and base, reinforced concrete, \$100,000. Vancouver, B. C. Architect, Emil Guenther, Northwest Trust Bldg., Vancouver. Owner's name withheld. The building has been de-

signed for a commercial hotel and will cover a large ground area. There will be a total of some 160 guest rooms. Besides the main lobby, offices and parlors. Plans include steam heat, elevator service, a vacuum cleaning system and hot water supply. Interior will be finished in pine and hardwood. The exterior of the building will be faced with tile and pressed brick. Plans are complete and figures will be called for shortly.

SCHOOL—2 story and base, brick, \$35,000. Camas, Wash. Architects, Fred A. Legg and George L. Kingsberry, Ainsworth Bldg., Portland. Owners, Camas School District. The building has been designed to contain twelve class rooms and an auditorium. The interior will be finished in pine with some maple floors. Plans provide for a central heating system and vacuum cleaning. The exterior of the building will be faced with cement plaster. Plans are complete and bids will be opened on June 2nd. Plans can be secured from the architects or from the Clerk of the Board of Education.

FOREIGN TRADE OPPORTUNITIES.

[Inquiries in which addresses are omitted are on file at Bureau of Foreign and Domestic Commerce. In applying for addresses refer to file number.]

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 10932. Sulphuric acid plant.—An American consul has forwarded specifications and blue prints for a sulphuric acid plant complete required at a sewage disposal plant of a municipality in his district. Tenders are not to be submitted until instruction giving the date have been issued by the local municipal engineer. Copy of the complete instructions and blue prints can be obtained from the Bureau of Foreign and Domestic Commerce.

No. 10939. Automobile chassis.—A number of foreign dealers in motor cars, anticipating an increase in the customs tariff, desire to form prompt connections with manufacturers who are prepared to supply the chassis only. They propose to build the bodies and assemble the parts locally. Manufacturers of motor-car chassis, as well as of accessories, are requested to supply an American consular officer with about 1 dozen catalogues each, which will be turned over to the proper persons. In each case the prices f. o. b. New York, together with trade and cash discounts

to dealers, and approximate weights and measurements, should accompany catalogues.

No. 10857. Fire engines and other apparatus.—A report from an American consular officer in the Far East states that a local municipal council has decided to purchase five fire engines and other apparatus, the expenditure to be about \$34,000. It is proposed to have the new engines of a type suitable for handling by utilizing horses and a number of trained firemen. Catalogues and letters in English should be addressed to an official named in the report.

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

Economy and efficiency are correlative terms. Efficiency means economy of labor and maximum results from a given expenditure of time and labor. So that the ordinary use of the word economy as to the matter of saving money is in reality only the net result in a business way of what the word means. As to what the word really means Ruskin tells in *The Art of Economy*:

"All economy, whether of state, households, or individuals, may be defined to be the art of managing labor. * * * Now, we have warped the word "economy" in our English language into a meaning which it has no business whatever to bear. In our use of it, it constantly signifies merely sparing or saving; economy of money means saving money—economy of time, sparing time, and so on. But that is a wholly barbarous use of the word—barbarous in a double sense, for it is not English and it is bad Greek; barbarous in a treble sense, for it is not English, it is bad Greek, and it is worse sense.

Economy no more means saving money than it means spending money. It means the administration of a house; its stewardship; spending or saving, that is, whether money or time, or anything else, to the best possible advantage."

The strike of the gas and electric workers is beginning to be noticeable in the failure to light the streets of San Francisco at night time. For one to be out at night in a city the size of this and see the main thoroughfares dark as a country village certainly emphasizes the fact that the public is being imposed upon. For those who must be out after 9 or 10 o'clock the dark streets are certainly not pleasant things to walk home in.

And the public is the one who must suffer. The people are the ones who must pay the piper, the expense of the struggle must be borne by the public as well as all the inconveniences of the contest. When the struggle is over the gas and electric company will have to recoup its losses. The public will have to pay. And in this contest the public has nothing to say. Certainly with all the other laws that have been passed there ought to be some law compelling the belligerent parties to arbitrate their differences and some means provided whereby the public would receive some protection. There is no stronger argument for municipal ownership of public utilities than this same warfare which saddles onto the public such inconvenience and expense.

PERSONAL EFFORT AND EFFICIENCY ENGINEERING.

It is the part of the scientific man to discover the truths of nature. But as there is nothing absolute, all his observations are necessarily more or less vitiated by errors. It is not enough for him to reduce these errors to a minimum. He must assure himself that he knows their nature, the order of their magnitude, and their influence upon the conclusions and operations which he bases upon his observations. All these points have received due attention, and a fairly complete "theory of errors" thus developed forms part of the stock-in-trade of every worker in the exact sciences.

But scientific observation and manipulation is merely a refinement of common every-day practice, and errors of observation and of operation play an important role in our daily pursuits also. How much a man's earning capacity and even life depends upon the perfect working of his senses and limbs is often not realized by him until age, illness or accident has impaired it. Not only is there such a qualitative relation between a man's physical and mental well-being and his earning power, but accident and life insurance companies, as well as courts in deciding actions for personal injury, find themselves confronted with the problem of establishing some quantitative estimate, however crude, of the value of a man's organs, their influence upon his earning capacity or "efficiency."

It would be a poor policy that should take note only of the value of lost faculties. To the efficiency engineer more than to any other person we owe it that our attention has been drawn to what might be termed "false motions," i. e., errors of operations, and their influence upon the efficiency of the industrial worker under normal conditions. And not merely qualitative, but quantitative studies, made with watch and camera, have furnished us a truly scientific groundwork on which to base improved manufacturing methods, to secure greatly increased efficiency. It is sometimes falsely supposed that the additional output thus harvested is the result of increased pressure placed upon the worker. If instances of this kind have occurred, they are contrary to the purpose which the originators of the movement for increased efficiency had in view: the output is to be increased, not by increasing the pressure of work, but by decreasing the resistance, by eliminating waste in lost motion and misplaced energy. Such increase in the output must result on the whole in a gain to the entire community; perhaps not always in a gain evenly distributed among all members of a community, but nevertheless, in a gain to all.—Scientific American.

HOW TO BUILD WELL.

A Timely Article On Construction From The English View-Point.

Scientific building construction is based on mechanical laws, which, to insure the stability of structures raised by them, should be well understood by architects, although there are some of the advanced Aesthetic school who deny that architectural form has anything to do with construction. An unprejudiced observer will, however, admit that the growth of Mediaeval architecture from the Norman to Pedpendicular was really progress in advanced methods of building discovered as the works were carried on. The fact, however, remains that, although in the golden age of building the architect was chief workman, at present his function is to decorate a structure the framework of which has been put together for him by a quantity surveyor, or possibly an expert in steel-frame construction. Decoration now consists in the selection and combination of pretty bits from the works of architects long since deceased. These bits were originally construction decorated; but in taking them from their surroundings they are no longer constructive elements in any sense of the word.

To take the simplest case, in the Parthenon and such buildings columns and entablatures were structural necessities—there would be no building without them; but now such columns and entablatures are copied and stuck up against walls because they look pretty, and as they have no structural function whatever to perform, they are useless and expensive excrescences which the building would be better without. Columns and entablatures were something to the ancient Greeks; but now they have ceased to be constructive elements, they should be eschewed, and home attempt made to create an architecture which shall be really an art, and not a fashion. It is positively grotesque to see men in this 20th century turning over the remains of Vitruvius, Palladio, and others with a view to the selection and combination of such portions of their works as they may consider aesthetic. These supreme efforts at manufacturing shams are successful for a time—the public is so woefully ignorant of all that pertains to architecture; but after a momentary success these swindles are consigned to everlasting contempt. To build well, it is therefore necessary that the architect should honestly acknowledge the structural requirements of the elements with which he has to deal, and endeavor to satisfy them, carefully eschewing columns, cornices, pediments, and all such second-hand properties gathered from the exuviae of buildings in other latitudes and of other times.

The first problem that confronts the man who would build is, Of what shall the walls be—stone or brick? This must be solved by considering what materials are found in that locality, and deciding whether they shall be used, or others of a more suitable, and perhaps cheaper, kind be imported. In older times houses were built with local materials, for there were no others

to be obtained at a reasonable rate. Hence, in a stone country stone was used, in a clay country brick, and in a wooded district oak; and these materials necessitated modes of construction and architectural forms peculiar to themselves; but now that steamers and railways have annihilated distance, we are privileged to see oolite cottages in sandstone countries, "rag" cottages on clay, and oak-framed structures where oak is not grown.

If stone is used some knowledge of its properties is necessary. It may be quarried in an igneous, or aqueous formation, the first being fire-formed, and the last sedimentary deposit in water. As this is not a geological treatise, it must suffice to refer briefly to the stones generally used in building. The fire-formed rocks are granite and basalt, sometimes called whinstone; and the water-formed sandstones and limestones.

What is a sure guide to the value of a building stone? An inspection of some building in which the stone has been exposed for centuries is the only infallible guide to its weathering properties, and all expert reports, diagnosis, analysis, and what not must be set aside for the knowledge gained in this way. This becomes obvious when it is known that the chemical analysis of chalk and carboniferous limestones are exactly alike. Yet chalk will burst to pieces if exposed to one winter's frost, while carboniferous limestone will show tool marks after the lapse of 600 and 700 years as fresh as the day they were worked. If a stone is impermeable by water, it is clear that it is a good weather stone; but if it adsorbs any, its durability cannot be inferred from its properties in this respect, as compared with other stones, which are more or less absorbent. The capacity of stones for absorbing water may be judged from the fact that one limestone will take up no water after twenty-four hours' immersion, when another, from a different formation, will absorb no less than eleven pints to the cubic foot, both stones being "bone dry" when tested in the first instance. The weathering properties of a stone are not, however, everything; its suitability for any building in the matter of sound construction and cost in working also press for consideration. Some quarries show a face as if built up with regular courses for a few inches to nearly a foot thick. These are ideal stones for building, as they can be quarried and laid in walls with a minimum of labor, and the bond secured with little trouble. Where the cost of working a stone is excessive, brick quoins and dressings are frequently used with rubble-wallings; but this never looks well, for brick is softer than stone, and the dressings should convey the idea of being of a harder material than the walling, the angles of which they are meant to protect. Cut stone quoins, and door and window jambs of the same material, with brick walling always look well. A cavity, or a coat of cement on the outside, will make the inside of a wall

proof against rain; but nothing will stop the deposit of moisture on the inside of a wall if it is faced with non-porous material. Hence, when a wall is of stone outside, it should be faced with absorbent brick inside, or an "unaccountable" dampness, or "sweating" of the wall will be the result. Dampness rising from the foundation is, of course, best dealt with by using natural asphalt; and if the building is a mansion, the whole space inside the walls should be covered with asphalt too, for cement concrete is not damp-proof. Should it be decided to build perfect bonding, and they must be "facings" and "backings"; both should be of the same thickness, to insure perfect bonding, and they must be well shaped, hard, and well burned. Bats, except as closers, should be avoided. The practice of grouting brick walls at every fourth course should be avoided, for it encourages careless bricklaying; it is evident that if the courses are well flushed with mortar, as they should be, there will be no room for grout.

Keeping the courses level, the faces plumb, and the angles properly aligned with the correct closers, are all prime necessities to good brickwork. Some bricks are so sandy that they will not keep out rain; others so clayey that they cannot stand frost. The first must be cemented, or weather-slatted, and there is no help for the latter but to cut them out and replace them with others. The goodness of a brick is tested by striking it sharply against another. If it gives a clear metallic ring, it is sound and well burned; if it does not it should be rejected. Bricks are generally dry when tested in this way; but if they are tested after being soaked for twelve hours in water, unsuspected weaknesses may be discovered in them, and this applies especially to moulded and ornamental bricks. An important question in the building of walls still remains to be settled—namely, the kind of lime that shall be used for making mortar. That the sand shall be sharp and clean goes without saying; but that, for brickwork, it shall pass through a 30 and be caught in a 40 sieve is not so well known. For stonework coarser sands may be used.

Sand may be pure silica, pure limestone, or mixtures of either with other substances. In a mill, continued grinding wears the angles of the grains down, so that the sharpness specified for by the architect is frequently ground away during the process of mortar making. The lime used may be pure or clayey. The former is made from chalk and the pure limestones; the latter from limestones containing up to 25 per cent of clay. The behavior of these limes when treated with water is very different. The pure lime swells up at once, gets intensely hot, and falls to a white powder rapidly; it also increases in bulk to nearly twice that of the unslacked lime. Its color is always pure white. A heap of pure lime-mortar may be left for months without change through its mass, a skin only of carbonate forming

on the outside. The next point to be considered is, Shall concrete be used on the foundations or not? If the bottom is stiff clay, gravel, or sand that will not shift, the wall whether of brick or stone, may be carried up directly from it, provided there is not within three feet of the surface—a depth necessary to place it below the reach of meteorological influences. It is usual to put footings to a wall, and the lowest course of these is generally vice the width of the wall at the ground level, the object of this being spread the weight of the superstructure over a larger area, and reduce the pressure on each square foot of the foundation by one-half. In some cases a good foundation can only be obtained by going down; in others, widening of comparatively shallow foundations will be a better plan. The builders in any locality are generally liable guides as to the safety of the ground on which it is intended to build. Building on made ground, or virgin soil and made ground, is dangerous. In this case the foundations should be entrusted to men of experience in such work, and all theoretical opinions carefully eschewed, for a slight lapse in this case may lead to ruin.

When there is a hard bottom to build on, concrete is not necessary, and need not be used unless it proves to be a cheaper material than brick or stonework to fill the trenches. Formerly it was common to build wood and timbers into walls; but if the walls are damp, these timbers will rot in a few years. Hoop-iron bond is also used, and in a damp wall it will soon rust, while in a dry wall it will be found round and bright even after fifty years. This bond ties the walls longitudinally; but if several rows are put on the same course they damage the wall in this way—if it falls over, it backs up into sections along the lines of the hoop-iron bond, but it is no part of the duty of a wall to fall over in this way, the bond, after all, does the wall no harm. Hoop-iron is specially valuable for tying cross partitions to a main wall. The "wastes" from a house consist of the discharge from water closets, bath, lavatory, housemaid's sinks, and scullery sinks, and the object of the builder should be to get rid of these wastes, or any gases arising from them as soon as possible. The proper way to fix earthenware drains, lead or other pipes, to effect this object has been treated so exhaustively by writers who understood the subject, as well as by those who did not, it is worn threadbare, and a reference to it is even a greater nuisance than the sewage itself. A amateur builders of all kinds, sanitary engineers with various qualifications, and some doctors with none, have done their best, and with success, to harrow the feelings of the public, create a scare, and make life miserable about the disposal of matter declared to be a "deadly poison" though a few minutes before it, and its "gases," were carried about in the human body for hours, if not days, without ill-effects. Clearing this subject of cant and humbug, it is obvious that as no one ever comes in contact with the solids or liquids of sewage, the only way they can effect mischief is through the lungs, and as women spend hours, and sometimes days in sewers without experiencing any ill-effects, breathing sewer-gases

cannot, after all, be so dangerous to health as many are led to believe. Men have been suffocated in sewers through want of oxygen; but when there was enough of it to maintain a candle lighting, the sewer-gas so diluted might be breathed with impunity.

A private house is not a public sewer, and it would be impossible to conceive of a water closet or bathroom with an atmosphere so completely exhausted of its oxygen as to be dangerous. Unpleasant smells are not necessarily poisonous. There is no mystery about them, or about the gases which give rise to them; they are all well known to chemists, and they may be breathed with impunity when diluted with oxygen. There are two very important points in house drainage which are usually overlooked in hunting after gases—namely, the necessity for a periodical cleaning of the insides of soil and waste pipes, the scraping of fireclay drains, and their automatic flushing at least once every twelve hours. If soil pipes, waste pipes, and drains are kept clean inside, and they are efficiently disconnected from any main sewer, it is obvious that, with traps or without them, no sewage gases can ever get into the house.

BUILDING MORE FIREPROOF HOMES.

By P. D. Van Vliet in Keith's Magazine.

Is it not true that the fireproof house receives greater consideration on the part of architects and owners? It so happens that a fireproof house is also one practically free from deterioration. There are no rotting timbers, and coal bills are generally lower than with cheap, inflammable construction.

But it is generally thought that fireproofing entails great expense, that any of the accepted safe materials are beyond the purse of the average home builder. That this is not the case is being proven by numberless examples of fireproof construction now under way, after designs of architects who understand how to keep costs down.

At the Chicago cement show held last January, one of the most interesting exhibits was that showing a typical suburban home in full size and built entirely of fireproof materials. It was a true concrete house, concrete hollow tile having been used for wall and floor material, and a stucco coat having been applied for the finished surface.

It is commonly believed that a coating of stucco on a good frame renders a house fireproof. This is not the case. The thin protecting shell is no protection from fire within and its life is limited. But true fireproof construction with approved materials gives perfect security. Stucco on such a foundation is ideal.

As a matter of fact the house at the cement show was necessarily built only in part. The depth of the booth being 14 feet, the porch, porch roof and the front wall of the house, including a bay with casement windows off the living room, a casement window off the hall and the entrance were all that could be actually constructed. The balance was theatrical scene painters and gave in perspective, not only the house, but a typical suburban setting.

The roof of the house is an important

feature that is seldom given sufficient consideration. Where houses are built close together the danger of fire being communicated from house to house is great where wood shingles are used. There is perhaps nothing cheaper nor better than the wood shingle, if we disregard entirely the danger from fire, and yet this danger is so real today with our crowded city conditions that the makers of fireproof shingles, of cement-asbestos or tiles of clay or cement, are finding a ready market.

In order to carry out in every detail the purpose of the house a fireproof roof of asbestos shingles was used, and while its cost was found to be practically double that of wood shingles, yet this additional cost must be reckoned as a pure investment, there being no depreciation and the greater safety bringing a real reduction in the annual fire insurance costs.

The home owner should look well to the materials specified by his architect and used by his contractor when building his house. He should be sure that the walls are well insulated and preferably that they have a double air space, for this means a considerable saving in coal and a more comfortable house through a hot summer.

DEVELOPMENT IN CEMENT MANUFACTURE—WHITE CEMENT.

By E. B. Scott.

It is difficult to realize how large a place cement occupies today in all our ideas of construction and how rapid this development has been. So accustomed have we become to concrete construction that we no longer look for it to represent something else, but accept it for itself. Everyone now realizes how horrible are the cement blocks shaped in imitation of ashlar-cut stone or concrete walls marked off into rectangles to represent granite block construction.

While concrete has thus made its own place among materials of construction, and no longer needs to be used as an imitation of something else in one regard it leaves something to be desired from an artistic standpoint, and that is the matter of color.

The natural color of concrete in spite of the fact that we have become accustomed to it, is not pleasing. Its tone is decidedly cold and harsh. In various ways architects have sought to get around this difficulty and a variety of paints and washes have been resorted to. It is not easy, however, to secure any degree of durability in this way, so the attention of chemists and cement manufacturers has been turned more and more to the problem of making a cement free from this defect, or as far as possible clear white.

As a matter of analysis all the elements that compose a standard Portland cement can be obtained in a perfectly white state and there is no reason why a Portland gray cement should not be made from them. In practice this move has been somewhat difficult and costly owing to the care required in the selection and treatment of the component materials, which had to be assembled from widely separated regions. Several foreign and eastern companies succeeded in solving the problem, however, and when their products were put on the market they were

welcomed, for they made possible splendid decorative work in concrete which before had not been attempted.

The cost of making white cement was of course considerably higher than that of ordinary gray cement, but its advantages were so manifest for a number of uses that it soon had a large market throughout the Eastern States. Among its important applications were the facing of concrete buildings, mortar of laying face bricks and tile, interior decoration, bathrooms terrazzo work and so forth, as well as for pergolas, statuary, and ornamental work generally.

The use of white cement on the Pacific Coast has been very limited. The Eastern price was reasonable enough, but when over \$2.00 per barrel was added for freight charges, white cement became too much of a luxury for everyday use. Meanwhile, however, a careful reconnaissance was made throughout California in search of materials out of which to make white cement, and this painstaking search was crowned with success. So now it appears that we have right here on the Coast the necessary ingredients to make a cement that stands all the tests of a standard Portland cement and is as white and stainless as any the Eastern brands. This result has been brought about by the Santa Cruz Portland Cement Co. at their Davenport mill, and great credit is due them for their enterprise in accomplishing it, as it will have an important bearing on the Pacific Coast architecture.—The Architect and Builder.

INCREASE IN SAND-LIME BRICK.

Manufacture of Nearly 175,000,000 Bricks Reported by United States Geological Survey.

Nineteen twelve was a good year for the sand-lime brick industry.

The value of the output of sand-lime brick in the United States last year, according to figures compiled by the United States Geological Survey, was \$1,170,884, compared with \$897,664 in 1911, an increase of \$273,220. The 1912 production was slightly greater than

that of 1910, which was valued at \$1,169,163, and only 4.48 per cent less than that of 1907, the banner year in the industry.

The total number of this comparatively new kind of brick manufactured in 1912 was 174,361,000, of which 164,140,000 were common brick and 10,221,000 front brick. Michigan continued in 1912 to be the leading State in value of output, its product constituting 24.54 per cent of the total value of all sand-lime products in 1912. New York was second in value of product, as in 1911, reporting 16.99 per cent of the total. Florida was third, displacing Minnesota, which fell to fourth place. Eight States—California, Florida, Idaho, Indiana, Michigan, Minnesota, New York and Wisconsin—showed an increase in 1912, and three—New Jersey, Pennsylvania and South Dakota—showed a decrease. Michigan showed the largest increase, \$77,392; Florida the second and New York the third. In 1911 only two States—New York and Wisconsin showed an increase.

The average price per thousand for common sand-lime brick was \$6.45 in 1912, compared with \$6.09 in 1911 and \$6.36 in 1910; for front brick it was \$10.41 in 1912, against \$9.53 in 1911 and \$10.90 in 1910.

Outlook for Industry Considered Bright.

The sand-lime brick industry has been established in the United States only a little over 10 years and during that time has passed through many vicissitudes. Many plants have been erected where market conditions were not propitious and others where suitable materials were not available; others, although conditions and materials were satisfactory, failed for want of technical skill or because of poor management. During 1912 some of the abandoned plants were taken over by skilled men, were remodeled in accordance with the latest developments, and are now being operated successfully. The prospects for 1913 are considered bright, the future of the industry seems established, and a steady growth may be expected.

A copy of the Survey's report on Sand-lime Brick may be obtained free on application to the Director of the Geological Survey at Washington, D. C.

ing has been mentioned in these columns before when plans were first started. Working drawings have been completed and placed in the hands of the owner who has started excavating under the Day Labor system. The building has been arranged for six suites of four rooms and bath each. All apartments will have connecting baths and will be equipped with wall beds. Interiors will be finished in pine. The exterior of the building will be covered with cement plaster on metal lath and klinker brick veneer.

SAN FRANCISCO—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, M. S. Show. Preliminary sketches have been prepared for this building, which is to be erected on property recently purchased by Mr. Show on Bush street west of Hyde. The lot has a frontage of 68 feet 9 inches and a depth of 137½ feet. Plans provide for a total of about 100 guest rooms arranged in two and three room suites. All suites will have private bath rooms and wall beds. Interior finish will be of pine, elm panels and hardwood or tile floors. Bath rooms will have cement floors and tile wainscot. There will be steam heat, elevator service and a vacuum cleaning system. Hot and cold water plant will be installed. Exterior of the building will be faced with pressed brick. It will be completed at once.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owners, Rege Bros. The building will be erected on Filbert street 179 feet east of Gough and has been arranged to contain six apartments of four rooms and bath each. Interiors will be finished with some hardwood floors and elm panels. There will be open fire place and tile mantel in each suite. Bath rooms will be finished in cement plaster. Some wall beds will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and a contract will be let within a few days.

OAKLAND, CAL.—Apartment house, 2 story and base, frame, \$18,000. Architect, J. Henry Boehrer, Delger Bldg., Oakland. Owner, Mrs. Remillard. The building will be erected on 22nd street between Grove and Telegraph and has been arranged to contain 18 suites of two rooms and bath each. Interior finish will be of pine, elm panels and hardwood floors. All suites will be equipped with wall beds. Bath rooms will have tile wainscot. Plans provide for steam heat and a hot water supply. The exterior of the building will be faced with veneer pressed brick. Sub-bids are now being taken by Alfred Legault who can be found at this site.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 4 story and base frame. Cost not stated. Architect John Galen Howard, 602 Mission St., S. F. Owner's name withheld. This building will be erected at the corner of Euclid and Hearst avenues, and when completed will be one of the most modern and up-to-date apartment houses in Berkeley. Interior has been arranged for suites ranging from two to eight rooms and baths. Hardwood and pine will be used in interior finish with hardwood floors in the principal rooms. There will be steam heat, elevator service and a vacuum cleaning system. Wall beds are specified. Bath

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$23,000. Architect, none. Owners, Kern-McKillop Bros, 331 Pine St., S. F. The building is to be erected on the property on Taylor street adjoining another similar structure now under construction and owned by the same parties. This building will have a frontage of 30 feet and a depth of 165 feet. Plans provide for 15 suites of two and three rooms each with private baths. All suites will have wall beds. There will be steam heat, vacuum cleaning system and an automatic elevator. Interior finish will be of pine with hardwood floors and some elm panels. Bath rooms will be finished in cement plaster. Exterior of the building will be faced with red brick veneer. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$12,000. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, Herman Hogrefe, 1960 Hyde St., S. F. The building will be erected on Taylor street north of Sutter, and has been designed to contain seven apartment flats. Interior finish will be of pine with elm panels and hardwood floors. A central heating system will be installed. Bath rooms will have cement floors and tile wainscot. All suites will have private bath rooms and will be equipped with wall beds. Exterior of the structure will be covered with white cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,500. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner, John Fletcher. The build-

rooms will be finished in tile and cement plaster. The exterior of the building will be covered with cement plaster. Plans are being prepared.

OAKLAND, CAL.—Apartment house alterations, 2 story and base, frame, \$4,000. Architect, C. H. Miller, Foxcroft Bldg., S. F. Owner, P. N. Tritt. The work will consist of remodeling the present two-story frame residence into two and three room apartments with private baths. There will be new interior trim, new electric work, plumbing, painting and plastering. Exterior of the building will also be somewhat altered and will be covered with rustic and shiplap. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architects, Kay & Skidmore, Broadway Central Bldg., L. A. Owner's name withheld. The building will cover an area of 50x137 feet, and has been arranged for 30 suites of two rooms and bath each. All apartments will be equipped with wall beds. Interior finish will be of pine with elm panels. Some hardwood floors will be used. There will be steam heat and an automatic elevator. Exterior of the building will be faced with pressed brick. Bath rooms will have cement floors and tile wainscot. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick and steel. Cost not stated. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, Dr. E. C. Manning. The building will be erected on an inside lot with a street frontage of 50 feet and a depth of 145 feet. There will be a total of 75 rooms arranged in two and three room suites with private baths. All suites will have wall beds. Interior finish will be of pine and hardwood. Bath rooms will be finished in cement plaster. There will be steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick trimmed with artificial stone. Plans are now being prepared for this work.

BANKS.

BURBANK, LOS ANGELES CO., CAL. Bank, 1 story and base, brick. Cost not stated. Architects, Krempel & Birkes, Henne Bldg., L. A. Owners, Farmers' and Merchants' National Bank of Burbank. The building will cover an area of 26x60 feet and will be occupied by the bank only. The plans include safe deposit and coin vaults which will be let in a separate contract. Construction will be fireproof. Interior will be arranged for large public space, working space and directors' rooms. There will be hardwood and marble trim and ornamental plaster. The exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

BRIDGES, DAMS AND HARBOR WORK.

SEATTLE, WASH.—Harbor work. Cost not stated. Engineers, Port of Seattle Commission, Central Bldg., Seattle. Owners, City of Seattle. The Seattle Port Commission, Central Bldg., at its regular meeting awarded contracts as follows for Port development

work, all previously described in these columns:

Harrington, Peters Co., Oriental Bldg., on their bid of \$97,200, were awarded the contract for the construction of warehouses, etc., at the East Waterway improvement, and on their bid of \$18,507.25 for net warehouse, etc., at Salmon Bay.

Hans Pederson, Madison Bldg., on his bid of \$242,944 was awarded the contract for the substructures on the Smith's Cove improvement.

The Puget Sound Bridge & Dredging Co., Central Bldg., on its bid of \$252,308.50 was awarded the contract for excavation and dredging the Smith's Cove improvement.

The Seattle Frog & Switch Co., Lowman Bldg., on its bids of \$22,168.10 and \$6,792.40 was awarded the contracts for rails and appurtenances on the Smith's Cove and Central Waterfront improvements respectively.

Total of above, \$639,920.25.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Warehouse and factory, 3 story and base, brick and steel, \$50,000. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owners, Workman Packing Co. This building will be erected on Harrison street between 4th and 5th streets, and will cover an area of 50x100 feet. The first floor is to be arranged for the offices of the company and shipping department. Upper floors will contain the storerooms and factory of the meat packers. Third floor is to be wainscoted with tile. A complete refrigerating plant will be installed. Construction will be of the mill type. Metal window frames and sash are specified. There will be a large freight elevator. Exterior of the building will be faced with pressed brick. Plans are being prepared and figures will shortly be called.

SAN FERNANDO, LOS ANGELES CO., CAL.—Ice plant, 2 story and base, reinforced concrete. Cost not stated. Architect, none. Owners, Pacific Fruit Express Co., Pacific Electric Bldg., L. A. The plant proper will cover an area of 62x140 feet with a storage wing, one story high 45x100 feet. Construction will be fireproof throughout. Floors and roof will be of reinforced concrete. A large amount of special machinery will be installed, which is to be let under a separate contract. The plans call for fireproof doors and metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken by the owners.

Contracts Awarded.

VANCOUVER, B. C.—Factory, 6 story and base, reinforced concrete. Cost not stated. Architect, H. S. Griffith, Dominion Trust Bldg., Vancouver. Owners, National Drug and Chemical Co. Contractors George Snider & Brethour, 207 Hastings, West Vancouver. Contract price not stated.

FLATS.

SAN FRANCISCO—Flats, 3 story and base, frame, \$4,000. Architect, none. Owner, H. Sholten, 1522 Santa Clara Ave., Alameda. The building has been arranged for three small flats and will be erected on 14th street south of Polson. Interior finish will be of pine throughout. There will be gas grates

and tile mantels. Each flat will have a bath with tile wainscoting. Thirty-gallon boilers will be installed. Exterior of the building will be covered with rustic. Plans are complete and in the hands of the owner who is now purchasing all materials. Work will be done by Day Labor.

SAN FRANCISCO—Flats, 2, 2 story and base, frame, \$5,000 each. Architect none. Owner, C. A. Kushton, 714 9th Ave., S. F. These buildings will be erected on 9th avenue south of C street. Each will have a frontage of 25 feet and a depth of 60 feet. Interiors will be arranged for two modern five and six room flats with bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile will also be used in the bath rooms and kitchens. Exterior of the buildings will be covered with brick veneer and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

SAN FRANCISCO—Flats, 2 story and base, frame, \$6,500. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, N. J. Baglietto. The building will be erected on Greenwich street west of Larkin, and has been designed to contain two residential flats, one of five rooms and the other of six rooms. Interior will be finished in pine with hardwood floors in the principal rooms. There will be large open fire places with brick mantels. Bath rooms will have tile wainscot and tile will also be used in the kitchen. Exterior of the building will be covered with cement plaster on metal lath. A contract is to be awarded within a few days.

GARAGES.

OAKLAND, CAL.—Garage, 1 story, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, W. L. Locke. The garage will be erected on Wadsworth and Bayou Vista streets. The plans provide for an automatic turntable. A cement floor will be used. Interior finish will be of pine. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architect, A. W. Angel, 3555 Princeton St., L. A. Owner, E. T. Riley. The building has been designed for a commercial garage and will contain office in the front portion of the building, repair and storage space in the rear. There will be a cement floor, metal window sash and frames and special storage tanks. Interior finish will be of pine. The exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

GOVERNMENT WORK AND SUPPLIES.

Prospective Bidders.

The following firms have received plans and specifications from the Supervising Architect's office for work to be performed at Honolulu. Bids will be opened on June 20th:

King Lumber Co., Charlottesville, Va.
Wm. H. Maxwell, Auburn, Ind.

P. J. Carlin Construction Co., 1 Madison avenue, New York city.
J. E. and A. L. Pennock, Land Title Building, Philadelphia, Pa.
Grant Fee, San Francisco, Cal.

Tullalip Indian School.

All bids received on April 7 for constructing an addition to the frame house and the extension of water system at the Tullalip Indian School, Wash., have been rejected and supplemental bids will be asked from the original bidders.

Canal Requisitions.

Requisitions have been received at the office of the 15thman Canal Commission calling for the furnishing of the following supplies and material:

300,000 ft. B. M. 2x12 in 16 to 24 ft S. I. E. long leaf yellow pine or Douglas fir.

40,000 cross ties, No. 1, to be of cypress, redwood, Douglas fir, or long leaf yellow pine.

\$2,000 sq ft paving brick or paving blocks.

3,400 lin ft special brick or block.

Pearl Harbor, Coal Towers.

The contract for constructing coal towers at the U. S. naval station, Pearl Harbor, H. T., bids for which were opened on May 3, has been awarded to C. W. Hunt Co., New York city, at \$70,500.

Metal Weather Strips.

Bids for metal weather strips were opened by the quartermaster at Fort D. A. Russell, Wyo., as follows:

A. De Armon, Cheyenne, Wyo., "Chamberlain," corrugated, \$1,987.50; do, plain, \$1,820; "Columbia," \$1,456.32.

John B. Harker, Minneapolis, Minn., "National," single, \$2,134.55; do, double, \$2,332.65.

McKee Green Mfg. Co., St. Louis, Mo., \$1,850.

Denver Metal Weather Strip Co., Denver, Colo., \$1,092.13.

J. F. Bills, Laramie, Wyo., plain, \$1,756.31; cloth lined, \$2,334.72.

Marine Barracks, Mare Island, Cal.

The following bids were received by the assistant quartermaster, U. S. Marine Corps headquarters, Washington, D. C., for furnishing 5 steel cells, 1 door and 4 window grills at the marine barracks, navy yard, Mare Island, Cal.:
Pauly Jail Building Co., St. Louis, Mo., \$2,070.

Champion Iron Co., Kenton, Ohio, \$1,750; 100 days.

Mesker Bros. Iron Co., St. Louis, Mo., \$1,898; 60 days.

Stewart Iron Co., Cincinnati, Ohio, \$1,758; 120 days.

Van Dorn Iron Works, Cleveland, Ohio, \$1,356; 90 days.

Fence, Fort Baker, Cal.

Bids for 8,000 feet woven wire fence were received by R. W. Finger, Lieut. C. A. C., Q. M., Fort Baker, Cal., as follows:

Max Gels Construction Co., 163 Sutter street, San Francisco, Cal., regular, \$1,550; alternate A, \$1,475; B, \$1,675.

The Standard Fence Co., 310 12th street, Oakland, Cal., regular, 24c foot; A, 22c; B, 26c; C, 24c.

Francis Skoze, 110 Jessie street, San Francisco, Cal., regular, \$1,915; A, \$1,875; B, \$2,115; C, \$2,045.

Pacific Fence Construction Co., 423

Market street, San Francisco, Cal., regular, \$1,898; A, \$1,654; B, \$2,127; C, \$1,882.

J. Pringle, 338 Pine street, San Francisco, Cal., regular, \$1,950; A, \$1,680; B, \$2,290; C, \$1,860.

James Stanley, Sansalito, Cal., regular, \$3.30 rod; A, \$3.02; B, \$3.12; C, \$3.07.
Ed. Stahl, Sausalito, Cal., regular, \$1,885; A, \$1,720.

HALLS AND SOCIETY BUILDINGS.

RIVERSIDE, RIVERSIDE CO., CAL.

Lodge hall, 3 story and base, reinforced concrete, \$80,000. Architect, George D. Barnett, Wright and Callender Bldg., L. A. Owners, Riverside Elks' Hall Association. This building will be erected at the corner of Market and Whittier streets and will cover a large area. The first floor will be arranged for the lobby, parlors, offices and a library. An auditorium seating 500 people will occupy the second floor and third floor will be arranged for apartments. Interior finish will be of pine, hardwoods and marble and tile. There will be elevator service, steam heat and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

BREMERTON, WASH.—Lodge hall, 3 story and base, reinforced concrete, \$25,000. Architect's name not given. Owners, Bremerton Eagles' Hall Association. This work has been mentioned here before when the architect was first commissioned to prepare the plans. Working drawings have been turned over to Edward S. Walker, chairman of the Building Committee, and he is now taking figures for the construction. The building will be arranged for stores on the first floor and lodge rooms, offices and sleeping apartments on the second and third floors. Plans provide for steam heat, elevator service and a vacuum cleaning system. Interior will be finished in pine and hardwoods. Marble and tile will be used extensively. There will be patent store fronts. Exterior of the building will be faced with cement plaster. Plans can be secured from the chairman of the Building Committee. Bids will be opened about the middle of June.

HOSPITALS.

PRESIDIO OF SAN FRANCISCO—Power plant equipment. Cost not stated. Architects, Constructing Quartermaster Dept., Fort Mason. Owners, United States Government. Plans for the furnishing and installation of additional power plant equipment at the Letterman General Hospital at the Presidio have been completed. Bids are now being taken for this work and will be opened on June 12th. Plans can be secured from the Constructing Quartermaster's office at Fort Mason. The official proposal appears in another column of this issue.

Contracts Awarded.

OXNARD, VENTURA CO., CAL.—Hospital, 2 story and base, brick and steel, \$35,000. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Sisters of Mercy. Contractor, Thomas Carroll, Oxnard. Contr. price, \$35,000.

HOTELS.

SAN FRANCISCO—Hotel, 12 stor and base. Class A construction, \$110,000. Architect, Charles J. Rousseau Phelan Bldg., S. F. Owner's name withheld. This building will be erected on Geary street near Jones. The lot has a large street frontage and considerable depth. Plans will provide for total of 132 guest rooms and 77 bath. Interior will be finished in pine and hardwoods with ornamental plaster in the lobby and office. There will be a complete steel frame and exterior walls faced with glazed terra cotta and pressed brick. Steam heat, elevator service and a vacuum cleaning system will complete the mechanical equipment. All window frames and sash will be of metal. Plans are being prepared and construction will be started as soon as arrangements pending with the tenant can be settled.

SAN FRANCISCO—Hotel, 3 stor and base, frame, \$22,000. Architect, August Nordin, Mills Bldg., S. F. Owner, B. Josephine O'Neil. The building is to be erected on Harrison street near Third. The first floor will be arranged for stores and upper floors for a number of modern hotel rooms. There will be a hot water system. Interior finish will be of pine throughout. Exterior of the building will be covered with rustic and cement plaster of etal lath. Bids have been taken of the work and are now under advisement in the office of the architect. Contract will be let in a few days.

LOS ANGELES, CAL.—Hotel, 5 stor and base. Class A construction. Cost not stated. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner, F. Rabin. The building will be erected on Coronado street and will cover a area of 75x120 feet. Plans provide for a total of 150 guest rooms and 70 bath. Interior will be finished in pine and hardwoods with ornamental plaster, marble and tile used in the lobby. Bath rooms will have cement floors and tile wainscot. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Metal window frames and sash are specified. Exterior of the building will be faced with glazed brick and terra cotta. Interior partitions will be of hollow tile. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 5 stor and base. Class A construction. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Monarch Investment Co. The building will occupy a corner site covering an area of 272x195 feet, and will be built around a court 140x150 feet. There will be a total of 200 guest rooms and 150 bath. Construction will be fireproof throughout, with hollow tile partitions and concrete floors. Interior will be finished in pine and hardwood. Bath will have cement floors and tile wainscot. Plans provide for both freight and passenger elevators, steam heat, vacuum cleaning and a hot water plant. Metal window sash and frame are to be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

LOS ANGELES, CAL.—Hotel, 3 stor and base, brick. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Mrs. Mathilde McLaughlin. This building will be erected at the corner of Union and Pico streets and

will cover an area of 100x125 feet. Preliminary plans for a building containing stores on the first floor and modern hotel rooms above have been prepared. The proposed building will have about 125 guest rooms and three stores. A lease is now pending between the owner and a lessee. Interior finish will be of pine throughout. Plans provide for steam heat and elevator service. Exterior will be faced with pressed brick. If a lease is signed construction will be started at once.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$45,000. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. F. W. Sabichl. Contractors, Almeter, Hall & Almeter, Ferguson Bldg., L. A. Contract price, \$45,000.

LOS ANGELES CAL.—Hotel and theatre, 3 story and base, brick, \$70,000. Architect, John P. Blee, Union League Bldg., L. A. Owners, Emil Olcovich, Carl Stern, Ben Meyer and associates. Contractors, Barker-Bradley Construction Co., 1824 East 15th St., L. A. Contract price, \$70,000.

LIBRARIES.

Contracts Awarded.

LOS ANGELES, CAL.—Library, 1 story and base. Class A construction, \$30,000. Architects, Train & Williams associated with F. M. Ashley, Exchange Bldg., L. A. Owners, City of Los Angeles. Contractor, C. Karseboom, 1445 Dana St., L. A. Contract price, \$29,417.

PANAMA -- PACIFIC EXPOSITION WORK.

SAN FRANCISCO — Structural steel work on auditorium. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids for furnishing, fabricating and erecting the structural steel and cast iron work of the Exposition Auditorium were received Thursday morning by the Committee on Buildings and Grounds. The Exposition Company set aside a million dollars for the structure, and it is to be located on the lot formerly occupied by the old Mechanics' Pavilion and for which the City and County of San Francisco paid \$701,437. The Bids received were as follows: J. G. Williams Construction Co., on proposal C, receiving f. o. b. San Francisco, unloading, storing, hauling and erecting the steel and cast iron, \$53,500. Smith-Rice Co., proposal C, for receiving, unloading, storing and erecting, etc., \$59,500. United States Steel Products Co., proposal A for furnishing, fabricating and delivering f. o. b. San Francisco, \$217,238; for furnishing, fabricating and delivering Eastern terminal, \$164,835. California Construction Co., proposal A for furnishing, erecting, riveting all steel and cast iron, \$314,069; proposal B, for furnishing, fabricating and delivering, San Francisco, \$257,940; for furnishing, fabricating and delivering Eastern terminal, \$204,940; proposal C, for receiving, f. o. b. San Francisco, unloading, storing, hauling and erecting the steel and cast iron, \$59,120. Blume Construction Co., for receiving f. o. b. San Francisco, unloading, storing, hauling and erecting, \$39,000.

SAN FRANCISCO — Building, frame construction. Cost not stated. Architect, Director of Works,

Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. The Buildings and Grounds Committee of the Panama-Pacific International Exposition Co. opened bids on Tuesday, May 27th, for the construction of the Transportation Building and for the plumbing on the same. Bids on the general construction were taken as follows: (a) Exposition Co. to furnish lumber and (b) contractor to furnish lumber. Lange & Bergstrom were low on both propositions. John G. Sutton Co. was low on the plumbing at \$19,300 with two competitors—The Turner Co., \$19,490, and Wittman-Lyman Co., \$19,441—very close. Contracts have not been awarded. A complete list of these figures will be found under the heading of San Francisco in this issue.

SAN FRANCISCO—Varied Industries Building, frame construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on June 4th by the Buildings and Grounds Committee of the Exposition Co. for the general construction of the above mentioned building and also for the plumbing and installation of sewer and water pipes in the same. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

SAN FRANCISCO — Outfall sewer. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on June 4th for the construction of an outfall sewer in the Presidio section of the Exposition grounds. Plans can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Metay lockers for car barns. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened on June 4th by the Board of Public Works for furnishing and installing metal lockers in the Municipal Car Barns, Geary street. Plans can be secured from the Department of Architecture.

PORTERVILLE, TULARE CO., CAL.—Railroad station, 1 story and base brick and steel, \$20,000. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Plans for a new passenger station have been forwarded to H. V. Platt at Porterville, and he is now taking figures for the work. The building will contain two waiting rooms, station offices and baggage and express rooms. Interior finish will be of pine with some hardwood. A central heating system will be installed. Exterior of the station will be faced with pressed brick. A clay tile roof will be used. Plans can be obtained from H. V. Platt at Porterville.

RESIDENCES.

SAN FRANCISCO—Residence alterations, frame construction, \$2,000. Architect, Norman R. Coulter, 46 Kearny St., S. F. Owner, L. Gilpin. Plans for this work provide for the raising of the present two-story dwelling and

constructing a large entry hall and additional rooms on the street level. New plastering, plumbing, painting and electric work will also be installed. Interior finish will be of pine and hardwood. Exterior of the building will be covered with cement plaster on etal lath. Plans are complete and work has been started by Day Labor.

SAN FRANCISCO—Residence, 2, 2 story and base, frame, \$3,000 each. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, E. Ginley, 131 5th Ave., S. F. These houses will be erected on 9th avenue north of Clement street. Each will contain seven rooms and bath. Interiors will be finished in pine and hardwood with hardwood floors in the dining rooms, living rooms and reception halls. There will be open fire places with brick mantels. Tile wainscoting will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story attic and base, frame, \$12,000. Architects, Havens & Toepke, 46 Kearny St., S. F. Owners, S. A. Born Building Co., 660 Market St., S. F. The dwelling will be erected in the West Clay Park Tract, and is to be similar in design to several other very attractive homes recently erected in that tract by the same firm. Interior finish will be largely of hardwoods with hardwood floors used in all principal rooms. There will be twelve rooms, three baths and a sleeping porch. Plans provide for a central heating system, probably hot water, open fire places and an automatic water heater. Bath rooms will have tile floors and wainscot. Mantels will be of brick and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. Mr. Born is now purchasing all materials.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, J. A. Gilmour, 4214 Howe St., Oakland. The dwelling has been designed to contain six rooms and bath. Interior will be finished in pine with hardwood floors in the living room, dining room and reception hall. There will be a large open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, V. S. Kid. The dwelling will be erected in the Claremont Tract and has been designed for an eight room house with baths and sleeping porches. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will also be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,500. Architect, Julia Morgan, Mer-

chants' Exchange Bldg., S. F. Owner, Miss Nellie Connors. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,000. Architect, C. H. Miller, Foxcroft Bldg., S. F. Owner, R. T. Southerland. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the dining room, living room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,500. Architect, Claude B. Barton, Security Bldg., Oakland. Owner, Claude B. Barton. The dwelling, which has been designed for an eight-room house, will be erected at Adams Point. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath room will have tile wainscot. Tile will also be used in the kitchen. An automatic water heater will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and subfigures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,500. Architects, Milvain Bros., Delger Bldg., Oakland. Owner, A. H. Dana. The house has been designed to contain eight rooms, bath and sleeping porch and will be erected in Rockridge Park. Interior will be finished in pine, white enamel and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile or brick mantels. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are being prepared for the work.

OAKLAND, CAL.—Residence, 2 story, attic and basement, frame, \$30,000. Architects, Milvain Bros., Delger Bldg., Oakland. Owner, Mrs. A. J. Larkey. The house will be erected in Crocker Highlands and will contain a large number of rooms, several baths and sleeping porch. A garage will be erected on the rear of the lot. Interior of the dwelling will be finished in pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. The exterior of the residence will be covered with cement plaster on metal lath. Plans for this work are being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owners, George Friend Co. The dwelling will be erected in the Thousand Oaks Tract, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine throughout with hardwood floors in the dining room, living room and reception hall. There will be open fire places and tile or brick mantels. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared and when complete work will be done by Day Labor.

WOODSIDE, SAN MATEO CO., CAL.—Residence, 2 story and base, frame, \$45,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, J. J. Graves. Mr. Graves owns a large ranch in the Moore Tract near Woodside and will build a house containing twenty rooms, six baths and sleeping porches. A two-story garage with completely equipped machine shop and storage space for ten machines will also be erected on the site. Interior trim for the residence will be of pine and hardwoods. Hardwood floors will be used in all of the principal rooms. Bath rooms will be finished in tile. A central heating system, probably hot water, will be installed. The exterior of the buildings will be covered with cement plaster on metal lath. Roofs will be of red clay tile. Plans provide for extensive landscape gardening, a large concrete swimming tank and sunken gardens. Excavating has been started and subcontracts for the balance of the work will be let shortly.

SAN JOSE, SANTA CLARA CO., CAL.—Residence, 2 story and base, frame, \$3,500. Architect, F. D. Wolfe, First National Bank Bldg., San Jose. Owner, J. Murphy. The dwelling has been designed for a seven-room house with bath. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the living and dining rooms and reception hall. There will be a large open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

PASADENA, LOS ANGELES CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architects, Parkinson & Bergstrom, Security Bank Bldg., L. A. Owner, H. O. Ayer. The dwelling will contain sixteen rooms, several baths and sleeping porches. Interior finish will be of pine and hardwoods with hardwood floors used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath and shakes. Plans have been revised and new figures are now being taken.

LOS ANGELES, CAL.—Residence, 2 story and base, frame. Cost not stated. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owner, Milton E. Getz. The dwelling will occupy a corner site and has been designed for an eighteen room house with all modern conveniences. There will be furnace heat and open fire places. Interior will be fin-

ished in pine, hardwood and white enamel. Hardwood floors will be used in all principal rooms. Mantels will be of brick and tile. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Contracts Awarded.

PORTLAND, ORE.—Residence, 2 story and base, frame, \$10,000. Architect, none. Owner, M. A. Ashley. Contractors, H. E. Wood & Co, 860 Williams Ave., Portland. Contract price, \$10,000.

PASADENA, LOS ANGELES CO., CAL.—Residence, 2 story and base, frame, \$40,000. Architect, Foss Designing and Building Co., 100 East Colorado St., Pasadena. Owner, W. C. Leistkow. Contractors, Foss Designing and Building Co., 100 East Colorado St., Pasadena. Contract price, \$40,000.

SCHOOLS.

MENLO PARK, SAN MATEO CO., CAL.—School, 1 story and base, frame and concrete, \$15,000. Architect, J. W. Dolliver, Royal Insurance Bldg., S. F. Owners, Menlo Park School District. Plans for a four-room building as designed by Architect Dolliver have been accepted by the Board of School Trustees. The building is so arranged that additions may easily be made at a later date. This structure will replace the building destroyed by fire some months ago. Interior will be finished in pine. Exterior will probably be faced with cement plaster. Working drawings are being prepared and bids will be called for shortly.

SAN FRANCISCO — School, 2 story and base, frame and concrete. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Eight sets of bids were opened at Wednesday's meeting of the Board of Public Works for the general construction of the Edison School. Monson Bros. were low at \$42,677, but no contract was awarded. A complete list of these bids will be found under the heading of San Francisco in this issue.

HUNTINGTON PARK, LOS ANGELES CO., CAL.—School, 2 story and base, brick. Cost not stated. Architect, George W. Eldredge, Los Angeles Investment Bldg., L. A. Owners, Huntington Park School District. The building will cover an area of 119x120 feet, and has been designed in the Italian Renaissance style. Construction will be practically fireproof. There will be steam heat and a modern system of ventilation. Exterior of the building will be faced with pressed brick. Bonds to the amount of \$50,000 have been voted. Plans are now being prepared and bids will be called for shortly.

LOS ANGELES, CAL.—School, 2 story and base, brick, \$30,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Woman's Board of Home Missions of the Presbyterian Church. The building will cover an area of 90x 90 feet. The first floor is to be arranged for class rooms, offices and a large dining room. Upper floors will be divided into apartments. Interior finish will be of pine with some hardwood floors. Plans provide for six baths which will have cement floors and tile wainscot. There will be steam heat. Exterior of the building will be

faced with cement plaster. Plans are complete and figures are being taken.

SAN JOSE, SANTA CLARA CO., CAL.—School, 1 story and base, reinforced concrete, \$65,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Hester School District. This work has been mentioned here a number of times before when plans were formerly out for figures. The revised drawings are now being figured and bids will be opened by the School Trustees on June 7th. The building will contain 14 class rooms and an assembly hall. Construction will be as near fireproof as the funds available will allow. Plans may be secured from the architect or from the Clerk of the Hester School District, Herbert C. Jones, Knox Bldg., San Jose.

LAGUNA SCHOOL DISTRICT, FRESNO CO., CAL.—School, 1 story and base, brick, \$10,000. Architects, Swartz, Hotchkiss & Swartz, Fresno. Owners, Laguna School District. The building has been designed for a district school and will contain four class rooms. Interior will be finished in pine with some maple floors. There will be a central heating system. Exterior of the building will be faced with pressed brick. Plans are now being prepared and bids will be called for shortly.

FRESNO, FRESNO CO., CAL.—School, 1 story and base, brick. Cost not stated. Architects, Swartz, Hotchkiss & Swartz, Fresno. Owners, Walnut School District. The building will contain three class rooms, offices and toilets. Interior will be finished in pine throughout. There will be a central heating system. Exterior of the building will be faced with pressed brick. Design is in the classic style. Plans are being prepared and figures will be called for shortly.

SEATTLE, WASH.—School additions, 2 story and base, brick, \$50,000. Architect not stated. Owners, City of Seattle. Bids for this work were opened on Tuesday last and show Dittensen & Gehring, Epler Bldg., low at \$45,875 on proposition A and \$45,875 on proposition B. This firm will probably be awarded the contract.

SEATTLE, WASH.—School, 2 story and base, reinforced concrete, \$80,000. Architect's name not given. Owners, City of Seattle. Bids for the construction of the Lake School as opened at the last meeting of the Board of Education show Pinne & Gjarde low at \$78,614 on proposition A and \$79,159 for proposition B. A contract will probably be awarded at the next meeting of the Board of Education. These figures include heating and plumbing.

STORE.

SAN FRANCISCO.—Stores and offices alterations, 3 story and base, Class C. Cost not stated. Architect, Henry Sherman, Mills Bldg., S. F. Owner, Barbara Suter. The building, which is to undergo repairs is located at 325 Bush street. Plans will provide for the complete alteration of the first floor and basement which are to be occupied by a large restaurant. There will be new painting, plastering, electric work and plumbing. Upper floors will not be altered. Plans are complete and figures are being taken.

SEATTLE, WASH.—Stores and lofts, 4 story and base, steel and concrete, \$150,000. Architect, Saunders & Lawton, Alaska Bldg., Seattle. Owner's

name withheld. Preliminary plans have been prepared for a large commercial structure which is to be erected in the wholesale district. There will be several stores on the first floor and upper floors will be arranged for lofts for storage purposes. Foundations and bearing walls will be designed to carry four additional stories. Construction will be fireproof. Metal window frames and sash are to be specified. Exterior of the building will be faced with cement plaster. Plans are being prepared. Further mention will be made of the work when plans are ready for figures.

VANCOUVER, B. C.—Stores and offices, 15 story and base, reinforced concrete. Cost not stated. Architect, Thomas Hooper, Winch Bldg., Vancouver. Owner's name withheld. This building is proposed for the corner of Granville and Dunsmuir streets. The building will be 120x120 with a tower of five additional stories. It will be erected for stores on the ground floor and offices above. The specifications call for high-speed elevators and an entire modern equipment usually found in such structures. It is possible that contract tenders will be invited within the next six weeks. Exterior will be covered with pressed brick and tile.

STOCKTON, SAN JOAQUIN CO., CAL.—Stores and offices, alteration, 4 story brick and steel, \$70,000. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Kile, Wilhoit & Mough. The Yosemite Theatre Building, one of the best known office structures in Stockton, is to undergo thorough remodeling. A new steam heating system will be installed, new interior trim, plumbing, electric work and elevators. Additions will be made in portions of the building. Exterior will be faced with pressed brick and terra cotta. Plans are complete and bids are now being taken.

LOS ANGELES, CAL.—Stores and lofts, 5 story and base, brick and steel. Cost not stated. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owners, Besinger Estate. The building will be erected on Los Angeles street, near 9th, and will cover an area of 88x146 feet. The first floor will be arranged for stores and upper floors for light lofts. There will be steam heat, elevator service, metal window sash and frames and fireproof doors. Interior finish will be of pine throughout. Patent store fronts are specified. Exterior of the building will be faced with terra cotta. Plans will be complete and ready for figures within a week or ten days.

LOS ANGELES, CAL.—Stores and offices, 13 story and base, Class A construction. Cost not stated. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owners, Building Owners Co. This building has been mentioned here before when the architect was first commissioned to prepare plans. A site on 6th street between Hill and Olive streets has been secured, and construction will be started as soon as the temporary buildings now occupying the site can be wrecked. Construction will be fireproof throughout with reinforced concrete walls, concrete floors and roof and hollow tile interior partitions. Interior will be finished in metal trim, marble and hardwoods. There will be elevator service, steam heat, a vacuum cleaning system and radiators. Metal window sash and

frames are specified. Exterior of the building will be faced with pressed brick and terra cotta. Bids will be called for within a week or ten days.

Contracts Awarded.

PORTLAND, ORE.—Stores and offices, .. stories, reinforced concrete or steel frame. Cost not given. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owners, H. L. Pittcock et al. Contractors, Brayton Engineering Co., Lumberman's Bldg., Portland. Contract price cannot be given as the height of the structure has not been decided upon. The contract has probably been awarded on a percentage basis.

LOS ANGELES, CAL.—Stores and lofts, 5 story and base, reinforced concrete, \$120,000. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. F. W. Sabichl. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price, \$120,000.

LOS ANGELES, CAL.—Store and lofts, 3 story and base. Class A construction, \$37,000. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. Owner, Frank H. Shafer. Contractors, Hardeleine-Breunle Woodworking Co., Central Bldg., L. A. Contract price, \$37,000.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.

CANAL, CIRCULAR 778.—Proposals for Two Lock Entrance Floating Caissons and Their Equipment.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m., July 21, 1913, at which time they will be opened in public for furnishing the above mentioned articles. M. on the 9th day of June, 1913**, and then opened, for a conduit and wiring system in the United States Marine Hospital, San Francisco, Cal., in accordance with drawing and specification, copies of which may be had at this office or at the office of the Supervising Superintendent of Construction, U. S. Post Office, San Francisco, Cal., at the discretion of the Supervising Architect.

O. WENDEROTH,
Supervising Architect. (*)

PROPOSALS FOR BOAT HOUSE.

SEALED bids or proposals are invited to be delivered to the Board of Park Directors of the City of Oakland, at its office in the City Hall Annex, 1728 Broadway, Oakland, California, on **Wednesday, the 11th day of June, 1913, between the hours of 2 o'clock and 3 o'clock p. m.** for furnishing necessary labor and materials for and in the construction of a reinforced concrete Boat House on the west shore of Lake Merritt for the Board of Park Directors of the City of Oakland, Alameda County, California, in accordance with the specifications thereon on file in the office of said Board of Park Directors, to which specifications reference is hereby made for full particulars. Proposals shall be made upon blank forms, which will be furnished by the secretary of the Board of Park Directors upon application.

All work done and materials furnished shall be to the approval of Walter D. Reed, architect for the Board of Park Directors, and to the acceptance of the Board of Park Directors.

To secure faithful performance of contract a bond in the sum of Fifteen Thousand Dollars (\$15,000) with sureties approved by the Board of Park Directors, shall be required, or successful bidder shall deposit with the Auditor a certified check upon some solvent bank for said amount for the faithful performance of said contract, and a bond of fifty (50) per cent of the contract price, with sureties approved by the City Attorney and the Board of Park Directors for the protection of persons furnishing labor and material shall also be required.

Work shall be commenced within thirty (30) days and shall be completed within one hundred and fifty (150) days from date of contract.

Each bid shall bear the affidavit of bidder as required by Section 126 of the Charter of the City of Oakland.

Each bid must be accompanied by a check of ten per cent of amount of bid, payable to "Frank M. Smith, City Clerk," certified by a responsible bank, which check shall be forfeited to the City of Oakland should the bidder receiving an award fail within ten (10) days after acceptance of bid to enter into a contract and furnish the bond required as set forth in this notice.

The Board of Park Directors reserves the right to reject any or all bids or any bid or any separate item mentioned in this proposal.

By order of the Board of Park Directors.
HENRY F. VOGT,
Secretary.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company, in Room 415, Exposition Building, Pine and Battery Streets, San Francisco, California, at **11 o'clock A. M., Wednesday, June 10, 1913**, for the construction and erection of Prestressed concrete structural in accordance with the plans and specifications on file in the office of Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company or cash in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$5.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

NOTICE TO CONTRACTORS.

Auditorium Steel Bids Are Opened.

Exposition Company Open Figures for
Structural Steel and Iron Work
For The Auditorium.

Bids for furnishing, fabricating and erecting the structural steel and cast iron work of the Exposition Auditorium were received Thursday morning by the Committee on Buildings and Grounds.

The Exposition set aside a million dollars for this structure and it is to be located on the lot formerly occupied by the old Mechanics Pavilion and for which the City and County of San Francisco paid \$701,437.08.

The bids received are as follows:

J. G. Williams Construction Company, on Proposal "C" receiving f. o. b. San Francisco, unloading, storing, hauling, and erecting the steel and cast iron, \$63,500.

Smith Rice Company, Proposal "C" for receiving, unloading, storing and erecting, etc., \$59,506.

United States Steel Products Company, Proposal "B" for furnishing, fabricating and delivering f. o. b. San Francisco, \$217,238; for furnishing, fabricating and delivering Eastern terminal, \$164,335.

California Construction Company, Proposal "A" for furnishing, fabricating, erecting, riveting all steel and cast iron, \$314,060; Proposal "B" for furnishing, fabricating and delivering, San Francisco, \$257,946; For furnishing, fabricating and delivering Eastern terminal, \$204,940; Proposal "C" for receiving, f. o. b. San Francisco, unloading, storing, hauling and erecting the steel and cast iron, \$59,120.

Biune Construction Company: For receiving f. o. b. San Francisco, unloading, storing, hauling and erecting, \$29,900.

City Bids Opened.

For General Construction of Edison
School.

Eight sets of bids were opened at Wednesday's meeting of the Board of Public Works for the general construction of the Edison School. Monson Bros. were low at \$12,677, but no contract was awarded. Following is a complete list of all figures submitted:

General Construction Edison School.

Heckenroth & Schell.	\$49,586
Monson Bros.	42,677
Neswom, Weld & Kohn.	44,820
Carnahan & Mulford.	46,289
J. W. Carr.
McSheehy Bros.	49,942
Thomas Miller.	46,674
F. H. Born.	59,837

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all correctly classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

Panama-Pacific Co. Opens Bids On Big Jobs.

Lange & Bergstrom Low Men For Construction of Transportation Building. No Award Made.

The Buildings & Grounds Committee of the Panama-Pacific International Exposition Company opened bids on Tuesday, May 27th, for the construction of the Transportation Building, another of the large exhibit palaces which is to be erected in the Exhibit Section of the Harbor View site. Bids for the plumbing on the same were also opened. Bids on the general construction were taken as follows: (a) Exposition Company to furnish lumber and (b) contractor to furnish lumber. Lange & Bergstrom were low on both propositions, (a) \$252,065; (b) \$358,518. John G. Sutton was low on the plumbing at \$19,360 with two competitors, The Turner Co., \$19,190 and Wittman-Lyman Co., \$19,441, very close. Contracts have not been awarded. The following is a complete list of the bids as presented:

SAN FRANCISCO.

APARTMENT HOUSE—2 story and base, frame, \$23,000. San Francisco. Architect, none. Owners, Kern-McKillop Bros., 331 Pine St., S. F. The building is to be erected on the property on Taylor street adjoining another similar structure now under construction and owned by the same parties. This building will have a frontage of 30 feet and a depth of 165 feet. Plans provide for fifteen suites of two and three rooms each with private baths. All suites will have wall beds. There will be steam heat, vacuum cleaning system and an automatic elevator. Interior finish will be of pine with hardwood floors and some elm panels. Bath rooms will be finished in cement plaster. Exterior of the building will be faced with red brick veneer. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—2 story and base, frame, \$12,000. San Francisco. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, Herman Hogrefe, 1960 Hyde St., S. F. The building will be erected on Taylor street north of Sutter, and has been designed to contain seven apartment flats. Interior

finish will be of pine with elm panels and hardwood floors. A central heating system will be installed. Bath rooms will have cement floors and tile wainscot. All suites will have private bath rooms and will be equipped with wall beds. Exterior of the structure will be covered with white cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

APARTMENT HOUSE—3 story and base, frame, \$10,500. San Francisco. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner, John Fletcher. The building has been mentioned in these columns before when plans were first started. Working drawings have been completed and placed in the hands of the owner who has started excavating under the Day Labor system. The building has been arranged for six suites of four rooms and bath each. All apartments will have connecting baths and will be equipped with wall beds. Exteriors will be finished in pine. The exterior of the building will be covered with cement plaster on metal lath and klinker brick veneer.

APARTMENT HOUSE—1 story and base, brick and steel. Cost not stated.

San Francisco. Architect, C. O. Clausen. Phelan Bldg., S. F. Owner, M. S. Shaw. Preliminary sketches have been prepared for this building which is to be erected on property recently purchased by Mr. Shaw on Bush street west of Hyde. The lot has a frontage of 65 feet 9 inches and a depth of 137 1/4 feet. Plans provide for a total of about 100 guest rooms arranged in two and three room suites. All suites will have private bath rooms and wall beds. Interior finish will be of pine, elm panels and hardwood or tile floors. Bath rooms will have cement floors and tile wainscot. There will be steam heat, elevator service and a vacuum cleaning system. Hot and cold water plant will be installed. Exterior of the building will be faced with pressed brick. Plans will be completed at once.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, C. O. Clausen. Phelan Bldg., S. F. Owners Rego Bros. The building will be erected on Filbert street 179 feet east of Gough, and has been arranged to contain six apartments of four rooms and bath each. Interiors will be finished in pine with some hardwood floors and elm panels. There will be an open fire place and tile mantel in each suite. Bath rooms will be finished in cement plaster. Some wall beds will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and a contract will be let within a few days.

METAL LOCKERS FOR CAR BARNs—Cost not stated. San Francisco. Architect, City Department of Architecture. Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened on June 4th by the Board of Public Works for furnishing and installing metal lockers in the Municipal Car Barns, Geary street. Plans can be secured from the Department of Architecture.

RESIDENCE ALTERATIONS—Frame construction, \$2,000. San Francisco. Architect, Norman R. Conter, 46 Kearny St., S. F. Owner, L. Gilpin. Plans for this work provide for the raising of the present two-story dwelling and constructing a large entry hall and additional rooms on the street level. New plastering, plumbing, painting and electric work will also be installed. Interior finish will be of pine and hardwood. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and work has been started by Day Labor.

RESIDENCES—2, 2 story and base, frame, \$3,000 each. San Francisco. Architect, Edward E. Young, 251 Kearny St., S. F. Owner, E. Ginley, 131 5th Ave., S. F. These houses will be erected on 9th avenue north of Clement street. Each will contain seven rooms and bath. Interiors will be finished in pine and hardwood with hardwood floors in the dining rooms, living rooms and reception halls. There will be open fire places with brick mantels. Tile wainscoting will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

RESIDENT—2 story, attic and base, frame, \$12,000. San Francisco. Architects, Havens & Toepke, 46 Kearny St., S. F. Owners, S. A. Born Building Co., 660 Market St., S. F. The dwelling

will be erected in the West Clay Park Tract, and is to be similar in design to several other very attractive homes recently erected in that tract by the same firm. Interior finish will be largely of hardwoods with hardwood floors used in all the principal rooms. There will be twelve rooms, three baths and a sleeping porch. Plans provide for a central heating system, probably hot water, open fire places and an automatic water heater. Bath rooms will have tile floors and wainscot. Mantels will be of brick and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. Mr. Born is now purchasing all materials.

WAREHOUSE AND FACTORY—3 story and base, brick and steel, \$50,000. San Francisco. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owners, Workman Packing Co. This building will be erected on Harrison street between 4th and 5th streets, and will cover an area of 50x100 feet. The first floor is to be arranged for the offices of the company and shipping department. Upper floors will contain the storerooms and factory of the meat packers. Third floor is to be wainscoted with tile. A complete refrigerating plant will be installed. Construction will be of the mill type. Metal window frame and sash are specified. There will be a large freight elevator. Exterior of the building will be faced with pressed brick. Plans are being prepared and figures will shortly be called.

FLATS—3 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, H. Sholten, 1522 Santa Clara Ave., Alameda. The building has been arranged for three small flats, and will be erected on 14th street south of Folsom. Interior finish will be of pine throughout. There will be gas grates and tile mantels. Each flat will have a bath with tile wainscoting. Thirty-gallon boilers will be installed. Exterior of the building will be covered with rustic. Plans are complete and in the hands of the owner who is now purchasing all materials. Work will be done by Day Labor.

FLATS—2, 2 story and base, frame, \$5,000 each. San Francisco. Architect, none. Owner, C. A. Rushton, 714 9th Ave., S. F. These buildings will be erected on 9th avenue south of C street. Each will have a frontage of 25 feet and a depth of 60 feet. Interiors will be arranged for two modern five and six room flats with bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile will also be used in the bath rooms and kitchens. Exterior of the buildings will be covered with brick veneer and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

FLATS—2 story and base, frame, \$6,500. San Francisco. Architect, C. O. Clausen. Phelan Bldg., S. F. Owner, N. J. Bagliatetto. The building will be erected on Greenwich street west of Larkin, and has been designed to contain two residential flats, one of five rooms and the other of six rooms. Interior will be finished in pine with hardwood floors in the principal rooms. There will be large open fire places with brick mantels. Bath rooms will

have tile wainscot and tile will also be used in the kitchen. Exterior of the building will be covered with cement plaster on metal lath. A contract is to be awarded with a few days.

POWER PLANT EQUIPMENT—Cost not stated. Presidio of San Francisco. Architects, Constructing Quartermaster Dept., Fort Mason. Owners, United States Government. Plans for the furnishing and installation of additional power plant equipment at the Letterman General Hospital at the Presidio have been completed. Bids are now being taken for this work and will be opened on June 12th. Plans can be secured from the Constructing Quartermaster's office at Fort Mason. The official proposal appears in another column of this issue.

HOTEL—12 story and base. Class A construction, \$110,000. San Francisco. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owner's name withheld. This building will be erected on Geary street near Jones. The lot has a large street frontage and considerable depth. Plans will provide for a total of 132 guest rooms and 77 baths. Interior will be finished in pine and hardwoods with ornamental plaster in the lobby and office. There will be a complete steel frame and exterior walls faced with mat glazed terra cotta and pressed brick. Steam heat, elevator service and a vacuum cleaning system will complete the mechanical equipment. All window frames and sash will be of metal. Plans are being prepared and construction will be started as soon as arrangements now pending with the tenant can be settled.

HOTEL—3 story and base, frame, \$22,000. San Francisco. Architect, August Nordin, Mills Bldg., S. F. Owner, B. Josephine O'Neil. The building is to be erected on Harrison street near Third. The first floor will be arranged for stores and upper floors for a number of modern hotel rooms. There will be a hot water system. Interior finish will be of pine throughout. Exterior of the building will be covered with rustic and cement plaster on metal lath. Bids have been taken on the work and are now under advisement in the office of the architect. A contract will be let in a few days.

SCHOOL—2 story and base, frame and concrete. Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Eight sets of bids were opened at Wednesday's meeting of the Board of Public Works for the general construction of the Edison School. Henson Bros. were low at \$42,677, but no contract was awarded. A complete list of these bids will be found under the heading of San Francisco in this issue.

STORES AND OFFICES ALTERATIONS—3 story and base. Class C. Cost stated. San Francisco. Architect, Henry Sherrmund, Mills Bldg., S. F. Owner, Barbara Suter. The building which is to undergo repairs is located at 325 Bush street. Plans will provide for the complete alteration of the first floor and basement, which are to be occupied by a large restaurant. There will be new painting, plastering, electric work and plumbing. Upper floors will not be altered. Plans are complete and figures are being taken.

STRUCTURAL STEEL WORK ON AUDITORIUM—Cost not stated. San Francisco. Architect, Director of

Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids for furnishing, fabricating and erecting the structural steel and cast iron work of the Exposition Auditorium were received Thursday morning by the Committee on Buildings and Grounds. The Exposition Company set aside a million dollars for the structure, and it is to be located on the lot formerly occupied by the old Mechanics' Pavilion, and for which the City and County of San Francisco paid \$701,437.00. The bids received are as follows: J. G. Williams Construction Co. On proposal C, receiving f. o. b. San Francisco, unloading, storing, hauling and erecting the steel and cast iron, \$53,500. Smith-Rice Co., proposal C for receiving, unloading, storing and erecting, etc., \$59,500. United States Steel Products Co., proposal A for furnishing, fabricating and delivering f. o. b. San Francisco, \$217,283; for furnishing, fabricating and delivering eastern terminal, \$164,835. California Construction Co., proposal A for furnishing, fabricating, erecting, riveting all steel and cast iron, \$314,060; proposal B for furnishing fabricating and delivering San Francisco, \$257,940; for furnishing, fabricating and delivering eastern terminal, \$204,940; proposal C for receiving, f. o. b. San Francisco, unloading, storing, hauling and erecting the steel and cast iron, \$59,000.

TRANSPORTATION BUILDING—Frame construction. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. The Buildings and Grounds Committee of the Panama-Pacific International Exposition Co. opened bids on Tuesday, May 27th, for the construction of the Transportation Building and for the plumbing on the same. Bids on the general construction were taken as follows: (a) Exposition Co. to furnish lumber and (b) contractor to furnish lumber, Lange & Bergstrom were low on both propositions. John G. Sutton was low on the plumbing at \$19,300, with two competitors—The Turner Co., \$19,490, and Wittman-Lyman Co., \$19,441—very close. Contracts have not been awarded. A complete list of these figures will be found under the heading of San Francisco in this issue.

VARIED INDUSTRIES BUILDING—Frame construction. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on June 4th by the Buildings and Grounds Committee of the Exposition Co., for the general construction of the above mentioned building, and also for the plumbing and installation of sewer and water pipes in the same. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

OUTFALL SEWER—Cost not stated. San Francisco. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on June 4th for the construction of an outfall sewer in the Presidio section of the Exposition grounds. Plans can be se-

cured from the office of the Director of Works. An official proposal appears in another column of this issue.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—2 story and base, frame, \$18,000. Oakland, Cal. Architect, J. Henry Boehringer, Delger Bldg., Oakland. Owner, Mrs. E. Remillard. Building will be erected on 22nd street between grove and Telegraph. It has been arranged to contain 13 suites of two rooms and bath each. Interior finish will be of pine, elm panel and hardwood floors. All suites will be equipped with wall beds. Bath rooms will have tile wainscot. Plans provide for steam heat and a hot water supply. The exterior of the building will be faced with veneer pressed brick. Sub-bids are now being taken

by Alfred Legault, who can be found at the site.

APARTMENT HOUSE—1 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Galen Howard, 602 Mission St., S. F. Owner's name withheld. This building will be erected at the corner of Euclid and Hearst avenues, and when completed will be one of the most modern and up-to-date apartment houses in Berkeley. Interior has been arranged for suites ranging from two to eight rooms and baths. Hardwood and pine will be used in interior finish with hardwood floors in the principal rooms. There will be steam heat, elevator service and a vacuum cleaning system. Wall beds are specified. Bath rooms will be finished in tile and cement plaster. The exterior of the building will probably be covered with cement plaster. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$2,500. Piedmont, Alameda Co., Cal. Architect, none. Owner, J. A. Gilmour, 424 Howe St., Oakland. The dwelling has been designed to contain six rooms and bath. Interior will be finished in pine with hardwood floors in the living room, dining room and reception hall. There will be a large open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, V. S. Kidd. The dwelling will be erected in the Claremont Tract, and has been designed for an eight-room house with baths and sleeping porches. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will also be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$4,500. Piedmont, Alameda Co., Cal. Architect, Julia Morgan. Merchants' Exchange Bldg., S. F. Owner, Miss Nellie Connors. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$4,000. Oakland, Cal. Architect, C. H. Miller, Foxcroft Bldg., S. F. Owner, R. T. Southerland. The dwelling has been designed for a six-room house with bath and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the dining room, living room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Tile will be

used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$5,500. Oakland, Cal. Architect, Claude B. Barton, Security Bldg., Oakland. Owner, Claude B. Barton. The dwelling, which has been designed for an eight-room house, will be erected at Adams Point. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath rooms will have tile wainscot. Tile will also be used in the kitchen. An automatic water heater will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and subfigures are being taken.

RESIDENCE—2 story and base, frame, \$5,500. Oakland, Cal. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, A. H. Dana. The house has been designed to contain eight rooms, bath and sleeping porch, and will be erected in Rockridge Park. Interior will be finished in pine, white enamel and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be open fire places and tile or brick mantels. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with shingles. Plans are being prepared for the work.

RESIDENCE—2 story, attic and basement, frame, \$30,000. Oakland, Cal. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, Mrs. A. J. Larkey. The house will be erected in Crocker Highlands and will contain a large number of rooms, several baths and sleeping porch. A garage will be erected on the rear of the lot. Interior of the dwelling will be finished in pine and hardwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchen. An automatic water heater will be installed. The exterior of the residence will be covered with cement plaster on metal lath. Plans for this work are being prepared.

RESIDENCE—2 story and base, frame, \$4,500. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Mrs. Conklin. The house will be erected on Staten avenue and has been designed for a seven room dwelling with bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, C. O. Clausen, Phelan Bldg., S. F. Owners, George Friend Co. The dwelling will be erected in the Thousand Oaks Tract, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine throughout with hardwood floors in the dining room, living

BUILDING AND INDUSTRIAL NEWS

room and reception hall. There will be open fire places and tile or brick mantels. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared and when complete work will be done by Day Labor.

APARTMENT HOUSE ALTERATIONS—2 story and base, frame, \$4,000. Oakland, Cal. Architect, C. H. Miller, Foxcroft Bldg., S. F. Owner, P. N. Tritt. The work will consist of remodeling the present two-story frame residence into two and three room apartments with private baths. There will be new interior trim, new electric work, plumbing, painting and plastering. Exterior of the building will also be somewhat altered and will be covered with rustic and shiplap. Plans are being prepared.

GARAGE—1 story, frame. Cost not stated. Oakland, Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, W. L. Locke. The garage will be erected on Wadsworth and Bayou Vista streets. The plans provide for an automatic turntable. A cement floor will be used. Interior finish will be of pine. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

Oakland Builders To Have Annual Day.

Hig Industrial Parade Will Be One of the Main Features of Builders' Exchange Day.

A Committee of Arrangements has been appointed by the President of the Oakland Builders Exchange to arrange for the Builders' Exchange Day.

The entire day of June 14th, 1913, has been set aside to be known as Builders' Exchange Day, and to be an annual affair. On this, their first Builders' Exchange Day, the plans are as follows:

INDUSTRIAL PARADE.

They hope to have a monstrous industrial parade and have invited all of the civic bodies and clubs of Oakland, Alameda and Berkeley to co-operate for this purpose, and are hopeful of having every industrial concern represented by one or two vehicles in this parade. The parade is to start at 9:30, and to be over the main streets of Oakland and then disband. It is the request that each vehicle be loaded with the goods handled by that respective concern, and that this load, where possible, consist of the regular load in course of delivery, so that after disbandment the vehicle can continue on its errand. This will minimize expense and time, and will not interfere with the day's deliveries, and they positively wish every vehicle that they might be able to place in the parade to have a sign attached to it reading for example: "JOHN BROWN CO., BUILDING MATERIALS—MEMBERS OF THE BUILDERS' EXCHANGE OF ALAMEDA COUNTY." And it is asked that this sign be placed in a conspicuous place, where it can be readily seen while the vehicle is in the course of parading.

PICNIC AND BASEBALL.

After disbandment, the day will be given over to pleasure and for this purpose, Grand Canyon Park has been secured and the arrangements are such that they can assure everyone of a healthy good time. In its nature it will be an outing and a picnic. There will be games for all, light refreshments, music, dancing and prizes for the games, with toys for the children. There will be a sensational baseball game, many of their stars participating. Any member wishing to play on either of these teams will confer with Wm. Makin or C. L. Cummins.

COMMITTEE: Wm. Makin, Chairman. F. T. Kennedy, L. C. Fraser, Jr., C. L. Cummins, Ed. Hunt.

P. F. BRADHOFF, Secretary.

SAN JOSE AND THE SANTA CLARA VALLEY.

RESIDENCE — 2 story and base, frame, \$15,000. Woodside, San Mateo Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, J. J. Graves. Mr. Graves owns a large ranch in the Moore Tract near Woodside, and will build a house containing twenty rooms, six baths and sleeping porches. A two-story garage with a completely equipped machine shop and storage space for ten machines will also be erected on the site. Interior trim for the residence will be of pine and hardwoods. Hardwood floors will be used in all of the principal rooms. Bath rooms will be finished in tile. A central heating system, probably hot water, will be installed. The exterior of the buildings will be covered with cement plaster on metal lath. Roofs will be of red clay tile. Plans provide for extensive landscape gardening, a large concrete swimming tank and sunken gardens. Excavating has been started and subcontracts for the balance of the work will be let shortly.

RESIDENCE — 2 story and base, frame, \$3,500. San Jose, Santa Clara Co., Cal. Architect, P. D. Wolfe, First National Bank Bldg., San Jose. Owner, J. Murphy. The dwelling has been designed for a seven-room house with bath. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the living and dining rooms and reception hall. There will be a large open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

SCHOOL—1 story and base, frame and concrete, \$15,000. Menlo Park, San Mateo Co., Cal. Architect, J. W. Dolliver, Royal Insurance Bldg., S. F. Owners, Menlo Park School District. Plans for a four-room building as designed by Architect Dolliver have been accepted by the Board of School Trustees. The building is so arranged that additions may easily be made at a later

date. This structure will replace the building destroyed by fire some months ago. Interior will be finished in pine. Exterior will probably be faced with cement plaster. Working drawings are being prepared and bids will be called for shortly.

SCHOOL—1 story and base, reinforced concrete, \$65,000. San Jose, Santa Clara Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Hester School District. This work has been mentioned here a number of times before when plans were formerly out for figures. The revised drawings are now being figured and bids will be opened by the School Trustees on June 7th. The building will contain 14 class rooms and an assembly hall. Construction will be as near fireproof as the funds available will allow. Plans may be secured from the architect or from the Clerk of the Hester School District, Herbert C Jones, Knox Bldg., San Jose.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Kay & Skidmore, Broadway Central Bldg., L. A. Owner's name withheld. The building will cover an area of 50x137 feet, and has been arranged for thirty suites of two rooms and bath each. All apartments will be equipped with wall beds. Interior finish will be of pine with elm panels. Some hardwood floors will be

used. There will be steam heat and an automatic elevator. Exterior of the building will be faced with pressed brick. Bath rooms will have cement floors and tile wainscot. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, R. B. Young & Son, Lankershin Bldg., L. A. Owner, Dr. E. C. Manning. The building will be erected on an inside lot with a street frontage of 50 feet and a depth of 145 feet. There will be a total of 75 rooms arranged in two and three room suites with private baths. All suites will have wall beds. Interior finish will be of pine and hardwood. Bath rooms will be finished in cement plaster. There will be steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with pressed brick trimmed with artificial stone. Plans are now being prepared for this work.

ICE PLANT—2 story and base, reinforced concrete. Cost not stated. San Fernando, Los Angeles Co., Cal. Architect, none. Owners, Pacific Fruit Express Co., Pacific Electric Bldg., L. A. The plant proper will cover an area of 62x140 feet with a storage wing one story high 45x100 feet. Construction will be fireproof throughout. Floors and roof will be of reinforced concrete. A large amount of special machinery will be installed, which is to be let under a special contract. The plans call for fireproof doors and metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken by the owners.

LODGE HALL—3 story and base, reinforced concrete, \$80,000. Riverside, Riverside Co., Cal. Architect, George D. Barnett, Wright and Callender Bldg., L. A. Owners, Riverside Elks' Hall Association. This building will be erected at the corner of Market and Whittier streets and will cover a large area. The first floor will be arranged for the lobby, parlors, offices and a library. An auditorium seating 500 people will occupy the second floor and third floor will be arranged for apartments. Interior finish will be of pine, hardwoods and marble and tile. There will be elevator service, steam heat and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

HOTEL—7 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, E. J. Borgmeyer, Stinson Bldg., L. A. Owner, E. Rabin. The building will be erected on Coronado street and will cover an area of 75x120 feet. Plans provide for a total of 150 guest rooms and 70 baths. Interior will be finished in pine and hardwoods with ornamental plaster, marble and tile used in the lobby. Bath rooms will have cement floors and tile wainscot. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Metal window frames and sash are specified. Exterior of the building will be faced with glazed brick and terra cotta. Interior partitions will be of hollow tile. Plans are being prepared.

HOTEL—5 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Mon-

arch Investment Co. The building will occupy a corner site covering an area of 272x195 feet and will be built around a court 140x150 feet. There will be a total of 200 guest rooms and 150 baths. Construction will be fireproof throughout, with hollow tile partitions and concrete floors. Interior will be finished in pine and hardwood. Baths will have cement floors and tile wainscot. Plans provide for both freight and passenger elevators, steam heat, vacuum cleaning system and a hot water plant. Metal window sash and frames are to be used. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

RESIDENCE—2 story and base, frame. Cost not stated. Pasadena, Los Angeles Co., Cal. Architects, Parkinson & Bergstrom, Security Bank Bldg., L. A. Owner, H. O. Ayer. The dwelling will contain sixteen rooms, several baths and sleeping porches. Interior finish will be of pine and hardwoods with hardwood floors used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. The exterior of the house will be covered with cement plaster on metal lath and shakes. Plans have been revised and new figures are now being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Los Angeles, Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owner, Milton E. Geitz. The dwelling will occupy a corner site and has been designed for an eighteen room house with all modern conveniences. There will be furnace heat and open fire places. Interior will be finished in pine, hardwood and white enamel. Hardwood floors will be used in all principal rooms. Mantels will be of brick and tile. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SCHOOL—2 story and base, brick. Cost not stated. Huntington Park, Los Angeles Co., Cal. Architect, George W. Eldredge, Los Angeles Investment Bldg., L. A. Owners, Huntington Park School District. The building will cover an area of 119x220 feet, and has been designed in the Italian Renaissance style. Construction will be practically fireproof. There will be steam heat and a modern system of ventilation. Exterior of the building will be faced with pressed brick. Bonds to the amount of \$80,000 have been voted. Plans are now being prepared and bids will be called for shortly.

SCHOOL—2 story and base, brick, \$30,000. Los Angeles, Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Woman's Board of Home Missions of the Presbyterian Church. The building will cover an area of 90x90 feet. The first floor is to be arranged for class rooms, offices and a large dining room. Upper floors will be divided into apartments. Interior finish will be of pine with some hardwood floors. Plans provide for six baths which will have cement floors and tile wainscot. There will be steam heat. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

STORES AND LOFTS—5 story and

base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owners, Besinger Estate. The building will be erected on Los Angeles street near 9th, and will cover an area of 88x145 feet. The first floor will be arranged for stores and upper floors for light lofts. There will be steam heat, elevator service, metal window sash and frames and fireproof doors. Interior finish will be of pine throughout. Patent store fronts are specified. Exterior of the building will be faced with terra cotta. Plans will be complete and ready for figures within a week or ten days.

BANK—1 story and base, brick. Cost not stated. Burbank, Los Angeles Co., Cal. Architects, Krepel & Erkes, Henne Bldg., L. A. Owners, Farmers' and Merchants' National Bank of Burbank. The building will cover an area of 26x60 feet and will be occupied by the bank only. The plans include safe deposit and coin vaults which will be let in a separate contract. Construction will be fireproof. Interior will be arranged for large public space, working space and directors' rooms. There will be hardwood and marble trim and ornamental plaster. The exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

GARAGE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. W. Angel, 3555 Princeton St., L. A. Owner, E. T. Riley. The building has been designed for a commercial garage and will contain the office in the front portion of the building, repair and storage space in the rear. There will be a cement floor, metal window sash and frames and special storage tanks. Interior finish will be of pine. The exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

HOTEL—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Mrs. Mathilde McLaughlin. This building will be erected at the corner of Union and Pico streets and will cover an area of 100x125 feet. Preliminary plans for a building containing stores on the first floor and modern hotel rooms above have been prepared. The proposed building will have about 125 guest rooms and three stores. A lease is now pending between the owner and lessee. Interior finish will be of pine throughout. Plans provide for steam heat and elevator service. Exterior will be faced with pressed brick. If a lease is signed construction will be started at once.

STORES AND OFFICES—13 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owners, Building Owners Co. This building has been mentioned here before when the architect was first commissioned to prepare plans. A site on 6th street between Hill and Olive streets has been secured and construction will be started as soon as the temporary buildings now occupying the site can be wrecked. Construction will be fireproof throughout with reinforced concrete walls, concrete floors and roof and hollow tile interior partitions. Interior will be finished in metal trim, marble and hardwoods. There will be elevator

service, steam heat, a vacuum cleaning system and mail chutes. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick and terra cotta. Bids will be called for within a week or ten days.

Contracts Awarded.

HOSPITAL—2 story and base, brick and steel, \$35,000. Oxnard, Ventura Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Sisters of Mercy. Contractor, Thomas Carroll, Oxnard. Contract price, \$35,000.

HOTEL—4 story and base, brick and steel, \$45,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. F. W. Sabichl. Contractors, Alpetter, Hall & Alpetter, Ferguson Bldg., L. A. Contract price, \$45,000.

RESIDENCE—2 story and base, frame, \$40,000. Pasadena, Los Angeles Co., Cal. Architect, Foss Designing and Building Co., 100 East Colorado St., Pasadena. Owner, W. C. Leistkow. Contractors, Foss Designing and Building Co., 100 East Colorado St., Pasadena. Contract price, \$40,000.

STORES AND LOFTS—5 story and base, reinforced concrete, \$120,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, Mrs. F. W. Sabichl. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A. Contract price, \$120,000.

LIBRARY—1 story and base. Class A construction, \$20,000. Los Angeles, Cal. Architects, Train & Williams associated with F. N. Ashley, Exchange Bldg., L. A. Owners, City of Los Angeles. Contractor, C. Karseboom, 1443 Dana St., L. A. Contract price, \$23,417.

STORE AND LOFTS—3 story and base. Class A construction, \$37,000. Los Angeles, Cal. Architect, Frederick Noonan, Wright and Callender Bldg., L. A. Owner, Frank H. Shafer. Contractors, Hardeline-Breunig Woodworking Co., Central Bldg., L. A. Contract price \$37,000.

NOTE, AND THEATRE—3 story and base, brick, \$70,000. Los Angeles, Cal. Architect, John F. Blee, Union League Bldg., L. A. Owners, Em. Olcovich, Carl Stern, Ben Meyer and associates. Contractors, Barker-Bradley Construction Co., 1824 East 15th St., L. A. Contract price, \$70,000.

SEATTLE AND WASHINGTON

STORES AND LOFTS—4 story and base, steel and concrete, \$150,000. Seattle, Wash. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owner name withheld. Preliminary plans have been prepared for a large commercial structure which is to be erected in the wholesale district. There will be several stores on the first floor and upper floors will be arranged for loft for storage purposes. Foundations and bearing walls will be designed to carry four additional stories. Construction will be fireproof. Metal window frame and sash are specified. Exterior of building will be faced with cement plaster. Plans are being prepared. Further mention will be made of the work when plans are ready for figures.

STORES AND OFFICES—15 story and base, reinforced concrete. Cost not stated. Vancouver, B. C. Architect, Thomas Hooper, Winch Bldg., Vancouver. Owner's name withheld.

This building is proposed for the corner of Granville and Dunsmuir streets. The building will be 120x120 with a tower of five additional stories. It will be erected for stores on the ground floor and offices above. The specifications call for high-speed elevators and an entire modern equipment usually found in such structures. It is possible that contract tenders will be invited within the next six weeks. Exterior will be covered with pressed brick and tile.

SCHOOL ADDITIONS—2 story and base, brick, \$50,000. Seattle, Wash. Architect not stated. Owners, City of Seattle. Bids for this work were opened on Tuesday last and show Ditlefsen & Gehring, Epler Bldg., low at \$45,875 on proposition A and \$45,875 on proposition B. This firm will probably be awarded the contract.

SCHOOL—2 story and base, reinforced concrete, \$80,000. Seattle, Wash. Architect's name not given. Owners, City of Seattle. Bids for the construction of the Lake School as opened at the last meeting of the Board of Education show Pinne & Gjarde low at \$78,614 for proposition A and \$79,159 for proposition B. A contract will probably be awarded at the next meeting of the Board of Education. These figures include heating and plumbing.

LODGE HALL—3 story and base, reinforced concrete, \$25,000. Bremerton, Wash. Architect's name not given. Owners, Bremerton Eagles' Hall Association. This work has been mentioned here before when the architect was first commissioned to prepare the plans. Working drawings have been turned over to Edward E. Walker, chairman of the Building Committee, and he is now taking figures for the construction. The building will be arranged for stores on the first floor and lodge rooms, offices and sleeping apartments on the second and third floors. Plans provide for steam heat, elevator service and a vacuum cleaning system. Interior will be finished in pine and hardwoods. Marble and tile will be used extensively. There will be patent store fronts. Exterior of the building will be faced with cement plaster. Plans can be secured from the chairman of the Building Committee. Bids will be opened about the middle of June.

HARBOR WORK—Cost not stated. Seattle, Wash. Engineers, Port of Seattle Commission, Central Bldg., Seattle. Owners, City of Seattle. The Seattle Port Commission, Central Bldg., at its regular meeting awarded contracts as follows for Port development work, all previously described in these columns:

Harrington, Peters Co., Oriental Bldg., on their bid of \$97,200, were awarded the contract for the construction of warehouses, etc., at the East Waterway improvement, and on their bid of \$18,507.25 for net warehouse, etc., at Salmon Bay.

Ians Pederson, Madison Bldg., on his bid of \$242,944 was awarded the contract for the substructures on the Smith's Cove improvement.

The Puget Sound Bridge & Dredging Co., Central Bldg., on its bid of \$252,308.50 was awarded the contract for excavation and dredging the Smith's Cove improvement.

The Seattle Frog & Switch Co., Lowman Bldg., on its bids of \$22,168.10 and \$6,792.40 was awarded the contracts for rails and appurtenances on the Smith's

Cove and Central Waterfront improvements respectively.

Total of above, \$639,920.25.

Contracts Awarded.

FACTORY—6 story and base, reinforced concrete. Cost not stated. Vancouver, B. C. Architect, H. S. Griffith, Dominion Trust Bldg., Vancouver. Owners, National Drug and Chemical Co. Contractors, George Snider and Brethour, 207 Hastings, West Vancouver. Contract price not stated.

PORTLAND AND OREGON.

Contracts Awarded.

RESIDENCE—2 story and base, frame, \$10,000. Portland, Ore. Architect, none. Owner, M. A. Ashley. Contractors, H. E. Wood & Co., 860 Williams Ave., Portland. Contract price, \$10,000.

STORES AND OFFICES—... stories, reinforced concrete or steel frame. Cost not given. Portland, Ore. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owners, H. L. Pittock et al. Contractors, Brayton Engineering Co., Lumberman's Bldg., Portland. Contract price cannot be given as the height of the structure has not been decided upon. The contract has probably been awarded on a percentage basis.

FOREIGN TRADE OPPORTUNITIES.

[Inquiries in which addresses are omitted are on file at Bureau of Foreign and Domestic Commerce. In applying for addresses refer to file number.]

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 10996. Motor launches.—An American consul in the Far East reports that the use of commercial motor boats in his district continues to increase, and the establishment of two services is contemplated. It is understood that the contract for the launches has been placed, but it is thought that there will be a good market for various grades of American marine motors. Copy of the complete report, giving further details regarding this market and the best manner of making sales, will be sent to interested firms by the Bureau of Foreign and Domestic Commerce.

No. 11000. Dry dock and men's block.—The American consul general at Ottawa reports that the Department of Public Works has advertised for tenders, to be received until June 23, for constructing a dry dock in the county of Levis, Quebec. Tenders will also be received until June 24 for the construction of a men's block, New Barracks, Long Branch, near Toronto, Ontario. Plans, specifications and form of contract can be seen and forms of tender obtained at the Department of Public Works, Canada.

No. 11002. Machinery and accessories.—The American minister at Burcharest reports that bids to be opened at the Prefecture at Sofia, Bulgaria, have been invited by the direction of the Pernik mine, belonging to the Bulgarian Gov-

ernment, to furnish for the mine two machines, three dynamo-electric machines, and an electromotor, with their accessories. Intending bidders should communicate at once with the Ministry of Commerce, Industry, and Labor, at Sofia, from which copies of the specifications may be obtained. In order to be admitted to compete an intending bidder must produce certificates to show that he has executed similar installations and that he has deposited the required bond (3,500 francs, or \$675) in the Bulgarian Bank.

No. 11003. Crude botanic drugs.—In response to inquiries from the United States an American consul furnishes the names of two firms that have been interviewed in regard to the purchase of crude American botanic drugs, such as roots, barks, etc. These firms are in the market for shipments of from \$500 to \$2,000 in value.

No. 10923. Benzine, naphtha, and similar products.—An American consular officer in a European country reports that a local business house desires to get in touch with American manufacturers or exporters of benzine, naphtha, tar, caustic soda, glycerin, and other similar products, with a view to supplying the local market. Correspondence.

JOHN TUTTLE PASSES AWAY.

John Tuttle, for many years a member of the Builders' Exchange, has passed to the great beyond. Death came last Saturday morning at his family home, 110 Webster street.

For thirty years Mr. Tuttle was in active business here in San Francisco, during which time he made a host of friends. As a soldier Mr. Tuttle has a record that any man would be proud of, having served through the Civil War and participating in fourteen battles.

The funeral ceremony will be held on Tuesday under the auspices of Geo. H. Thomas Post, Grand Army of the Republic, at their hall in the Redmen Building on Golden Gate avenue near Jones street, at one o'clock. Deceased was 70 years of age.

HAD A BRISK PRELIMINARY SKIRMISH.

"Uh-well, sah," explained frazzled Mr. Trump, "dis is de way 'twuz: Me and muh wife, we had a ahgy-munt 'bout a p'int in de Scriptures, and she called me a liah and a fool, and I smacked her down. She hopped up and busted a skillet on muh head and slapped me flat wid it. I riz and welted her wid a chair leg and she flung de tea kettle at me and scalded muh pessonality right sharply. And den we begun to fight."

MODERN CREAMERY BUILDING.

Architect Henry H. Meyer is just completing one of the most modern Creameries that has yet been put up on the Pacific Coast for Annie L. Neal at Alameda, California.

The arrangement for the Creamery room, market room, sales room and shipping department are ideal.

One of the unique items is, that tile walls and tile floors have been used throughout the building, thus making it sanitary in every respect. This work was installed by The Watson Mantel & Tile Company of San Francisco. The front is finished in Marble

Ask the fellow who uses them--he will tell you that he knows of no better panels.

Are YOU particular?

having been put up by The Vermont Marble Company, and every modern convenience known to the trade is used throughout.

The owner is to be congratulated on the enterprise which is shown in the construction of such a building.

GARNETS BY THE TON.

Garnets are generally classed as precious stones, and a fine gem garnet may be worth from \$5 to \$25 a carat, according to variety and size, but it is not necessarily true that the owner of a garnet mine is a millionaire because his mine produces garnets by the ton. In fact, the bulk of the garnets produced are measured by the ton, but these of inferior quality are used for abrasive purposes. In 1912 the production of abrasive garnet, according to the United States Geological Survey, amounted to 4,182 short tons, valued at \$137,800, so that the average price for a ton of garnets was not quite \$33, or considerably less than double the price of a ton of hay.

The production of garnets in 1912 showed an increase of 106 tons in quantity and \$16,052 in value compared with 1911. The three garnet-producing States are New York, New Hampshire, and North Carolina.

CHAS. WESELY & CO. INCORPORATE.

Chas. Wesely & Co., 126 Silver St., manufacturers of cement laundry trays, combinations, butcher tanks, etc., has been granted a charter of incorporation, the capital stock being \$25,000.

Mr. Chas. Wesely was the original manufacturer and patentee of these class of fixtures, having made his first trays in 1832 and patent on same issued in 1853. They were the first on the market and have always given universal satisfaction. One very good point the purchaser can always rely on is that if any of the Wesely fixtures should prove defective it will always immediately be replaced free of charge.

The San Francisco office has been established for 5 years with Mr. C. J. Walsh as manager and under the new incorporation Mr. Walsh will continue as President and General Manager.

Prospective buyers of cement wash trays, combinations, etc., will do well to consult this company if they desire a first class article at the right price.

THE IDEAL CONCRETE HOUSE.

The ideal house of concrete is one with a flat roof, crowned by a parapet or some simple perforated patterning

such as one sees in the country barns of Italy for airing the hay. It is better to avoid the stereotype balusters and moldings (which have so long been associated with stone work), not because of any difficulty in casting, but simply to avoid stamping concrete in imitation of stone.

The flat roof is suggested in preference to the pitched because it is obviously cheaper and is the natural form. Shingle or slate roofs are pitched to insure a dry interior; a flat shingle roof would, of course, offer but little protection from water. The flat concrete roof, when composed of a rich mixture and properly done, is a perfectly practical roof. When covered with flat tiles of a pleasing shade it makes an ideal roof-garden. In favoring the flat roof it is not to be understood that the pitched roof is impracticable. It is simply more costly, necessitating a rather cumbersome roof construction and is created only for exterior effect. If the visible roof is desired it should be kept as simple as possible, for the complicated roof of the frame house with innumerable dormers is really quite out of the question in concrete.—House Beautiful.

Mr. William Allen White at the recent luncheon given to him in this city called attention to what might have been expected had Roosevelt been in President Wilson's place and read his own message to Congress; if he had established an office in the Capitol building or sent his secretary of state to impress his ideas of the Japanese question. If Roosevelt had done this Mr. White ventures to say that all the reactionaries would have had a cannipion fit. As to that Mr. White has some ideas on foreign diplomacy and the conduct of the State department. Evidently he would have it pepper up. In the Emporia Gazette, of which he is editor, he demands that the American foreign policy gird on its armor and acquit itself in a creditable manner.

"The American flag," writes Mr. White, "isn't respected in any of the South American countries. It isn't respected in Japan, or the Japs wouldn't be as sassy as they now are. The government never resents an insult, save through long-winded diplomacy. It always is crawfishing and accepting hollow excuses. Its present abject attitude in the Japanese matter should make every American sick. It should tell the Japs to go to Hannibal, Mo., and encourage California to frame exclusive legislation. It should shoot Mexico full

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

Bind your copies of the Building and Industrial News in PERMANENT BOOK FORM

We have succeeded at last in securing a really practical binder. The Building and Industrial News contains a great deal of technical and statistical information that many of our readers find worth saving for future reference. There is no better way of preserving it than using the

"BIG BEN" BINDER

which preserves the magazine in permanent book form. This binder is handsome and durable, and makes the permanent filing of magazines as easy as filing ordinary papers. It opens flat like a regular book, and comes in fine art cloth with the name of our Journal stamped in gold on the front cover and back. For persons who desire to

Save These Valuable Articles

this binder is just the thing, as it holds several numbers of our Journal and can be used again indefinitely year after year, simply by taking out the old Journals and inserting the new ones as they come to you.

By making special arrangement with the manufacturers of this best binder that has ever been put on the market, we are able to furnish them to you for **ONLY \$1.00 EACH.**

Merely send us your name and address and say: "Send us your binder. I enclose \$1.00," and we will send the binder promptly all charges prepaid.

Send in your orders now and begin saving the statistical and technical information, articles and valuable data, that will be published in The Building and Industrial News this year.

Editorial Comment.

Building construction in San Francisco last month amounted to \$2,206,409. To this is to be added \$307,060 for Panama-Pacific work and \$103,520 for City construction, making in all a total of \$2,816,935.

Considering the present state of business generally this a pretty good showing for the month. For private construction, outside of Exposition work and City construction the total is more than two millions, so that it is at least an average month. Of the \$2,206,409 thus tabulated \$1,353,737 was brick and concrete construction, \$682,590 for frame buildings and \$170,082 came under the head of alterations and additions. Compared with former years the record for May is as follows:

May, 1904.....	\$1,766,020
May, 1905.....	2,226,555
May, 1906.....	621,034
May, 1907.....	4,351,431
May, 1908.....	3,070,230
May, 1909.....	3,029,609
May, 1910.....	2,759,204
May, 1911.....	2,326,562
May, 1912.....	3,153,910
May, 1913.....	2,206,409

Ordinarily the month of May has shown a pretty good building record. For it is a month of settled weather and a time to start construction for the summer. For the present year the record is as follows:

January, 1913.....	\$1,585,555
February, 1913.....	1,979,043
March, 1913.....	2,171,583
April, 1913.....	2,249,332
May, 1913.....	2,206,409

As the Exposition work is practically a part of private construction within the limits of San Francisco the total out side of City work amounts to more than two and one-half millions. Considering the dullness of business generally the expenditure of that amount of money in building construction shows that in this regard San Francisco is at least holding its own.

It has been reported that ships might pass through the Panama canal by July next, but there seems to have been some misunderstanding on that point, as Colonel Goethals says that he believes that by next October ships drawing not more than fifteen feet of water may pass through the big ditch, Gatun Lake, through which vessels must pass, is said to be very low this year. But by November the lake will have risen greatly and in all probability there will be plenty of water to fill the entire lake including the Culebra cut.

On May 18, last, the waters of the Pacific Ocean were let into the canal by blowing up the dike south of Miraflores lock with a blast of 32,750 pounds of dynamite.

It was originally planned to continue the excavation back of the dike with steam shovels, but as the dredges at the Pacific entrance had practically completed their work they were available for operation in the canal itself. The dike was accordingly destroyed to admit them. As excavation with dredges is more expeditious than steam-shovel work, this will make for increased progress. Although the canal will not be officially opened until January 1st, 1915, it is probable that ships will be able to make the passage through it early this fall, in October or November as above stated. The only element of uncertainty is due to the slides at Culebra. Were it not for these slides there would now be only a million and a half cubic yards to be taken out of the cut instead of six and one-half million cubic yards.

California has always been noted for the peculiarities of its climate and vegetation. As the latter is the result of the farmer it follows that not only do we have the vegetation of the tropics and the temperate zones commingled, but also there are particular species of trees that are found only within the borders of the state.

Among these is the Monterey Cypress, which is found exclusively in the county of Monterey. And another is the Torrey Pine, which is still more restricted in the area in which it is found, being confined to a narrow belt a few miles long on the coast near the south of the Soledad River just north of San Diego and on the island of Santa Rosa, California. This is the least widely distributed pine tree in the United States. Another plant, the western iron wood, which is the only tree species of the saxifrage family of plants, is found only in the small coast islands of Southern California, is said to be the rarest plant in America.

While these are the rarest specimens and are perhaps the remains of species that were once more widely distributed, the big trees of the Sierras themselves are purely local products. These rare trees and plants combined with the picturesque mountains and skies gives California an individuality that has made it justly famous the world around.

The Southern Pacific Company has made application to the Railroad Commission for permission to raise \$30,000,000 by note issues in California. This is to be a part of a 48 million dollar expenditure on the lines in California and Oregon. This is intended to double track the system in many places, for the erection of terminal stations and the construction of ferry boats. This is certainly a substantial improvement and a big expenditure in betterments. These improvements are badly needed and if the road is to get ready to handle the exposition crowds it is time improvements should begin.

LEVEES AND FLOOD CONTROL.

Considerations Bearing on Proposed Methods of Protection for Regions
Exposed to Possible Flood Conditions.
By William A. Feeney.

After millions of dollars have been spent in the construction of levees to protect cities and towns along the Ohio, Mississippi, and other rivers of the country from floods, many leading citizens come forward to denounce the entire system as a failure. While some favor a return to the way of nature, without protection other than that the rivers themselves afford in spreading out to a greater width than the levees now permit, there are those who advise the more conservative plan of setting the levees back a mile or two; while still others claim that, in view of the vested interests already created in redeemed lands and the improvements thereon, the maintenance of the levee system must be continued.

A specific example of the situation is found in the perilous position in which Cairo, Ill., found itself when the Ohio River swelled to a stage of 54.8 feet and the Mississippi River on the other side was at an equal stage. At the water front, the street was $2\frac{1}{2}$ feet below the crest of the flood and on the next thoroughfare back, Commercial avenue, the street level was $12\frac{1}{2}$ feet below the water line. The water was held in check from flooding this city of 22,000 persons by a levee 55.5 feet high, reinforced by a superstructure 25.7 inches high.

The levee was strongly built, and held out when others nearby gave way and flooded the entire country from the hills of Kentucky to the hills of Missouri. The little Illinois city was the only dry spot for miles either way in this vast territory of which it is the center. Its citizens were so alarmed that the sheriff called for aid, and the Governor sent soldiers and sailors to help protect it.

The problem of levee construction bears on the interests of all flood-threatened sections in general, but its special pertinence in relation to Cairo arises from the fact that plans have been made for the erection there of a 60-foot levee at a cost of many thousands of dollars. The recent flood swooped down before Cairo had time to build its new levee; and now its citizens are debating whether or not to follow a different system from that generally employed.

Mr. H. H. Halliday, cement dealer and prominent citizen in that section of Illinois, has gathered information on the effect levees have on present conditions, and he attributes much of the recent inundation throughout the country to them. He holds that the levees built by government engineers, States, municipalities, and even individual corporations have made conditions worse than better. He has two remedies. The better one, in his opinion, would be to put the present levees back a mile or two; the other is to abolish all levees, and go back to old conditions.

"The proposition of levee building has become serious, and grows more so each year," declares Mr. Halliday. "I doubt if any city can feel safe with any levee at the present proximity to the normal river tide at which they

are built. The waters of the Ohio have been coming higher and higher at Cairo with the increase in the number of levees along that river. There is a question if even a 60-foot levee would be a protection if the levees continue to multiply in the future as they have in the past, unless they are built farther back from the river bed.

"The recent experience of Cairo with high waters recalls vividly to my mind the old days when there was no levee. Then the river flooded, to be sure, at times; but it never reached any great stage as it does now, and the population could turn out and hold it in check with bags of sand and the like. The reason for this was that the river was not confined in a small avenue securely locked in by levees on all sides. It spread out as the waters of rains and snows increased in volume. When it reached a city like Cairo, one felt that it would never rise to a stage sufficient to flood reasonably high places. It covered the bottoms with water, which was to be expected; but it relieved sections that are now threatened annually by floods.

"The rivers, under the present levee system must provide room for their added waters by increasing stages, instead of the old way of spreading out. These increased stages increase in proportion, so it seems, as more levees are built. The only way that the stage is held down is when a weak point in some levee gives way, and then the country for miles around is flooded many feet deep. The flood is far worse than was that in the old days when the river spread its banks but kept at a less stage.

"I think that the present system is a mistake, and the experiences of so many flooded sections this year would tend to prove it. Of course, there is very little likelihood that we shall go back to the old way of nature, for we would have extreme difficulty, for one thing in getting back. But I do believe that the question of moving the levees back a mile or more should receive serious consideration. The expense involved would be far less than the damage that is caused by floods which might be lessened.

"If the rivers were allowed to spread out a mile or more in flood times, the danger to the cities and towns along their banks would be greatly diminished. It is a vast engineering problem that has not yet been satisfactorily solved."

There are many persons, including well-known engineers, who agree with the view-point expressed by Mr. Halliday. They think that something should be done. What this something is, must come only after considerable study of the problem and the possible results. Cairo, if the sentiment of her citizens can be taken as a barometer, will take a leading part in the new move for efficient levee building. No one seems to think it probable that levees will ever be abolished; but they hope that a better system of building them will be found.

The massive walls of concrete may be moved or replaced by others built

farther back, if public sentiment along the rivers crystallizes as it now promises to do. It will be a problem worth watching in the solution.

ARTISTIC DESIGN IN ENGINEERING

An engineer fails in the fulfillment of his duty in so far as his works are destructive to the value of surrounding property, detrimental to the welfare of the community, or unnecessarily offensive to the senses or sensibilities of those who are compelled to live with these works as part of their environment.

This was the opinion of Prof. Archibald Barr, expressed in his presidential address before the Engineering Section of the British Association of Architects.

There were injuries, he said, which engineers might inflict upon the community, other than those to health and physical comfort. Everyone, even the least cultured, had some sense of the beautiful and the comely, and was affected by the aspects of his environment more than himself could realize. The engineer, then, whose works needlessly offended even the most fastidious taste, was acting contrary to the spirit of his profession at its best. There has been far too great a disregard of aesthetic considerations in the everyday work of the engineer, who usually took a too exclusively utilitarian view of his calling. A greater regard for artistic merit would not necessarily lead to extravagance, but, in many cases, would conduce to economy and efficiency. There was, or ought to be, a closer connection than was usually recognized, between the work of the engineer and that of those to whom was usually restricted the title of "artist." There was no great gulf, fixed between the fine arts and the utilitarian arts in earlier times. Such men as Michael Angelo, Raphael, and Leonardo da Vinci might be claimed as masters in the arts of construction as well as in those with which their names were usually associated. The separation of the beautiful and the useful was quite a modern vice.

There was an old maxim to the effect that the designer should ornament his construction and not construct his ornamentation. This was an admirable rule so far as it went, but it should be subordinated to a higher rule, that he should ornament his structure only if he lacked the skill to make it beautiful in itself. A structure of any kind that was intended to serve a useful end, should have the beauty of appropriateness for the purpose it was to serve. It should tell the truth, and nothing but the truth, and if its character were such that it could be permitted to tell the whole truth, so much the better. It should be beautiful and not beautified. The practice of resorting to extraneous adornments to minimize crudities of structural scheme, had its rise in the comparatively recent times when culture and taste were at their lowest and it was specially characteristic, not only of earlier times, but of the earlier

stages of the design of any particular product. It has already disappeared in some cases, and would continue to disappear from the practice of the arts of construction as skill and taste developed.

It was constantly remarked, and with justice, that steel bridges, as a class, were much less pleasing to the eye than those of stone. The reasons for the contrast in artistic merit were not far to seek. The building of stone bridges was an ancient art; the survival of the fittest, and selection—even with little creative skill on the part of the designers—would have led to the development of types having, of necessity, at least the elegance of fitness. But further, this art had come down through the times when artistic and utilitarian aims had not yet been divorced in the practice of the crafts; and further still, the practice of building in stone had been in the hands of architects, as well as of engineers, and architects were expected to be artists, and were trained as such. On the other hand, construction in steel was a very modern art; and it had been in the hands of engineers who usually neglected, if they did not despise, the study of fine arts. But why had architects, with their artistic training, not succeeded in producing structures in steel as admirable as those they designed in stone? Partly, no doubt, because they were hampered by tradition, and partly—if a common engineer might venture the criticism—because, as a rule, they had not sufficiently mastered the science of construction, and had been too much addicted to taking the easy course of adopting a decorated treatment instead of striving to secure elegance of structural scheme as such; and decoration, at least on anything like traditional lines, was wholly incompatible with the best possibilities of steel as a structural material. Progress was being made in the art of designing efficient and graceful structures in metal; but the best results could be attained only by a designer who had a thorough scientific and technical knowledge of the properties of steel and the processes of its manipulation, on the one hand, and cultured artistic sense and capacity on the other.

There is much in these remarks that bears on the problem of artistic design in concrete.

THOUGHTS ON FURNACE HEATING.

In commenting upon the question as to the necessity of accuracy and of rules to replace the general haphazard methods in vogue, especially in reference to furnace heating, a contractor points out that it must ever be borne in mind that rules and computations will never take the place of brains and experience.

The ratio of loss of heat units from a building as used in computations for steam and hot water heating will answer just as well as for warm-air heating. We might say in passing that the establishment of the average heat unit loss from buildings did not absolutely establish the amount of steam or hot water radiation required to heat any and every building. There is still a large margin either way left for the good sense and experience of

the fitter, engineer or boss plumber to get busy on in order that the plant when put to the actual test may give satisfactory and economical results.

It may be conceded that in furnaces designed for warm-air heating greater leeway in construction is possible than in a steam heater for the reason that in the latter it resolves itself primarily into a question of evaporation capacity. While in air furnaces heating the air direct, quantity and velocity of air travel have a much larger range of variation with similar grate surface and comparative exposed heating surface than is the case with water, either as water or as transformed into steam. The only rating method therefore that seems practical is the actual test of each furnace as to the number of heat units it will deliver with a given amount of air supplied at a given velocity. From this data it probably would not be difficult to ascertain the figures at varying square inches of air supply and varying velocities. Whether the use of outside air reverses the cooling effect of air leakage or accelerates, it is to my mind an open question, phenomena in support of both contentions having been brought to notice.

In the selection of a furnace I have always confined myself to the two or three makes with which I have become familiar through practice. I have, however, found that in most cases a 26-inch casing furnace (for example) gives better results than, say, a 42-inch casing furnace of a cheaper output. Unfamiliar makes I have always put up to the owner or architects. "You can have whatever furnace you want! With a No. 16 Tip Top I guarantee results; with the No. 24 Slip Shod, I don't, because I don't know anything about it."

In more than three-quarters of the cases on which I have been called where complaint has been made made a handkerchief laid over the register pulled in instead of bulging out with the flow of warm air, showing conclusively that the furnace was hungry for air and naturally robbed the coldest rooms—the castings red hot, the cellar overheated and the rooms cold. Result: The owner condemns the furnace as no good. The first mechanic that comes in says that the house can not be heated by warm air and plugs for a steam job. And why? Because the steam boiler manufacturers in order to get a market for their goods have been instructing the fitter, the plumber and the hardware man how to install the plant, have been giving them the fundamentals for computing pipe sizes and the requirements of piping. Consequently, the mechanic is on surer ground as to possible results in the case of steam. In case of warm-air heating how different! The manufacturer simply puts a furnace on the market, in some cases he will claim that it will heat a certain number of cubic feet, in other cases not. No attention whatever is paid either in instructions or otherwise concerning piping or method of setting. He, the manufacturer, has never before interested himself in the results, and the results have never interested themselves in the manufacturer or his goods further than to condemn them. The furnace, however, is only one part of the job. The installation makes or mars the reputation of the furnace.

In determining pipe sizes I divide the cubic contents in feet by 30 and the quotient in square inches has been the smallest area of pipe (when not impossible on account of constructional difficulties) for the room. However, I never use smaller warm-air pipe than 8-inch. Registers I make 40 per cent larger in area than that of the warm-air pipe leading to it. This allows the fretwork construction.

I always use a pit under the furnace when possible. If a pit cannot be used the cold air duct is provided with a deflecting shield to throw the cold air toward the opposite side of the furnace. The cold air supply must be at least 75 per cent of the area of the combined warm-air pipes. Due regard is always given to rooms with two or three sides exposed and to long runs by increasing the size of the pipe. Where runs are unusually long the trunk main line system is employed. Inside air supply I have only used for its circulating properties, where long halls form a pocket or where air pressure from outside interfered with the flow of warm air from the furnace into the room. The latter condition is often found in flimsily built houses and can usually be ascertained by air currents moving along the floor toward the register.—Building Age.

AUTOMATIC STORAGE HEATERS.

For the last year the demand for automatic water service has been rapidly increasing until now even the less pretentious homes demand this new convenience. The Electric Weld automatic storage system of gas water heating is comparatively new in the local field but the rapid strides it is making indicate that it is destined to take a prominent place. The storage feature is one that appeals, for it does not restrict the amount of hot water that can be drawn, the only limit to the volume of hot water obtainable being the size of the faucets. The flow of gas is controlled by a moment thermostat, which is operated by the temperature of the water in the bottom of the boiler. The cold water displacing the hot water which has been drawn off, operates the automatic valve, allowing sufficient gas to flow through at the rate of 60 feet per hour to heat the same amount of water as has been drawn; it then closes, leaving only the small pilot light burning, ready for the next operation. The boiler is doubly insulated with asbestos and oak wood lagging, insuring the same efficiency as is had with the thermos bottle.

These heaters are made for all requirements from the small bungalow size to the large hotel or apartment sizes, ranging from 18 gallons to 500 gallons. Sizes up to 66 gallons are operated by a single burner; from 82 gallons to 500 gallons are equipped with two or more burners, according to size. The multiple boiler, as the large sizes are called, are particularly efficient where a large service is required, both from the standpoint of gas consumption and where a simultaneous drain from a number of faucets occurs. The latter is covered with the storage feature and applies to all portions of the building. Electric Weld heaters are distributed by the Gas Appliance Sales Co. of America.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, E. E. Hildebrand. Mr. Hildebrand has recently purchased a lot on Larkin street near Union and will shortly start the construction of a modern apartment house. The building will be arranged to contain six apartments of four rooms and bath each. Interior will be finished in pine with some hardwood floors and elm panels. There will be either a steam heating system or gas grates. Bath rooms will be finished in cement plaster. All suites will be equipped with wall beds. The exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 4 story and base, reinforced concrete. Cost not stated. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on Hyde street near Sutter and will contain a number of two and three room suites. All apartments will have wall beds and private bath rooms. Plans provide for an automatic elevator, steam heat, a vacuum cleaning system and hot water supply. Interior finish will be of pine with some hardwood. The tile will be used in the bath rooms. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$15,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, James Ward. The building is to be erected at the southwest corner of Clay and Taylor street and will cover an area of 90x30 feet. The first floor has been arranged for four stores and upper floors will contain eight apartments of two and three rooms each. Interior will be finished in pine throughout with some hardwood floors. Bath rooms will be finished in cement plaster. All apartments will be equipped with private bath and wall beds. There will be steam heat and a hot water supply. Patent store fronts will be used. Exterior of the building will be covered with rustic and ship-lap and pressed brick veneer. Plans are complete and contracts will be let at once.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$23,000. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Annie M. Spellman. The building will be erected at the corner of 25th street and Telegraph avenue, and will be arranged for stores on the first floor and 42 rooms on the upper two floors. Suites will consist of two and three rooms with private bath. Interiors will be finished in pine with some hardwood panels. A central heating system will be installed. Bath rooms will be finished in cement plaster. All suites will have wall beds. Exterior of the building will be covered with pressed brick and cement plaster on metal lath. Construction will be

handled by E. Sommarstrom, 302 East 12th street, and is to be done by Day Labor.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$15,000. Architect, J. H. Boehrer, Delger Bldg., Oakland. Owner, Mrs. Virginia Remillard. Supt. A. Legault, Delger Bldg., Oakland. The building will be erected on 22nd street east of Grove, and has been arranged to contain six suites of two rooms and bath. Interior finish will be of pine with some hardwood veneer. Bath rooms will be finished in cement plaster and tile wainscot. A central heating system or gas radiators will be installed. All suites will be equipped with wall beds. The exterior of the building will be covered with rustic. Plans are complete and the work is now being done by Day Labor.

OAKLAND, CAL.—Apartment house, 6 story and base, brick and steel, \$70,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. This building will be erected at the corner of 12th and Grove streets, and is to cover an area of 50x100 feet. There will be seven stores on the ground floor while upper floors will be divided into 96 rooms, arranged in two and three room suites with private bath rooms. Plans provide for steam heat, elevator service, wall beds, a vacuum cleaning system and hot water supply. Interior finish will be of pine and hardwood. Bath rooms will be finished in cement plaster and tile wainscot. There will be patent store fronts. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

OAKLAND, CAL.—Apartment house, 3 story and base, \$25,000. Architect, George L. Streshley, Lick Bldg., S. F. Owner's name withheld. The building has been mentioned in these columns before when the architect was first commissioned to prepare plans. The building will contain a number of two and three room apartments on the upper floors and stores on the first floor. Interior finish will be of pine with some elm panels. There will be steam heat. All suites will have private bath rooms and wall beds. A hot water supply will be installed. Bath rooms will be finished in cement plaster. The exterior of the building will probably be covered with cement plaster on metal lath. Plans are complete and figures are to be called for at once.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base. Class C construction, \$15,000. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, Dr. E. C. Manning. Contractors, The Pozzo Construction Co., 421 Macy St., L. A. Contract price, \$45,000.

BANKS.

STOCKTON, SAN JOAQUIN CO., CAL.—Bank, 10 story and base. Class A or B construction, \$150,000. Architects, Stone & Wright, South California St., Stockton. Owners, Commercial Savings Bank of Stockton, John Raglio, President. The building will be erected at the northwest corner of Main and Sutter streets. The entire first

floor and basement will be occupied by the bank. Upper floors will be arranged for a large number of modern offices. Construction will be fireproof throughout with steel frame and walls of reinforced concrete or brick. Exterior will be faced with stone, pressed brick and terra cotta. Interior finish will be of hardwoods and metal. Marble wainscoting will be used in the halls and corridors. There will be steam heat, elevator service and a vacuum cleaning system. Metal window sash and frames are to be specified. Interior of the banking rooms will be handsomely finished in marble, tile and ornamental plaster. Special safe deposit and coin vaults will be installed. Plans are now being prepared.

REDLANDS, SAN BERNARDINO CO., CAL.—Bank and offices, 2 story and base, reinforced concrete, \$75,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, First National Bank of Redlands. The building will be erected on a corner site and will cover an area of 40x118 feet. Construction will be fireproof throughout. The entire first floor will be occupied by the bank and will be finished in pine, hardwoods, ornamental plaster and marble. A tile floor will be used. Plans provide for coin and safe deposit vaults. There will be steam heat and metal window sash and frames. Exterior of the building will be faced with artificial stone. Plans are complete and figures are now being taken.

CHURCHES.

SAN JOSE, SANTA CLARA CO., CAL.—Mission, 1 story, frame, \$3,000. Architect, none. Owner, S. Nashimure, 221 Jackson St., San Jose. The building has been designed for a mission house. Interior finish will be of pine and redwood. A maple floor will be used. Plans do not provide for a heating system. Exterior of the building will be covered with cement plaster. Plans are in the hands of the owner and work will be done by Day Labor.

LONG BEACH, LOS ANGELES CO., CAL.—Church, brick and steel. Cost not stated. Architects, Frank T. Kegley and T. Foster Ena, associated, Consolidated Realty Bldg., L. A. Owners, Roman Catholic Church, Father James A. Reardon, pastor. The building will be designed with a main auditorium seating 650 people and a smaller chapel seating 250 people. Interior will be finished in pine with maple floors. A steam heating system will be installed. Ornamental plaster is specified. Two towers of steel construction will be built. Exterior of the building will be faced with ruffled brick. Plans are complete and figures are being taken.

Contracts Awarded.

SAN FRANCISCO—Church, galvanized iron work, \$4,690. Architect, John J. Foley, 46 Kearny St., S. F. Owners, St. Joseph's Church. A contract for the galvanized iron work has been awarded to the Western Sheet Metal and Corning Works at \$4,690. This contract does not include the copper or bronze work.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Planing mill, 2 story, frame, \$2,000. Architect, none. Owner, G. Windler, 41 South Park St., S. F. The mill will be erected at the

northwest corner of 8th and Hooper streets, and is to cover a large area. No interior finish will be used. Besides the building a large amount of machinery will be purchased. Exterior will be covered with shiplap and galvanized iron. Plans are in the hands of the owner and work will be done by Day Labor.

SAN FRANCISCO—Warehouse, 3 story and base, reinforced concrete, \$50,000. Architects, Welsh & Carey, Merchants' National Bank Bldg., S. F. Owner, Richard I. Whelan. This work has been mentioned here before when plans were first started. The entire building has been leased to the American Paint and Dry Color Co. Construction will be practically fireproof. A concrete basement and first floor will be used. Fire walls will separate the main parts of the building. The front portion will be fitted up for offices and will be finished in pine and hardwoods. Exterior of the building will be faced with cement plaster. Metal window sash and frames are specified. Plans are complete and figures are being taken.

SAN JOSE, SANTA CLARA CO., CAL.—Bunk houses, 2, 1 story, frame, \$1,400 each. Architect, none. Owners, Central California Fruit Co., S. E. corner of Jackson and 7th streets, San Jose. These buildings will be erected at the company's plant and will be used for bunk houses and dining hall. Interiors will be finished in pine. The exteriors will be covered with rustic or shiplap. Plans are in the hands of the owners and work will be done by Day Labor.

SEATTLE, WASH.—Factory, 5 story and base, reinforced concrete, \$400,000. Architect, John Graham, Lyon Bldg., Seattle. Owners, Ford Motor Car Co. This building has been mentioned here a number of times before. Plans have been revised and new figures have been taken. The structure will be similar to the Ford buildings now under construction in San Francisco, Portland and Los Angeles, all of which were designed by Mr. Graham. Construction will be fireproof throughout. The building covers a large area, and will contain the company's administrative offices, warehouse, show rooms and assembling plant. Bids were opened on June 10th and a contract will be awarded before the end of this week. Separate bids were taken for the general construction, the electric work and plumbing.

FLATS.

OAKLAND, CAL.—Flats, 2 story and base, frame. Cost not stated. Architect, Henry Sherrmund, Mills Bldg., S. F. Owner, J. B. Cabana. The building will be erected at the corner of East 14th street and 9th avenue, and will cover an area of 50x100 feet. There will be four stores and entrance on the first floor. Upper floor will be arranged for four flats of three and four rooms each with private bath. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. Bath rooms will be finished in tile. There will be open fire places and tile or brick mantels. Patent store fronts are specified. Exterior of the building will be covered with V joint rustic. Plans are complete and figures are now being taken.

GOVERNMENT WORK AND SUPPLIES.

Panama Canal Lock Caissons.

The Isthmian Canal Commission will open bids July 21, 1913, under circular No. 778, for furnishing two lock entrance floating caissons and their equipment. These caissons are to be of identical design for use at the lock entrances of the Panama Canal. The contract includes the furnishing of all the material and labor necessary to make each caisson complete for its purpose, including all pumps, electrical motors, and other electrical apparatus and wiring, all piping, valves, sea chests, strainers, etc., the ventilators and electrically driven fans, the hawse pipes, mooring chains and winches, deck capstans and cranes, the skylights with the necessary fittings for opening their covers, and all other fittings necessary to complete the caissons in accordance with accompanying drawings and specifications.

The principal dimensions of the caissons are as follows: Length between vertical ends, 112 feet 6 inches; length, extreme, 113 feet 10 inches; depth at side, 65 feet; breadth, moulded, 35 feet; breadth at top of deck, 18 feet; draught, light, 32 feet, draught, extreme, 61 feet.

Each caisson will be equipped with a pumping system for unwatering the lock chambers. This will consist of 4 20-inch diameter vertical centrifugal Volute pumps, placed about 11 feet 6 inches above the keel. They will be driven by electric motors located on the operating deck. The piping system is to be arranged so as to enable the operation of the suction or discharge to take place from either side of the caisson. Two of the pumps will have additional pipe fittings for flooding or unwatering the interior of the caisson. The valves, motors, etc., will, as a rule, be manipulated from the operating deck.

Rooftop Post Exchange, Fort Yellowstone.

All bids received for rooftoping the post exchange building at Fort Yellowstone, Wyo., have been rejected and instructions given on May 17 to readvertise the work.

Lamps and Carbons, Reclamation Service.

Abstract of bids, advertisement 599, arc lamps and carbons, Sun River project, opened at Los Angeles, Cal.:

Item 1, 5 arc lamps; 2 300 pair carbons; 3 years; 4 additional carbons.

General Electric Co., Los Angeles, Cal., item 1, \$172, Lynn, Mass., 3 days; 2, \$45 for 300 carbons, Lynn, Mass., 3 days; 3, 1; 4, 15c each, Lynn, Mass.

Westinghouse Electric and Manufacturing Co., Los Angeles, Cal., item 1, \$175, Gilman, M. from E., Pittsburgh steel, 2, \$51, East Pittsburgh, Pa., immediate; 3, 1; 4, 17c per pair, East Pittsburgh, Pa.

The Adams-Bengall Co., Cleveland, Ohio, item 1, \$187.50, Cleveland, Ohio, 3 days; 2, \$60 for 300 carbons, Cleveland, Ohio, 3 days; 3, 3; 4, 20c or less, each, Cleveland Ohio, 2 per cent discount, 10 days.

Prospective Bidders.

Specifications for work under the office of the supervising architect have been furnished to the following firms in addition to those previously noted in these columns:

Grand Junction, Colo., Construction June 24.

Connors Bros. Co., Lowell, Mass.
Hiran Lloyd Building and Construction Co., Odd Fellows Building, St Louis Mo.

J. E. & A. L. Pennock, Land Title Bldg., Philadelphia, Pa.

J. H. Wiese, Omaha, Neb.
King Lumber Co., Charlottesville, Va.
J. J. Lumsden, Canon Block, Grand Junction, Colo.

Honolulu, H. T., Construction, June 20.
King Lumber Co., Charlottesville, Va.
Wm. H. Maxwell, Auburn, Ind.

P. J. Carlin Construction Co., 1 Madison avenue, New York city.

J. E. & A. L. Pennock, Land Title Building, Philadelphia, Pa.

Grant Fee, San Francisco, Cal.
Southern Construction Co., Lowman Bldg., Seattle, Wash.

The Witteman Co., Buffalo, N. Y.
W. N. Concannon, San Francisco, Cal.

Yards and Docks.

Specifications for work under the bureau of yards and docks, Navy Department, have been furnished to the following firms in addition to those previously mentioned in these columns:

Pearl Harbor Building, June 28.
Spaulding Construction Co., Portland, Ore.

Crane Co., Washington, D. C.
W. N. Concannon, San Francisco, Cal.
Carnegie Steel Co., Philadelphia, Pa.
Connors Bros., Lowell, Mass.

Pearl Harbor, Gunners' Quarters, June 28.

Spanning Construction Co., Portland, Ore.

Crane Co., Washington, D. C.
Connors Bros., Lowell, Mass.
Carnegie Steel Co., Philadelphia, Pa.
W. N. Concannon, San Francisco, Cal.

Puget Sound, Cranes, June 21.
General Electric Co., Schenectady, N. Y.

Cutler-Hammer Mfg. Co., Milwaukee, Wis.

Niles-Benent-Pond Co., 111 Broadway, New York city.

Curtis Pneumatic Machinery Co., St. Louis, Mo.

Pawling & Harnischfeger Co., Milwaukee, Wis.

Manning (Maxwell & Moore, 85 Liberty street, New York city.

J. H. Schneider Iron Co., National Bank Bldg., Washington, D. C.

American Hoist and Derrick Co., St. Paul, Minn.

Morgan Engineering Co., Alliance, O.
Cyclops Iron Works, 847 Folsom street, San Francisco, Cal.

Butte Engineering and Construction Co., 687 Howard street, San Francisco, Cal.

Gas Generators.

Bids were opened by the lighthouse inspector, 18th district, San Francisco, Cal., as follows for furnishing three generators for acetylene gas:

George Breck, 70 Turk street, San Francisco, Cal., \$1,425; accepted.

J. R. Colt Co., \$1,500.

Pearl Harbor, H. T. Oil Tank.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for a steel fuel-oil tank to be constructed at the naval station, Pearl Harbor, H. T.:

Reeves Bros. Co., Alliance, Ohio, \$25,780.

Petroleum Iron Works Co., Sharon, Pa., \$21,500.

Treadwell Construction Co., Midland, Pa., \$20,250 and \$20,250 (alt.).

Camden Iron Works, 400 Chestnut St., Philadelphia, Pa., \$27,000.

Ritter-Conley Mfg. Co., 55 Water street, Pittsburgh, Pa., \$22,110.

Chicago Bridge and Iron Co., 10500 Throop street, Chicago, Ill., \$25,800.

Oil-Burning Apparatus, Fort Rosecrans.

The contract for constructing pipe line and installing oil-burning apparatus at Fort Rosecrans, Cal., has been awarded to S. F. Johnson Co., of San Diego, Cal., at \$6,205.

U. S. Marine Barracks, Cell Work.

The contract for furnishing eight steel cells, one door and four window grills for the U. S. Marine Barracks, navy yard, Mare Island, will be made to the Van Dorn Iron Works, Cleveland, Ohio, at \$1,156.

Reclamation Work.

The Reclamation Service is asking for proposals for furnishing sluice and penstock gates and accessories for the Elephant Butte dam, Rio Grande project, New Mexico-Texas. The bids will be opened at the office of the Reclamation Service at Elephant Butte, New Mexico, on June 25, 1913.

Pocatello, Idaho, Construction.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for the construction, complete, of the U. S. post office and court house at Pocatello, Idaho:

Palmberg & Mattson, Astoria, Ore., limestone, \$97,200; sandstone, \$97,200.

George A. Whitmeyer & Sons, Ogden, Utah, sandstone, \$116,622.

Hiram Lloyd Building and Construction Co., Old Fellows Bldg., St. Louis, Mo., limestone, \$109,254; sandstone, \$112,254.

Campbell Building Co., Salt Lake City, Utah, limestone, \$101,024; sandstone, \$99,524.

William H. Maxwell, Auburn, Ind., limestone, \$106,627.

Whitway-Lee Construction Co., Boise, Idaho, limestone, \$93,300; sandstone, \$94,445.

W. D. Lovell, Minneapolis, Minn., limestone, \$99,900.

Electric Traveling Crane.

An advertisement appears elsewhere in this issue calling for bids to be opened on June 21 at the bureau of yards and docks, Navy Department, for furnishing electric traveling crane at the navy yard, Puget Sound, Wash. The contract covers 1 20-ton, 4-motor, with 5-ton auxiliary; 1 5-ton, 1-motor, 1 3½-ton, 3-motor traveling bridge crane and 1 5-ton, 3-motor traveling wall crane, with trolley wires and support complete. The crane shall have the following dimensions: 20-ton crane, span 51 feet 7 inches, height from floor, 41 feet; 5-ton crane, span 27 feet 8 inches; height from floor 18 feet 3 inches; 3½-ton bridge crane, span 27 feet 8 inches, height from floor 28 feet 3 inches; 5-ton wall crane, outside clearance, 23 feet 6 inches, trolley radius from 3 feet to 20 feet 6 inches, maximum hoist 19 feet 6 inches, height from floor to top of crane rails 20 feet 5½ inches; all runways 335 feet.

Supplemental Naval Bids.

The following supplemental bids were received by the bureau of supplies and accounts, Navy Department, Washington, D. C., for class 33, schedule 5301, original date of opening April 29:

Bid 40. A. S. Carmen, Selby, Cal., \$1-346.80.

51. Charles Este Co., Philadelphia, Pa., \$1,170.

52. G. Elias & Bro., Buffalo, N. Y., \$1,274.

56. Geo. S. Fowler, Washington, D. C., \$1,164.55.

175. Van Arsdale-Harris Lumber Co., San Francisco, Cal., \$1,397.50.

HALLS AND SOCIETY BUILD.

OAKLAND, CAL.—Museum and office addition, frame construction. Cost not stated. Architect, John J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Plans for the removal of the present office building to a new location and for the construction of new foundations for the same, and for the construction of a one-story frame addition to the present Public Museum building have been completed and figures are now being called. Bids will be opened on June 12th by the Library Directors. Plans can be secured from Supervising Architect Donovan. An official prospectus for the work appears in this issue.

Contracts Awarded.

TILLAMOOK, ORE.—Lodge hall, 2 story and base, brick and steel, \$22,500. Architect, E. E. McClaran, Lumber Exchange Bldg., Portland. Owners, Tillamook Old Fellows Hall Association. Contractor, E. B. White, Lumber Exchange Bldg., Portland. Contract price, \$22,486.

ANAHEIM, ORANGE CO., CAL.—Lodge hall, 2 story and base, brick, \$31,324. Architect, Fred H. Eley, Hervey-Pinley Bldg., Santa Ana. Owners, Masonic Temple Association of Anaheim. Contractor, J. S. Hilend, Adelaide St., Anaheim. Contract price, \$31,324.

HOSPITALS.

STOCKTON, SAN JOAQUIN CO CAL.—Hospital, 2 story and base, reinforced concrete. Cost not stated. Architect, Walter King, Elks' Bldg., Stockton. Owners, St. Joseph's Society. The building has been designed with a main building and two wings. Construction will be fireproof throughout. The building will contain a number of public wards and also private rooms. A large and modern operating room and hydrotherapeutic will be features of the institution. Plans provide for steam heat, elevator service, vacuum cleaning and hot water system. Interior will be finished in pine and hardwoods. Marble and tile will be used extensively. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SEATTLE, WASH.—Administration building, 5 and 2½ story and base, brick and steel, \$100,000. Architect, Daniel Huntington, Seattle. Owners, City of Seattle. This is the first building of a large project, funds for which are now available. The main structure will be five stories in height and cover an area of 73x56 feet. The two wings will be two stories high and cover an area of 50x32 feet. Interior will be

finished in pine, hardwoods, white enamel and tile. There will be steam heat, vacuum cleaning system and elevators. The exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures will be called for at once.

HOTELS.

SAN FRANCISCO—Hotel, 3 story and base, frame, \$18,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, A. Hinkelmann. The building will be erected on 8th street south of Howard, and will have a street frontage of 30 feet and a depth of 130 feet. The first floor will be arranged for stores. Upper floor will contain 48 guest rooms, several baths and the lobby. Interior finish will be of pine throughout. Plans provide for a hot water system. The exterior of the building will be covered with rustic and shiplap. Plans are complete and a contract will be let within a few days.

SAN FRANCISCO—Hotel, 7 story and base. Class C construction, \$60,000. Architect Mattanovich, David Hewes Bldg., S. F. Owner, Mrs. Mary A. Hefferman. The building will be erected on Taylor street south of Turk and will have a frontage of 45½ feet and a depth of 76½ feet. The ground floor will contain the hotel lobby and stores. Upper floors will be divided in single rooms and baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service and a vacuum cleaning plant. Ornamental plaster will be used in the lobby and office. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor under the direction of Beach and Hefferman, David Hewes Bldg. All materials are now being purchased.

RIO VISTA, SOLANO CO., CAL.—Hotel and stores, 2 story and base, brick or reinforced concrete. Cost not stated. Architect, Bernard J. Joseph, First National Bank Bldg., S. F. Owners, Rio Vista Hotel Co. The building is to be erected at the corner of 2nd and Main streets, and will have a frontage on one street of 120 feet and of 80 feet on the other. There will be five stories on the first floor besides the hotel entrance and lobby. Upper floor will contain 31 guest rooms and baths. Plans have been prepared with foundations heavy enough to support three stories. The type of construction has not been fully determined. Interior will be finished in pine throughout. There will be steam heat and a hot water system. Exterior will probably be faced with cement plaster. Plans are being prepared.

FRESNO, FRESNO CO., CAL.—Hotel, 2 story and base, brick and steel, \$20,000. Architects, Swartz, Hotchkins & Swartz, Fresno. Owner, C. W. Musick. The building will be erected on J street adjoining the Young Women's Christian Association, and will cover an area of 50x125 feet. The first floor will be arranged for a number of stores. Upper floor will be subdivided into single rooms. Interior finish will be of pine throughout. Patent storefronts are to be specified. Exterior of the building will be faced with pressed brick. Leases are now being made on the stores. Plans are being prepared.

LONG BEACH, LOS ANGELES CO., CAL.—Hotel, 10 story and base, reinforced concrete, \$700,000. Architects, Kysor & Biggar, Wright and Callender Bldg., L. A. Owners, Oxford Investment Co. The building is to be erected at the corner of Ocean and Pine avenues and will cover a large area. Preliminary plans show a total of 700 rooms, all of which will have connecting baths. Construction will be fireproof. Plans are only in the preliminary stage and details of the building cannot be given at this time. Further mention will be made in these columns as the plans progress.

EL CENTRO, IMPERIAL CO., CAL.—Hotel, 4 story and base, reinforced concrete and brick, \$150,000. Architect, one. Owners, Bell Development Co., an Nuyes Bldg., L. A. The building is to be erected at the corner of 7th and Main streets, and will cover an area of 55x132 feet. Several stores, hotel lobby and offices, public dining room and kitchen will occupy the first floor. Upper floors will contain a total of 132 guest rooms and baths. There will be team heat, elevator service and a vacuum cleaning system. Interior finish will be of pine. Tile floor will be used in the lobby. Exterior of the building will be faced with cement plaster. Plans are being prepared.

Contracts Awarded.
FRESNO, FRESNO CO., CAL.—Hotel, 3 story and base, brick and steel. Cost not stated. Architect, Edward T. Bulkes, Crocker Bldg., S. F. Owner, Judge Frank Short. Contractors, Trewitt & Shields, Fresno. Contract price not stated. Note: The building will cover an area of 75x150 feet and will be arranged for stores on the first floor and rooms above.

LODI, SAN JOAQUIN CO., CAL.—Hotel, 4 story and base, brick and steel, \$90,000. Architect, Ralph P. Morrill, 14 Fellows Bldg., Stockton. Owner, Whitaker, Galt. Contractor, Fred G. Ry, Lodi. Contract price, \$50,000.

SAN DIEGO, CAL.—Hotel, 3 story and base, reinforced concrete. Cost not stated. Architect, Harrison Albright, Union Laughlin Bldg., L. A. Owners, D. and A. B. Spreckels. Contractors, Urter Construction Co., Spreckels Bldg., San Diego. Contract price not stated. Note: The building will cover an area of 200x150 feet and will contain a total of 400 guest rooms.

SEASIDE, ORE.—Hotel addition, time and stone. Cost not stated. Architect, F. Manson White, Henry Bldg., Portland. Owner, Dan J. Moore. Contractors, Martin & Reisner, Woodlawn. Contract price not stated. Note: The new architect has prepared plans for a number of beach houses costing from \$200 to \$5,500, which are also to be erected at Seaside.

LIBRARIES.

HOOD RIVER, ORE.—Library, 2 story and base, brick, \$17,500. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owners, Hood River Carnegie Library Association. The building has been designed in the classic style and will cover an area of 55x75 feet. There will be two public reading rooms, large stack rooms, librarian's office and toilets. Interior finish will be of pine and hardwoods with maple floors. A central heating system, probably steam, will be installed. Considerable ornamental iron will be used.

The exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans will be completed within the next twenty days and bids will be advertised.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Mines Building, frame construction. Cost not stated. Architect, Director of Works, P. P. I. E. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. The plans and specifications for the Mines building have been completed and are now out for figures. Plans may be secured from the Director of Works. Bids will be opened by the Buildings and Grounds Committee on June 12. An official proposal appears in another column of this issue. Separate bids are being taken for the general construction and for the installation of the plumbing, gas and sewer pipes.

SAN FRANCISCO—Pile foundations. Cost not stated. Architect, Director of Works, P. P. I. E. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids are now being taken by the Buildings and Grounds Committee for the pile foundation for the Main Entrance Tower. Bids are asked on a unit price per linear foot. Plans can be secured from the Director of Works. Bids will be opened on June 13th. An official proposal appears in another column of this issue.

SAN FRANCISCO—Varied Industries Building, plumbing on same and outfall sewer. Cost not stated. Architect, Director of Works, P. P. I. E. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Three sets of figures were opened Wednesday morning by the Building and Grounds Committee of the Panama-Pacific International Exposition Co. Streshley, Freeze & Peterson were low for the general construction of the Varied Industries Building at \$195,379, if the Exposition Company furnishes the lumber and at \$266,982 if the contractor furnishes the lumber. F. W. Snook Co., were low on the plumbing at \$13,750. Bids opened for the construction of the Presidio Sewer Outfall show Michael Murphy low at \$5,700. No contracts were awarded. A complete list of these figures appears under the heading of San Francisco in this issue.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN LEANDRO, ALAMEDA CO., CAL.—Station, 1 story, frame, \$1,500. Architect, W. H. Judson, Albany Bldg., Oakland. Owners, Broadmoor Tract. A small station is to be erected at the main entrance to the tract at once. Design is in the Mission style. Bids are now being taken for the carpentry work, plastering, sheet metal work, plumbing, painting, mill work and electric work. Mr. Judson will let all contracts separately.

STOCKTON, SAN JOAQUIN CO., CAL.—Freight depot, 2 story and base, reinforced concrete, \$100,000. Architect, Engineering Department Santa Fe Railroad. Owners, Santa Fe Railroad. An amount of \$100,000 has been set aside for the construction of this build-

ing which is to cover two city blocks. A site at the corner of California and San Joaquin streets has been secured and the company will ask the city of Stockton to close Sutter street. Construction will be fireproof. Besides the freight sheds the building will contain the offices of the company on the upper floor. Construction will be fireproof. Exterior will be faced with cement plaster. Work will be started as soon as plans can be completed.

LOS ANGELES, CAL.—Passenger station, 1 and 2 story, Class A construction. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Southern Pacific Co. The new passenger station will be erected at 5th and Central streets and will be 580 feet long and 70 feet wide. The central portion of the building will be but one story high, 50 feet wide and is 220 feet long and will be of Class A construction. The two wings, each two stories high will be of Class C construction. Plans include steam heat, metal window sash and frames, tile floors and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for shortly.

RESIDENCES.

SAN FRANCISCO—Bungalow, 1½ story and base, frame, \$2,000. Architect, none. Owner, N. J. Nelson, 4278 23rd Ave., S. F. The dwelling will contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living room and dining room. There will be a large open fire place with brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

SAN FRANCISCO—Residences, 6, 2 story and base, frame, \$2,500 each. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. These dwellings will be erected on the west side of 15th avenue north of Clement street, and each has been designed for a six-room house with bath. Interior finish will be of pine and some hardwood veneer. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be open fire places and brick and tile mantels. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with rustic, cement plaster on metal lath and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor. Mr. Nelson is now in the market for the val-

rious materials.
SAN FRANCISCO—Cottages, 3, 1 story and base, frame, \$1,250 each. Architect, none. Owner, G. Cavaglieri, 592 Potrero Ave., S. F. These dwellings will be erected on San Bruno avenue near 19th street, and each will contain five rooms and bath. Interiors will be finished in pine throughout. There will be open fire places and tile or brick mantels. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,000. Architect,

Joseph M. Geary, 23rd and Folsom Sts., S. F. Owners, Parkside Home Builders. The dwelling will be erected on the west side of 21st avenue south of Taraval street, and has been designed for a seven-room house with bath. Interior finish will be of pine with some hardwood panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with shingles. Plans are complete and the work will be done by Day Labor under the supervision of the architect.

PIEDMONT ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,600. Architect, W. H. Judson, Albany Bldg., Oakland. Owner, Mr. Embury. The house has been designed for a seven-room dwelling with all modern conveniences. The interior will be finished in pine and hardwood with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and an open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared for the work.

LIVERMORE, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$8,000. Architect, none. Owners, Coast Manufacturing and Supply Co. and T. W. Norris. The dwelling will be erected on property adjacent to the new plant of the company. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, Louis Engler, 2721 Haste St., Berkeley. The dwelling has been designed for a nine-room house with bath and sleeping porch. Interior finish will be of pine throughout. Some hardwood floors are specified. Plans provide for furnace heat and open fire place. Mantel will be of tile. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor. He is now purchasing all materials.

FRUITVALE, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$2,100. Architect, W. H. Judson, Albany Bldg., Oakland. Owner, Mr. Hautermann. The dwelling has been designed for a five room house with bath. Interior finish will be of pine throughout. Hardwood floors will be used in two rooms. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic. Plans are now being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owners, United Home Builders, 1762 Broadway, Oakland. The dwelling will be erected on 4th avenue and has been designed for a seven-room house with bath. Interior will be finished in pine and some hardwood panels. Hardwood

floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A vacuum cleaning system is also specified. Plans are complete and the work will be done by Day Labor.

LIVERMORE, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$18,000. Architect, none. Owners, Coast Manufacturing and Supply Co. and Albert M. Merritt. This dwelling is to contain twelve rooms, baths and sleeping porch. Interior will be finished in pine and hardwoods. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Peter Fredrickson, 3021½ Fulton St., Berkeley. The dwelling has been designed for a six-room house with bath and sleeping porch and will be erected on Yolo street. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalow, 1½ story and base, frame, \$2,500. Architect, Emily E. Williams, 2406 Sacramento St., S. F. Owner, Walter McIntire, South 16th St., San Jose. The house will contain six rooms and bath. All interior finish will be of pine or redwood. Open fire place with brick mantel will be used in the living room. Hardwood floors will be used in the principal rooms. The exterior of the house will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

STOCKTON, SAN JOAQUIN CO., CAL.—Residences, frame construction. The following Day Labor jobs are reported as about to be started in Stockton: Mrs. H. Mowry, 1308 East Main St., 1 story frame cottage, \$1,200; P. E. Ferrell & Co., 301 So. California St., 1 story frame, \$1,500; and Albert Embree, 634 East Main St., 2 story and base, \$7,500.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, P. Nelson, 30 Presidio Terrace, S. F. The dwelling is to be erected on Clement street east of 16th avenue, and has been designed for an eight-room house with bath. Interior will be finished in pine and hardwood with hardwood floors used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none.

Owner, John Rench, 1345 12th Ave., S. F. The house will be erected on 5th avenue near Judah street, and will contain seven rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and an open fire place. A large brick mantel will be used in the living room. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

SAN LEANDRO, ALAMEDA CO., CAL.—Residence and garage, 1 story and base, frame, \$6,000 and \$1,000. Architects, Newsom & Dixon, 812 Broadway, Oakland. Owner, Mr. Merrill. The dwelling will be erected in Broadmoor, and has been designed for an eight-room bungalow with baths and sleeping porch. A one-story frame garage will be erected at the rear of the lot. Interior finish of the residence will be of pine, white enamel and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. There will be an automatic water heater installed. Exterior of both residence and garage will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

VICTORIA, B. C.—Residence, 3 story and base, rock and stucco, \$30,000. Architect, A. Warren Milner, Arcade Bldg., Seattle. Owner, W. A. Lewthwaite. The dwelling will contain in the neighborhood of twenty rooms, several baths and sleeping porches. Interior will be finished in pine and hardwoods with hardwood floors in the principal rooms. There will be a central heating system, probably hot water. Bath rooms will be finished in tile. An automatic water heater will be installed. Several large open fire places with brick and tile mantels will be used. Exterior of the house will be covered with stucco and rock. Plans are being prepared.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base, frame, \$10,000. Architects, Swartz, Hotchkin & Swartz, Fresno. Owner, Frank H. Connelly. The dwelling will be erected on Peralta Way and has been designed for an eight-room dwelling with three baths. Interior finish will be of pine, oak and mahogany. Hardwood floors will be used in the principal rooms. Bath rooms will be finished in tile. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Residence, 2 story and base, frame, \$15,000. Architects, G. Lawrence Stimson Co., 1212 Avoc Ave., Pasadena. Owner, Lyman T. McFie. Contractors, G. Lawrence Stimson Co., 1212 Avoc Ave., Pasadena. Contract price, \$15,000.

SCHOOLS.

QUINCY, PLUMAS CO., CAL.—School, 1 story and base, reinforced concrete, \$30,000. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Quincy Union High School. The building will contain 8 class rooms and an assembly hall. There will be a central heating system and vacuum cleaning. Interior will be finished in pine with some maple floors. Working drawings have been approved by the Board of School Trustees and bids will be called for at once. Plans can be secured from the architect. Exterior of the building will be faced with cement plaster. Construction will be as near fireproof as funds will permit.

CAMAS, WASH.—School, 2 story and base, brick, \$30,000. Architects, Fred A. Legg and J. Kingsberry, Ainsworth Bldg., Portland. Owners, Camas School District. The building has been arranged for twelve class rooms, assembly hall, gymnasium, principal's office, chemical and physical laboratories and domestic science and manual training departments. Interior will be finished in pine throughout with some maple floors. The building covers an area of 112x73 feet. A plenum heating system will be installed. The chemical and physical laboratories and gymnasium will be located in the basement. First floor will contain four class rooms, domestic science rooms and principal's office. Upper floors will be arranged for four class rooms and the assembly hall. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Bids will be opened on June 29th.

SAN JOSE, SANTA CLARA CO., CAL.—School, 1 story and base, reinforced concrete, \$65,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Hester School District. Bids for the general construction of this building were opened on Saturday last and show Robinson & Place of Oakland low on one proposition at \$60,950, and Martin Witter low on the alternate at \$61,935. The Pacific Blower and Heating Co. were low on the heating at \$5,200, and Sonderstrom was low on the painting at \$2,250. No contracts have been awarded. A complete list of these figures appears under the heading of San Jose and the Santa Clara Valley in this issue.

SANTA MONICA, LOS ANGELES CO., CAL.—Schools, 2, 2 story and base, brick. Cost not stated. Architects, Allison & Allison, Hibernal Bldg., L. A. Owners, Santa Monica School District. One of these buildings will be erected on Central avenue and the other will form an addition to one of the present schools. Both will contain six class rooms and an assembly hall. Interior finish will be of pine with maple floors. There will be a central heating system. Metal window sash and frames are specified. The exteriors will be faced with ruffled brick. Plans are complete and bids are now being taken for the work.

FAIRMEAD SCHOOL DISTRICT, FRESNO CO., CAL.—School, 1 story and base brick, \$10,000. Architect, J. Carl Thayer, Fresno. Owners, Fairmead School District. The building has been designed for a district school and will contain two class rooms. Interior will be finished in pine throughout. Besides the class rooms plans provide for teachers' rooms, office and

toilets. The building will be heated by stoves. Exterior will be faced with cement plaster. Plans are now being prepared.

Contracts Awarded.

MAXWELL, COLUSA CO., CAL.—School, 1 story and base, reinforced concrete, \$23,250. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Maxwell School District. Contractor, Robert Trost, 26th and Howard Sts., S. F. General construction. Contract price not stated. San Francisco Blower Co., heating and ventilating. Contract price not stated.

STORES & OFFICE BUILDINGS

SAN FRANCISCO—Office building, 13 story and base. Class A construction, \$1,250,000. Architects, Ward & Blohne, Alaska Commercial Bldg., S. F. Owners, Medical Building Association, represented by Attorney Walter W. Kaufman. Preliminary plans for what is to be one of the largest and most finely appointed office structures devoted exclusively to the medical profession are being prepared. The members of the San Francisco County Medical Society, under the leadership of Dr. James A. Black and Dr. Phillip Mills Jones, have secured the northeast corner of Post and Powell streets, diagonally across from the St. Francis Hotel and will erect thereon a 13-story class A office building devoted exclusively to the use of doctors and dentists. The property has a frontage of 137½ feet on Powell street and 162 feet on Post street. While details of construction have not been fully determined it is stated that the building will contain 600 modern office suites besides special operating rooms, club rooms, as assembly hall and space for what is to be the largest medical library in the west. There will be a complete steel frame with walls of either brick or reinforced concrete, faced with pressed brick or terra cotta. Mechanical equipment will include elevator service, steam heat, vacuum cleaning system and all other modern features. Metal trim and marble wainscot will be used throughout. Leases on over two hundred of the offices have been made in the last two days. Actual construction will probably be underway inside of three or four months.

SAN FRANCISCO—Stores and lofts, 2 or 3 story, brick or concrete. Cost not stated. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Cowell Estate. The property on Clay street near the waterfront, and which has been covered since the fire with temporary wooden buildings, is to be improved with brick or concrete structures. The ground floors will be arranged for stores and upper floors for lofts or offices. Interior finish will be of pine throughout. There will be metal window sash and frames. Patent store fronts will be used. Exteriors will be faced with cement plaster or pressed brick. Plans are being prepared.

SAN FRANCISCO—Stores and billiard hall, 2 story and base, frame. Cost not stated. Architects, J. E. Kraft & Sons, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Polk street at the corner of Austin avenue, and will cover an area of 69x70 feet. The first floor will be arranged for two stores, a butcher shop and grocery store. Upper floor will be fitted up for a billiard hall. Interior will be finished in pine throughout.

There will be patent store fronts. Exterior of the building will be covered with ship-lap and cement plaster. Plans are complete and figures are being taken.

LIVERMORE, ALAMEDA CO., CAL.—Office building, 2 story and base, frame. Cost not stated. Architect, none. Owner, Coast Mfg. and Supply Co., Livermore. A two-story office building is about to be erected on the property of the Coast Mfg. and Supply Co. at the site of their new plant. Interior will be finished in pine throughout with some maple floors. There will be a central heating system. Exterior of the building will be covered with rustic. Plans have been completed and the work will be done by Day Labor. The owners are now purchasing all materials.

SEATTLE, WASH.—Stores and offices, 11 story and base, reinforced concrete, \$500,000. Architects, Howell & Stockes, Henry Bldg., Seattle. Owners, Metropolitan Building Co. It is announced that work will be started in the near future by the Metropolitan Building Co. on the long delayed Grandin Building. It has not been decided whether to let a general contract on the structure or not. The building will be erected at the corner of 4th avenue and University street, and will cover an area of 60x130 feet.

LOS ANGELES, CAL.—Stores and lofts, 13 story and base. Class A construction. Cost not stated. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Mason Estate. The building will be erected on Spring street between 7th and 8th streets and will cover an area of 60x101 feet. There will be a complete steel frame with exterior walls of brick or concrete faced with terra cotta. Interior finish will be of pine and metal. Metal window sash and frames will be used throughout. There will be three elevators, sidewalk elevators and steam heat. Floors and interior partitions will be of hollow tile and concrete. Plans are complete and will be ready for figures in about a week or ten days.

LOS ANGELES, CAL.—Stores and offices, 12 story and base. Class A construction. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners, Haas Realty Co. A site at the corner of 7th and Broadway has been secured and a building covering an area of 55x155 feet is proposed. None of the details of construction have been worked out but are to be determined within a few days. A complete description of the work will be published here as soon as possible.

PASADENA, LOS ANGELES CO., CAL.—Offices, 6 or 7 story and base. Class A addition, \$100,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Citizens' Savings Bank. The present one-story building will be remodeled for banking rooms. Upper floors will be subdivided into about 16 modern office suites. There will be steam heat, elevator service, a vacuum cleaning system and mail chutes. Metal window frames and sash will be used. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared and will shortly be ready for figures.

SALEM, ORE.—Stores and offices, 4 story and base, brick and steel, \$85,000. Architect, Aaron H. Gould, Worcester Bldg., Portland. Owner, P. R. Ryan. The building will be erected on one of

the principal corners and will cover an area of 103x108 feet. The first floor will be arranged for a number of stores and the entrance to the upper floors. Second and third floors will be subdivided into offices and the fourth floor will be fitted up for a large public hall. There will be elevator service, steam heat and metal window sash and frames. Interior finish will be of pine with a maple floor on the fourth floor. Some tile and marble will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SEALED PROPOSALS.

S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR CRUSHING BRICK AND STONE.

OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on

Wednesday, the 11th day of June, 1913, for doing the following work including the furnishing of the necessary labor therefore, to wit:

Crushing of brick and stone, cleaning of brick and removing of the stepping and curbing at present incorporated in the foundations and approaches of the old City Hall, bounded by McAllister and Larkin streets and City Hall avenue.

Progressive payments will be made. The amount of bond for faithful performance of contract has been fixed at \$10,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

PROPOSALS FOR BUILDING.

OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 18th day of June, 1913, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The general construction of the Glen Park School building, to be erected on Bosworth street, between Brompton and Lippard avenues.

Note—The work hereinabove referred to is to be paid for out of the proceeds of the sale of School Bonds of the issue of 1904, and contract will not be made or entered into until the awardee shall have purchased or caused to be purchased, bonds to the amount of the contract, together with the estimated incidental expenses.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within two hundred and forty (240) calendar days thereafter.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposal forms will be furnished gratuitously upon application at the office of the architect, and all proposals must be made upon such forms. The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

PROPOSALS FOR STEAM FIRE EXTINGUISHERS.

OFFICE OF THE BOARD OF FIRE COMMISSIONERS, SAN FRANCISCO.

In accordance with a resolution of the Board of Fire Commissioners duly passed on May 9, 1912, sealed proposals will be received in open session of the Board on Wednesday, June 18, 1913, between the hours of 5 and 5:30 p. m. for furnishing, testing and delivering

one or more steam fire engines of the 2nd size with gasoline motor tractor attached for use in the San Francisco Fire Department, in strict accordance with the specifications contained in the proposal blanks prepared by the Board of Fire Commissioners on file and copies of which may be obtained at the office of the Board of Fire Commissioners, Temporary City Hall, 1231 Market street, San Francisco, Cal.

BOARD OF FIRE COMMISSIONERS,
FRANK T. KENNEDY,
Secretary.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415, in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 10:30 A. M. Thursday, June 12th 1913, for the installation of Plumbing, Sewer and Water Pipes of the Mines Building, in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$50.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Fifty Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee,
WILLIAM H. CROCKER,
Chairman. (*)

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

M. Thursday, June 12th, 1913, for the construction of the Mines Building, in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$50.00, which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Fifty Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee,
WILLIAM H. CROCKER,
Chairman. (*)

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 415 in the Exposition Building, Pine and Battery Streets, San Francisco, California, at 10:30 A. M. Thursday, June 12th, 1913, for the Foundations for Main Entrance Tower in accordance with plans and specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$50.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee,
WILLIAM H. CROCKER,
Chairman. (*)

PROPOSALS FOR GASOLINE TRACTORS.

OFFICE OF THE BOARD OF FIRE COMMISSIONERS, San Francisco.

In accordance with a resolution of the Board of Fire Commissioners duly passed on May 9, 1913, sealed proposals will be received in open session of the Board on Wednesday, June 18, 1913, between the hours of 5 and 5:30 o'clock p. m., for furnishing, testing and delivering one (1) or more gasoline motor tractors for use in the San Francisco Fire Department, in strict accordance with the specifications contained in the proposal blanks prepared by the Board of Fire Commissioners, on file, and copies of which may be obtained at the office of the Board of Fire Commissioners, Temporary City Hall, 1231 Market street, San Francisco, Cal.

BOARD OF FIRE COMMISSIONERS,
FRANK T. KENNEDY,
Secretary.

PROPOSALS FOR BUILDING.

THE BOARD OF LIBRARY DIRECTORS of the City of Oakland, State of

California, requests and will receive bids for the furnishing of all the materials, labor and workmanship required in connection with the removal of the present Office Building to the new location, and for the construction of new foundations for same; also for the construction, erection and finish of all work for the one (1) story and basement frame addition to the present building of the Public Museum, all to be erected on the grounds of said Public Museum located on the easterly side of Oak street between Fourteenth and Fifteenth streets in the City of Oakland, Alameda County, California.

All said materials, labor and workmanship is to consist of that required by, and in accordance with the plans, drawings and specifications prepared therefor and on file in the office of John J. Donovan, the Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes, endorsed "Bid for Public Museum," addressed to the Board of Library Directors, and deposited by the bidder, or his agent, with the Board, while in session, between 8:00 o'clock and 9:00 o'clock p. m., Pacific Time, on the 12th day of June, 1913, in the office of the Librarian in the Oakland Free Library, Fourteenth and Grove streets, Oakland, California, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Board.

The contract for the furnishing of all the labor and material entering into the construction and completion of the work, including plumbing, heating, electric work and other equipment indicated on the drawings or called for in the specifications, is to be let or awarded as a whole or general contract.

No bid will be received or considered which is not accompanied by a check, certified by a responsible bank, payable to the order of F. M. Smith, Clerk, in an amount not less than ten per centum (10%) of the aggregate amount of the proposal. Said check shall be forfeited to and be retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish bonds of the forms to be provided by the City and as required by the Charter of the City of Oakland, within twenty (20) days after receiving notice of award.

A bond set of the Forms of Proposal, and of the required Affidavits, Agreement, Bonds, Acknowledgments and Specifications will be furnished contractors on demand at the office of the Supervising Architect of the City of Oakland, Security Bank Building, corner 11th and Broadway. The plans and drawings may be had at the said office of the Supervising Architect after June 5th, 1913, within a reasonable time after application, and upon the deposit of Ten Dollars (\$10.00), which deposit will be returned to the applicant when the said plans and drawings are returned to the Architect in good condition.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the

specifications and drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Board in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

MINES BUILDING—Frame construction. Cost not stated. San Francisco. Architect, Director of Works, P. J. E. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. The plans and specifications for the Mines building have been completed and are now out for figures. Plans may be secured from the Director of Works. Bids will be opened by the Buildings and Grounds Committee on June 12th. An official proposal appears in another column of this issue. Separate bids are being taken for the general construction and for the installation of the plumbing, gas and sewer pipes.

PILE FOUNDATIONS—Cost not stated. San Francisco. Architect, Director of Works P. J. E. Co., Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids are now being taken by the Buildings and Grounds Committee for the pile foundation for the Main Entrance Tower. Bids are asked on a unit price per linear foot. Plans can be secured from the Director of Works. Bids will be opened on June 13th. An official proposal appears in another column of this issue.

VARIED INDUSTRIES BUILDING—Plumbing on same and outfall sewer. Cost not stated. San Francisco. Architect Director of Works, P. J. E. Co., S. F. Owners, Panama-Pacific International Exposition Co. Three sets of figures were opened Wednesday morning by the Building and Grounds Committee of the Panama-Pacific International Exposition Co. Streshly-Freeze & Peterson were low for the general construction of the Varied Industries Building at \$195,379, if the Exposition Company furnishes the lumber, and at \$266,982 if the contractor furnishes the lumber. F. W. Snook Co. were low on the plumbing at \$13,750. Bids opened for the construction of the Presidio Outfall Sewer show Michael Murphy low at \$5,700. No contracts were awarded. A complete list of these figures appears under the heading of San Francisco in this issue.

APARTMENT HOUSE 3 story and base, frame. Cost not stated. San Francisco. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, E. H. Hildebrand. Mr. Hildebrand has recently purchased a lot on Larkin street near Union and will shortly start the construction of a modern apartment house. The building will be arranged to contain six apartments of four rooms and bath each. Interior will be finished in pine with some hardwood floors and elm panels. There will be either a steam heating system or gas grates. Bath rooms will be finished in cement plaster. All suites

will be equipped with wall beds. The exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

APARTMENT HOUSE—4 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner's name withheld. The building will be erected on Hyde street near Sutter and will contain a number of two and three room suites. All apartments will have wall beds and private bath rooms. Plans provide for an automatic elevator, steam heat, a vacuum cleaning system and hot water supply. Interior finish will be of pine with some hardwood. Tile will be used in the bath rooms. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$15,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, James Ward. The building is to be erected at the southeast corner of Clay and Taylor and will cover an area of 993x30 feet. The first floor has been arranged for four stores and upper floors will contain eight modern apartments of two and three rooms each. Bath rooms will be finished in cement plaster. All apartments will be equipped with private bath and wall beds. There will be steam heat and a hot water supply. Patent store fronts will be used. Exterior of the building will be covered with rustic and shiplap and pressed brick veneer. Plans are complete and contracts will be let at once.

BUNGALOW—1½ story and base, frame, \$2,500. San Francisco. Architect, none. Owner, N. J. Nelson, 1278 23rd Ave., S. F. The dwelling will contain six rooms and bath. Interior will be finished in pine throughout. Hardwood floors will be used in the living room and dining room. There will be a large open fire place with brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

RESIDENCES—6, 2 story and base, frame, \$2,500 each. San Francisco. Owner, F. Nelson, 30 Presidio Terrace, S. F. These dwellings will be erected on the west side of 15th avenue north of Clement street, and each has been designed for a six-room house with bath. Interior finish will be of pine and some hardwood veneer. Hardwood floors will be used in the living room, dining rooms and reception halls. There will be open fire places and brick and tile mantels. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with rustic, cement plaster on metal lath and shingles.

Plans are complete and in the hands of the owner who will do the work by Day Labor. Mr. Nelson is now in the market for the various materials.

COTTAGES—3, 1 story and base, frame, \$1,250 each. San Francisco. Architect, none. Owner, G. Cavaglieri, 592 Potrero Ave., S. F. These dwellings will be erected on San Bruno avenue near 19th street and each will contain five rooms and bath. Interiors will be finished in pine throughout. There will be open fire places and tile or brick mantels. Tile will be used in the bath rooms and kitchens. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$4,000. San Francisco. Architect, Joseph M. Geary, 23rd and Folsom Sts., S. F. Owners, Parkside Home Builders. The dwelling will be erected on the west side of 21st avenue south of Taraval street, and has been designed for a seven-room house with bath. Interior finish will be of pine with some hardwood panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with shingles. Plans are complete and the work will be done by Day Labor under the supervision of the architect.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling is to be erected on Clement street east of 16th avenue, and has been designed for an eight-room house with bath. Interior will be finished in pine and hardwood with hardwood floors used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, John Rench, 1315 12th avenue, S. F. The house will be erected on 5th avenue near Judah street, and will contain seven rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. A large brick mantel will be used in the living room. Bath room will be finished in cement plaster. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

PLANING MILL—2 story, frame, \$2,000. San Francisco. Architect, none. Owner, G. Windler, 41 South Park St., S. F. The mill will be erected at the northwest corner of 8th and Hooper streets, and is to cover a large area. No interior finish will be used. Besides the building a large amount of machinery will be purchased. Exterior will be covered with shiplap and galvanized iron. Plans are in the hands

of the owner and work will be done by Day Labor.

WAREHOUSE—3 story and base, reinforced concrete \$30,000. San Francisco. Architects, Welsh & Carey, Merchants' National Bank Bldg., S. F. Owner, Richard I. Whelan. This work has been mentioned here before when plans were first started. The entire building has been leased to the American Paint and Dry Color Co. Construction will be practically fireproof. A concrete basement and first floor will be used. Firewalls will separate the main parts of the building. The front portion will be fitted up for offices and will be finished in pine and hardwoods. Exterior of the building will be faced with cement plaster. Metal window sash and frames are specified. Plans are complete and figures are being taken.

HOTEL—3 story and base, frame, \$18,000. San Francisco. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, A. Hinkelmann. The building will be erected on 8th street south of Howard, and will have a street frontage of 30 feet and a depth of 130 feet. The first floor will be arranged for stores. Upper floor will contain 48 guest rooms, several baths and the lobby. Interior finish will be of pine throughout. Plans provide for a hot water system. The exterior of the building will be covered with rustic and shiplap. Plans are complete and a contract will be let within a few days.

HOTEL—7 story and base. Class C construction, \$60,000. San Francisco. Architect, Mattanovich, David Hewes Bldg., S. F. Owner, Mrs. Mary A. Heffernan. The building will be erected on Taylor street south of Turk, and will have a frontage of 45½ feet and a depth of 76½ feet. The ground floor will contain the hotel lobby and stores. Upper floors will be divided in single rooms and baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service and a vacuum cleaning plant. Ornamental plaster will be used in the lobby and office. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor under the direction of Beach & Heffernan, David Hewes Bldg. All materials are now being purchased.

OFFICE BUILDING—13 story and base. Class A construction, \$1,250,000. San Francisco. Architects, Ward & Blohne, Alaska Commercial Bldg., S. F. Owners, Medical Building Association, represented by Attorney Walter W. Kaufman. Preliminary plans for what is to be one of the largest and most finely appointed office structures devoted exclusively to the medical profession are being prepared. The members of the San Francisco County Medical Society, under the leadership of Dr. James A. Black and Dr. Phillip Mills Jones, have secured the northeast corner of Post and Powell streets, diagonally across from the St. Francis Hotel and will erect thereon a 13-story class A office building devoted exclusively to the use of doctors and dentists. The property has a frontage of 137½ feet on Powell street and 162 feet on Post street. While details of construction have not been fully deter-

mined it is stated that the building will contain 600 modern office suites besides special operating rooms, club rooms, an assembly hall and space for what is to be the largest medical library in the west. There will be a complete steel frame with walls of either brick or reinforced concrete, faced with pressed brick or terra cotta. Mechanical equipment will include elevator service, steam heat, vacuum cleaning system and all other modern features. Metal trim and marble wainscot will be used throughout. Leases on over two hundred of the offices have been made in the last two days. Actual construction will probably be underway inside of three or four months.

STORES AND LOFTS—2 or 3 story, brick or concrete. Cost not stated. San Francisco. Architect, Hen. H. Meyers, Kohl Bldg., S. F. Owners, Cowell Estate. The property on Clay street near the waterfront, and which has been covered since the fire with temporary wooden buildings, is to be improved with brick or concrete structures. The ground floors will be arranged for stores and upper floors for lofts or offices. Interior finish will be of pine throughout. There will be metal window sash and frames. Patent store fronts will be used. Exteriors will be faced with cement plaster or pressed brick. Plans are being prepared.

STORES AND BILLIARD HALL—2 story and base, frame. Cost not stated. San Francisco. Architects, J. E. Kraft & Sons, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Polk street at the corner of Austin avenue and will cover an area of 69x70 feet. The first floor will be arranged for two stores, a butcher shop and a grocery store. Upper floor will be fitted up for a billiard hall. Interior will be finished in pine throughout. There will be patent store fronts. Exterior of the building will be covered with shiplap and cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

CHURCH—Galvanized iron work, \$4,690. San Francisco. Architect, John J. Foley, 46 Kearny St., S. F. Owners, St. Joseph's Church. A contract for the galvanized iron work has been awarded to the Western Sheet Metal and Cornice Works at \$4,690. This contract does not include the copper or bronze work.

Exposition Co. Open Bids For Three Jobs.

Bids For The Varied Industries Building Show Streshlow-Freeze & Peterson Low at \$195,379.

Three sets of figures were opened Wednesday morning by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company. Streshlow-Freeze & Peterson were low for the general construction of the Varied Industries Building at \$195,379 if the Exposition Company furnishes the lumber and at \$266,932 if the contractor furnishes the lumber. F. W. Snook & Co. were low on the

plumbing at \$13,750. Bids opened for the construction of the Presidio Sewer Outfall show Michael Murphy low at \$5700. No contracts were awarded. The following is a complete list of all figures submitted:

General Construction Varied Industries Building.

Streshlow-Freeze & Peterson (a) \$195,379; (b) \$266,932.
J. Monk, (a) \$217,716; (b) \$293,000.
Connary-Peterson Co., (a) \$213,930; (b) \$—

Plumbing on above.

Turner Co. \$14,990
Wittman-Lyman Co. 15,796
Burnham Plumbing Co. 16,674
Kiernan & O'Brien. 14,990
Lettich Bros. 16,495
John G. Sutton Co. 14,620
F. W. Snook Co. 13,750

Presidio Outfall Sewer.

Contra Costa Constr. Co. \$7,944.00
Gorell Bros. 8,545.90
F. E. Hilmer 5,975.00
Michael Murphy 5,700.00
Central California Con. Co. 6,900.00

ANNOUNCEMENT.

By W. W. Anderson & Co.

A Malicious Falschood Nailed.

Some irresponsible parties are circulating a story to the effect that W. W. Anderson & Co., who have the contract for the Machinery Hall in the Fair Grounds, intend to abandon their contract. All such talk is absolutely false.

W. W. Anderson has been in business for many years. He is no stranger. Everybody knows him. His credit is A No. 1, and his integrity unquestioned.

The bondsmen are perfectly satisfied and are highly indignant that such a story should be started. The only trouble that W. W. Anderson & Co. have had on the job is a question as to whether the carpenters or the plasterers shall nail the stucco work in place.

There are now on the job about 400 mechanics. Last week the pay roll was \$10,500.

The following letter from the Loop Lumber Co., who are one of the bondsmen, is of special interest. It reads as follows:

LOOP LUMBER COMPANY,

Office, Yards and Mill

CENTRAL BASIN

San Francisco, June 4th, 1913.

Daily Pacific Builder,
560 Mission Street,
San Francisco, Calif.

Gentlemen:—
Permit me to say a word regarding a report that was published in a sheet today, to the effect that W. W. Anderson & Company, the Contractors who are building the Machinery Hall for the Panama-Pacific International Exposition Company, were about to abandon their contract on this building.

This report evidently emanates from some source that is endeavoring to injure the reputation of W. W. Anderson & Company, for some reason unknown, and without any foundation on facts.

As one of the bondsmen on this job I wish to state that having known Mr. Anderson and Mr. Wagner of this firm for a number of years through business dealing and personal contact, and having a thorough knowledge of their ability financially and otherwise to carry out their contract to a successful conclusion, I do not hesitate to say that this report is absolutely false and uncalled for.

Very respectfully yours,
WM. CHATHAM.

BOSS PLASTERERS HAVE PICNIC.

The Boss Plasterers of San Francisco and Oakland held their Annual Outing Saturday at Cowell's Big Tree Grove in the Santa Cruz mountains.

The Boss Lathers and many material men of both Oakland and San Francisco were guests of the Plasterers and a grand good time was enjoyed.

While the big trees have been visited by many great and distinguished guests it was for the Plasterers and their guests to show the Trees a touch of class before unknown in their locality.

The delegation left Third and Townsend streets at 8:05 A. M. and arrived at the grounds at 11:00 A. M. The Henry Cowell Lime and Cement Co. furnished a brass band, which accompanied the picnickers on the train and as the grove was reached an interesting program of games and races was commenced.

The material firms of San Francisco and Oakland contributed liberally toward the prizes, which made the various events very attractive to the participants.

The most attractive prize, however, was a \$2500 accident policy given by the Southwestern Surety Insurance Co. to be given to one of the Boss Plasterers, the decision to be made by a drawing. The Holmes Lime Co., Nephi Plaster Co., Quality Lime Co., Waterhouse & Price Co., Empire Plaster Co., Atlantic Fireproofing Co., California Lime Co., Spring Valley Water Co., Adolph Meyer Co., the Western Lime Co. and others.

The prizes consisted of coffee pots, hoes and shovels, wheelbarrows, hods, fountain pens, base balls and bats, cases of beer, skates, candies, merchandise orders, and, in fact, every thing that would suit the fancy of a fastidious plasterer.

After the races and games were disposed of all spent the afternoon dancing in the spacious pavilion.

Those in charge of the outing were:

ABANDONMENT OF HOMESTEAD.

June 2, 1913—S SIXTEENTH & E
 Filbert S 33.17xE 120, Okd. Fred-
 erick and Annie M Osborn.

OAKLAND AND ALAMEDA COUNTY.

APARTMENT HOUSE—3 story and
 base, frame, \$23,000. Oakland, Cal.
 Architects, Thomas & Oliver, Pantages
 Theatre Bldg., Oakland. Owner, Annie
 M. Spellman. The building will be
 erected at the corner of 25th street
 and Telegraph avenue, and will be ar-
 ranged for stores on the first floor and
 42 rooms on the upper two floors.
 Suites will consist of two and three
 rooms with private bath. Interiors
 will be finished in pine with some hard-
 wood panels. A central heating system
 will be installed. Bath rooms will be
 finished in cement plaster. All suites
 will have wall beds. Exterior of the
 building will be covered with pressed
 brick and cement plaster on metal
 lath. Construction will be handled by
 E. Sommarstrom, 302 East 12th street,
 and is to be done by Day Labor.

APARTMENT HOUSE—3 story and
 base, frame, \$15,000. Oakland, Cal. Ar-
 chitect, J. H. Boehrer, Delger Bldg.,

 hard, Supt. A. Legault, Delger Bldg.,
 Oakland. The building will be erected
 on 22nd street east of Grove, and has
 been arranged to contain six suites of
 two rooms and bath. Interior finish
 will be of pine with some hardwood
 veneer. Bath rooms will be finished in
 cement plaster and tile wainscot. A
 central heating system or gas radiators
 will be installed. All suites will be
 equipped with wall beds. The exterior
 of the building will be covered with
 rustic. Plans are complete and the
 work will be done by Day Labor.

APARTMENT HOUSE—6 story and
 base, brick and steel, \$70,000. Oakland,
 Cal. Architect, Charles W. McCall,
 Central Bank Bldg., Oakland. Owner's
 name withheld. This building will be
 erected at the corner of 12th and Grove
 streets and is to cover an area of 50x
 100 feet. There will be seven stories
 on the ground floor while upper floors
 will be divided into 96 rooms, ar-
 ranged in two and three room suites
 with private bath rooms. Plans pro-
 vide for steam heat, elevator service,
 wall beds, a vacuum cleaning system
 and hot water supply. Interior finish
 will be of pine and hardwood. Bath
 rooms will be finished in cement plas-
 ter and tile wainscot. There will be
 patent store fronts. Exterior of the
 building will be faced with pressed
 brick and terra cotta. Plans are now
 being prepared.

APARTMENT HOUSE—3 story and
 base, frame, \$25,000. Oakland, Cal. Ar-
 chitect, George L. Streshley, Lick Bldg.,
 S. F. Owner's name withheld. The
 building has been mentioned in these
 columns before when the architect was
 first commissioned to prepare plans.
 The building will contain a number of
 two and three room apartments on the
 upper floors and stores on the first
 floor. Interior finish will be of pine
 with some elm panels. There will be
 steam heat. All suites will have pri-
 vate bath rooms and wall beds. A hot
 water supply will be installed. Bath
 rooms will be finished in cement plas-
 ter. The exterior of the building will
 probably be covered with cement plas-
 ter on metal lath. Plans are complete
 and figures are to be called for at once.

RESIDENCE — 2 story and base,
 frame, \$3,600. Piedmont, Alameda Co.,
 Cal. Architect, W. H. Judson, Albany
 Bldg., Oakland. Owner, Mr. Embury.

The house has been designed for a
 seven-room dwelling with all modern
 conveniences. The interior will be fin-
 ished in pine and hardwood with hard-
 wood floors in the living room, dining
 room and reception hall. There will be
 furnace heat and open fire place. Man-
 tel will be of brick. Tile will be used
 in the bath room and kitchen. The ex-
 terior of the house will be covered
 with cement plaster on metal lath.
 Plans are now being prepared for the
 work.

RESIDENCE — 2 story and base,
 frame, \$5,000. Livermore, Alameda Co.,
 Cal. Architect, none. Owners, Coast
 Manufacturing and Supply Co. and T.
 W. Norris. The dwelling will be erected
 on property adjacent to the new plant
 of the company. Interior will be fin-
 ished in pine and hardwood. Plans
 provide for furnace heat and open fire
 places. Mantels will be of brick. Tile
 will be used in the bath rooms and
 kitchen. Exterior of the dwelling will
 be covered with cement plaster on
 metal lath. Plans are complete and
 figures are now being taken.

RESIDENCE — 2 story and base,
 frame, \$5,000. Berkeley, Alameda Co.,
 Cal. Architect, none. Owner, Louis
 Engler, 2721 Haste St., Berkeley.
 The dwelling has been designed for a nine-
 room house with bath and sleeping
 porch. Interior finish will be of pine
 throughout. Some hardwood floors are
 specified. Plans provide for furnace
 heat and an open fire place. Mantel
 will be of tile. Tile will be used in the
 bath room and kitchen. Exterior of
 the dwelling will be covered with ce-
 ment plaster. Plans are in the hands
 of the owner and the work will be done
 by Day Labor. He is now purchasing
 all materials.

BUNGALOW — 1 story and base,
 frame, \$2,100. Fruitvale, Alameda Co.,
 Cal. Architect, W. H. Judson, Albany
 Bldg., Oakland. Owner, Mr. Hauser-
 mann. The dwelling has been designed
 for a five-room house with bath. In-
 terior finish will be of pine throughout.
 Hardwood floors will be used in two
 rooms. There will be a large open fire
 place in the living room with brick
 mantel. Tile will be used in the bath
 room and kitchen. Exterior of the
 dwelling will be covered with rustic.
 Plans are now being prepared.

RESIDENCE — 2 story and base,
 frame, \$3,500. Oakland, Cal. Architect,
 none. Owners, United Home Builders,
 1762 Broadway, Oakland. The dwelling
 will be erected on 4th avenue, and has
 been designed for a seven-room house
 with bath. Interior will be finished in
 pine and some hardwood panels. Hard-
 wood floors will be used in the prin-
 cipal rooms. There will be furnace
 heat and open fire places. Mantels will
 be of brick and tile. Tile will be used
 in the bath room and kitchen. An au-
 tomatic water heater will be installed.
 Exterior of the dwelling will be cov-
 ered with cement plaster on metal lath.
 A vacuum cleaning system is also spe-
 cified. Plans are complete and the
 work will be done by Day Labor.

RESIDENCE — 2 story and base,
 frame, \$18,000. Livermore, Alameda Co.,
 Cal. Architect, none. Owners, Const
 Mfg. and Supply Co., and Albert M.
 Merritt. This dwelling is to contain
 twelve rooms, baths and sleeping porch.
 Interior will be finished in pine and
 hardwoods. Hardwood floors will be
 used in the principal rooms. Plans
 provide for furnace heat and open fire

places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath rooms will be finished in tile. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Peter Fredrickson, 302½ Fulton St., Berkeley. The dwelling has been designed for a six-room house with bath and sleeping porch and will be erected on Yolo street. Interior finish will be of pine and hardwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE AND GARAGE—1 story and base, frame, \$6,000 and \$1,000. San Leandro, Alameda Co., Cal. Architects, Newsom & Dixon, 512 Broadway, Oakland. Owner, Mr. Merrill. The dwelling will be erected in Broadmoor, and has been designed for an eight-room bungalow with baths and sleeping porch. A one-story frame garage will be erected at the rear of the lot. Interior finish of the residence will be of pine, white enamel and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile. There will be an automatic water heater installed. Exterior of both the residence and garage will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

MUSEUM AND OFFICE ADDITION—Frame construction. Cost not stated. Oakland, Cal. Architect, John J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Plans for the removal of the present office building to a new location and for the construction of new foundations for the same and for the construction of a one-story frame addition to the present Public Museum building have been completed and figures are now being called. Bids will be opened on June 12th by the Library Directors. Plans can be secured from Supervising Architect Donovan. An official proposal for the work appears in this issue.

FLATS—2 story and base, frame, Cost not stated. Oakland, Cal. Architect, Henry Sherman, Mills Bldg., & F. Owner, J. B. Cabana. The building will be erected at the corner of East 14th street and 9th avenue and will cover an area of 50x100 feet. There will be four stores and entrance on the first floor. Upper floor will be arranged for four flats of three and four rooms each with private bath. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. Bath rooms will be finished in tile. There will be open fire places and tile or brick mantels. Patent store fronts are specified. Exterior of the building will be covered with V joint rustic. Plans are complete and figures are now being taken.

STATIONS—1 story, frame, \$1,500. San Leandro, Alameda Co., Cal. Architect, W. H. Judson, Albany Bldg., Oakland. Owners, Broadmoor Tract. A

small station is to be erected at the main entrance to the tract at once. Design is in the Mission style. Bids are now being taken for the carpentry work, plastering, sheet metal work, plumbing, painting, mill work and electric work. Mr. Judson will let all contracts separate.

OFFICE BUILDING—2 story and base, frame. Cost not stated. Livermore, Alameda Co., Cal. Architect, none. Owner, Coast Mfg. and Supply Co., Livermore. A two-story office building is about to be erected on the property of the Coast Mfg. and Supply Co. at the site of their new plant. Interior will be finished in pine throughout with some maple floors. There will be a central heating system. Exterior of the building will be covered with rustic. Plans have been completed and the work will be done by Day Labor. The owners are now purchasing all materials.

SAN JOSE AND THE SANTA CLARA VALLEY.

BUNGALOW—1½ story and base,
frame, \$2,500. San Jose, Santa Clara
Co., Cal. Architect, Emily E. Williams,
2406 Sacramento St., S. F. Owner,
Walter McIntire, South 16th St., San
Jose. The house will contain six rooms
and bath. All interior finish will be of
pine or redwood. Open fire place with
brick mantel will be used in the living
room. Hardwood floors will be used in
the principal rooms. The exterior of
the house will be covered with rustic
and shingles. Plans are complete and
the work will be done by Day Labor.

MISSION—1 story, frame \$3,000. San
Jose, Santa Clara Co., Cal. Architect,
none. Owner, S. Nashimure, 221 Jack-
son St., San Jose. The building has
been designed for a mission house. In-
terior finish will be of pine and red-
wood. A maple floor will be used.
Plans do not provide for a heating sys-
tem. Exterior of the building will be
covered with cement plaster. Plans are
in the hands of the owner and work
will be done by Day Labor.

BUNK HOUSES—2, 1 story, frame,
\$1,400 each. San Jose, Santa Clara Co.,
Cal. Architect, none. Owners, Central
California Fruit Co., S. E. corner of
Jackson and 7th streets, San Jose.
These buildings will be erected at the
company's plant and will be used for
bunk houses and dining hall. Interiors

will be finished in pine. The exteriors
will be covered with rustic or shiplap.
Plans are in the hands of the owners
and work will be done by Day Labor.

SCHOOL—1 story and base, rein-
forced concrete, \$65,000. San Jose,
Santa Clara Co., Cal. Architect, Nor-
man F. Marsh, Broadway Central Bldg.,
L. A. Owners, Hester School District.
Bids for the general construction of
this building were opened on Saturday
last and show Robinson and Place of
Oakland low on one proposition at
\$60,950 and Martin Wittler low on the
alternate at \$61,935. The Pacific
Blower and Heating Co. were low on
the heating at \$5,200, and Sonderstrom
was low on the painting at \$2,250. No
contracts have been awarded. A com-
plete list of these figures appears
under the heading of San Jose and the
Santa Clara Valley in this issue.

HESTER SCHOOL BIDS OPENED AT SAN JOSE.

Bids Received For the Work Are With-
in the Amount Available and Con-
struction to be Started.

(By Special Wire)

Bids for the construction of the
Hester School building in San Jose
were opened by the Board of Trustees
at San Jose on Saturday, June 7th.
Separate bids were taken for the gen-
eral construction and for the heating
and painting. Robinson & Place,
of Oakland, were low at \$60,950 on the gen-
eral construction with Martin Wittler
low on the alternate proposition at
\$61,935. The Pacific Blower Co., of San
Francisco, were low on the heating at
\$5,200 and Sonderstrom, of San Jose,
was low on the painting at \$2,250. Her-
bert C. Jones, Clerk of the Board, states
that the bids were well within the
amount available and that the work
will proceed at once. Contracts have
not been awarded, but will be within
a few days. Plans were prepared by
Architect Norman F. Marsh, of Los
Angeles.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

BANK—10 story and base. Class A or B construction, \$150,000. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, South California St., Stockton. Owners, Commercial Savings Bank of Stockton, John Raggle, President. The building will be erected at the northwest corner of Main and Sutter streets. The entire first floor and basement will be occupied by the bank. Upper floors will be arranged for a

large number of modern offices. Construction will be fireproof throughout with steel frame and wall of reinforced concrete or brick. Exterior will be faced with stone, pressed brick and terra cotta. Interior finish will be of hardwoods and metal. Marble wainscoting will be used in the halls and corridors. There will be steam heat, elevator service and a vacuum cleaning system. Metal window sash and frames are to be specified. Interior of the banking rooms will be handsomely finished in marble, tile and ornamental plaster. Special safe deposit and coin vaults will be installed. Plans are now being prepared.

RESIDENCES—Frame construction. Stockton, San Joaquin Co., Cal. The following Day Labor jobs are reported as about to be started in Stockton: Mrs. H. Mowry, 1308 East Main St., 1 story frame cottage, \$1,200; E. E. Ferrell & Co., 301 So. California St., 1 story frame, \$1,500, and Albert Embree, 624 East Main St., 2 story and base, \$7,500.

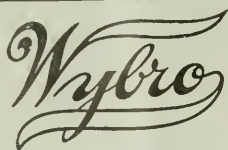

HOSPITAL—2 story and base, reinforced concrete. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owners, St. Joseph's Society. The building has been designed with a main building and two wings. Construction will be fireproof throughout. The building will contain a number of public wards and also private rooms. A large and modern operating room and hydrotherapeutic ward will be features of the institution. Plans provide for steam heat, elevator service, vacuum cleaning and hot water system. Interior will be finished in pine and hardwoods. Marble and tile will be used extensively. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

FREIGHT DEPOT—2 story and base, reinforced concrete, \$100,000. Stockton, San Joaquin Co., Cal. Architect, Engineering Department Santa Fe Railroad. Owners, Santa Fe Railroad. An amount of \$100,000 has been set aside for the construction of this building, which is to cover two city blocks. A site at the corner of California and San Joaquin streets has been secured, and the company will ask the city of Stockton to close Sutter street. Construction will be fireproof. Besides the freight sheds the building will contain the offices of the company on the upper floor. Construction will be fireproof. Exterior will be faced with cement plaster. Work will be started as soon as plans can be completed.

SCHOOL—1 story and base, reinforced concrete, \$30,000. Quincy, Plumas Co., Cal. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Quincy Union High School. The building will contain eight class rooms and an assembly hall. There will be a central heating system and vacuum cleaning. Interior will be finished in pine with some maple floors. Working drawings have been approved by the Board of School Trustees and bids will be called for at once. Plans can be secured from the architect. Exterior of the building will be faced with cement plaster. Construction will be as near fireproof as funds will permit.

Contracts Awarded.

HOTEL—4 story and base, brick and steel, \$50,000. Lodi, San Joaquin Co., Cal. Architect, Ralph P. Morrill, Old Fellows Bldg., Stockton. Owner, J. Whit-

LOS ANGELES AND SOUTH- CALIFORNIA.

BANK AND OFFICES—2 story and
base, reinforced concrete, \$75,000. Red-
lands, San Bernardino Co., Cal. Archi-
tects, Parkinson & Bergstrom, Se-
curity Bank Bldg., L. A. Owners, First
National Bank of Redlands. The build-
ing will be erected on a corner site
and will cover an area of 40x118 feet.
Construction will be fireproof through-
out. The entire first floor will be oc-
cupied by the bank and will be fin-
ished in pine, hardwoods, ornamental
plaster and marble. A tile floor will
be used. Plans provide for coin and
safe deposit vaults. There will be steam
heat and metal window sash and
frame. Exterior of the building will
be faced with artificial stone. Plans
are complete and figures are now being
taken.

CHURCH—Brick and steel. Cost not
stated. Long Beach, Los Angeles Co.,
Cal. Architects, Frank T. Kexley and
T. Foster Ena, associated, Consolidated
Realty Bldg., L. A. Owners, Roman
Catholic Church, Father James A.
Reardon, pastor. The building will be
designed with a main auditorium seat-
ing 650 people and a smaller chapel
seating 250 people. Interior will be
finished in pine with maple floors. A
steam heating system will be installed.
Ornamental plaster is specified. Two
towers of steel construction will be
built. Exterior of the building will be
faced with ruffled brick. Plans are
complete and figures are being taken.

HOTEL—10 story and base, rein-
forced concrete, \$700,000. Long Beach,
Los Angeles Co., Cal. Architects,
Kysor & Biggar, Wright and Callender
Bldg., L. A. Owners, Oxford Investment
Co. The building is to be erected at
the corner of Ocean and Pine avenues
and will cover a large area. Prelim-
inary plans show a total of 700 rooms,
all of which will have connecting

baths. Construction will be fireproof. Plans are only in the preliminary stage and details of the building cannot be given at this time. Further mention will be made in these columns as the plans progress.

HOTEL—1 story and base, reinforced concrete and brick, \$150,000. El Centro, Imperial Co., Cal. Architect, none. Owners, Bell Development Co., Van Nuys Bldg., L. A. The building is to be erected at the corner of 7th and Main streets and will cover an area of 152x132 feet. Several stories, hotel lobby and offices, public dining room and kitchen will occupy the first floor. Upper floors will contain a total of 152 guest rooms and baths. There will be steam heat, elevator service and a vacuum cleaning system. Interior finish will be of pine. A tile floor will be used in the lobby. Exterior of the building will be faced with cement plaster. Plans are being prepared.

PASSENGER STATION—1 and 2 story. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Southern Pacific Co. The new passenger station will be erected at 5th and Central streets and will be 550 feet long and 70 feet wide. The central portion of the building will be but one story high, 50 feet wide and is 220 feet long and will be of Class A construction. The two wings, each two stories high, will be of Class C construction. Plans include steam heat, metal window sash and frames, tile floors and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be called for shortly.

STOES AND LOFTS—13 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Mason Estate. The building will be erected on Spring street between 7th and 8th streets and will cover an area of 60x101 feet. There will be a complete steel frame with exterior walls of brick or concrete faced with terra cotta. Interior finish will be of pine and metal. Metal window sash and frames will be used throughout. There will be three elevators, sidewalk elevators and steam heat. Floors and interior partitions will be of hollow tile and concrete. Plans are complete and will be ready for figures in about a week or ten days.

STORES AND OFFICES—12 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners, Haas Realty Co. A site at the corner of 7th and Broadway has been secured and a building covering an area of 55x155 feet is proposed. None of the details of construction have been worked out but are to be determined within a few days. A complete description of the work will be published here as soon as possible.

OFFICES—6 or 7 story and base. Class A addition, \$100,000. Pasadena, Los Angeles Co., Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Citizens' Savings Bank. The present one story building will be remodeled for banking rooms. Upper floors will be subdivided into about 16 modern office suites. There will be steam heat, elevator service, a vacuum cleaning system and mail chutes. Metal window frames and sash will be

used. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared and will shortly be ready for figures.

SCHOOLS—2, 2 story and base, brick. Cost not stated. Santa Monica, Los Angeles Co., Cal. Architects, Allison & Allison, Ithierman Bldg., L. A. Owners, Santa Monica School District. One of these buildings will be erected on Central avenue and the other will form an addition to one of the present schools. Both will contain six class rooms and an assembly hall. Interior finish will be of pine with maple floors. There will be a central heating system. Metal window sash and frames are specified. The exterior will be faced with ruffled brick. Plans are complete and bids are now being taken for the work.

Contracts Awarded.

APARTMENT HOUSE—3 story and base. Class C construction, \$45,000. Los Angeles, Cal. Architects, R. E. Young & Son, Lankershim Bldg., L. A. Owner, Dr. E. C. Manning. Contractors, The Pozzo Construction Co., 421 Macy St., L. A. Contract price, \$45,000.

HOTEL—3 story and base, reinforced concrete. Cost not stated. San Diego, Cal. Architect, Harrison Albright, Homer Laughlin Bldg., L. A. Owners, J. D. and A. B. Spreckels. Contractors, Wurtz Construction Co., Spreckels Bldg., San Diego. Contract price not stated. Note: The building will cover an area of 200x150 feet and will contain a total of 400 guest rooms.

LODGE HALL—2 story and base, brick, \$31,324. Anaheim, Orange Co., Cal. Architect, Fred H. Eley, Hervey-Finley Bldg., Santa Ana. Owners, Masonic Temple Association of Anaheim. Contractor, J. S. Hiliend, Adeline St., Anaheim. Contract price, \$31,324.

RESIDENCE—2 story and base, frame, \$15,000. Los Angeles, Cal. Architects, G. Lawrence Stimson Co., 1212 Avoc Ave., Pasadena. Owner, Lyman T. McFie. Contractors, G. Lawrence Stimson Co., 1212 Avoc Ave., Pasadena. Contract price, \$15,000.

PORTLAND AND OREGON.

LIBRARY—2 story and base, brick, \$17,500. Hood River, Ore. Architects, Sutton & Whitney, Lewis Bldg., Portland. Owners, Hood River Carnegie Library Association. The building has been designed in the classic style and will cover an area of 55x75 feet. There will be two public reading rooms, large stack rooms, librarian's office and toilets. Interior finish will be of pine and hardwoods with maple floors. A central heating system, probably steam, will be installed. Considerable ornamental iron will be used. The exterior of the building will be faced with pressed brick, trimmed with terra cotta. Plans will be completed within the next 20 days and bids will be advertised.

STORES AND OFFICES—1 story and base, brick and steel, \$85,000. Salem, Ore. Architect, Aaron Gould, Worcester Bldg., Portland. Owner, Dr. R. Ryan. The building will be erected on one of the principal corners and will cover an area of 103x108 feet. The first floor will be arranged for a number of stores and the entrance to the upper floors. Second and third floors will be subdivided into offices and the fourth floor will be fitted up for a large public hall. There will be elevator service, steam heat and metal window sash and

frames. Interior finish will be of pine with a maple floor on the fourth floor. Some tile and marble will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

LODGE HALL—2 story and base, brick and steel, \$22,500. Tillamook, Ore. Architect, E. E. McClaran, Lumber Exchange Bldg., Portland. Owners, Tillamook Odd Fellows Hall Association. Contractor, E. B. White, Lumber Exchange Bldg., Portland. Contract price, \$22,486.

HOTEL ADDITION—Frame and stone. Cost not stated. Seaside, Ore. Architect, F. Manson White, Henry Bldg., Portland. Owner, Dan J. Moore. Contractors, Martin & Reiser, Woodlawn. Contract price not stated. Note: The same architect has prepared plans for a number of beach houses costing from \$1,200 to \$8,500, which are also to be erected at Seaside.

SEATTLE AND WASHINGTON.

RESIDENCE—3 story and base, rock and stucco, \$30,000. Victoria, B. C. Architect, A. Warren Milner, Arcade Bldg., Seattle. Owner, W. A. Lewthwaite. The dwelling will contain in the neighborhood of twenty rooms, several baths and sleeping porches. Interior will be finished in pine and hardwoods with hardwood floors in the principal rooms. There will be a central heating system, probably hot water. Bath rooms will be finished in tile. An automatic water heater will be installed. Several large open fire places with brick and tile mantels will be used. Exterior of the house will be covered with stucco and rock. Plans are being prepared.

FACTORY—3 story and base, reinforced concrete, \$400,000. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owners, Ford Motor Car Co. This building has been mentioned here a number of times before. Plans have been revised and new figures have been taken. The structure will be similar to the Ford buildings now under construction in San Francisco, Portland and Los Angeles, all of which were designed by Mr. Graham. Construction will be fireproof throughout. The building covers a large area and will contain the company's administrative offices, warehouse, show rooms and assembling plant. Bids were opened on June 10th and a contract will be awarded before the end of this week. Separate bids were taken for the general construction, the electric work and plumbing.

ADMINISTRATION BUILDING—5 and 2½ story and base, brick and steel, \$100,000. Seattle, Wash. Architect, Daniel Huntington, Seattle. Owners, City of Seattle. This is the first building of a large project, funds for which are now available. The main structure will be five stories in height and cover an area of 73x56 feet. The two wings will be two stories high and cover an area of 50x32 feet. Interior will be finished in pine, hardwoods, white enamel and tile. There will be steam heat, vacuum cleaning system and elevators. The exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are complete and figures will be called for at once.

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

The Supreme Court of this State has decided that there is no authority in the Charter of San Francisco for the proposed agreement between the city and the musical association under the terms of which it is proposed to erect an opera house in the Civic Center. The ground on which the decision rests is that the city has no power to grant to an outside body the control of its property. And this is evidently a good decision although it may work a hardship in the present case. For if such a precedent were allowed to be established it might lead to numerous complications even if there were authority in the charter for such an action.

The Supreme Court suggests that if the building were built by private enterprise and then donated to the city the donors might make any kind of agreement they wish for the control of the property. Under the present decision the plans for the erection of a municipal opera house have gone glimmering. Some other plans will have to be thought out before this important building in the Civic Center can be erected. Probably there may be a way of getting the same result by proceeding on somewhat different lines.

world, but the history of the wool and worsted industry has been to cry ever for more and more duty, and ever to keep the wages and the workers down."

So also in the use of structural steel and wire and nails and farm implements. The Secretary points that these articles are being shipped out of the country at the rate of 5 million dollars per day and further asks the following questions:

"When we can sell steel abroad at the rate of \$1,000,000 a day as we are doing, why do we need a duty on the products of the steel mill? When the Argentine farmer buys American wire cheaper or better than he can get it from England or Germany, why should the American farmer pay a higher price because of a duty to protect the American maker of that wire?"

The fact is that the American people are all paying these protective duties to the people that are benefited by them. And the question is who is getting the benefits? In about 90 per cent of the cases it is the heads of the great trusts who have grown enormously wealthy by fiditious capitalization of industries and who are paying interest on this water capital by means of the tariff tax. Any change in the tariff schedule affects business. It is to be hoped that the tariff bill will soon be passed and that it will be a substantial revision downward.

Speaking of the many kinds of business that will go out of existence if the tariff is reduced, and the low wages that will be paid to workmen there is another side to the question that the friends of the tariff beneficiaries never mention. Among the things quoted on the subject is that of an article recently contributed to the *Wichita Beacon* by William C. Redfield, United States Secretary of Commerce and Labor.

Speaking of the tender regard that manufacturers have for the wages of workmen and the protection they ask in the make up of tariff schedules, the Secretary has this to say:

"This was on the theory that they would divide with their workmen, but the workmen tell another story about that division. Everybody who thinks knows that the talk of the tariff making wages high is a joke. Perhaps it is more just to say it is a tragedy.

The fact is that the great worsted industry, for example, with its enormous protection, running up, in cases, to more than 100 per cent, has been paying very low wages, while other industries, with far less protection, have been paying higher wages.

I have seen the products of American factories—shops where wages were good and tariff duties comparatively low—sold all over the

It is reported that the Southern Pacific coast lines are to be electrified throughout. Whether this is an item of expense in the 48 millions asked for of the Railroad Commission is not stated, but if the report is true it marks the beginning of the biggest change from steam to electricity in this country. With the great hydro-electric development that is going on in this state it would seem to be only a question of time till the change from steam to the electric current will be effected.

Economies of electric transmission have made it not only possible but mechanically and financially feasible to operate great trunk lines by this method. Particularly is this the case in the mountain regions where snow sheds and tunnels make the smoke of steam engines a very great nuisance. Electricity is quieter, cleaner and safer than steam. It permits the dispatch of trains at short intervals, allows them to be made up at different relays or increases the unit of power cars in multiples. It applies the power more advantageously and is more easily controlled and regulated. The time is not far distant when transportation throughout the country will be effected by means of this force.

THE CONCISE SPECIFICATIONS.

Timely Discussion of the Many Intricacies of a Well-worn Subject.

At the present time when hustling is the order of the day, the desirability of adopting brevity in specification-writing is admitted by all engaged in building work; but if this end were attained either by ambiguity in description, or omission of anything necessary to the due execution of the intended work, it would be disastrous to the interests of both client and builder, and inimical to the professional reputation of the architect who drafted the document. Only these having a thorough practical knowledge of building work should attempt specification writing, and it is unfortunate that this experience is more likely to lead to prolixity than to brevity, for the many pitfalls known to the practical man can only be avoided by pointing them out, and he has to guard against them in a style of writing the reverse of concise.

It may therefore be taken for granted that the specification written by a competent architect will be long, for he will face difficulties in construction which would be avoided by a less capable man. Men frequently attempt to describe what they do not understand, and they usually become singularly dogmatic in the attempt. But the ordinary builder is not misled by such assurance, and, reading between the lines, he has no difficulty in assessing the architect's practical knowledge at its true value, and in acting accordingly. It follows that a specification for embodiment in any contract should be written by a man of extensive experience, who, has the power to express himself clearly, tersely, and to the point. The certain sign of an amateur's work, in this way, is his constantly falling back on the expression "to bedone to the satisfaction of the architect," for if he does not clearly see what he wants, and is at loss for words to describe it, this formula is a very present help in time of trouble for him and his like.

To acquire the knack of concise specification writing is not easy, for like Euclid, there is no royal road to it. Plodding, diligence, and close attention, under the direction of a competent man, where possible, are necessary to attain even the rudiments of the art. Listening to professors who endeavor, by lecturing, to impart a knowledge of building construction sufficient to enable the student to write a specification, is fatuous, and to attend any technical school class with the same object in view is more so. It has been well said that if men took only half the trouble to go to Heaven that they take to go to the other place, their eternal happiness would be assured, and so it is with the subject under consideration. If a pupil devoted his energies to examining some building work in situ, and writing a description of it, instead of using the eyes and brains of others, he would acquire facility for the work in half the time he takes to gain a smattering of it in classes, or from professional lecturers. Suppose a student of building construction examined for himself,

say, an internal door in a good house, and sketched what he saw in his notebook, how much likely he would be to gain a knowledge of specifying such a door than if he listened to lectures, or attended technical classes, where it is explained by diagrams at secondhand. Every house, with its offices, contains examples of different kinds of doors, and when a beginner has learned how to describe them concisely and accurately he may pass on to the windows, staircases and floors, and thus, without leaving his own house, he can pursue an original line of study that will, if he is diligent, make him more than a match for the men trained in classrooms.

Some books have been published containing specifications for various buildings; but no work has yet been written on the art of specification writing. The various styles of architecture have been lucidly described, and now that the ornamental portions of the art are so well illustrated in books and journals, it is surely not too much to expect that professors and masters of the subject will describe up-to-date methods of building construction, and so help us to live in the twentieth century, instead of harking back to others as old as 300 B. C. Few architects in good practice write the necessary specifications for their own buildings. This work is turned over to an assistant, or the quantity surveyor, and these documents are always regarded as nuisances; hence the present generation try to shirk the work by scribbling a belated description of it all over the drawings, and others press the quantities into service on a kind of condensed specification. With every care, accidental mistakes occur in the documents, and they invariably lead to a lawsuit, or, what is worse to an arbitration, both of which are ruinously expensive, and satisfy no one but the lawyer.

When an architect is incompetent, he will entrench himself behind a series of general clauses, which may be interpreted to mean anything or nothing; they are as vague as they are provoking, and this must always be the case where a man attempts to describe what he has no clear idea of. Architects should recollect that carelessness in specification writing must of necessity leave the builder in doubt as to what is meant and this uncertainty will compel him to apply to the architect for some explanation of what is really the object of the doubtful clause, thus leading to an immense waste of time, besides worry, and, perhaps, loss of temper. Disputes sometimes arise on a building over the meaning of the drawings, but much more frequently over the specification, and if the architect carries everything with a high hand, and the builder feels aggrieved, then a state of things exists which is inimical to the execution of good work, and the employees must suffer. Every properly written specification should avoid all law terms, and this may be done by leaving the preparation of the contract to lawyers.

A specification may be divided into

trades, such as Bricklayer, Mason, Carpenter, etc., or it may be arranged so as to deal with floors, roofs, walls, windows, doors, etc., all, of course, under different headings; but whatever plan is adopted, marginal references should always be employed, and numbered, for facilitating reference. A specification written en bloc is a nuisance, for the waste of time in looking for an item is often great, and it should be avoided. Marginal references are, in reality, a kind of index; but, if the reference, or the pages are numbered, a proper index should be made and bound up with the document.

The strangest thing in connection with specification writing is that materials continue to be described as for use in a building when they may be seen in a state of decay all over the country. This looks as if the architect's experience died with him, and that the rising generation were in no way concerned about the failures of those who preceded them. Since master men in the various trades have been supplanted by the general contractor, the specification has increased in bulk enormously, and the superintendence of the work has become a matter of the gravest anxiety. For once the architect certifies that the work is done according to the specification, he takes on himself the whole responsibility for the builder's shortcomings, and the cost of making good these failings may fall on the architect. Hence, some insist on having a clerk of works, and others will employ only builders they understand; in which latter case errors in the specifications or omissions from the drawings will never be heard of. Specifications are very definite about the seasoning of timber and its freedom from sapwood, shake, and knots; but all such clauses are more honored in the breach than in the observance, and unseasoned timber, as well as that which is knotty and sappy, may be seen in use everywhere. This question of timber is most difficult to settle concisely in a specification, for all our soft building timber—that is to say the greatest part of what is used—is called by some absurd name, and this name is not constant for that particular timber in any locality. For instance, nearly all ordinary building timber is "red"; sometimes it is "yellow"; again, it is "fir" or "dent"; or it may be "white," and this may mean Canadian or North of Europe spruce. Generally speaking, all soft woods used by builders are called by them either "red deal" or "white deal," and the public follow their example, though there never was such a tree as a "deal tree." Pitch pine is, again, a vague term, for it may be applied to any timber rich in turps and resin; in fact half a dozen varieties of the pine furnish the "pitch-pine" of the State. Now, then, in a concise specification, the architect to describe the wood he wants? To call red deal or yellow deal "Pinus sylvestris" would be pedantic to call it by its best known name "Scotch fir," would be incorrect, for it is not a "fir"; and there appears to be

no way out of the difficulty but by using that name by which the timber is known in the place where the architect is going to use it. After years of technical schooling, many of our professional men, and others, appear to be wholly ignorant of the nature of timber. Now, then, can they describe it concisely in their specifications?

Take, again, the commonest material used in building—namely, lime—for it is used alone and in combination with clay. How is it to be described correctly? And if it was so, described how many would understand what the architect meant? If an architect specified that the mortar was to be made with calcium oxide one part and silica three parts, what would the builder think of him? Yet this would be a correct description in many places. Surely, if an architect specified that only impure lime was to be used for mortar making, people would think he was mad! Yet impure lime makes the best mortar, especially for brick or stone work in wet places, always assuming that the impurity is clay not exceeding one-quarter the weight of the pure lime. In fact, except for plastering, indoor work, and walls in dry places, pure lime is the worst lime that could be used. To make Portland cement, pure lime has to be made impure by the addition of clay, both being ground to an impalpable powder and calcined. Smeaton "discovered" blue lias lime; Vicat described how to make what is now called "Portland cement," and Aspdin patented and made money by it.

Looking down an ordinary specification, it will be seen that some items have a purely legal bearing. These are "conditions of contract." Others describe the nature of the relation of builder and architect throughout the work. Some are of general import, and may be applied to any building, while others are special and can only apply to the building in hand. A specification may, therefore, with advantage be divided into four heads—namely, Legal, Personal, General Technical and Special Technical. The first three might well be typed and kept for general use. The "special" claims must, of course, be written to suit each separate building. In building with bricks, English bond is generally considered the best, because in no part of the work does joint come over point, and bricks need not be cut with the trowel to fill up the work as in Flemish bond. But the writer has never seen a wall fail because it was built in this bond, and there are many such walls throughout the country. In engineering work English bond is usually employed, on account of its superior strength. Here, again, the concise specification writer may be troubled in describing the bond he wants, for some builders assert that English bond is that with three courses of stretchers to one of headers, so that before being concise it would be well to know what others understand to be the meaning of the words about to be used.

It is most important to guard against dry-rot in a building, and the specification should provide for the ventilation of all spaces in floors and under floors where timber is employed; in fact, the architect should make such provision that the seasoning of the timber shall go on after it is fixed in the building, and in no case should it be exposed to damp, stagnant air. If it is, three or four years will be the

limit of its existence as sound timber, even if it is pitch-pine. The use of unseasoned wood in timbers that are not framed does not matter much; but in roof principals, and in joiner's work, it would be disastrous. To write a concise specification that at the same time be explicit is, we repeat, the work of a man who has had an extensive and wide practice, to which he has given his personal attention.—The Building News (Eng.)

STAINED AND LEADED GLASS FOR THE HOUSE.

Among the architectural accessories that lend refinement to the dwelling house are to be considered windows of stained and leaded glass. Stained glass, as distinguished from leaded glass, is that material which depends primarily upon color for its effect, whereas leaded glass is dependent upon the lines of lead that form a patterned network to hold the bits of plain glass that compose the whole panel, and rarely contain color at all, although occasionally color is introduced in a slight degree into the decorative scheme.

There are, of course, certain rooms in the house where windows of stained glass will find their most appropriate setting. In the library—that is to say, in the room which is a real library—the stained glass window above the book shelves may form a most appropriate decorative feature, and while admitting a certain amount of light, will obviate the strong cross lights that would otherwise result from the use of windows throughout of clear glass. In some instances small window spaces above the book shelves have been filled by portrait heads in stained glass, and in other instances larger spaces have been occupied by landscape windows worked out with subdued or glowing tints, as good taste determines.

Hall, staircase and music room windows of stained glass are appropriate in the proper setting, and in town houses, where the rear of the dwelling has an unpleasant outlook and yet must give place to the dining room, stained glass windows let in a sufficient amount of light and yet screen the undesirable view. Naturally one does not look for large figure composition in stained glass windows intended for small rooms, for in this, with all other matters under the dictatorship of good taste, consistency must be studied and maintained.—House and Garden.

BIDS OPENED FOR CONCRETE BRIDGE.

Wm. Radtke, of Gilroy, was the lowest bidder for concrete bridge near San Jose. Award will be made on Monday, June 16th. Other bidders on the above job were:

John W. Williams, San Jose.	\$12,000
M. E. Kilcourse, San Jose.	11,432
T. K. Beard, Modesto.	10,856
State Const. Co., S. F.	12,289
A. W. Beggers, S. F.	13,937
R. O. Summers, San Jose.	14,845

The Engineer's estimate was \$11,200. Plans were also ordered for two new bridges to cost about \$25,000 and \$80,000.

IRVING L. RYDER,

Engineer, San Jose.

AUTOMATIC STORAGE HEATERS.

For the last year the demand for automatic water service has been rapidly increasing until now even the less pretentious homes demand this new convenience. The Electric Weld automatic storage system of gas water heating is comparatively new in the local field but the rapid strides it is making indicate that it is destined to take a prominent place. The storage feature is one that appeals, for it does not restrict the amount of hot water that can be drawn, the only limit to the volume of hot water obtainable being the size of the faucets. The flow of gas is controlled by a moment temperature thermostat, which is operated by the temperature of the water in the bottom of the boiler. The cold water displacing the hot water which has been drawn off, oper-

ates the automatic valve, allowing sufficient gas to flow through at the rate of 60 feet per hour to heat the same amount of water as has been drawn; it then closes, leaving only the small pilot light burning, ready for the next operation. The boiler is doubly insulated with asbestos and oak wool lagging, insuring the same efficiency as is had with the thermos bottle.

These heaters are made for all requirements from the small bungalow size to the large hotel or apartment sizes, ranging from 18 gallons to 500 gallons. Sizes up to 66 gallons are operated by a single burner; from 82 gallons to 500 gallons are equipped with two or more burners, according to size. The multiple boiler, as the large sizes are called, are particularly efficient where a large service is required, both from the standpoint of gas consumption and where a simultaneous drain from a number of faucets occurs. The latter is covered with the storage feature and applies to all portions of the building. Electric Weld heaters are distributed by the Gas Appliance Sales Co. of America.

Hardwood Flooring A Growing Industry.

Inlaid Floor Co., Equipped To Meet This Growing Business.

The opening of the present year found the Inlaid Floor Company, one of San Francisco's most enterprising business firms, installed in their new factory and in a position to meet the demands of an ever increasing business with absolute satisfaction and promptness.

Incorporated in 1897, the Inlaid Floor Company has, from a small beginning, built up the largest trade in the manufacture and installation of ornamental,

above. The building contains an area of 14,000 square feet, all of which is given over to the manufacture of strips and other materials used in connection with their work. The dry kiln operated in connection with the plant has a capacity of 30,000 feet of lumber at one time. An average daily output of 50,000 square feet of manufactured material is maintained through the greater part of the year.

An attractive illustrated catalogue,

Francisco. Down the peninsular the homes of Mary Pauline Payne, James Flood, Francis J. Caroline, Clement Tobin, George A. Pope, H. C. Breeden, J. D. Grant, Eugene De Sable, the San Mateo Polo Club and the San Mateo Country Club are examples of the work of the Inlaid Floor Co. Among the San Francisco homes and buildings in which the company's floors have been installed may be mentioned the following: Adolph Spreckels, A. Roos, A.

hardwood and plain floors to be found in the west. Their business covers the entire State of California and part of Nevada and is conducted along co-operative lines, nearly all of their 87 employees in this city being personally interested in the business.

The Inlaid Floor Company maintains offices in both San Francisco and Oakland. The factory is located at 18th and Alabama streets, in this city, and is a two-story fireproof structure, as shown

in colors, has just been issued by the Inlaid Floor Co., showing numerous patterns of floors, borders and grills, which are carried in stock. The company solicits correspondence from owners, architects and contractors and will gladly submit water color sketches of any special work desired.

The recent work of the Inlaid Floor Company embraces nearly all of the largest and best known private homes and public buildings in and about San

Stern, J. Liebes, St. Luke's Hospital and the Masonic Temple. In Piedmont, Berkeley and Alameda the Inlaid Floor Company have installed their work in the residences of H. W. Taylor, H. H. Hart, Mr. Alexander, H. K. Moffatt, Mr. Barbour, Frank Havens, Wicham Havens, Adolph Uhl, George H. Tyson and James Tyson. The handsome country home of Wm. Tevis at Bakersfield furnishes another excellent example of their workmanship.

MAY VOTE SCHOOL BONDS.

CHICO (Butte Co.), June 12.—The voters of Chico High School District will register their verdict July 7th on a plan to issue bonds for \$70,000 with which to enlarge the High School to a size sufficient for present and future needs. There is hardly seating room at the buildings now in use and a great increase in attendance is expected next term.

The School Board last night chose the date for the High School bond election, and will shortly call an election for bonds in the sum of \$45,000 to be used to construct additional buildings to accommodate the great increase in Grammar School attendance.

EXPECT BIG TIMBER SALE.

District Forester DuBois announces that the Forest Service is anticipating considerable timber sale business adjacent to the branch line of the Southern Pacific Railroad now being constructed from Susanville to the Meadows, through a large body of Government timber on the Susan River watershed within the southeastern portion of the Lassen National Forest.

The stumpage values of the timber within these chances have been appraised, and they will be offered for sale by the Government during the coming Summer. The total amount of timber involved is 456,000,000 feet board measure. The individual chances range in amount from 54,000,000 feet board measure to 127,000,000 feet board measure.

WHY HE WAS UNHAPPY IN ARIZONA.

Tom McNeal tells of a Kansas man who tried living down in Southwest Arizona. One of his objections to the country is the high cost of living. In the three years he was there the weather got so hot on four different occasions that it melted the gold fillings out of his teeth. That made his dentist bills something awful. He finally decided to have his teeth pulled and wear store teeth, but the metal plates got so hot they scorched the roof of his mouth and his gums till they were covered with blisters. The last year he discarded teeth entirely and gummed it, but he wants no more of that country in his.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment houses, 3, 3 story and base, frame, \$12,000 to \$25,000 each. Architect, none. Owners, Metropolis Investment Co., 332 Bush street, S. F. These buildings will be erected at the northwest corner of Hyde and Sacramento streets. Interiors will be arranged for two and three room suites with private baths and wall beds. Interior finish will be of pine with elm panels and hardwood floors. There will be steam heat. Bath rooms will be finished in cement plaster. Exterior will be covered with klinker brick veneer and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor.

SEATTLE, WASH.—Apartment house, 3 story and base, brick, \$35,000. Architect, James H. Schack, Lippy Bldg., Seattle. Owner, C. D. Stimpson. The building will cover an area of 43x117 feet and is to be arranged for thirteen suites of three rooms each and twelve suites of two rooms. All apartments will have wall beds and private bath rooms. Interior finish will be of pine throughout. Some hardwood floors will be used. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with cement plaster and pressed brick. Plans are complete and figures are now being taken.

SEATTLE, WASH.—Apartment house, 3 story and base, brick, \$35,000. Architect, V. W. Voorhees, Eitel Bldg., Seattle. Owner, Dr. G. H. Randall. The building will be erected on Highland Drive and has a frontage on that street of 66 feet and a depth of 70 feet. Plans show 22 apartments of three rooms and bath each. Interior finish will be of pine and white enamel. There will be steam heat, an automatic elevator and vacuum cleaning system. Bath rooms will be finished in cement plaster. A hot water plant will also be installed. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architect, Arthur T. Ehrenpfort, 251 Kearny St., S. F. Owner's name withheld. The building will be erected at the northeast corner of Cole and Rivoli streets, and has been designed to contain ve suites of four rooms and bath each. Interior finish will be of pine with some elm panels and hardwood floors. A steam heating system will be installed. Bath rooms will be finished in cement plaster. All apartments will be equipped with wall beds. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans have been completed and the architect is now taking figures on the work.

SAN FRANCISCO—Apartment house, 5 story and base. Class C construction, \$125,000. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building is to be erected in the Fifty Vara District and will cover a large area. Plans are arranged for 125 suites and single rooms, all of which will have private

baths. There will be steam heat, elevator service, a hot water system and vacuum cleaning plant. Interior finish will be of pine and hardwood with ornamental plaster used in the lobby and amusement rooms. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

PASADENA, LOS ANGELES CO., CAL.—Apartment house, 4 story and base, brick, \$60,000. Architects, Krucker & Deckbar, Ferguson Bldg., L. A. Owners, Charles Slade and S. S. Wood. The building will be erected on a corner site and has been arranged for ten three-room suites and thirty-five two-room suites. Interior finish will be of pine and hardwoods. Ornamental plaster will be used in the lobby and amusement rooms. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water plant. Bath rooms will be finished in cement plaster. All suites will have connecting baths and wall beds. Exterior of the building will be faced with pressed brick. Marble and tile will be used extensively. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick, \$38,000. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Owner, Anna Baker, Contractors, Pozzo Construction Co., 431 Macy St., L. A. Contract price, \$38,000.

CHURCHES.

OAKLAND, CAL.—Synagogue, 1 story and base, reinforced concrete, \$75,000. Architect, G. Albert Lansburgh, 709 Mission St., S. F. Owners, Jewish Synagogue Association of Oakland. This building has been mentioned here before when the architect was first commissioned to prepare the plans. The edifice will be erected at 28th and Webster streets, and has been designed in the classic style. Construction will be fireproof throughout with concrete floors and walls. Exterior will be faced with cement plaster. Interior finish will be of pine, hardwoods and ornamental plaster. There will be a central heating system and a vacuum cleaning plant. Considerable marble and tile will be used. Plans are complete and figures are now being taken.

SAN PEDRO, LOS ANGELES CO., CAL.—Church and institutional building, 4 story and base. Class A construction, \$100,000. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owners, First Methodist Church of San Pedro. The project is still in the preliminary stage and details of construction cannot be given at this time. The plan of the owners is to construct a building which will contain the church proper and dormitories, class rooms, gymnasium, library and auditorium. Construction will be fireproof throughout. Funds are now being raised. Further details will be given in these columns as the plans progress.

LONG BEACH, LOS ANGELES CO., CAL.—Church, 1 story and base, brick and steel, \$75,000. Architects, H. M.

Patterson & Co., O. T. Johnson Bldg., L. A. Owners, Congregational Church of Long Beach. Plans for this building show an attractive structure designed in the Gothic style and covering an area of 100x150 feet. The church will contain a main auditorium seating 1,400 people and a Sunday school seating 500. Besides these two large rooms there will be eighteen class rooms, parlors, library and pastor's study. Basement has been arranged for dining rooms, social hall and junior department. Construction will be of brick with exterior faced with pressed brick. There will be a central heating system. Interior will be finished in pine and hardwood with ornamental plaster. Plans are being prepared.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Warehouses, 2, 1 story and base, brick and steel, \$65,000 and \$150,000. Architect, none. Owners, United States Steel Products Co., Rialto Bldg., S. F. These two buildings are to be erected at the foot of 20th street. A contract for the foundation work has already been let to the Thompson Bridge Co., and the balance of the work will be done by Day Labor under the direction of the owners. One building will cover an area of 162x240 feet and the other an area of 300x380 feet. The smaller structure will be entirely of brick while the larger will have a complete steel frame. Exterior will be faced with stock brick. Work is now underway.

PORTLAND, ORE.—Warehouse, 4 story and base, brick. Cost not stated. Architect, Robert F. Teget, Swetland Bldg., Portland. Owner's name withheld. The building will be erected at the corner of 14th and Burnside streets and will cover a large area. Construction will be of the heavy mill type. Interior will be finished in pine for the offices of the owners. Plans provide for fireproof doors, metal window sash and frames, elevator service and spiral chutes. Exterior of the building will be faced with stock brick. Plans are now being prepared.

LOS ANGELES, CAL.—Warehouse, 5 story and base, reinforced concrete. Cost not stated. Architect's name not given. Owners, City of Los Angeles. Plans for this building, which is to be erected on San Julian street, have been approved by the Board of Education and are now out for figures. Bids will be opened on June 28th. The building will cover an area of 75x90 feet. There will be reinforced concrete walls, floors and roof. Plans provide for elevator service, metal window sash and frames and fireproof doors. Exterior will be faced with cement plaster. Plans can be secured from the secretary of the Board of Education.

BELLINGHAM, WASH.—Cement plant, reinforced concrete construction, \$1,000,000. Engineers not selected. Owners, Puget Sound Cement and Lime Co., Seattle. The Puget Sound Cement and Lime Co., which was recently incorporated at \$3,500,000 for the purpose of manufacturing cement from deposits owned by the company on Orcas Island, has purchased a site from C. H. Larrabee just south of Bellingham, on which to erect a \$1,000,000 plant. Those behind the company are Hans Pederson, the contractor, Madison Bldg., Alex. Paulsen, Paulson Bldg., Spokane, William Thaanum, of the Washington Savings and Loan Association, 810 2nd

Ave., Geo. W. Allen, manager of the National Surety Co., Alaska Bldg., Victor C. Coxhead, Ronald Station, and C. P. Hissett, 914 24th Ave. N. All of Seattle. The plant to be erected, it is stated, will be one of the most modern on the Coast. The erection of this large plant like that of the Olympic Portland cement plant (Haffour-Guthrie interests), now completed, north of Bellingham, will be one of the big construction features of the year in this territory. Further mention of the work will be made in these columns as the plans progress.

Contracts Awarded.

SAN FERNANDO, LOS ANGELES CO., CAL.—Ice plant, 1 and 2 story and base, reinforced concrete, \$22,000. Engineers, Engineering Department Pacific Fruit Express, Pacific Electric Bldg., L. A. Owners, Pacific Fruit Express. Contractor, Carl Leonhardt, H. W. Hellman Bldg., L. A. Contract price, \$22,000. Note: The contract has been taken with the condition that the owners furnish cement and electric work.

FIRE HOUSES AND JAILS.

SAN FRANCISCO—Police station, 2 story and base, brick and stone. Cost not stated. Architect, Architectural Department, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans for the construction of the Harbor Police Station have been approved and are now out for figures. The building will contain captain's office, general office, cell block and retiring rooms for the patrolmen. There will be a central heating system and modern plumbing. Interior will be finished in pine and hardwood. The exterior of the building will be faced with pressed brick and stone. Plans can be secured from the Department of Architecture. Bids will be opened on June 15th by the Board of Public Works.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, Mrs. Anna P. Marsh, 418 Raymond Apartments, Franklin and Market streets, S. F. The building will be erected on 8th avenue south of Cabrillo, and will contain two modern flats of four and five rooms each. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be either open fire places or gas grates. Mantels will be of tile. Tile will be used in the bath rooms and kitchens. Exterior of the house will be covered with shiplap and rustic with klunker brick veneer. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Flat, 2 story and base, frame, \$3,000. Architect, John Anderson, 1422 Broadway, Oakland. Owner, T. F. Watson. The building will be erected on 41st street and has been designed to contain two flats of four and five rooms each with bath. Interior finish will be of pine and redwood with some hardwood floors. There will be open fire places and brick mantels. Tile will be used in the bath rooms and kitchens. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor under the direction of Mr. Anderson.

GARAGES.

OAKLAND, CAL.—Garage and sales rooms, 2 story and base, reinforced concrete, \$50,000. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, Cuyler Lee. The building will be erected at the corner of 24th and Broadway and has been designed for an automobile sales room. Interior of the front portion of the building will be handsomely finished in hardwoods, marble and tile. Rear of the first floor and entire second floor will be used for repair shop and storage space. Construction will be fireproof throughout. Metal window sash and frames are specified. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken for the excavating, concrete work and steel. As soon as specifications for the balance of the work can be completed it will be put out for figures.

LOS ANGELES, CAL.—Garage, 1 story and base, reinforced concrete, \$12,000. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owners, Messrs. Belgard and Jackson. The building has been designed for a commercial garage and will cover an area of 65x150 feet. Construction will be fireproof throughout with cement floor and reinforced concrete walls. Plans provide for metal window sash and frames, special storage tanks and patent store fronts. The front of the building will be fitted up for offices and is to be handsomely finished. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architects, Kempel & Erkes, Henne Bldg., L. A. Owners, Schmidt Estate. The building will cover an area of 100x176 feet. There will be four stores besides the garage. Design is in the Old English style. There will be a concrete floor, copper store fronts, ruffled brick facing and granite base. A slate roof is specified. Plans are nearly complete and bids will be called at once.

LOS ANGELES, CAL.—Garage, 2 story and base, brick. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, H. W. O'Melveny. The building will be erected at the corner of 12th and Figueroa streets, and has been designed for a commercial garage. The building will cover an area of 60x150 feet. The first floor and basement will be given over to storage space and offices. Upper floor will be fitted up for a modern machine shop. There will be special gasoline storage tanks. Interior finish will be of pine throughout. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

GOVERNMENT WORK AND SUPPLIES.

Santa Barbara, Cal., Post Office.

As previously reported, the contract for the construction of the U. S. public building at Santa Barbara, Cal., was awarded to Eugene Schuler, Wahpeton, N. D., at \$105,015. In the construction of the building the following fixtures and materials will be used: Plumbing fixtures, Federal-Huber Co.; direct radiators, Kewanee Boiler Co.; wall radiators, Fowler & Wolf Mfg. Co.; non-conducting coverings, Ehret-Magnesia

Mfg. Co.; radiator valves, Jenkins Bros.; pressure regulator, Bishop, Babcock, Becker Co.; air valves for radiators, do; air valves for end of steam mains, etc., do; hydraulic vacuum pump for air removal system, do; boiler, Kewanee Boiler Co.; lighting fixtures, Brass Products Co.; cabinet and tablet, Frank Adam Electric Co.; conduit, Mark Mfg. Co.; wire, John A. Roebling's Sons Co.; plug receptacles, Bryant Electric Co.; snap switches, Arrow Electric Co.

Pocatello, Idaho, Construction.

The following is a detail of the bids received by the supervising architect, Treasury Department, Washington, D. C., for the construction of the U. S. post office and court house at Pocatello, Idaho:

Bid 1. Whiteway-Lee Construction Co., Boise, Idaho.

2. Palmberg & Mattson, Astoria, Ore.

3. W. D. Lovell, Minneapolis, Minn.

4. Campbell Building Co. of Utah, Salt Lake City, Utah.

5. William H. Maxwell, Auburn, Ind.

6. Hiram Lloyd Building and Construction Co., Odd Fellows Building, St. Louis, Mo.

7. George A. Whitmeyer & Sons, Ogden, Utah.

Limestone—Bid 1, \$93,300; 2, \$97,200; 3, \$99,900; 4, \$101,024; 5, \$106,627; 6, \$109,254.

Sandstone—Bid 1, \$94,445; 2, \$97,200; 4, \$99,524; 6, \$112,254; 7, \$116,662.

Alternate A (substituting brick for macadam in connection with the driveway, as specified)—Bid 1, \$907; 2, \$760; 3, \$1000; 4, \$1,750; 5, \$598; 6, \$400.

Alternate B (substituting stone for exterior terra cotta, as specified), add to limestone bid—Bid 1, \$5,011; 2, \$3,000; 3, \$3,000; 4, \$1,700; 5, \$2,085; 6, \$4,000. Add to sandstone bid—Bid 1, \$5,694; 2, \$3,000; 4, \$4,300; 6, \$7,500; 7, \$6,195.

Alternate C (substituting granite for concrete in connection with terrace steps at Arthur avenue entrance, as specified), add—Bid 1, \$184; 2, \$500; 3, \$400; 4, \$282; 5, \$230; 6, \$400.

Alternate D (substituting terrazzo floor with marble borders, marble cross strips, marble base, marble thresholds, etc., for wood floor base, etc., in 2nd story corridor, as specified), add—Bid 1, \$799; 2, \$940; 3, \$600; 4, \$447; 5, \$248; 6, \$400.

Alternate E (substituting Keene's cement for hard plaster, as specified)—Bid 1, \$630; 2, \$600; 3, \$1,000; 4, \$500; 5, \$700; 6, \$800.

Amount included for all work in connection with approaches—Bid 1, \$2,230; 2, \$1,875; 3, \$2,300; 4, \$2,400; 5, \$2,134; 6, \$4,300.

Amount included for subdrainage system, complete, including catch basin—Bid 1, \$630; 2, \$350; 3, \$300; 4, \$375; 5, \$218; 6, \$580.

Amount included for all work in connection with waterproofing of basement walls, including the brick or terra cotta lining—Bid 1, \$814; 2, \$150; 3, \$300; 4, \$415; 6, \$446; 6, \$450.

Amount included for window and door screens—Bid 1, \$525; 2, \$440; 3, \$500; 4, \$435; 5, \$1,280; 6, \$300.

Amount included for all work specified under heading of "Plumbing"—Bid 1, \$4,185; 2, \$6,300; 3, \$1,500; 4, \$1,750; 5, \$6,860; 6, \$1,700.

Amount included for all marble work and terrazzo floors, complete in place, in all toilet rooms and in janitor's

sink closet—Bid 1, \$2,430; 2, \$2,500; 3, \$2,000; 4, \$2,750; 5, \$1800; 6, \$200.

Amount included for all work specified under head of "Gas piping"—Bid 1, \$472; 2, \$475; 3, \$150; 4, \$390; 5, \$420; 6, \$300; 7, \$275.

Amount included for all work specified under "Heating apparatus"—Bid 1, \$6,109; 2, \$5,010; 3, \$4,500; 4, \$4,650; 5, \$4,538; 6, \$4,900.

Amount included for all work specified under head of "Conduit and wiring system"—Bid 1, \$2,310; 2, \$2,800; 3, \$2,500; 4, \$2,925; 5, \$2,600; 6, \$2,000.

Amount included for all work specified under "Lighting fixtures"—Bid 1, \$1,625; 2, \$1,800; 3, \$1,600; 4, \$1,400; 5, \$1,700; 6, \$1,100.

Amount to be deducted if nonconducting coverings are omitted from the of water tank, all cold water, hot water, and circulating piping of plumbing system, except the ice water piping and piping concealed in chases—Bid 1, \$400; 2, \$125; 3, \$200; 4, \$375; 5, \$280; 6, \$100.

Amount to be deducted if all nonconducting coverings are omitted from the reeching and pipes and fittings of heating apparatus, except risers in chases—Bid 1, \$240; 2, \$185; 3, \$200; 4, \$260; 5, \$35; 6, \$150; 7, \$400.

Manufacturer of plumbing fixtures—Bid 1, Federal-Huber Co.; 2, Federal-Huber; 3, Crane Co.; 4, John Douglas & Co.; 5, Federal-Huber; 6, Wolff; 7, Crane Co.

Manufacturer of lighting fixtures—Bid 1, Brass Products Co.; 2, Frank Adam Electric Co.; 3, Frank Adam; 4, Capitol Electric Co., Salt Lake City; 5, Brass Products Co.; 7, General Electric

Manufacturer of direct radiators—Bid 1, U. S. Radiator Corporation; 2, American Radiator Co.; 3, American Radiator Co.; 4, American Radiator Co.; 5, Kewanee; 6, American Radiator Co.

Manufacturer of indirect radiators—Bid 1, U. S. Radiator Corporation; 2, American Radiator Co.; 3, American Radiator Co.; 4, American Radiator Co.; 7, American Radiator Co.

Manufacturer of wall radiators—Bid 1, U. S. Radiator Corporation; 2, American Radiator Co.; 3, American Radiator Co.; 4, American Radiator Co.; 7, American Radiator Co.

Manufacturer of nonconducting coverings—Bid 1, Johns-Manville; 3, Johns-Manville; 4, Johns-Manville; 7, American Radiator Co.

Manufacturer of radiator valves—Bid 1, Crane Co.; 2, Jenkins; 3, Jenkins; 4, Jenkins; 6, Jenkins; 7, Crane Co.

Manufacturer of conduit and tablet—Bid 1, Brass Products Co.; 2, Frank Adam; 3, Frank Adam; 4, Frank Adam; 5, Frank Adam; 7, General Electric Co.

Manufacturer of conduit—Bid 1, Brass Products Co.; 2, "Galvaduct"; 3, Western Conduit Co.; 4, National Metal Mfg. Co.; 6, Western Mfg. Co.; 7, General Electric Co.

Manufacturer of wire—Bid 1, Waterbury Co.; 2, John Roebbling's Sons Co.; 3, Hazard Mfg. Co.; 4, Phillips Insulated Wire Co.; 6, Hazard Mfg. Co.; 7, General Electric Co.

Manufacturer of plug receptacles—Bid 1, Bryant Electric Co.; 2, General Electric Co.; 3, Bryant; 4, General Electric Co.; 6, Bryant; 7, General Electric Co.

Manufacturer of snap switches—Bid 1, Hart Mfg. Co.; 2, General Electric

Co.; 3, Arrow Electric Co.; 4, General Electric Co.; 6, Arrow; 7, General Electric Co.

Prospective Bidders.

Specifications for work under the office of the supervising architect have been furnished to the following firms in addition to those previously noted in these columns:

Grand Junction, Colo., Construction, June 24.

Wm. H. Maxwell, Auburn, Ind.
Conners Bros. Co., Lowell, Mass.
Hiram Lloyd Building and Construction Co., Odd Fellows Bldg., St. Louis, Mo.

J. E. & A. L. Pennock, Land Title Building, Philadelphia, Pa.

J. H. Wiese, Omaha, Neb.

King Lumber Co., Charlottesville, Va.
J. J. Lumsden, Canon Block, Grand Junction, Colo.

P. J. Moran, Contractor (Inc.), Salt Lake City, Utah.

George Hinchliff Co., Security Bldg., Chicago, Ill.

Campbell Building Co., Salt Lake City, Utah.

Christensen Construction Co., 17 W. 42nd street, New York city.

George A. Warning, General Contractor, Grand Junction, Colo.

Grass Valley, Cal., Construction, June 30.

The Northwestern Co., Post Office Bldg., Santa Barbara, Cal.

King Lumber Co., Charlottesville, Va.
B. J. Duffy, 3673 17th street, San Francisco, Cal.

Christensen Bros., Oakland, Cal.

Honolulu, Hawaii, Construction, June 20.

King Lumber Co., Charlottesville, Va.
Wm. H. Maxwell, Auburn, Ind.

P. J. Carlin Construction Co., 1 Madison avenue, New York city.

J. E. & A. L. Pennock, Land Title Building, Philadelphia, Pa.

Grant Fee, San Francisco, Cal.

Southern Construction Co., Lowman Bldg., Seattle, Wash.

The Wittenman Co., Buffalo, N. Y.

W. N. Concannon, San Francisco, Cal.

Yards and Docks.

Specifications for work under the bureau of yards and docks, Navy Department, have been furnished to the following firms in addition to those previously mentioned in these columns:

Pearl Harbor, Building, June 28.

Spaulding Construction Co., Portland, Ore.

Crane Co., Washington, D. C.

W. N. Concannon, San Francisco, Cal.

Carnegie Steel Co., Philadelphia, Pa.

Conners Bros. Co., Lowell, Mass.

Pearl Harbor, Gunners' Quarters, June 28.

Spaulding Construction Co., Portland, Ore.

Crane Co., Washington, D. C.

Conners Bros., Lowell, Mass.

Carnegie Steel Co., Philadelphia, Pa.

W. N. Concannon, San Francisco, Cal.

Puget Sound, Cranes, June 21.

General Electric Co., Schenectady, N. Y.

Cutler-Hammer Mfg. Co., Milwaukee, Wis.

Niles-Cement-Pond Co., 111 Broadway, New York city.

Curtis Pneumatic Machinery Co., St. Louis, Mo.

Pawling & Harnischfeger Co., Milwaukee, Wis.

Manning, Maxwell & Moors, 85 Liberty street, New York city.

J. H. Schneider Iron Co., National Bank Bldg., Washington, D. C.
American Hoist and Derrick Co., St. Paul, Minn.

Morgan Engineering Co., Alliance, O.
Cyclops Iron Works, 847 Folsom street, San Francisco, Cal.

Dutler Engineering and Construction Co., 687 Howard street, San Francisco, Cal.

Doors for Canal Fortifications.

On July 7, 1913, the Isthmian Canal Commission will open bids under circular 780 for furnishing a number of doors and gratings for seacoast batteries in connection with the fortifications on the Pacific and Atlantic sides of the Isthmus of Panama. These doors and material are to be of structural steel and the gratings are to be of mild steel of the same characteristics as is specified for the doors. The following batteries will be supplied with the necessary doors and gratings: Howard, Tibball, Merritt, Kilpatrick, Weed, Parke, Stanley, Mower, Webb, Burnside, Buell and Warren.

The doors for battery Howard are to be delivered on the Isthmus within two months after the award, while those for batteries Stanley and Mower within three months after the award, and the entire order is to be delivered complete within six months. The specifications state that the award is to be made in the aggregate and to one firm only. The question of early delivery will be given careful consideration when award is made. The desired quantities are 156 double doors, 25 single hinge doors, 1 double sliding door, 104 sliding doors, 122 sliding gratings, 15 double sliding gratings, 52 double-hinge gratings, 116 single-hinge gratings, 3 double lazy tong gratings, and 3 single lazy tong gratings.

Wahpeton Indian School.

The following bids were received at the office of the commissioner of Indian Affairs, Washington, D. C., for the erection of a brick hospital at the Wahpeton Indian School, N. D.:

Item 1, for the building complete; 2, for omitting plaster ceiling and substituting metal; 3, for using hardwood floors.

F. A. Hancock, Morris, Minn., Item 1, \$24,350; 2, add \$350; 3, add \$150.

R. K. Hafsos, Aberdeen, S. D., Item 1, \$17,960; 2, add \$200; 3, add \$190.

Schuland & Co., Alexandria, Minn., Item 1, \$19,742; 2, add \$205; 3, add \$5.

W. D. Lovell, Minneapolis, Minn., Item 1, \$19,800; 2, add \$200; 3, add \$100.

Raymond Stencil, Wahpeton, N. D., Item 1, \$22,497; 2, add \$73; 3, add \$25.

Sam Christensen, Wahpeton, N. D., Item 1, \$22,600; 2, \$22,984; 3, \$22,740.

Lumber and Piles, Canal Circular 780.

The Isthmian Canal Commission is calling for bids for furnishing a quantity of lumber and piles under classes 6, 7 and 8 of canal circular 780, bids to be opened July 7. The details of these classes follow:

Class 6—25,000 ft siding, 5,000 ft 1x4 lumber, \$48; 250,000 ft 1x12 lumber, \$48; 50,000 ft 2x3 lumber, \$48; 50,000 ft 2x4 lumber, \$48; 40,000 ft 2x8 lumber, \$48; 100,000 ft 2x13 lumber, \$181E; 100,000 ft 2x12 lumber, \$48; 60,000 ft 3x8 lumber, \$48; 120,000 ft 3x10 lumber, \$48; 50,000 ft 3x12 lumber, \$48; 80,000 ft 4x4 lumber, \$48; 30,000 ft 6x8 lumber, rough; 30,000 ft 6x12 lumber, rough; 50,000 ft 8x8 lumber, rough;

20,000 ft 8x10 lumber, rough; 15,000 ft 8x12 lumber, rough; 70,000 ft 12x12 lumber, rough.

Class 7.—125,000 ft 3x6 inch yellow pine lumber for car stakes.

Class 8.—Creosoted piles: 50 lengths 50 ft; 50 lengths 55 ft; 100 lengths 60 ft; 50 lengths 65 ft; 50 lengths 70 ft; 100 lengths 75 ft; 100 lengths 80 ft.

Canal Circular 780.

The Isthmian Canal Commission will open bids on July 7 under circular 780 for furnishing the following supplies and material:

Class 1. Doors and gratings for sea-coast batteries.

Class 2. 18 locomotive driving wheel tires.

Class 3. 1,500 deck scrubbing brushes.

Class 4. 100,000 lbs. fire clay.

Class 5. 3,000 gals liquid coal tar.

Class 6. A quantity of dressed and rough lumber.

Class 7. 125,000 ft yellow pine lumber for car stakes.

Class 8. A quantity of creosoted piles.

Pearl Harbor, H. T., Oil Tank.

The contract for the construction of an oil tank at the U. S. naval station, Pearl Harbor, under bids opened May 24, has been awarded to the Treadwell Construction Co., Midland, Pa., at \$20,250.

Building, Fort Huachuca, Ariz.

The contract for all work in connection with the construction of buildings at Fort Huachuca, Ariz., including the construction, plumbing, heating, wiring, lighting, etc., has been awarded to J. P. Dalton & Sons, of Junction City, Kans., at prices as follows: For three double sets of officers' quarters, \$11,198 each, plus for two additional replaces on second floor of same, \$140 each; for two company barracks, \$13,268 each; for one double lavatory, \$7,808 each; for extension to sewer system, \$3,443; for addition to hospital, \$17,813; for concrete floor in lavatory, \$65; for addition to commissary storehouse, \$14,087; grand total for all work, \$108,766. Plumbing fixtures manufactured by the L. Wolf Mfg. Co. are to be used. The old quartermaster's storehouse is not to be remodeled at this time, contract having been awarded for two company barracks, instead of one.

The following bid was received by the general purchasing officer, Isthmian Canal Commission, Washington, D. C., for furnishing Class 1 of canal circular 778-A, a miscellaneous quantity of enamel brick:

Bid 1. American Enamel Brick Co., 1182 Broadway, New York city, \$10,760.99; delivery 115 days; inspection to be made at South River, N. J.

HALLS AND SOCIETY BUILDINGS.

OAKLAND, CAL.—Museum, 1 story and base, frame addition, \$4,000. Architect, Supervising Architect J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids for this work were opened at the last meeting of the Library Trustees and all bids have been rejected as the lowest was some \$500 above the amount available. Plans will probably be revised. A complete list of the figures as opened appears under the heading of Oakland and Alameda County in this issue.

SAN FRANCISCO—Lodge hall, 3 story and base, Class A and class C construction, \$180,000. Architect, Will D. Shea, 244 Kearny St., S. F. Owners, Young Men's Institute. This building has been mentioned here a number of times before. A contract for the excavating has been awarded to Daniel O'Day & Co., and plans for the balance of the work are now out for figures. The building is classic in design and will be of the class A type in nearly all parts. The first floor contains a large library, offices, reading rooms, etc. A large gymnasium will occupy the basement. Upper floors will be arranged for lodge halls, banquet rooms and ball room. Interior will be handsomely finished in hardwoods and ornamental plaster. Exterior will be faced with granite and terra cotta. There will be steam heat, elevator service, a vacuum cleaning system and other modern conveniences.

PASADENA, LOS ANGELES CO., CAL.—Lodge hall, 3 story and base, brick and steel, \$40,000. Architects, Foss Designing and Building Co., 100 East Colorado St., Pasadena. Owners, Pasadena Odd Fellows Temple Association. This work has been mentioned here before when the architects were first commissioned to prepare the plans. The basement will contain furnace rooms and a banquet hall, first floor the lobby, parlors, library and offices. A large auditorium, lodge rooms and club rooms will occupy the second floor and the third floor will be arranged for living apartments for the members. There will be steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with stone. Plans are complete and bids will be opened on June 23rd.

Contracts Awarded.

BAKERSFIELD, KERN CO., CAL.—Club house, 3 story and base, brick and steel, \$35,507. Architect, Thomas B. Wiseman, Producers' Bank Bldg., Bakersfield. Owners, Bakersfield Club. Contractor, D. Ashbury Evans, Fresno. Contract price, \$35,507.

HOTELS.

SAN FRANCISCO—Hotel, 3 story and base, Class C construction. Cost not stated. Architect, Arthur T. Ehrenpfer, 251 Kearny St., S. F. Owner's name withheld. The building will be erected on Larkin street near the Civic Center. The first floor will be arranged for three stores and upper floors will be subdivided in 45 guest rooms and a number of bath rooms. Plans provide for steam heat, elevator service and a hot water plant. Interior finish will be of pine and hardwood. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with cement plaster or pressed brick. Plans are now being prepared.

SALEM, ORE.—Hotel, 4 story and base, brick and concrete, \$85,000. Architect, Aaron Gould, Worcester Bldg., Portland. Owner, R. R. Ryan. The building will occupy an important business corner and will cover an area of 160x103 feet. There will be a number of stores on the first floor besides the hotel lobby and offices. Upper floors will be subdivided into a large number of guest rooms, offices and club rooms. Plans provide for steam heat, elevator service and a hot water plant. Interior finish will be of pine throughout. Bath rooms will be wainscoted with tile.

The exterior of the building will be faced with pressed brick. Plans are now complete and figures are being taken.

SPRINGFIELD, ORE.—Hotel, 3 story and base, concrete and brick, \$75,000. Architect, George Post, Salem. Owner, D. S. Pabb. The building has been designed for a modern commercial hotel. The corner lot on which the building will be erected covers an area of 100x110 feet. The first floor will contain stores, hotel lobby, offices and dining rooms. Upper floors will be subdivided into about 110 guest rooms, a number of which will have connecting baths. There will be steam heat and a hot water plant. Interior finish will be of pine throughout. Exterior of the building will be faced with pressed pressed brick and cement plaster. Plans are now being prepared.

LOS ANGELES, CAL.—Hotel, 3 story and base, brick. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owner, Walter H. Fisher. Contractor, Alex Grant, 1002 Union Oil Bldg., L. A. Note: This contract has been taken on a percentage basis. Plans have not been completed but work will start within a few days.

IMPERIAL, IMPERIAL CO., CAL.—Hotel addition, 2 story, brick. Cost not stated. Architects, Alfred W. Rea and Charles Garstang, Black Bldg., L. A. Owners, Hotel Imperial Co. The addition will be two stories high and covers an area of 44x135 feet. Plans provide for a store room, 24 guest rooms and 16 baths. Interior finish will be of pine throughout. Hot and cold running water will be supplied to all rooms. Besides this addition plans will be drawn shortly for an arcade 13 feet wide and also of brick construction. Plans for the addition are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, E. C. Thorne, Realty Board Bldg., L. A. Owner, I. I. De Hall. The building will be erected at the corner of Los Angeles and Commercial streets and will cover an area of 64x110 feet. There will be five stores on the first floor besides the entrance to the hotel. Upper floors will be subdivided into 100 guest rooms and a number of baths. Interior finish will be entirely of pine. Bath rooms will have cement floors and tile wainscot. There will be steam heat, elevator service and a hot water supply. Exterior of the building will be faced with pressed brick. Plans are complete and materials are now being purchased. The work will be done by Day Labor.

Contracts Awarded.

MODESTO, STANISLAUS CO., CAL.—Hotel, 4 story and base, brick and steel \$115,000. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owners, Crow & Hogan. Contractor, George Shannon, Modesto. This contract has been taken on a percentage basis. Plans are now being prepared and work will be started as soon as the working drawings are completed.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Palace of Mine frame construction, \$217,000. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids for the construction of the Palace of Mines will

opened by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Co. on Thursday. Bids were also opened at the same time for the plumbing, sewers and water pipes in the same building. Streshlow, Freeze & Peterson were low at \$217,000 for the general construction, and Robert Dalziel, Jr., Co. were low on the plumbing at \$13,847. No contracts were awarded. A complete list of the bids appears under San Francisco in this issue.

RAILROAD CONSTRUCTION—AND EQUIPMENT

LOS ANGELES, CAL. Passenger station, 1 and 2 story and base. Class A and C construction, \$250,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owners, Southern Pacific Co. This work was mentioned here last week. Working drawings for the building are complete and figures will be called for at once. The main portion of the building will be one story high and of the class A type, 220 feet long and 70 feet wide. Two, two-story wings of the class C type will complete the building.

RESIDENCES.

SAN FRANCISCO—Residence, 3 story and base, brick and frame, \$6,000. Architect, none. Owner, Mary E. Sealey, 306 Geary St., S. F. The dwelling will be erected at the corner of Powell and Sacramento streets, and will contain in the neighborhood of ten rooms and two baths. Interior will be finished in pine and hardwoods with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchen. Exterior of the dwelling will be covered with pressed brick. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story, attic and base, frame, \$12,000. Architect, none. Owner, Dr. A. B. Paulding, Lane Hospital, S. F. The dwelling will be erected on Green street between Divisadero and Broadway streets, and has been designed to contain ten rooms, three baths and a sleeping porch. Interior will be handsomely finished in pine, oak and mahogany. There will be furnace heat and open fire places. Mantels will be of brick or tile. Bath rooms will be finished in tile. An automatic water heater will be installed. Hardwood floors are specified in all rooms. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

PIEDMONT, ALAMEDA CO., CAL.—Residence alterations, 2 story and base, frame, \$2,500. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, Mrs. C. J. Evans. This work will consist of new plastering, plumbing, painting and electric work. Interior of the house will be altered and two new rooms added. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. Furnace heat is to be installed. A large brick mantel will be used in the living room. Exterior of the dwelling will be covered with shingles. Plans are complete and the work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—

Residence, 2 story, attic and base, frame, \$25,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, H. J. Knolles. The dwelling will be erected on Mountain avenue, and will contain in the neighborhood of fourteen rooms, several baths and sleeping porches. A garage will also be erected on the lot. Interior of the dwelling will be finished in pine, oak and mahogany with the sleeping rooms finished in white enamel. There will be furnace heat and open fire places. Mantels will be of brick or tile. Hardwood floors will be used in the principal rooms. Bath rooms will be finished in tile. Plans provide for an automatic water heater and vacuum cleaning system. Exterior of the house will be covered with cement plaster on metal lath. Plans have been completed and figures are now being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Harris Allen, 2514 Hillegass Ave., Berkeley. Owner, Mrs. Gertrude D. White. This house will be erected on Plaza Drive, in Claremont Park, and has been designed to contain seven rooms, bath and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and an open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, F. Thomas, Jr. The dwelling has been designed for a six room house with bath. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and an open fire place. Mantel will be of brick or tile. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with shakes. Plans are now being prepared.

SAN LEANDRO, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$6,000. Architects, Newsom & Dixon, 812 Broadway, Oakland. Owner, Mr. Merrill. The dwelling will contain eight rooms, bath and sleeping porch. Interior finish will be of pine, oak and mahogany. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

SEATTLE, WASH.—Residence, 3 story and base, brick and frame, \$100,000. Architects, Cutler & Malmgren, Paulson Bldg., Seattle. Owner, C. D. Stimpson. This work has been mentioned here before when plans were first started. The dwelling will be erected in Highlands, and is to be one of the most attractive homes in Seattle. Interior will be finished entirely in hardwoods. Baths will have tile floors and wainscot. There will be a

central heating system, probably steam. The exterior of the house will be faced with pressed brick. Plans are complete and the work is being done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, O. E. Evans, 2367 Mission St., S. F. Owner, James Welsh. The dwelling has been designed for a seven-room house with bath, and will be erected on 11th avenue near Anza street. Interior will be finished in pine and elm. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with brick veneer to the water table and with cement plaster and rustic above that point. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residences, 3, 2 story and base, frame. Cost not stated. Architect, Joseph Cahen, 45 Kearny St., S. F. Owners, Oscar Heyman Bros. These houses have been designed for seven and eight room dwellings and will be erected on 24th avenue near Lincoln Way. Interior finish will be of pine with some elm panels and hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will also be used in the bath rooms and kitchens. Automatic water heaters will be installed in the eight-room houses. Exteriors will be covered with cement plaster on metal lath, brick veneer, shingles and rustic. Plans are being prepared and when complete the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame. Cost not stated. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner's name withheld. The dwelling will be erected on the Great Highway near the wireless station, and has been designed for a ten room house with baths and sleeping porches. Interior will be finished in pine, oak and mahogany. There will be furnace heat and open fire places. Mantels will be of brick and tile. The bath rooms will be finished in tile. Tile will also be used in the kitchen. Hardwood floors will be used in the principal rooms. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Residences, 2, 2 story and base, frame. Cost not stated. Architect, Joseph Cahen, 45 Kearny St., S. F. Owners, Oscar Heyman Bros. These two houses will be erected on 23rd avenue near Lincoln Way, and each will contain seven rooms and bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be large open fire places in the living rooms with brick mantels. Tile will be used in the baths and kitchens. Exteriors will be covered with cement plaster, rustic and shingles. Plans are being prepared and when complete the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,000. Architect, J. Henry Boehrer, Delger Bldg., Oakland. Owner, Milton Newmart. The house will contain seven rooms, bath and sleeping porch.

BUILDING AND INDUSTRIAL NEWS

Interior will be finished in pine and hardwoods with hardwood floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$3,000. Architect, none. Owners, United Home Builders, 1762 Broadway, Oakland. The dwelling will contain seven rooms and bath. Interior finish will be of pine with some oak veneer. Hardwood floors will be used in the living room, dining room, den and reception hall. A large sleeping porch will be a feature of the house. There will be furnace heat and an open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. Exterior of the bungalow will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, I. W. Button, 5930 Telegraph Ave., Oakland. The dwelling will be erected on Oakvale avenue, and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine with some oak veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of brick or tile. Bath room will be finished in cement plaster. The wainscot will be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

LIVERMORE, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$4,500. Architect, Harvey Partridge Smith, Blake Bldg., Oakland. Owner, G. H. Todd. The dwelling will contain seven rooms and bath, and is to be erected on property adjoining the plant of the Coast Supply Co. Interior will be finished in pine and hardwoods with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will be finished in cement plaster. Tile will be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL.—Residence, 2 story and base, frame, \$15,000. Architect's name not stated. Owner, S. P. Mulford. Contractor, D. W. March, 219 So. Lake Ave., Pasadena. Contract has been taken on a percentage basis.

LOS ANGELES, CAL.—Residence, 2 story, attic and base, frame, \$32,000. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owner, Milton E. Getz. Contractors, Barber-Bradley Construction Co., 1824 East 15th St., L. A. Contract price, \$32,000.

SCHOOLS.

SAN FRANCISCO—School, 2 story and base, brick and steel. Cost not stated. Architect, Architectural Department, Temporary City Hall Bldg., S. P. Owners, City and County of San Francisco. Plans for the Columbus

School, which is to be erected on the block bounded by 12th and 13th avenues, Kirkham and Lawton streets, have been completed and are now out for figures. The building has been designed for a twelve-room school, but only six rooms will be constructed at this time. Interior will be finished in pine and maple. There will be a complete steel frame with brick erected walls faced with pressed brick. The plans provide for a steam heating system and vacuum cleaning plant. Bids will be opened by the Board of Public Works on June 18th. Plans can be secured from the Department of Architecture.

SANTA MONICA, LOS ANGELES CO., CAL.—Schools, 2, 2 story and base, brick. Cost not stated. Architects, Allison & Allison, Hiernian Bldg., L. A. Owners, Santa Monica School District. These buildings were mentioned here last week. Plans have been completed and approved and bids will be opened by the Board of Education on June 23rd. One building will be erected on Central avenue and will contain six class rooms and an auditorium. The other improvement will be in the nature of an addition to the Roosevelt School, and will also contain six class rooms. There will be central heating systems in both buildings. Exteriors will be faced with ruffled brick. Plans can be secured from the architects.

PHOENIX, ARIZ.—School, 2 story and base, brick and steel, \$125,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, City of Phoenix. This building has been designed as a grammar school and will cover an area of 280x120 feet. Plans provide for 16 class rooms, an assembly hall, manual training and domestic science departments and offices. Hollow tile and metal lath and plaster interior partitions will be used. Interior finish will be of pine and hardwoods. Exterior will be faced with pressed brick. Plans have been approved by the school board and bids are now being taken. Figures will be opened on July 6th.

HANFORD, KINGS CO., CAL.—School, 1 story and base, brick, \$11,000. Architects, Thayer & Doriot, Forsyth Bldg., Fresno. Owners, Hanford School District. The building will contain four class rooms and the principal's office. Interior will be finished in pine throughout. There will be a central heating system. Exterior of the building will be faced with pressed brick. Plans are nearly complete and bids will be called for within a few days. Plans can be secured from the architects.

BAKERSFIELD, KERN CO., CAL.—School, 2 story and base, brick. Cost not stated. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. The School Board has approved the preliminary plans submitted by Architect Clark for the Niles street school and have called for bids on the construction. The building will contain eight-class rooms, assembly hall, office and teachers' rooms. Interior will be finished in pine with maple floors. A central heating system will be installed. Plans provide for vacuum cleaning and program clocks. Exterior of the building will be faced with pressed brick. Plans can be secured from the architect.

BAKERSFIELD, KERN CO., CAL.—School remodeling, brick and frame construction. Cost not stated. Architect, O. L. Clark, Brower Bldg., Bakers-

field. Owners, City of Bakersfield. Plans for remodeling the Bryant School, recently damaged by fire, have been approved by the Board of Education. The work will include a new composition roof, galvanized iron cornice, interior finish and plastering. Bids will be called for on the work shortly.

FULLERTON, ORANGE CO., CAL.—School, 2 story and base, reinforced concrete and brick, \$60,000. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Fullerton School District. All bids received for this work were above the appropriation and have been taken under advisement. The following bids were submitted: General Contract—George C. Condon, \$51,000; Sawtelle Building and Construction Co., \$78,496; Chas. Betts, Upland, \$59,275; Kling Co., \$59,372; Perkins & Holcomb, \$62,000; David Irvine, \$62,996; Plumbing—B. A. Fuller, \$2,485; Chas. Arndt, \$2,758; Coony & Winterbottom, \$2,800; J. F. Blair, \$2,300. Heating and Ventilating—Machinery and Electrical Co., \$4,573 and \$5,300; Cass-Smurdamerel, \$5,150; American Heating and Construction Co., \$5,229; E. D. Hough, \$5,560.

SEATTLE, WASH.—School, 1 story and base, reinforced concrete, \$25,000. Architect, Edgar Blair, 901 7th Ave., Seattle. Owners, City of Seattle. Plans for the East Harrison street school have been approved by the Board of Education and bids will be opened on June 25th. The building will contain six standard sized class rooms and an assembly hall. Interior will be finished in pine with maple floors. There will be steam heat and a vacuum cleaning system. Bids are to be taken for the entire work including the heating and plumbing. Exterior of the building will be faced with cement plaster. Plans can be secured from the architect or from Reuben W. Jones, Secretary of the Board of Education.

CORVALLIS, ORE.—University buildings, brick and steel construction. Cost not stated. Architects, Bennes & Hendricks, Portland. Owners, Oregon Agricultural College. The first work to be undertaken will be the construction of a large structure which will be built in three units. The first of these, which is to be occupied by the domestic science department, will be the only part built at this time. This will be three stories high and will cost \$55,000. It will be of brick and mill construction and equipped with the Plenum system of heating and ventilating; all modern plumbing, etc. The basement will have a cafe, kitchen serving room and a laundry and the upper floors will be used expressly for laboratories, including six for food and cookeries, and three large laboratories, 25x65, together with necessary lockers, reading rooms, etc. The other buildings to be built are the Art Science building and the Administration building. These are to be built later, the cost of which will make a required expenditure of \$175,000. In addition to these buildings a gymnasium will be built 261x159 in dimension, to be erected at a cost of \$160,000, but only one wing will be built at this time which will cost \$60,000. This, too, will be of brick and mill construction and will have a gymnasium, 90x150, a gallery and running track, a swimming tank 50x100, four bowling alleys and two hand ball courts.

Contracts Awarded.

HUNTINGTON PARK, LOS ANGELES CO., CAL.—School, 1 story and base, reinforced concrete. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Huntington Park School District. Contractor, C. S. McCully, general construction, \$20,750; A. Frank, plumbing, \$2,625; Litsinger & Bennett, wiring, \$663.40; W. G. Hutchison Co., lighting fixtures, \$100, and G. A. Jones, sidewalk work, \$632.10.

BAKERSFIELD, KEIN CO., CAL.—School addition, 2 story and base, reinforced concrete and brick, \$28,500. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. Contractor, M. T. Kean, Bakersfield. Contract price, \$28,500.

SEWERS, STREET WORK AND WATER SYSTEMS.

TULARE, TULARE CO., CAL.—Pumping plant, domestic service and fire service pumps. Cost not stated. Engineers, Sloan & Robson, Nevada Bank Bldg., S. F. Owners, City of Tulare. Plans for the O street pumping station are complete and bids for the equipment will be opened on July 7th. The equipment includes the following: Two domestic service pumps of 750 gallons per minute driven by two 60 h. p. motors, and two fire service pumps of 750 gallons per minute, driven by two 40 h. p. motors. Plans can be secured from Sloan & Robson.

Contracts Awarded.

LONG BEACH, LOS ANGELES CO., CAL.—Power plant additional unit, reinforced concrete, \$1,000,000. Engineers, Southern California Edison Co. Contractors, F. O. Engstrom Co., 5th and Seaton Sts., L. A. Contract price, \$1,000,000. Note: This is the second unit of this project, work on which has been started.

STORES AND OFFICES.

SAN FRANCISCO—Stores and lofts, 5 story and base, reinforced concrete, \$35,000. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owners, California Poultry Co. This building has been mentioned here before when plans were first started. The building will be erected in the heart of the wholesale district, and has been designed for a large market on the first floor and storage and packing rooms above. The basement will contain a complete cooling system for the building. A large amount of tile will be used. Plans provide for elevator service and steam heat. Metal window sash and frames will be used. Exterior of the building will be faced with cement plaster. Plans have been out for figures and a contract will be awarded within a few days.

SAN FRANCISCO — Stores and billiard hall, 2 story and base, frame. Cost not stated. Architect, J. E. Kraft & Sons, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Polk street at the corner of Austin avenue, and will cover an area of 69x70 feet. A market and grocery store will occupy the first floor. Upper floor will be fitted up for a large billiard and pool hall. Interior finish will be of pine. Tile and marble will be used in the stores. Patent store fronts are specified. Exterior of the building will be covered with cement

plaster and ship-lap. Plans are complete and figures are being taken.

STOCKTON, SAN JOAQUIN CO., CAL.—Stores, 1 story and base, brick, \$5,000. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, A. Waldemier. The building will be erected at the southwest corner of Market and Sacramento streets. There will be one store and a saloon. Interior finish will be of pine throughout. Plans provide for patent store fronts and metal window sash and frames. Exterior of the building will be faced with pressed brick. The estimated cost does not include saloon fixtures. Plans are now being prepared.

PORTLAND, ORE.—Offices, 8 story and base, reinforced concrete, \$85,000. Architects, MacNaughton & Raynond, Conard Bldg., Portland. Owners, Title and Trust Co. Contractors, Boyajohn-Arnold Co., Wilcox Bldg., Portland. This work has been mentioned here several times before. The contractors are now taking subfigures on all parts of the work.

LOS ANGELES, CAL.—Stores and offices, 12 story and base. Class A construction. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, William C. Kerckhoff. The building will be erected at the northwest corner of 6th and Los Angeles streets and will cover an area of 121x150 feet. The first floor will be arranged for a number of modern stores and upper floors will be subdivided into about 150 offices. There will be a complete steel frame, exterior walls of brick facing with glazed terra cotta. Reinforced concrete floors will be used. Interior will be finished in pine, oak and marble. Metal window sash and frames are specified. Plans provide for steam heat, elevator service, a vacuum cleaning plant and mail chutes. Plans are nearly complete and figures will be called for shortly.

PORTLAND, ORE.—Office building, 11 story and base. Class A construction, \$900,000. Architect, Engineering Dept. Pacific Telephone and Telegraph Co., New Montgomery St., S. F. Owners, Pacific Telephone and Telegraph Co. This building has been mentioned here a number of times before. Working drawings are now complete and bids for the general construction will be opened on July 1st. Plans and specifications can be secured from the New Montgomery street office. Construction will be fireproof throughout. The general offices of the company, mechanical department and pay stations will occupy the first floor and basement. Second floor will be devoted to the exchange room and upper floors will be arranged for offices. There will be steam heat, elevator service, metal window sash and frames and mail chutes. Marble and tile will be used extensively. Exterior of the building will be faced with pressed brick and terra cotta.

Contracts Awarded.

DISSOLUTION OF CO-PARTNERSHIP.

Co-partnership heretofore and now existing between Edwin D. Bennett and Sidney Ide Volz under firm name and style of Bennett & Volz, in conducting a general grate, mantle and tile business, at No. 184 Valencia street and 2751 16th street in the City and County of San Francisco, has been dissolved by mutual consent of said co-partners. Filed June 14, 1913.

Firms dealing news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE—3 story and base, brick and frame, \$6,000. San Francisco. Architect, none. Owner, Mary E. Seeley, 2306 Geary St., S. F. The dwelling will be erected at the corner of Powell and Sacramento streets, and will contain in the neighborhood of ten rooms and two baths. Interior will be finished in pine and hardwoods with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath rooms and kitchen. Exterior of the dwelling will be covered with pressed brick. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story, attic and base, frame, \$12,000. San Francisco. Architect, none. Owner, Dr. A. B. Spaulding, Lane Hospital, S. F. The dwelling will be erected on Green street between Divisadero and Broderick streets, and has been designed to contain ten rooms, three baths and a sleeping porch. Interior will be handsomely finished in pine, oak and mahogany. There will be furnace heat and open fire places. Mantels will be of brick or tile. Bath rooms will be finished in tile. An automatic water heater will be installed. Hardwood floors are specified in all rooms. The exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

APARTMENT HOUSES—3, 3 story and base, frame, \$12,000 to \$25,000 each. San Francisco. Architect, none. Owners, Metropolis Investment Co., 332 Bush St., S. F. These buildings will be erected at the northwest corner of Hyde and Sacramento streets. Interiors will be arranged for two and three room suites with private baths and wall beds. Interior finish will be of pine with elm panels and hardwood floors. There will be steam heat. Bath rooms will be finished in cement plaster. Exteriors will be covered with Klinker brick veneer and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor.

WAREHOUSES—2, 1 story and base, brick and steel, \$65,000 and \$150,000. San Francisco. Architect, none. Owners, United States Steel Products Co., Rialto Bldg., S. F. These two buildings are to be erected at the foot of 20th street. A contract for the foundation work has already been let to the Thompson Bridge Co. and the balance of the work will be done by Day Labor under the direction of the owners. One building will cover an area of 162x240 feet and the other an area of 300x350 feet. The smaller structure will be entirely of brick while the larger will have a complete steel frame. Exteriors will be faced with stock brick. Work is now underway.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architect, Arthur T. Ehrenpfort, 251 Kearny St., S. F. Owner's name withheld. The building will be erected at the northeast corner of Cole and Rivoli streets and has been designed to contain five suites of four rooms and

bath each. Interior finish will be of pine with some elm panels and hardwood floors. A steam heating system will be installed. Bath rooms will be finished in cement plaster. All apartments will be equipped with wall beds. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans have been completed and the architect is now taking figures on the work.

APARTMENT HOUSE—5 story and base. Class C construction, \$125,000. San Francisco. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building is to be erected in the Fifty Vara District and will cover a large area. Plans are arranged for 125 suites and single rooms, all of which will have private baths. There will be steam heat, elevator service, a hot water system and vacuum cleaning plant. Interior finish will be of pine and hardwood with ornamental plaster used in the lobby and amusement rooms. Bath rooms will have cement floors and tile wainscot. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

POLICE STATION—2 story and base, brick and stone. Cost not stated. San Francisco. Architect, Architectural Department, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans for the construction of the Harbor Police Station have been approved and are now out for figures. The building will contain captain's office, general office, cell block and retiring room for the patrolmen. There will be a central heating system and modern plumbing. Interior will be finished in pine and hardwood. The exterior of the building will be faced with pressed brick and stone. Plans can be secured from the Department of Architecture. Bids will be opened on June 18th by the Board of Public Works.

FLATS—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owner, Mrs. Anna P. Marsh, 418 Raymond Apartments, Franklin and Market streets, S. F. The building will be erected on 8th avenue south of Cabrillo, and will contain two modern flats of four and five rooms each. Interior will be finished in pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be either open fire places or gas grates. Mantels will be of tile. Tile will be used in the bath rooms and kitchens. Exterior of the house will be covered with shiplap and rustic with Klinker brick veneer. Plans are complete and the work will be done by Day Labor.

LODGE HALL—3 story and base. Class A and Class C construction, \$180,000. San Francisco. Architect, Will D. Shea, 241 Kearny St., S. F. Owners, Young Men's Institute. This building has been mentioned here a number of times before. A contract for the excavating has been awarded to Daniel O'Day & Co., and plans for the balance of the work are now out for figures. The building is classic in design and will be of the class A type in nearly all parts. The first floor contains a

large library, offices, reading rooms, etc. A large gymnasium will occupy the basement. Upper floors will be arranged for lodge halls, banquet rooms and ball room. Interior will be handsomely finished in hardwoods and ornamental plaster. Exterior will be faced with granite and terra cotta. There will be steam heat, elevator service, a vacuum cleaning system and all other modern conveniences.

HOTEL—3 story and base. Class C construction. Cost not stated. San Francisco. Architect, Arthur T. Ehrenpfort, 251 Kearny St., S. F. Owner's name withheld. The building will be erected on Larkin street near the Civic Center. The first floor will be arranged for three stores and upper floors will be subdivided into 45 guest rooms and a number of bath rooms. Plans provide for steam heat, elevator service and a hot water plant. Interior finish will be of pine and hardwood. Bath rooms will have cement floors and tile wainscot. The exterior of the building will be faced with cement plaster or pressed brick. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, O. E. Evans, 2367 Mission St., S. F. Owner, James Welsh. The dwelling has been designed for a seven-room house with bath, and will be erected on 11th avenue near Anza street. Interior will be finished in pine and elm. Hardwood floors will be used in the living room, dining room and reception hall. There will be a large open fire place in the living room with a brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with brick veneer to the water table and with cement plaster and rustic above that point. Plans are complete and the work will be done by Day Labor.

RESIDENCES—3, 2 story and base, frame. Cost not stated. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owners, Oscar Heyman Bros. These houses have been designed for seven and eight room dwellings, and will be erected on 24th avenue near Lincoln Way. Interior finish will be of pine with some elm panels and hardwood floors. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath rooms and kitchens. Automatic water heaters will be installed in the eight-room houses. Exteriors will be covered with cement plaster on metal lath, brick veneer, shingles and rustic. Plans are being prepared and when complete the work will be done by Day Labor.

PALACE OF MINES—Frame construction, \$217,000. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids for the construction of the Palace of Mines were opened by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Co. on Thursday. Bids were also opened at the same time for the plumbing, sewers, and water pipes in the same building. Streslow, Freeze & Peterson were low at \$217,997 for the general construction, and Robert Danziel, Jr., Co. were low on the plumbing at \$13,847. No contracts were awarded. A complete list of the bids appears under San Francisco in this issue.

SCHOOL—2 story and base, brick and steel. Cost not stated. San Francisco.

Architect, Architectural Department, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans for the Columbus School, which is to be erected on the block bounded by 12th and 13th avenues, Kirkham and Lawton streets, have been completed and are now out for figures. The building has been designed for a twelve-room school, but only six of the rooms will be constructed at this time. Interior will be finished in pine and maple. There will be a complete steel frame with brick erected walls faced with pressed brick. The plans provide for a steam heating system and vacuum cleaning plant. Bids will be opened by the Board of Public Works on June 18th. Plans can be secured from the Department of Architecture.

RESIDENCE—2 story and base, frame, Cost not stated. San Francisco. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner's name withheld. The dwelling will be erected on the Great Highway near the wireless station, and has been designed for a ten-room house with baths and sleeping porches. Interior will be finished in pine, oak and mahogany. There will be furnace heat and open fire places. Mantels will be of brick and tile. The bath rooms will be finished in tile. Tile will also be used in the kitchen. Hardwood floors will be used in the principal rooms. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCES—2, 2 story and base, frame. Cost not stated. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owners, Oscar Heyman Bros. These two houses will be erected on 23rd avenue near Lincoln Way, and each will contain seven rooms and bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the living rooms, dining rooms and reception halls. There will be large open fire places in the living rooms with brick mantels. Tile will be used in the baths and kitchens. Exteriors will be covered with cement plaster, rustic and shingles. Plans are being prepared and when complete the work will be done by Day Labor.

STORES AND LOFTS—5 story and base, reinforced concrete, \$35,000. San Francisco. Architect, Charles J. Rousseau, Phelan Bldg., S. F. Owners, California Poultry Co. This building has been mentioned here before when plans were first started. The building will be erected in the heart of the wholesale district, and has been designed for a large market on the first floor and storage and packing rooms above. The basement will contain a complete cooling system for the building. A large amount of tile will be used. Plans provide for elevator service and steam heat. Metal window sash and frames will be used. Exterior of the building will be faced with cement plaster. Plans have been out for figures and a contract will be awarded within a few days.

STORES AND BILLIARD HALL—2 story and base, frame. Cost not stated. San Francisco. Architects, J. E. Kraft & Sons, Phelan Bldg., S. F. Owner's name withheld. The building will be erected on Polk street at the corner of Austin avenue and will cover an area of 69x70 feet. A market and grocery

store will occupy the first floor. Upper floor will be fitted up for a large billiard and pool hall. Interior finish will be of pine. Tile and marble will be used in the stores. Patent store fronts are specified. Exterior of the building will be covered with cement plaster and shiplap. Plans are complete and figures are being taken.

VISITING ARCHITECTS HAVE BUSY SESSION.

Delegates to the third annual convention of the Pacific Coast Architectural League received a warm welcome by Portland architects. After a meeting at the club rooms at 9:30 o'clock last Tuesday morning, the party of some fifty visitors were driven to Chanticleer, overlooking the Columbia, in automobiles, lunched at the Automobile Club, attended a base ball game at the Waverly Golf Club at 2 o'clock in the afternoon and were brought back to Portland for the big electric parade.

Professor Warren Perry, an instructor in the school of architecture of the University of California, was the principal speaker of the day. He opened the discussion in the club rooms on "Architectural Education," in which he advocated the broadening of the work of the ateliers to resemble a college course. He also proposed that some of the Beaux Arts Society problems be worked out here and judged in Portland, instead of being sent to San Francisco. There are fifty students enrolled in the school of architecture at Berkeley, where the largest organization of the kind in the west is located. Wednesday morning at 10 o'clock David J. Meyers of Seattle delivered an address on the "Economy of League Control Under One Management of Coast Exhibits and Catalogues." There was a discussion of the subject following the presentation of the paper. At 12 o'clock the architects were guests of the Ad Club.

Figures Are Opened On Palace Of Mines.

**Streshlow-Freeze & Peterson Low on
General Construction and Robert
Dalziel Jr. on Plumbing.**

Bids for the construction of the Palace of Mines were opened by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company on Thursday. Bids were also opened at the same time for the plumbing, sewers and water pipes in the same building. Streshlow-Freeze & Peterson were low at \$217,997 for the general construction and Robert Dalziel Jr. Co. were low on the plumbing at \$13,847. No contracts were awarded. A complete list of the bids follows:

General Construction, Palace of Mines.

M. Fisher	\$280,796
Lange & Bergstrom	224,960
Connary-Peterson Co.	233,950
J. Monk	232,000
Streshlow, Freeze & Peterson ..	217,997
F. B. & L. F. Fisher	262,368
McLaren & Peterson	240,000

Plumbing, Palace of Mines.

John G. Sutton	\$15,975
Burnham Plumbing Co.	16,190

Robert Dalziel Jr.	13,847
Fred W. Snook Co.	15,998
Peterson-James Co.	17,294
Wittman Lyman Co.	15,371
The Turner Co.	14,660
Kiernan & O'Brien	15,706

Foundation Work For Auditorium.

**New Bids Opened For Excavating and
Foundation Work For Exposition
Auditorium, Lindgren Co. Low.**

Bids for the construction of the concrete and cement work and for the excavating for the foundation work at the Exposition Auditorium, which is to be erected in the Civic Center, were opened on Tuesday morning by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company. Lindgren Company submitted the lowest figure for the entire work including excavation, concrete and cement work at \$73,500. No contracts have been awarded. The following is a complete list of all bids opened. Bids were taken for (1) for the excavating, constructing concrete and cement work and (2) for the excavating and grading.

Lindgren Co. (1) \$73,500; (2) —.	
Contra Costa Constr. Co. (1) \$93,913; (2) \$33,000.	
State Constr. Co., (1) \$91,895; (2) \$34,000.	
Connary-Peterson Co (1) \$98,615; (2) —.	
Carnahan, Mulford (1) \$81,590; (2) \$25,800.	
Foster, Vogt Co. (1) \$76,787; (2) \$31,000.	
Sound Constr. & Eng. Co. (1) \$80,779; (2) \$31,425.	
Frank M. Garden Co. (1) \$76,165; (2) \$30,000.	
Clinton Fireproofing Co. (1) \$76,750; (2) \$25,800.	
Chas. Wright (1) \$74,872; (2) —.	
Central California Constr. Co. (1) \$107,000; (2) \$34,000.	
F. W. McClenahan & Co. (1) \$78,777; (2) \$25,600.	
Healy Tibbitts Constr. Co. (1) \$95,000; (2) \$34,000.	

City Bids Opened.

**Bids For Structural Steel of the City
Hall Opened and Show U. S. Steel
Products Low Men.**

Five firms submitted figures for the structural steel work on the City Hall to the Board of Public Works at the Wednesday afternoon meeting. The lowest general offer was made by the United States Steel Products Co. on proposition No. 1 for \$476,283 less \$118,342 if the city and county pays the freight. In any case the freight charges will probably be paid by the city as their facilities for handling the steel after its arrival and rates which municipalities can secure from the railroads will effect a saving of more than the amount allowed by the bidders. The following is a complete list of the bids submitted:

City Hall Steel.

Phoenix Iron Works, Prop. No. 1,	\$545,000, less \$121,000 if city pays the freight.
Prop. No. 2, \$530,000.	Prop.

BUILDING AND INDUSTRIAL NEWS

No. 3, \$520,000.

Union Iron Works, Prop. No. 3, \$571-750.50.

United States Steel Products Co., Prop. No. 1, \$476,283, less \$118,342 for freight.

Pacific Rolling Mills, Prop. No. 3, \$532,000.

Dyer Bros., Prop. No. 3, \$585,099.

The only difference between propositions Nos. 1, 2 and 3 is a difference in the time for completing the contract.

The Board of Public Works also opened bids at yesterday's session for the painting of the San Francisco Hospital group as follows:

Painting San Francisco Hospital.	
Max Cohn	\$29,200
G. Orsi	32,200
Olney & Palmer	24,900
Meyer & Walk	34,400
Isador Kissel	38,753
Harry Ankers	38,500
Grant Fee	45,000
D. Zelinsky	25,500
V. J. Donovan	29,575
W. Bernstein	44,750

Unit bids for cleaning brick on the old City Hall site were also received from Williams & Finnigan, Daniel O'Day Co., E. M. Huie & Co., H. M. Scarritt and Contra Costa Constr. Co. Williams & Finnigan were low men at approximately \$30,000.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

SCHOOL—2 story and base, brick. Cost not stated. Bakersfield, Kern Co., Cal. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. The School Board have approved the preliminary plans submitted by Architect Clark for the Niles street school and has called for bids on the construction. The building will contain eight class rooms, assembly hall, office and teachers' rooms. Interior will be finished in pine with maple floors. A central heating system will be installed. Plans provide for vacuum cleaning and program clocks. Exterior of the building will be faced with pressed brick. Plans can be secured from the architect.

SCHOOL REMODELING—Brick and frame construction. Cost not stated. Bakersfield, Kern Co., Cal. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. Plans for remodeling the Bryant School, recently damaged by fire, have been approved by the Board of Education. The work will include a new composition roof, galvanized iron cornice, interior finish and plastering. Bids will be called for on the work shortly.

SCHOOL—1 story and base, brick, \$11,000. Hanford, Kings Co., Cal. Architects, Thayer & Doriot, Forsyth Bldg., Fresno. Owners, Hanford School District. The building will contain four class rooms and the principal's office. Interior will be finished in pine throughout. There will be a central heating system. Exterior of the building will be faced with pressed brick. Plans are nearly complete and bids will be called for within a few days. Plans can be secured from the architects.

PUMPING PLANT—Domestic service and fire service pumps. Cost not stated. Engineers, Sloan & Robson, Nevada Bank Bldg., S. F. Owners, City of Tulare. Plans for the O street pumping station are complete and bids for the equipment will be opened on July 7th. The equipment includes the following: Two domestic service pumps of 750 gallons per minute driven by two 60 h. p. motors, and two fire service pumps of 750 gallons per minute,

driven by two 10 h. p. motors. Plans can be secured from Sloan & Robson.

Contracts Awarded.

HOTEL—1 story and base, brick and steel, \$115,000. Modesto, Stanislaus Co., Cal. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owners, Crow and Hugin. LOS ANGELES AND SOUTH-ERN CALIFORNIA.

HOTEL—3 story and base, brick.
 Cost not stated. Los Angeles, Cal. Ar-
 chitects, Train & Williams, Exchange
 Bldg., L. A. Owner, Walter H. Fisher.
 Contractor, Alex Grant, 1002 Union Oil
 Bldg., L. A. Note: This contract has
 been taken on a percentage basis. Plans
 have not been completed but work will
 start within a few days.

CHURCH AND INSTITUTIONAL
BUILDING—1 story and base. Class A
 construction, \$100,000. San Pedro, Los
 Angeles Co., Cal. Architect, Thornton
 Fitzhugh, Pacific Electric Bldg., L. A.
 Owners, First Methodist Church of San
 Pedro. The project is still in the pre-
 liminary stage and details of construc-
 tion cannot be given at this time. The
 plan of the owners is to construct a
 building which will contain the church
 proper and dormitories, class rooms,
 gymnasium, library and auditorium.
 Construction will be fireproof through-
 out. Funds are now being raised. Fur-
 ther details will be given in these col-
 umns as the plans progress.

CHURCH—1 story and base, brick
 and steel, \$75,000. Long Beach, Los An-
 geles Co., Cal. Architect, H. M. Patter-
 son, O. T. Johnson Bldg., L. A. Own-
 ers, Congregational Church of Long
 Beach. Plans for this building show
 an attractive structure designed in the
 Gothic style and covering an area of
 100x150 feet. The church will contain
 a main auditorium seating 1,400 people
 and a Sunday school seating 500. Be-
 sides these two large rooms there will
 be 18 class rooms, parlors, library and
 pastor's study. Basement has been ar-
 ranged for dining rooms, social hall
 and junior department. Construction
 will be of brick with exterior faced
 with pressed brick. There will be a
 central heating system. Interior will
 be finished in pine and hardwood with
 ornamental plaster. Plans are being
 prepared.

WAREHOUSE—5 story and base, re-
 inforced concrete. Cost not stated. Los
 Angeles, Cal. Architect's name not
 given. Owners, City of Los Angeles.
 Plans for this building, which is to be
 erected on San Julian street, have been
 approved by the Board of Education
 and are now out for figures. Bids will
 be opened on June 28th. The building
 will cover an area of 75x90 feet. There
 will be reinforced concrete walls, floors
 and roof. Plans provide for elevator
 service, metal window sash and frames
 and fireproof doors. Exterior will be
 faced with cement plaster. Plans can
 be secured from the secretary of the
 Board of Education.

GARAGE—1 story and base, rein-
 forced concrete, \$12,000. Los Angeles,
 Cal. Architect, C. C. Rittenhouse, Wil-
 cox Bldg., L. A. Owners, Messrs. Bel-
 con and Jackson. The building has
 been designed for a commercial garage
 and will cover an area of 60x150 feet.
 Construction will be fireproof through-
 out with cement floor and reinforced

concrete walls. Plans provide for tall window sash and frames, special storage tanks and patent store fronts. The front of the building will be fitted for offices and is to be handsomely finished. Exterior will be faced with smooth plaster. Plans are complete and figures are being taken.

GARAGE—1 story and base, brick, cost not stated. Los Angeles, Cal. Architects, Kempel & Erkes, Henne Bldg., L. A. Owners, Schmidt Estate. The building will cover an area of 100x176 feet. There will be four stores besides the garage. Design is in the Old English style. There will be a concrete floor, copper store fronts, ruffled brick lining and granite base. A slate roof specified. Plans are nearly complete and bids will be called at once.

GARAGE—2 story and base, brick, cost not stated. Los Angeles, Cal. Architects, Morgan, Wallis & Morgan, Van Noy Bldg., L. A. Owner, H. W. O'Malley. The building will be erected at the corner of 12th and Figueroa streets and has been designed for a commercial garage. The building will cover an area of 60x150 feet. The first floor basement will be given over to storage space and offices. Upper floor will be fitted up for a modern machine shop. There will be special gasoline storage tanks. Interior finish will be of pine throughout. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

HOTEL ADDITION—2 story, brick, cost not stated. Imperial, Imperial Co., L. A. Architects, Alfred W. Rea and Charles Garstang, Black Bldg., L. A. Owners, Hotel Imperial Co. The addition will be two stories high and covers an area of 44x135 feet. Plans provide for a store room, 24 guest rooms and baths. Interior finish will be of pine throughout. Hot and cold running water will be supplied to all rooms. Besides this addition plans will be made shortly for an arcade 13 feet wide and also of brick construction. Plans for the addition are complete and figures are being taken.

HOTEL—4 story and base, brick and tile. Cost not stated. Los Angeles, Cal. Architect, E. C. Thorne, Realty Bldg., L. A. Owner, L. I. De Hall. The building will be erected at the corner of Los Angeles and Commercial streets and will cover an area of 64x112 feet. There will be five stores on the first floor besides the entrance to the hotel. Upper floors will be subdivided into 100 guest rooms and a number of baths. Interior finish will be of pine. Bath rooms will have marble floors and tile wainscot. There will be steam heat, elevator service and hot water supply. Exterior of the building will be faced with pressed brick. Plans are complete and materials are now being purchased. The work will be done by Day Labor.

MESSING STATION—1 and 2 story and base. Class A and C construction, 22,000. Los Angeles, Cal. Architects, Johnson & Bergstrom, Security Bldg., L. A. Owners, Southern Pacific Co. The work was mentioned here last week. Working drawings for the building are complete and figures will be called for at once. The main portion of the building will be one story high and of the class A type, 220 feet long and 70 feet wide. Two, two story wings of the class C type will complete the building.

STORES AND OFFICES—12 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Morgan, Wallis & Morgan, Van Noy Bldg., L. A. Owner, William C. Kerckhoff. The building will be erected at the northwest corner of 6th and Los Angeles streets and will cover an area of 121x150 feet. The first floor will be arranged for a number of modern stores and upper floors will be subdivided into about 150 offices. There will be a complete steel frame, exterior walls of brick faced with glazed terra cotta. Reinforced concrete floors will be used. Interior will be finished in pine, oak and marble. Metal window sash and frames are specified. Plans provide for steam heat, elevator service, a vacuum cleaning plant and mail chutes. Plans are nearly complete and figures will be called for shortly.

SCHOOLS—2, 2 story and base, brick. Cost not stated. Santa Monica, Los Angeles Co., Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Santa Monica School District. These buildings were mentioned here last week. Plans have been completed and approved, and bids will be opened by the Board of Education on June 23rd. One building will be erected on Central avenue and will contain six class rooms, and an auditorium. The other improvement will be in the nature of an addition to the Roosevelt School and will also contain six class rooms. There will be central heating systems in both buildings. Exteriors will be faced with ruffled brick. Plans can be secured from the architects.

SCHOOL—2 story and base, brick and steel, 135,000. Phoenix, Ariz. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, City of Phoenix. This building has been designed as a grammar school and will cover an area of 280x120 feet. Plans provide for 16 class rooms, an assembly hall, manual training and domestic science departments and offices. Hollow tile and metal lath and plaster partitions will be used. Interior finish will be of pine and hardwoods. Exterior will be faced with pressed brick. Plans have been approved by the School Board and bids are now being taken. Figures will be opened on July 6th.

APARTMENT HOUSE—4 story and base, brick, \$60,000. Pasadena, Los Angeles Co., Cal. Architects, Krucker & Deckbar, Ferguson Bldg., L. A. Owners, Charles Slade and S. S. Wood. The building will be erected on a corner site and has been arranged for ten three-room suites and thirty-five two-room suites. Interior finish will be of pine and hardwoods. Ornamental plaster will be used in the lobby and amusement rooms. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water plant. Bath rooms will be finished in cement plaster. All suites will have connecting baths and wall beds. Exterior of the building will be faced with pressed brick. Marble and tile will be used extensively. Plans are complete and figures are being taken.

LODGE HALL—3 story and base, brick and steel, \$40,000. Pasadena, Los Angeles Co., Cal. Architects, Foss Designing and Building Co., 100 East Colorado St., Pasadena. Owners, Pasadena Odd Fellows Temple Association. This work has been mentioned here before when the architect was first commissioned to prepare the plans. The basement will contain furnace

rooms and a banquet hall, first floor the lobby, parlors, library and offices. A large auditorium, lodge rooms and club rooms will occupy the second floor and the third floor will be arranged for living apartments for the members. There will be steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with stone. Plans are complete and bids will be opened on June 23rd.

SCHOOL—2 story and base, reinforced concrete and brick, \$66,000. Fullerton, Orange Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Fullerton School District. All bids received for this work were above the appropriation and have been taken under advisement. The following bids were submitted: General Contract—George C. Condon, \$31,000; Sawtelle Building and Construction Co., \$58,196; Chas. Belts, Upland, \$59,275; Kling Co., \$59,572; Perkins & Holcomb, \$62,000; David Irvine, \$62,996. Plumbing—B. A. Fuller, \$2,453; Chas. Arndt, \$2,758; Conny & Winterbottom, \$2,800; J. F. Blair, \$2,806. Heating and Ventilating—Machinery and Electrical Co., \$4,573 and \$5,300; Cass-Smurr-Damerel, \$5,150; American Heating and Construction Co., \$5,229; E. D. Hough, \$5,860.

Contracts Awarded.

PORTLAND AND OREGON.

WAREHOUSE—1 story and base, brick,
brick. Cost not stated. Portland, Ore.
Architect, Robert F. Teget, Swetland
Bldg., Portland. Owner's name with-
held. The building will be erected at
the corner of 14th and Burnside streets
and will cover a large area. Construc-
tion will be of the heavy mill type. In-
terior will be finished in pine for the
offices of the owners. Plans provide
for fireproof doors, metal window sash
and frames, elevator service and spiral
chutes. Exterior of the building will
be faced with stock brick. Plans are
now being prepared.

HOTEL—4 story and base, brick and
concrete, \$85,000. Salem, Ore. Architect,
Aaron Gould, Worcester Bldg., Port-
land. Owner, R. R. Ryan. The build-
ing will occupy an important business
corner and will cover an area of 160x
163 feet. There will be a number of
stores on the first floor besides the
hotel lobby and offices. Upper floors
will be subdivided into a large number
of guest rooms, offices and club rooms.

Plans provide for steam heat, elevator
service and hot water plant. Interior
finish will be of pine throughout. Bath
rooms will be wainscoted with tile.
The exterior of the building will be
faced with pressed brick. Plans are
now complete and figures are being
taken.

HOTEL—3 story and base, concrete
and brick, \$75,000. Springfield, Ore.
Architect, George Post, Salem. Owner,
D. S. Pabb. The building has been de-
signed for a modern commercial hotel.
The corner lot on which the building
will be erected covers an area of 100x
110 feet. The first floor will contain
stores, hotel lobby, offices and dining
rooms. Upper floors will be subdivided
into about 110 guest rooms, a number
of which will have connecting baths.
There will be steam heat and a hot
water plant. Interior finish will be of
pine throughout. Exterior of the
building will be faced with pressed
brick and cement plaster. Plans are
now being prepared.

OFFICES—8 story and base, rein-
forced concrete, \$85,000. Portland, Ore.
Architects, McNaughton & Raymond,
Concord Bldg., Portland. Owners,
Title and Trust Co. Contractors, Boya-
john-Arnold Co., Wilcox Bldg., Port-
land. This work has been mentioned
here several times before. The con-
tractors are now taking subfigures on
all parts of the work.

UNIVERSITY BUILDINGS—Brick
and steel construction. Cost not stated.
Corvallis, Ore. Architects, Bennes
& Hendricks, Portland. Owners, Ore-
gon Agricultural College. The first
work to be undertaken will be the
construction of a large structure which
will be built in three units. The first
of these, which is to be occupied by the
domestic science department, will be
the only part built at this time. This
will be three stories high and will cost
\$55,000. It will be of brick and mill
construction and equipped with the
Plenum system of heating and venti-
lating; all modern plumbing, etc. The
basement will have a cafe, kitchen
serving room and laundry and the
upper floors will be used expressly for
laboratory, including six for food
and cookies, and three large labora-
tories, 25x65, together with necessary
lockers, reading rooms, etc. The other
buildings to be built are the Art Sci-
ence building and the Administration
building. These are to be built later,
the cost of which will make a re-
quired expenditure of \$175,000. In ad-
dition to these buildings a gymnasium
will be built 26x159 in dimension, to
be erected at a cost of \$160,000, but
only one wing will be built at this
time which will cost \$60,000. This,

615 Phelan Building, San Francisco

too, will be of brick and mill construc-
tion and will have a gymnasium, 90x
150, a gallery and running track, a
swimming tank 50x100, four bowling
alleys and two hand ball courts.

OFFICE BUILDING—11 story and
base. Class A construction, \$900,000.
Portland, Ore. Architect, Engineering
Department Pacific Telephone and
Telegraph Co., New Montgomery St.,
S. F. Owners, Pacific Telephone and
Telegraph Co. This building has been
mentioned here a number of time be-
fore. Working drawings are now com-
plete and bids for the general con-
struction will be opened on July 1st.
Plans and specifications can be secured
from the New Montgomery street of-
fice. Construction will be fireproof
throughout. The general offices of the
company, mechanical department and
pay stations will occupy the first floor
and basement. Second floor will be de-
voted to the exchange room and upper
floors will be arranged for offices.
There will be steam heat, elevator
service, metal window sash and frames
and mail chutes. Marble and tile will
be used extensively. Exterior of the
building will be faced with pressed
brick and terra cotta.

SEATTLE AND WASHINGTON.

RESIDENCE—3 story and base,
brick and frame, \$100,000. Seattle,
Wash. Architects, Cutter & Malmgren,
Paulson Bldg., Seattle. Owner, C. D.
Stimpson. This work has been men-
tioned here before when plans were
first started. The dwelling will be
erected in Highlands and is to be one
of the most attractive homes in Seattle.
Interior will be finished entirely in
hardwoods. Baths will have tile floors
and wainscot. There will be a central
heating system, probably steam. The
exterior of the house will be faced
with pressed brick. Plans are com-
plete and the work is being done by
Day Labor.

APARTMENT HOUSE—3 story and
base, brick, \$35,000. Seattle, Wash. Ar-
chitect, James H. Schack, Lippy Bldg.,
Seattle. Owner, C. D. Stimpson. The
building will cover an area of 48x111
feet, and is to be arranged for three
suits of three rooms each and
twelve suites of two rooms. All apart-
ments will have wall beds and private
bath rooms. Interior finish will be of
pine throughout. Some hardwood floor-
ing will be used. Bath rooms will have
cement floors and tile wainscot. Ex-
terior of the building will be faced with
cement plaster and pressed brick.
Plans are complete and figures are now
being taken.

APARTMENT HOUSE—3 story and
base, brick, \$35,000. Seattle, Wash. Ar-
chitect, V. W. Voorhees, Etzel Bldg.

A reversible window that cost only 25 cents more than the common double hung.

Common Sense Window

Invented and manufactured by
L. H. BIRTH, 19th and Carolina Sts.,
also 110 Jessie St.

Seattle. Owner, Dr. G. H. Randell. The building will be erected on Highland Drive and has a frontage on that street of 66 feet and a depth of 70 feet. Plans show 22 apartments of three rooms and bath each. Interior finish will be of pine and white enamel. There will be steam heat, an automatic elevator and vacuum cleaning system. Bath rooms will be finished in cement plaster. A hot water plant will also be installed. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

CEMENT PLANT—Reinforced concrete construction, \$1,000,000. Bellingham, Wash. Engineers not selected. Owners, Puget Sound Cement and Lime Co., Seattle. The Puget Sound Cement and Lime Co., which was recently incorporated at \$2,500,000 for the purpose of manufacturing cement from deposits owned by the company on Orcas Island has purchased a site from C. H. Larralee just south of Bellingham, on which to erect a \$1,000,000 plant. Those behind the company are Hans Pederson, the contractor, Madison Block, Alex. Paulsen, Paulsen Bldg., Spokane, William Thaanum, of the Washington Savings and Loan Association, 819 2nd Ave., Geo. W. Allen, manager of the National Surety Co., Alaska Bldg., Victor C. Coxhead, Ronald Station, and C. P. Rissett, 914 24th Ave., N. All of Seattle. The plant to be erected, it is stated, will be one of the most modern on the Coast. The erection of this large plant like that of the Olympic Portland cement plant (Balfour-Guthrie interests), now completed, north of Bellingham, will be one of the big construction features of the year in this territory. Further mention of the

work will be made in these columns as the plans progress.

SCHOOL—1 story and base, reinforced concrete, \$25,000. Seattle, Wash. Architect, Edgar Blair, 901 7th Ave., Seattle. Owners, City of Seattle. Plans for the East Harrison street school have been approved by the Board of Education and bids will be opened on June 25th. The building will contain six standard sized class rooms and an assembly hall. Interior will be finished in pine with maple floors. There will be steam heat and a vacuum cleaning system. Bids are to be taken for the entire work including the heating and plumbing. Exterior of the building will be faced with cement plaster. Plans can be secured from the architect or from Reuben W. Jones, Secretary of the Board of Education.

GOVERNMENT TO AID IN CROP MOVEMENT.

WASHINGTON, June 12.—Secretary McAdoo said today that his statement announcing that \$500,000,000 of emergency currency would be forthcoming should banks need it, was made in response to numerous inquiries from bankers who were anxious to know whether additional currency would be available for crop movements.

MUNICIPAL BONDS DEFEATED.

PETALUMA (Cal.), June 11.—Money took an active part in today's city election. The proposition to issue municipal bonds in the sum of \$275,000 for the purchase and improvement of the plant of the Petaluma Power and Water Company was defeated by the voters 3 to 1.

BANKRUPTS FILE PETITIONS.

Petitions in bankruptcy were filed in the United States District Court last Wednesday by C. A. Scoville, an Oakland real estate dealer, whose liabilities are given as \$1438, and his assets as nothing; and Adolf Behr, a San Francisco landscape gardener, whose debts are given at \$382 and his assets as zero.

MASONS TO LAY CORNER STONE.

PLACERVILLE (El Dorado Co.), June 12.—El Dorado Commandery, No. 4, K. T., of this city, will go to Sutter Creek Saturday, by order of the Grand Commander, Knights Templar of California, to take part in the ceremonies of the Grand Lodge, F. & A. M., in laying the cornerstone of the Amador County High School. William P. Filmer, Most Worthy Grand Master, will perform the ceremony, and the Sir Knights will parade in full uniform.

PLAN EXTENSIVE ROAD WORK.

SUISUN (Solano Co.), June 10.—Owing to the lack of funds, but very little work has been done on the public roads of this county since January 1st last. However, with the beginning of the fiscal year on July 1st next the road fund will have been replenished and work on the highways will be resumed.

The first work on a large scale will be on the Vallejo-Sulphur Springs Road, where several miles will be macadamized at a cost of several thousand dollars.

Other important road work will be the building of two large concrete bridges in Benicia Township to replace worn-out wooden structures.

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout the city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

The Electric Weld

Automatic Storage Gas Water Heaters.

An automatic gas water heater controlled by a movement temperature thermovalve using gas at the rate of 60 feet per hour when in operation, with no limit to the amount of hot water that can be drawn per minute.

A single extremely simple valve controls the entire heater, insuring permanent service with no cost for upkeep.

This heater is absolutely guaranteed, leaving the decision entirely with the consumer.

Electric Weld

Combination Gas Water Heaters

Over 8000 in daily use, in Los Angeles and vicinity.

The entire sale of parts to maintain the above heaters last year was \$68.30, which is $\frac{1}{4}$ of a cent per heater. This showing should command the attention of every person using a gas water heater.

The boiler is made of double extra heavy steel, guaranteed to work under 150 pounds pressure all joints are electrically welded, which guarantees the same tightness as a glass bottle.

Editorial Comment.

Reports of building statistics from 65 different cities, made to the American Contractor, Chicago, show a slight aggregate gain in construction compared with the same month of last year. This in spite of the fact that New York and Chicago showed a very material decrease over last year. The sum total of the minor cities overcame this shortage, however, so that generally there was an aggregate increase of about 3 per cent. Particulars can be found in the following table:

City	May, 1913.	May, 1912.
	Cost.	Cost.
Akron	\$ 584,380	\$ 454,800
Albany	399,665	453,540

Total

Considering the fact that there is a general business depression and money is more or less hard to get, the general result for May shows a very good condition of business.

Building means an actual outlay of money and while the issuing of a permit does not necessarily mean that that much money is expended during the month still it shows that something has been started and usually that a considerable amount of money has been spent during the month. In spite of the cry of the alarmists and the threatened reduction of the tariff there is still something doing and the people are continuing to build houses and churches and business blocks.

The great German liner, the Imperator, has beaten the world's record for speed in crossing the Atlantic. On the third day's run her log showed a distance of 707 knots in the twenty-four hours, making an average of 29 1/2 knots for the time. The nearest approach to this was the record of the Mauretania in 1911, which recorded 676 knots for the same period of time.

The record of the great ship reminds the world of the ill fated Titanic, which raced to its doom under similar conditions a year ago on the fifteenth of April.

The great German liner is 900 feet long, 96 feet wide and has a displacement of 65,000 tons. She surpasses the Titanic by 5000 tons displacement and is said to be infinitely better constructed to withstand the effects of collisions such as the Titanic suffered.

As yet there seems to be no limit to the size of ships. Increased size seems to effect greater economy in transportation in the matter of handling freight and passengers and so far as results go in the matter of speed also. So far as safety goes the large vessels seem to be just as safe unless it be in the matter of handling them and even there it has not been demonstrated whether or not the limit has been reached. The modern steamship has certainly become the levithan of the ocean and one of the wonders of the deep.

HOME HARMONIC.

A New Spirit In Domestic Architecture.

By H. Bryant Newbold, Architect, Victoria, Courtesy Victoria Spokesman.

It is a matter for rejoicing that a change for the better is showing itself in our domestic architecture as in other things.

We are no longer satisfied with the mere outward expression of wealth, we prefer that refinement should be the prevailing sentiment of our homes, if we are wealthy then it is a matter for self congratulation and not for vulgar outward display. No longer do we wish to suggest the gold that is in our pockets by brass balls fixed outside our gateposts. A feeling is spreading amongst us that our homes should be places of rest, and nowhere is this feeling of a true home stronger than in this beautiful city of ours, Victoria. We have here all that could be desired in the way of natural beauty, but how in our past ignorance have we murdered it? We have not considered the suitability of our homes to their surroundings. We have thought of them as matters apart, and how utterly and miserably have we failed.

And now there has come a change. We now choose firstly our site and its surroundings and having done so we next consult our architect that we may have our ideas embodied in his design which must be a design which will harmonize with our chosen site and so become part of the landscape and natural scenery.

If we have chosen a rocky piece of land, then is it quite permissible that we have a house of an uneven outline and of a rocky exterior, but should the land be flat, we desire a house of a more formal type.

In one house which I designed in that most beautiful landscape garden, Uplands, the house was backed by a hill, which sloped rapidly away from the front. Consequently I did not design for such a site a stately tudor mansion or one of Georgian or colonial type, which should be placed upon a level site, but endeavored to make the house fit in with the surroundings by nestling it up against the hill and sloping the roof lines away from this hill whereas on the front, being the face seen from below, I have reared up a projecting vertical gable. The effect aimed at is as of a lily rocked upon the bosom of the stream, a phase of the loveliness of nature.

What is it that lends us to the old countries in thousands, year by year, and why do we find those old villages so calm and restful to us? What it is in them that make them so much more attractive than our brand new chess-board subdivision? Is it not that they are harmonious portions of nature?

In every man, however debased may be his surroundings, there is a desire at times for a return to nature. In witness one calls to mind the window box which in crowded cities is all that remains of a garden in consequence of our mad rush after wealth. No short-sighted have they been in other cities that though this is one of the largest countries in the world, individuals have been herded and allowed themselves to be herded together into small coned areas and as a consequence there is in many cases no portion of

the earth left around the dwelling save that which may be gathered in a window box and set upon the window sill. But that this herding together in contrary to nature and that the love of nature is still present in the heart of all is evidenced by the little pathetic window boxes. This being so, it behooves us to at least see that our homes, which should express the character of the inmate, express this conformity with nature.

On a flat site we endeavor to express this sentiment by horizontal rather than vertical lines. By horizontal eaves and porch lines and a low wide nature of the windows we can suggest the desire to spread ourselves out, the land being far and wide, rather than project ourselves up into the air as we should were we surrounded by trees and hills.

No climate could be more beautiful than ours, and that it is not one of extreme heat is one of its chief charms. We do not, therefore, require the shade caused by greatly projecting eaves. Neither in a country where a quantity of moisture falls to give bounteous increase to our mother earth do we require nor it is wise to have a pitched roof, and in no country do we wish to introduce a style of building because it has been found desirable in another, without regard to the surroundings or climatic conditions. Nothing could be more desirable in semi-tropical California than the true bungalow, but in Victoria it is an abortion and a deceit, and we all agree that we will have no more of it.

Therefore, I rejoice to see in the works of my colleagues, especially among the younger architects, a tract of a distinct tendency towards a national style. The traditional styles of the country of our origin, and be we from either side of the line this origin is the same, should form the foundation of our adaptation to the needs and requirements of the present day, and none can be found better for the purpose than the Elizabethan and Jacobean.

The reason for this is obvious. The domestic architecture of those periods was based on thoroughly sound and practical lines. It was not only especially well suited to the climatic conditions and to the natural characteristics of the country but the builders were compelled by force of circumstances to rely upon the local materials available. Thus it conformed to the fundamental principle of architecture.

There are, of course other matters which will appeal to the present day home builders. No style offers greater possibilities for the commodious and comfortable designing of the interior. Such a type of house may embody, as indeed it does, "all modern conveniences."

The new spirit of harmonizing our homes with our surroundings means that the days of servile copying are over and that a younger generation has arisen which is expressing in our homes all that is best in our lives.

THE NEW YORK COUNTY COURTHOUSE.

Mr. Guy Lowell, Architect.

A preliminary presentation of the successful design submitted by Mr. Guy Lowell, Architect, in the competition for the New York County Courthouse, is made in this issue. Mr. Lowell's departure in submitting a circular building has evoked much comment in the daily press, practically unanimous in approval of a design which is as much a success in its artistic interpretation of the problem as it is an innovation in the conception of buildings of this kind. Mr. Lowell has stated that the plan of the new courthouse is an outgrowth of the idea that the general scheme of the building should be such that all of the work can be carried on in the simplest and most straightforward manner. From whatever direction the building is approached, there is always an entrance that leads directly to the large circular lobby in its center, around which all the elevators are arranged in one continuous ring. Though monumental in its character and of most artistic design, in all its practical details it fulfills every requirement of the business building type.

The basement floor, through which the subway runs, follows in its circular plan that of the floor above it and the location of a subway station permits those who have business in the building to step from the subway platform directly onto the elevators which will take them to the desired floor.

A feature of the scheme is that there is separate elevator service for the public and for the justices. Once in the building, the judges and the public need never meet, as the passageways connecting the robing rooms, the justices' chambers, the study alcoves and the library are all absolutely separate from the public corridors. In the same way the juries in the various trial chambers are kept quite apart from the public.

On the ground floor, adjoining the entrance, are important offices of the County Clerk, the waiting rooms for the public and the general consultation rooms for the lawyers and also rooms for the representatives of the press.

On the floors above are arranged the court rooms. There is one complete floor for the city court and four floors for the Supreme Court. Above the court rooms are the library and dining rooms for the justices. Adjoining a broad terrace overlooking the city and harbor are the justices' chambers. Each court has communicating rooms for witnesses and for counsel, has a gallery for the public and is amply lighted both by windows on the outside and by windows in the interior light court. This arrangement is particularly advantageous as it provides in addition to the artificial ventilation ample natural ventilation and also adequate protection against street noises, which have been such a disturbing factor in most of our city courts.

In studying the plans of the various floors, we are impressed with the time-saving features that this circular form makes possible. The adoption of a circular building has produced an exterior of great dignity and one that is simple and impressive in the long unbroken curves—a feature in design not easily obtained in the broken lines of an irregular or rectangular building.

In its general style of architecture, this courthouse is typical of many of the old Roman buildings, for though it

is necessarily many stories high, the elements in the design, as in the buildings of the classic period, have been kept few in number. The actual height to the justices' terrace is 200 feet and the building itself covers about 120,000 square feet of ground, leaving ample space for park and terracing around the building and thus providing a dignified setting for a building which will undoubtedly become one of the architectural features of New York City.—The American Architect.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 5 story and base, reinforced concrete, \$35,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, Jacob Vits, 825 Monadnock Bldg., S. F. The building will be erected on Leavenworth street south of Eddy and will have a frontage of 24 feet and a depth of 74 feet. The first floor has been arranged for a store and the entrance to the apartment house. Upper floors will be subdivided in 16 suites of two and three rooms each with bath. Interior will be finished in pine and elm panels. Bath rooms will have cement floors and tile wainscot. All suites will be equipped with wall beds. There will be elevator service, steam heat and a hot water supply. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Apartment house, 1 story and base, brick, \$20,000. Architect, Louis P. Hobart, Crocker Bldg., S. F. Owner, George A. Bos Co. This building will be erected on Green street west of Jones and will be arranged to contain four large and handsomely furnished apartments. Suites will consist of six and seven rooms. Interiors will be finished in pine and hardwoods. Bath rooms will be finished in tile. There will be an automatic elevator, steam heat, hot and cold water supply and vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are being prepared and it will be a matter of a month before figures are called.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$15,000. Architect, A. J. Bain, Russ Bldg., S. F. Owner's name withheld. The building will be erected near Haight and Fillmore streets and is to contain ten suites of three rooms and two suites of two rooms. All apartments will have wall beds and private bath rooms. Interior finish will be of pine with some elm panels and hardwood floors. Bath rooms will be finished in cement plaster and tile wainscot. Plans provide for steam heat and an automatic elevator. One large store will also be provided for on the first floor. The owner of the building is a well known contractor and the work will be done by Day Labor. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

SAN FRANCISCO—Apartment house,

3 story and base, frame, \$11,000. Architect, none. Owner, W. W. Yager, 1429 Hayes street, S. F. The building will be erected on Clay street west of Hyde and will cover an area of 32x93 feet. Interior has been arranged for twelve suites of two and three rooms each with bath. All apartments will be equipped with wall beds. Bath rooms will be finished in cement plaster. Interior finish will be of pine with some elm panels and hardwood floors. There will be a central heating system and hot and cold water supply. Exterior of the building will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

OAKLAND, CAL.—Apartment house, 3 story and base, frame. Cost not stated. Architect, none. Owners, Inter Cities Home Builders, 1764 Broadway, Oakland. This company are now erecting an apartment house containing eight suites of two and three rooms at the corner of 40th and Broadway. They are in the market for wall beds, bids on plumbing, plastering, electric work, painting, sash and door work, lumber, mill work and mirrors.

VANCOUVER, B. C.—Apartment house, 7 story and base, brick and steel, \$200,000. Architect, O. R. Lightheart, 2841 Burns St., Vancouver. Owner, O. R. Lightheart. The building is to be erected at the northwest corner of Bute and Nelson streets and will cover a considerable area. Interior has been arranged for two and three room apartments, all with bath. There will be disappearing beds. Interior will be finished in pine and hardwoods. Plans provide for steam heat, automatic elevator service, hot and cold water supply and a vacuum cleaning system. Bath rooms will be finished in tile and cement plaster. Exterior of the building will be faced with pressed brick. Plans are to be completed at once and the work will be done by Day Labor under the personal direction of the architect.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architect, W. G. Hind, 46 Kearny St., S. F. Owner, Mrs. Sarah Plard. The building will be erected on Mason street south of Broadway, and has been designed to contain eleven apartments of four rooms and one apartment of six rooms. Interior finish will be of pine, redwood and hardwood veneer. Hardwood floors will be used. Plans provide for steam heat, which may not be installed at the present time. All suites will have

wall beds and private bath rooms. Baths will be finished in cement plaster. Marble and tile will be used in the entrance. Exterior of the building will be covered with suiplap and brick veneer. Plans are complete and figures are being taken.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$30,000. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name withheld. The building will be designed to contain twenty-four apartments arranged in suites of two and three rooms each. The building covers an area of 50x114 feet. Interior will be finished in pine with some hardwood floors. There will be a central heating system, wall beds and private bath rooms. Entrance will be finished in tile and marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

SACRAMENTO, CAL.—Apartment house, 3 story and base, frame, \$17,000. Architect, William Willoner, 813 J St., Sacramento. Owner, A. G. Johnson. The building has been designed to contain twelve suites of three rooms and bath each. Interior finish will be of pine, redwood and some hardwood. There will be steam heat and an automatic elevator, dumb waiters, Simplex windows and disappearing beds. Bath rooms will be finished in cement plaster. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and will shortly be ready for figures.

HOLLYWOOD, LOS ANGELES CO., CAL.—Apartment houses, 2, 3 story and base, frame, \$70,000. Architects, Main Building and Investment Co., Thorpe Bldg., L. A. Owner, H. M. O'Malley. These buildings will be erected on adjoining property and in reality will be one large building and two wings. The main portion covers an area of 36x86 feet and the wings 36x76 feet. Interior will be arranged for two and three room suites with bath. Interior finish will be of pine and hardwood. Bath rooms will be finished in tile and cement plaster. All suites will have private bath rooms and wall beds. Plans provide for a central heating system, elevator service and a vacuum cleaning plant. Exterior of the building will be covered with cement plaster. Plans are nearly complete and the work will probably be carried out by the Main Building and Investment Co.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick and steel. Cost not stated. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner's name withheld. The building will be erected at the corner of 12th and Figueroa streets, and will cover an area of 77x192 feet. Interior will be arranged for a total of 54 rooms divided into two three room suites with baths. There will be five stores on the first floor. Interior finish will be of pine with some hardwood. Plans include steam heat, a vacuum cleaning system and hot and cold water system. Bath rooms will be finished in tile and cement plaster. Exterior of the building will be faced with pressed brick. Plans are nearly complete.

PORTLAND, ORE.—Apartment house, 3 story and base, brick, \$30,000. Architect, D. L. Hogan, Lumber Exchange Bldg., Portland. Owner, A. S. Ellis. The building will be erected on

a corner lot and will cover an area of 50x100 feet. There will be 29 suites of two rooms and bath. Interior finish will be of pine with some hardwood veneer and floors. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Tile and marble will be used in the entrance. Bath rooms will be finished in cement plaster and tile wainscot. All suites will be equipped with wall beds. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

SEATTLE, WASH.—Apartment house, 3 story and base, brick and steel, \$35,000. Architect, James H. Schack, T. S. Lippy Bldg., Seattle. Owner, C. D. Stimpson Contractor, N. F. Allen, People's Bank Bldg., Seattle. Contract price, \$35,000.

BANKS.

STOCKTON, SAN JOAQUIN CO., CAL.—Bank and offices, 10 story and base, brick and steel, \$150,000. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, Commercial Savings Bank of Stockton. This work has been mentioned here before when plans were first prepared. Working drawings have been completed and bids are now being taken. The building is to be erected at the corner of Main and Sutter streets and will be the most modern office building in the city. The entire first floor and basement will be occupied by the bank. Upper floors will be subdivided into modern offices. Construction will be fireproof. Interior will be finished in pine, marble and hardwoods. Plans provide for steam heat, elevator service, a vacuum cleaning system and mail chutes. Exterior of the building will be faced with pressed brick and terra cotta. Plans can be secured from the architects.

BANDON, ORE.—Bank, 2 story and base, reinforced concrete. Cost not stated. Architect, Benj. Otland, Marshfield. Owners, First National Bank of Bandon. The building is designed in the classic style. First floor will be arranged for one store besides the bank. Upper floors will be subdivided into modern offices. Interior of the banking rooms will be finished in pine and ornamental plaster. There will also be ornamental iron and bronze. There will be a central heating system. Exterior of the building will be faced with cement plaster.

SEATTLE, WASH.—Bank, 3 story and base, brick, \$20,000. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owners, Broadway State Bank. The building will be erected on Broadway and East Pike streets. The entire first floor and basement will be occupied by the bank. Upper floors will be arranged for offices. Interior finish of the banking rooms will be of hardwood, marble and tile. Upper floors will be finished in pine. Plans provide for a steam heating system, safe deposit vaults and coin vaults. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

BRIDGES AND DAMS.

SAN JOSE, SANTA CLARA CO., CAL.—Bridges, 2, reinforced concrete bridges, \$25,000 and \$8,000. Engineer,

City Engineer Irving J. Ryder, San Jose. Owners, City of San Jose. At the last meeting of the Council plans were ordered prepared for two reinforced concrete bridges. One will cost in the neighborhood of \$25,000 and the other about \$8,000. Plans will be completed in about two weeks.

PALMDALE, LOS ANGELES CO., CAL.—Dam, reinforced concrete. Cost not stated. Engineers, Allin & Allin, 65 North Raymond Ave., L. A. Owners, Palmdale Water Company. The dam will be erected on Little Rock Creek, and will be 300 feet long, 60 feet high, and is designed to impound water to irrigate 3,500 acres. Plans are also being prepared for two similar dams which will be erected higher up in the same canyon. Plans for the first dam are nearly complete and figures will be called for shortly.

CEDAR RIVER, WASH.—Dam, reinforced concrete, \$800,000. Engineer, City Engineer, Seattle. Owners, City of Seattle. Bids opened for the construction of the Cedar River dam show Nettleton, Bruce & Eachbach of Seattle low at \$687,110. The contract for the work will probably be awarded to them.

Contracts Awarded.

SAN JOSE, SANTA CLARA CO., CAL.—Bridges, concrete and frame. Cost not stated. Engineer, County Surveyor J. G. McMillan, San Jose. Owners, Santa Clara County. Contractor, W. H. Otto, 290 Park Ave., San Jose. Contract price, \$11,756.

WILLOWS, GLENN CO., CAL.—Bridges, concrete and frame. Cost not stated. Engineer, County Engineer Styles, Willows. Owners, Glenn County. The Board of Supervisors of Glenn County have awarded a contract for the bridge on Slough No. 2, a steel and concrete structure, to Jenkins & Wells, 36th and Y streets, Sacramento, for \$2,935. Concrete and steel bridge over Slough No. 3 to the Chico Construction Co. for \$1,645. A steel and concrete bridge over slough north of Biggs road on Butte Creek to the Chico Construction Co. for \$1,285.

OAKLAND, CAL.—Solid fill. Cost not stated. Engineer, Engineering Department Key Route System. Contractors, Daniel Contracting Co., 503 Market St., S. F. Contract price, \$500,000. The Daniel Contracting Co. has been awarded a contract for the solid fill from the Oakland shore line to the bulkhead line, a distance greater than half the length of the present Key Route pier. The contract price is stated to be \$500,000.

REXFORD AND COLUMBIA FLASS, WASH.—Bridges and snow sheds, \$700,000. Engineer, Engineering Department Great Northern R. R. Owners, Great Northern R. R. Company. Contractors, Grant Smith & Co., Henry Bldg., Seattle. Contract price, \$700,000.

CHURCHES.

LOS ANGELES, CAL.—Church. Class A construction, \$150,000. Architects, Goodhue & Ferguson, Boston. Owners, St. Paul's Pro-Cathedral. B. G. Goodhue is now in Southern California with Bishop Johnson and is going over the details for the construction of a new church edifice on Olive street between 5th and 6th streets. Working drawings will be started as soon as Mr. Goodhue returns east. Further mention of the work will be made in these columns.

LOS ANGELES, CAL.—Church. Class A construction, \$200,000. Architects, Imbs & Comes, St. Louis, Mo., Owners, St. Vincent's Catholic Church. This new edifice will be erected at the corner of West Adams and Figueroa streets. It is reported that E. L. Dohy has donated \$130,000 towards the construction and that the balance of the \$200,000 is already assured. Father Glass and one of the architects will make a tour of Europe before the designs for the building are started. Further mention of the work will be made in these columns.

Contracts Awarded.

VACAVILLE, SOLANO CO., CAL.—Church, 1 story and base, reinforced concrete. Cost not stated. Architect, L. M. Turton, Napa. Owners, Vacaville Episcopal Church. Contractor, George M. Sharpe, Vacaville. Contract price not stated.

FACTORIES & WAREHOUSES.

SEATTLE, WASH.—Warehouse, 2 story and base, brick, \$30,000. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, Goertz Schwabacher Land Co. The building will cover an area 120 feet square. Plans are complete and separate figures are being taken for the general construction and for the heating and plumbing. Interior will be left rough. Plans provide for a cement floor, metal window sash and frames and fireproof doors. Exterior will be faced with stock brick.

Contracts Awarded.

SEATTLE, WASH.—Factory, 2 story and base, steel and concrete, \$22,000. Architect, none. Owners, Great Western Smelting and Refining Co. Contractor, H. D. Stewart, American Bank Bldg., Seattle. Contract price, \$22,000.

VANCOUVER, B. C.—Factory, 7 story and base, brick and concrete. Cost not stated. Architects, Dalton & Eveleigh, Davis Chambers, Vancouver. Owners, John Leckie & Co. Contractor, George Snider Brethour, Dominion Bldg., Vancouver. Contract price not stated.

FIRE HOUSES AND JAILS.

SAN FRANCISCO—Police station, 2 story, brick and stone, \$35,000. Architect, Architectural Department, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works show O. C. Hall low on the general construction of the Harbor Police Station at approximately \$31,000. A complete list of all bids opened will be found in this issue under the heading of San Francisco.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,400. Architect, none. Owner, G. Cosco, 135 Pfeiffer St., S. F. The building will cover an area of 27½x45 feet, and has been designed to contain four small flats of four rooms and bath each. Interior finish will be of pine and redwood. Tile will be used in the bath rooms and kitchens. Thirty-gallon boilers will be installed. Exterior of the building will be covered with rustic and shiplap. Gas grates or open fire places will be used in the living rooms. Mantels will probably be of tile. Plans are complete

and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Flats, 4, 2 story and base, frame, \$5,000 each. Architect, Herbert A. Schmidt, Royal Insurance Bldg., S. F. Owner, C. J. U. Koenig, 520 Eureka St., S. P. These buildings will be erected on the north side of Broadway west of Hyde street. Each building will have a street frontage of 22 feet 11 inches and will extend back 60 feet. Interiors have been arranged for flats of five and six rooms with bath. Pine, oak and veneer trim will be used. Hardwood floors are specified in the principal rooms. There will be open fire places and brick and tile mantels. Bath rooms will be finished in cement plaster. Tile will be used in the bath rooms. Exteriors will be covered with rustic, cement plaster on metal lath and with veneer brick. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

SAN FRANCISCO—Flats, 3 story and base, frame, \$8,500. Architect, none. Owners, Jos. Tufo and P. Tufo, 1437 Kearny St., S. F. The building has been designed to contain nine flats of four rooms and bath each. The structure will cover an area of $37\frac{1}{2} \times 60$ feet, and is to be erected on Kearny street near Filbert. Interior finish will be of pine and redwood. Some oak floors will be used. Exterior of the building will be covered with rustic and ship-lap. Plans are complete and in the hands of the owners who will do the work by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,860. Architect, William Koenig, 750 Parnassus Ave., S. F. Owner, M. Hewitt, Stockton. The building will be erected at the corner of Parnassus avenue and 4th, and has been arranged to contain two modern flats of five and six rooms each with bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will be finished in cement plaster. Tile will be used in the kitchens. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor under the direction of Mr. Koenig.

Contracts Awarded.

SAN FRANCISCO—Flats, 2 story and base, frame, \$8,000. Architect, John J. Foley, 46 Kearny St., S. F. Owner, E. Prat. Contractor, Louis Metter, S. F. Contract price, \$8,000.

GOVERNMENT WORK AND SUPPLIES.

Weather Stripping, Fort D. A. Russell. The bid of the Denver Metal Weather Strip Co., of Denver, Colo., \$1,092.13 in amount, has been accepted for 14,561 feet metal weather stripping for Fort D. A. Russell, Wyo.

Excavation for Reclamation Service. Tabulation of bids for excavation of Canyon Division Canal, Grand Valley project, Colo., opened at Grand Junction, Colo., U. S. Reclamation Service. Bid 1. Reynolds-Bly Construction Co., Springfield, Utah.

2. W. O. & S. E. Morrison, Denver, Colo.

3. Killpatrick Bros., Beatrice, Neb.

4. John J. Lumsden & Co., Grand Junction, Colo.

5. Hewitt & Felch, Oakdale, Cal.

Schedule 1—Station 1 to Station 45.
Item 1. 90,500 cubic yards excavation, class 1—Bid 1, 18c; 2, 18½c; 3, 25c; 4, 37c.

Item 2. 1,500 cubic yards excavation, class 2—Bid 1, 48c; 2, 55c; 3, 90c; 4, 65c.

Item 3. 1,000 cubic yards excavation, class 3—Bid 1, 98c; 2, 98c; 3, 90c; 4, \$1.

Item 4. 950,000 cubic yards overhaul—Bid 1, 1¼c; 2, 1.6c; 3, 1¼c; 4, 2c.

Item 5. 1,500 cubic yards riprap—Bid 1, \$2.25; 2, \$3.90; 3, \$3.50; 4, \$6.

Totals—Bid 1, \$35,615; 2, \$39,957.50; 3, \$43,700; 4, \$63,460.

Schedule 2—Station 45 to Station 87.

Item 6. 54,500 cubic yards excavation, class 1—Bid 1, 18c; 2, 18½-10c; 3, 25c; 4, 37c.

Item 7. 1,600 cubic yards excavation, class 2—Bid 1, 48c; 2, 58c; 3, 45c; 4, 65c.

Item 8. 1,000 cubic yards excavation, class 3—Bid 1, 98c; 2, \$1.10; 3, 90c; 4, \$1.

Item 9. 140,000 cubic yards overhaul—Bid 1, 1¼c; 2, 1.8c; 3, 1¼c; 4, 2c.

Item 10. 200 cubic yards riprap—Bid 1, \$2.25; 2, \$4; 3, \$3.50; 4, \$6.

Totals—Bid 1, \$14,108; 2, \$15,648.50; 3, \$18,045; 4, \$26,205.

Schedule 3—Alternate A—Station 134 Plus 80 to Station 150.

Item 11a. 41,000 cubic yards excavation, class 1—Bid 1, 18c; 2, 18½-10c 3, 25c; 4, 37c.

Item 12a. 500 cubic yards excavation, class 2—Bid 1, 48c; 2, 58c; 3, 45c; 4, 65c.

Item 13a. 500 cubic yards excavation, class 3—Bid 1, 98c; 2, \$1.15; 3, 90c; 4, \$1.

Item 14a. 213,000 cubic yards overhaul—Bid 1, 1¼c; 2, 1.6c; 3, 1¼c; 4, 2c.

Totals—Bid 1, \$11,305; 2, \$12,022; 3, \$14,120; 4, \$20,255.

Schedule 3—Alternate B—Station 134 Plus 80 to Station 150.

Item 11b. 41,000 cubic yards excavation, class 1—Bid 1, 18c; 2, 18½-10c; 3, 25c; 4, 37c.

Item 12b. 500 cubic yards excavation, class 2—Bid 1, 48c; 2, 58c; 3, 45c; 4, 65c.

Item 13b. 500 cubic yards excavation, class 3—Bid 1, 98c; 2, \$1.15; 3, 90c; 4, \$1.

Item 14b. 1,000 cubic yards overhaul—Bid 1, 1¼c; 2, 1.6c; 3, 1¼c; 4, 2c.

Item 15b. 21,000 cubic yards material loaded into cars—Bid 1, 10c; 2, 11c; 3, 25c; 4, 35c.

Totals—Bid 1, \$10,255; 2, \$10,940; 3, \$12,365.

Schedule 4—Station 150 to Station 209 Plus 50.

Item 16. 137,000 cubic yards excavation, class 1—Bid 1, 18c; 2, 18½-10c; 3, 25c; 4, 37c; 5, 28c.

Item 17. 3,000 cubic yards excavation, class 2—Bid 1, 48c; 2, 55c; 3, 45c; 4, 65c; 5, 45c.

Item 18. 2,400 cubic yards excavation, class 3—Bid 1, 98c; 2, \$1.15; 3, 90c; 4, \$1; 5, \$1.

Item 19. 825,000 cubic yards overhaul—Bid 1, 1¼c; 2, 1.5c; 3, 1¼c; 4, 2c; 5, 2c.

Item 20. 100 cubic yards riprap—Bid 1, \$2.25; 2, \$4.25; 3, \$3.50; 4, 6; 5, \$3.50.

Totals—Bid 1, \$41,052; 2, \$42,692; 3, \$50,485; 4, \$72,140; 5, \$58,560.

Schedule 5—Station 229 to Station 242.

Item 21. 27,000 cubic yards excavation, class 1—Bid 1, 18c; 2, 18½c; 3, 25c; 4, 37c; 5, 26c.

Item 22. 3,000 cubic yards excavation, class 2—Bid 1, 48c; 2, 55c; 3, 45c; 4, 65c; 5, 45c.

Item 23. 600 cubic yards excavation, class 3—Bid 1, 98c; 2, \$1.10; 3, 90c; 4, \$1; 5, \$1.

Item 24. 25,000 cubic yards overhaul—Bid 1, 1¼c; 2, 1.8c; 3, 1¼c; 4, 2c; 5, 2c.

Item 25. 100 cubic yards riprap—Bid 1, \$2.25; 2, \$4; 3, \$3.50; 4, \$6; 5, \$3.50.

Totals—Bid 1, \$7,488; 2, \$8,155; 3, \$9,365; 4, \$13,640; 5, \$9820.

Grand totals (including alternate A, Schedule 3)—Bid 1, \$109,568, all or none; 2, \$118,115, all or none or first four; 3, \$135,715, all or none; 4, \$195,700, all or none except as provided in section 43; 5, both or none.

Fort Russell, Wyo., Remodeling Bakery

The following bids were received by the constructing quartermaster, U. S. Army, Fort D. A. Russell, Wyo., for remodeling bakery building No. 266 at that post:

W. J. Wilsack & Curtis A. Inman, Cheyenne, Wyo., \$6,400.

Howard & Woolf, Cheyenne, Wyo., \$4,155.

Archie Allison, Cheyenne, Wyo., \$6,150.

Edward Kress, Denver, Colo., \$5,715.

R. N. La Fontaine, Cheyenne, Wyo., \$5,230.

Fence, Fort Baker.

The contract for constructing 8,000 feet woven wire fence at Fort Baker, Cal., has been awarded to Max Geist construction Co., San Francisco, Cal., at \$1,675, under alternate B.

Y. & D. Towers.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for constructing steel towers for high-power radio station to be erected at Calmito, Canal Zone:

Item 5, net price for 3 600-ft self-supporting steel towers erected on foundations provided by the Government; item 6, net price for 3 600-ft self-supporting steel towers erected, complete, with foundations.

Penn Bridge Co., Washington, D. C., item 5, \$112,250; 6, \$126,200.

United Steel Products Co., 30 Church street, New York city, item 5, \$141,000; add 7.23c or deduct 7.23c; alternate, \$119,880; add or deduct 7.5c.

Des Moines Bridge and Iron Co., 806 Curry Bldg., Pittsburgh, Pa., item 2, \$150,349; 5, \$129,905; 4, foundations, \$10, excavation, \$1.75; steel, per lb, 6.65c.

Federal Telegraph Co., Merchants' Exchange, San Francisco, Cal., item 5, \$149,000; 6, \$191,000.

San Francisco, U. S. M. H., Wiring.

The following bids were received June 9 by the Supervising Architect, Treasury Department, Washington, D. C., for installing a conduit and wiring system in the U. S. marine hospital, San Francisco, Cal.:

General Electric Construction Co., San Francisco, Cal., \$3,385; time, July 30, 1913.

Standard Electric Construction Co., San Francisco, Cal., \$2,874; time August 9, 1913.

Decker Electric Construction Co., San Francisco, Cal., \$2,725; time, 45 days.

Pearl Harbor, Hospital Building.

No action has yet been taken regarding the award of the contract for the construction of naval hospital buildings at Pearl Harbor, H. T., under bids opened May 10.

HALLS & SOCIETY BLDGS.

PORTLAND, ORE.—Lodge hall, 2 story and base, brick and steel, \$60,000. Architects, Clausen & Clausen, MacIsay Bldg., Portland. Owners, Turn Verein Association. This work has been mentioned here before when the architects were first commissioned to prepare plans. Working drawings are now complete and figures are being taken. The building will contain a number of meeting rooms, social halls and a large gymnasium. Interior will be finished in pine and hardwoods. There will be steam heat and a hot water system. Exterior will be faced with pressed brick.

LOS ANGELES, CAL.—Music hall, 1 story and base, reinforced concrete, \$100,000. Architect, Myron Hunt, Hibernian Bldg., L. A. Owners, Pomona College. The building will be erected on the grounds of the Pomona College and will be arranged for a large auditorium seating 1,000 people, ten studios and twenty practice rooms. Construction will be fireproof throughout. Interior finish will be of oak. A tile roof will be used. Exterior of the building will be faced with cement plaster. Plans are also being prepared for an art building, similar in construction, which will cost in the neighborhood of \$12,000. Plans will be completed and bids will be called for about September 1st.

SACRAMENTO, CAL.—City Hall remodeling, brick and steel construction, \$25,000. Architects, Seadler & Hoen, Forum Bldg., Sacramento. Owners, City of Sacramento. Plans are nearly complete for remodeling the City Hall building. A number of offices will be enlarged, new plastering, painting and plumbing installed and the interior of the building generally improved. Bids will be advertised for within the next week or ten days. Considerable cabinet work is all to be done.

Contracts Awarded.

SAN FRANCISCO—City Hall steel work. Cost not stated. Architects, Bakewell & Brown, 251 Kearny St., S. F. Owners, City and County of San Francisco. Contractors, United States Steel Products Co., St. Louis. Contract price, \$176,783.

HOSPITALS.

SAN FRANCISCO—Hospital additions, etc., reinforced concrete construction. Cost not stated. Engineer, Consulting Quartermaster, Fort Mason. Owners, United States Government. The following contracts for work at the Letterman General Hospi-

tal, Presidio of San Francisco, have been awarded by the Constructing Quartermaster's office at Fort Mason, Capt. Walton, officer in charge:

Disinfecting and Sterilizing Building—Neil A. McLean, general construction, \$16,100; Burnham-Plumbing Co., plumbing, \$1,280; Burnham Plumbing Co., steam main, \$441. Total, \$18,124.

Addition to Detention Ward—Neil A. McLean, general construction, \$13,600; Burnham Plumbing Co., plumbing, \$1,965; Burnham Plumbing Co., heating, \$141; W. L. Tittle, electric wiring, \$385; W. L. Tittle, fixtures, \$159. Total, \$16,520.

Hydrotherapeutic Ward—Neil A. McLean, general construction, \$13,000; Burnham Plumbing Co., plumbing and apparatus, \$5,969; Burnham Plumbing Co., heating, \$559; W. L. Tittle, electric wiring, \$390; W. L. Tittle, fixtures, \$165. Total, \$20,177.

Nurses' Dormitory—Neil A. McLean, general construction, \$15,700; Burnham Plumbing Co., plumbing, \$1,800; Burnham Plumbing Co., heating, \$828; W. L. Tittle, electric work, \$518; W. L. Tittle, fixtures, \$215. Total, \$19,071.

LOS ANGELES, CAL.—Hospital, 4 story and base, reinforced concrete. Cost not stated. Architects, Garrett & Farrell, Carrier Bldg., L. A. Owners, Methodist Hospital Association. The building will be erected on South Hope street near Jefferson, and will cover an area of 60x141 feet. This building will be known as the administration building, and it is planned to eventually add two wings, each four stories in height and each 155x136 feet. Construction will be fireproof throughout with interior partitions of hollow tile and metal lath and plaster. Exterior walls and floors will be of reinforced concrete. Exterior will be faced with cement plaster. Interior will be finished in pine, marble and tile. There will be steam heat, elevator service, dumb waiters and modern hospital plumbing. Plans are nearly complete.

Contracts Awarded.

OXNARD, VENTURA CO., CAL.—Hospital, 2 story and base, brick and steel, \$55,000. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Sisters of Mercy. Contractor, Thomas Carroll, Oxnard, general construction only. Contract price, \$42,000.

HOTELS.

SAN FRANCISCO—Hotel, 7 story and base, Class C construction. Cost not stated. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner's name withheld. Preliminary plans for a seven-story hotel building, which is to be erected in the Fifty Yards District, are complete and working drawings are being prepared. The building will contain in the neighborhood of 170 rooms, a number of which will have connecting baths. Plans provide for steam heat, elevator service and a vacuum cleaning system. Exterior will probably be faced with pressed brick. Plans are now being prepared.

OAKLAND, CAL.—Hotel, subfigures, 5 story and base, brick and steel. Cost not stated. Architects, none. Owners, Inter-Ottics Home Builders, 1761 Broadway, Oakland. This firm are now in the market for lumber, brick work, plumbing, painting, plastering, electric work, structural iron and sheet metal work for a five-story hotel building.

OAKLAND, CAL.—Hotel, 7 story and base, brick and steel. Cost not stated. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owner, H. A. Powell. This building will be erected at the northeast corner of 13th and Franklin streets, and will be arranged for stores on the first floor and guest rooms above. Interior will be finished in pine and hardwood. All rooms will have connecting baths. Bath rooms will be finished in cement plaster and tile. There will be steam heat, elevator service, and a vacuum cleaning plant. Exterior of the building will be faced with pressed brick. Plans for the steel work are complete and figures are being taken. Plans will be out for figures on the balance of the work within a short time.

BURLINGAME, SAN MATEO CO., CAL.—Hotel, 3 story and base, frame, \$10,000. Architect, John J. Foley, 46 Kearny St., S. F. Owner, Peter L. Liberopolis. The building has been designed for a rooming house containing 46 rooms and several baths. Interior finish will be of pine and redwood. Bath rooms will be finished in cement plaster. Exterior of the building will be covered with shiplap and rustic. Hot water will be supplied to all rooms. Plans are complete and figures are being taken.

PLACERVILLE, EL DORADO CO., CAL.—Hotel, 2 story addition, brick and steel. Cost not stated. Architect, J. E. Osborn, Richmond. Owner, J. A. Paffetto, Ivy House, Placerville. The two additional stories will be arranged for a number of guest rooms and baths. Interior finish will be of pine throughout. There will be a central heating system and hot water plant. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architects, Neher & Skilling, Garland Bldg., L. A. Owner, W. H. Wagner. The building will be erected on Hope street near 8th, and will cover an area of 60x125 feet. Plans provide for a total of 95 guest rooms and 60 baths. Interior will be finished in pine and white enamel. Bath rooms will have cement floors and tile wainscot. There will be metal lath and plaster interior partitions and metal window frames and sash. Steam heat, elevator service and vacuum cleaning will be installed. Hot and cold running water will be supplied to all rooms. Exterior of the building will be faced with artificial stone. Marble and tile will be used in the entrance. Plans are complete and figures will be called for at once.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, E. C. Thorne, Realty Board Bldg., L. A. Owner, I. I. De Hall. This building has been mentioned here before when plans were first started. The building will cover an area of 60x100 feet and has been arranged for five stories on the first floor besides the entrance to the hotel. Upper floors will be subdivided into 100 guest rooms and a number of baths. Interior finish will be of pine and hardwood veneer. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Exterior of the building will be faced with pressed brick. Plans are now complete and figures are being taken.

PORTLAND, ORE.—Hotel, 3 story and base, brick and steel. Cost not stated. Architect, W. B. Bell, Worcester Bldg., Portland. Owners, Fisher and Thomsen. The building will be located at the southwest corner of Landslide and Washington streets, and will cover an area of 100x100 feet. Plans are to be prepared for a building with several stores on the first floor besides the entrance to the hotel. Upper two floors will be arranged for single rooms, a number of which will have connecting baths. There will be steam heat and hot and cold water in all rooms. Interior finish will be of pine throughout. Patent store fronts are to be specified. Exterior of the building will be faced with pressed brick. Plans will be prepared at once.

Contracts Awarded.

PORTLAND, ORE.—Hotel, 4 story and base, brick. \$75,000. Architects, Root & House, Commercial Club Bldg., Portland. Owner, A. C. Pike. Contractors, Investors Building and Trust Co., Yeon Bldg., Portland. Contract price, \$75,000.

LOS ANGELES, CAL.—Hotel, 2 story and base, brick. Cost not stated. Architect, John E. Kunst, Higgins Bldg., L. A. Owner, Henry J. Stevens. Contractor, J. N. Connors, 415 East 5th St., L. A. Contract price not stated.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO.—Pile foundation work, Main Entrance Tower. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids for the pile foundation for the Main Entrance Tower were opened by the Buildings and Grounds Committee on Thursday, June 19th. The lowest bid was submitted by Healy-Tibbitts Construction Co. at 243-10 cents per linear foot. They will probably be awarded the contract.

RAILROAD CONST., STATIONS AND EQUIPMENT.

PORTLAND, ORE.—Freight depot, 3 story and base, reinforced concrete. Cost not stated. Architects, Engineering Department, Hill System. Owners, Hill System, J. H. Young, President, Portland. The building will be erected on Morrison and Belmont streets and will cover a large area. Construction will be fireproof throughout, with reinforced concrete walls and floors. The largest freight elevators in the west will be installed in the building together with other modern methods for handling freight. Extensive trackage system will be constructed in the rear of the building. Exterior will be faced with cement plaster. Plans are now being prepared.

EUGENE, ORE.—Passenger station, 2 story and base, brick and steel, \$50,000. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owners, Portland, Eugene and Eastern R. R. Co. The building will cover an area of 38x55 feet. There will be two waiting rooms on the first floor and upper floor will contain the offices of the company in Eugene. Interior finish will be of pine and hardwood. Steam heat and a hot water system will be installed. Exterior of the building will be faced with pressed brick. A clay tile roof is specified. Plans are

complete and figures are being taken. Several large freight sheds will be erected on adjoining property shortly.

RESIDENCES.

SAN FRANCISCO.—Bungalow, 1½ story and base, frame, \$2,000. Architect, O. E. Evans, 2367 Mission St., S. F. Owner, C. Matson. The dwelling has been designed for a five-room house with bath. All interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room with brick or tile mantel. The building will be erected at the southeast corner of Battery and Halleck streets, and will cover a ground area of 34x77½ feet. There will be a complete steel frame and pile foundation. Interior finish will be of pine throughout. Plans provide for elevator service. Metal window sash and frames will be used. Sidewalk elevators are specified. Bids are now being taken for the steel work. A contract for the piling has been awarded to McGowan & Butler and the balance of the work will be put out for figures at once.

SAN FRANCISCO—Stores, 1 story and base, brick or reinforced concrete. Cost not stated. Architect, G. A. Applegarth, Call Bldg., S. F. Owners, Rodwell Produce Co., 210 Washington St., S. F. The building will be erected on the site of the company's present store and will cover an area of approximately 47x185 feet. The entire building will be used by the owners. Front portion of the structure will be fitted up for office purposes and the rear for wholesale purpose. Interior will be finished in pine with some tile and marble. A cement floor will be used. There will be sidewalk elevators, doors and lights. A pile foundation will probably be necessary. Exterior of the building will be faced with cement plaster. Plans are being prepared.

OAKLAND, CAL.—Stores and offices, 10 story and base. Class A construction. Cost not stated. Architect, Edward E. Seely, 255 California St., S. F. Owner, Frank W. Bilger. The building will be erected on the north side of 16th street 50 feet east of San Pablo avenue. Details of the construction have not been fully settled upon and cannot be given at this time. There will be a complete steel frame. Exterior will probably be faced with pressed brick and terra cotta. Further mention of the work will be made as the plans progress.

SACRAMENTO, CAL.—Store alterations, 3 story and base, brick, \$6,000. Architects, Seidler & Ilsen, Forum Bldg., Sacramento. Owners, Weinstein-Lubin Co. This work will include new interior fixtures and finish, new plumbing, plastering and some painting. Plans for the work are complete and figures are now being taken.

SEATTLE, WASH.—Stores and warehouse, 9 story and base, reinforced concrete, \$100,000. Architect, G. C. Nimmons, Chicago. Owners, Sears-Roebuck Co. Plans provide for a main building nine stories in height covering a ground area of 120x120 feet with an L also nine stories, and covering an area of 250x266 feet. Construction will be fireproof throughout. There will be steam heat, elevator service, metal window sash and frames, fireproof doors and parcels chutes. Exterior will be faced with cement plaster. Plans will be ready for figures about July 15th. The Chicago, Milwaukee and Puget Sound Railroad will finance the building.

SEATTLE, WASH.—Store, 1 story and base, reinforced concrete and steel, \$32,000. Architect, C. A. Meussdorffer, American Bank Bldg., Seattle. Owners, Blum & Alter. Plans for a one-story and basement building, covering a large area are complete and figures will be taken at once. The building will contain a number of retail stores. Interior will be finished in pine with some hardwood trim. There will be plate glass display windows in patent store fronts. Exterior of the building will be faced with cement plaster.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Stores and offices, 4 story and base. Class A construction. Cost not stated. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Mr. Hawley. This building has been mentioned here before. Plans have been revised, providing for a four-story instead of a three-story building. There will be stores on the first floor and a large number of modern offices on the upper floors. Exterior will be faced with pressed brick and terra cotta. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

SAN FRANCISCO—Stores and offices, 3 story and base, reinforced concrete, \$60,000. Architect, none. Owners, Italian Realty Co. Contractors, MacDonald & Kahn, Rialto Bldg., S. F. Contract price, \$60,000.

THEATRES.

RICHMOND, CONTRA COSTA CO., CAL.—Theatre, 2 story and base, reinforced concrete, \$40,000. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Turner & Dinkens Circuit. The building will be erected on Macdonald avenue between 8th and 9th streets, and will cover an area of 75x145 feet. There will be two small stores besides the theatre. Main auditorium will have a seating capacity of 1,400 people. Interior will be finished in pine and ornamental plaster. Construction will be practically fireproof. Exterior will be faced with cement plaster. There will be a central heating system and a modern system of ventilation. Plans are nearly complete.

SACRAMENTO, CAL.—Theatre, 3 story and base, reinforced concrete,

\$80,000. Architect, A. W. Cornellus, Merchants' National Bank Bldg., S. F. Owners, Turner & Dahnen Circuit. The building will be erected on K street between 11th and 12th streets, and covers a considerable ground area. There will be two stores on the first floor besides the theatre. Main auditorium will have a seating capacity of 2,000 people. Interior will be finished in pine with ornamental plaster. Plans provide for a central heating system and modern ventilation. The third floor of the building will probably be arranged for offices. Construction will be fireproof. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Theatre, 1 story and have, brick and frame, \$10,000. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owner, L. A. Irvine. The building will be erected at the corner of Sutter and Channel streets and has been designed for a moving picture house. Floor will be of cement. Interior finish will be of pine and ornamental plaster. Some art glass will be used. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken by the architects.

VANCOUVER, B. C. — Theatre, 3 story and base, reinforced concrete, \$150,000. Architect, J. V. Donnellan, 139 Pender St., West Vancouver. Owner's name withheld. The building will be erected at the corner of Main and Keefer streets, and is to be Class A in every respect. The main auditorium will have a seating capacity of 2,500 people. There will be three balconies. Interior will be finished in pine, hardwoods and ornamental plaster. Plans provide for a steam heating system and modern ventilation. There will be reinforced concrete floors, metal window sash and frames and metal stairways. Exterior of the building will be faced with cement plaster. Plans for the work are now being prepared.

Contracts Awarded.
SEATTLE, WASH.—Theatre, 2 story and base, brick and steel, \$150,000. Architect, E. W. Houghton, Collins Bldg., Seattle. Owners, King Amusement Co. Contractors, Grant Smith Co., Henry Bldg., Seattle. Contract price, \$150,000.

SEALED PROPOSALS.

PROPOSALS FOR HOSPITAL.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, and carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

APARTMENT HOUSE—5 story and base, reinforced concrete, \$35,000. San Francisco. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, Jacob Vits, 825 Monadnock Bldg., S. F. The building will be erected on Leavenworth street south of Eddy and will have a frontage of 24 feet and a depth of 74 feet. The first floor has been arranged for a store and the entrance to the apartment house. Upper floors will be subdivided in sixteen suites of two and three rooms each with bath. Interior will be finished in pine and elm panels. Bath rooms will have cement floors and tile wainscot. All suites will be equipped with wall beds. There will be elevator service, steam heat and a hot water supply. Exterior of the building will be faced with cement plaster. Plans are nearly complete and figures will be called for shortly.

APARTMENT HOUSE—4 story and base, brick, \$20,000. San Francisco. Architect, Louis P. Hobart, Crocker Bldg., S. F. Owner, George A. Bos Co. This building will be erected on Green street west of Jones, and will be arranged to contain four large and handsomely furnished apartments. Suites will consist of six and seven rooms. Interiors will be finished in pine and hardwoods. Bath rooms will be finished in tile. There will be an automatic elevator, steam heat, hot and cold water supply and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are being prepared and it will be a matter of a month before figures are called.

APARTMENT HOUSE—2 story and base, frame, \$15,000. San Francisco. Architect, A. J. Bain, Russ Bldg., S. F. Owner's name withheld. The building will be erected near Haight and Fillmore streets and is to contain ten suites of three rooms and two suites of two rooms. All apartments will have wall beds and private bath rooms. Interior finish will be of pine with some elm panels and hardwood floors. Bath rooms will be finished in cement plaster and tile wainscot. Plans provide for steam heat and an automatic elevator. One large store will also be provided for on the first floor. The owner of the building is a well known contractor and the work will be done by Day Labor. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, frame, \$11,000. San Francisco. Architect, none. Owner, W. W. Yager, 1129 Hyde St., S. F. The building will be erected on Clay street west of Hyde, and will cover an area of 32x33 feet. Interior has been arranged for twelve suites of two and three rooms each with bath. All apartments will be

equipped with wall beds. Bath rooms will be finished in cement plaster. Interior finish will be of pine with some elm panels and hardwood floors. There will be a central heating system and hot and cold water supply. Exterior of the building will be covered with rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

STORES AND LOFTS—2 story and base, brick and steel, \$16,000. San Francisco. Architect, Fred B. Wood, 2211 Steiner St., S. F. Owner, H. E. Holmes. The building will be erected on the north side of Folsom street west of Third street, having a frontage on Folsom street of 75 feet and a depth of 155 feet. The front portion of the building will be finished in pine and hardwoods, fitted up for office. Rear portion will be used for shop purposes. Upper floors will be arranged for light lofts. There will be elevator service. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

STORES AND LOFTS—2 story and base, steel and brick. Cost not stated. San Francisco. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owner, Isaac Kohn. The building will be erected at the southeast corner of Battery and Halleck streets and will cover a ground area of 34x77½ feet. There will be a complete steel frame and pile foundation. Interior will be arranged for stores on the first floor and lofts above. Interior finish will be of pine throughout. Plans provide for elevator service. Metal window sash and frames will be used. Sidewalk elevators are specified. Bids are now being taken for the steel work. A contract for the piling has been awarded to McGowan & Butler, and the balance of the work will be put out for figures at once.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architect, W. G. Hind, 46 Kearny St., S. F. Owner, Mrs. Sarah Plcard. The building will be erected on Mason street south of Broadway, and has been designed to contain 11 apartments of four rooms and one apartment of six rooms. Interior finish will be of pine, redwood and hardwood veneer. Hardwood floors will be used. Plans provide for steam heat, which may not be installed at the present time. All suites will have wall beds and private bath rooms. Baths will be finished in cement plaster. Marble and tile will be used in the entrance. Exterior of the building will be covered with shiplap and brick veneer. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$3,400. San Francisco. Architect, none.

Owner, G. Cosco, 155 Pfeiffer St., S. F. The building will cover an area of 27½x15 feet, and has been designed to contain four small flats of four rooms and bath each. Interior finish will be of pine and redwood. Tile will be used in the bath rooms and kitchens. Thirty-gallon boilers will be installed. Exterior of the building will be covered with rustic and shiplap. Gas grates or open fire places will be used in the living rooms. Mantels will probably be of tile. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FLATS—4, 2 story and base, frame, \$5,000 each. San Francisco. Architect, Herbert A. Schmidt, Royal Insurance Bldg., S. F. Owner, C. J. U. Koenig, 520 Eureka St., S. F. These buildings will be erected on the north side of Broadway west of Hyde street. Each building will have a street frontage of 22 feet 11 inches and will extend back 60 feet. Interiors have been arranged for flats of five and six rooms with bath. Pine, oak and veneer trim will be used. Hardwood floors are specified in the principal rooms. There will be open fire places and brick and tile mantels. Bath rooms will be finished in cement plaster. Tile will be used in the bath rooms. Exteriors will be covered with rustic cement plaster on metal lath and with brick veneer. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

FLATS—3 story and base, frame, \$8,500. San Francisco. Architect, none. Owners, Jos. Tufo and P. Tufo, 1437 Kearny St., S. F. The building has been designed to contain nine flats of four rooms and bath each. The structure will cover an area of 37½x60 feet, and is to be erected on Kearny street near Fillbert. Interior finish will be of pine and redwood. Some oak floors will be used. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor.

FLATS—2 story and base, frame, \$2,860. San Francisco. Architect, William Koenig, 750 Parnassus Ave., S. F. Owner, M. Hewitt, Stockton. The building will be erected on the corner of Parnassus avenue and 4th, and has been arranged to contain two modern flats of five and six rooms each with bath. Interior finish will be of pine with some elm panels. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Bath rooms will be finished in cement plaster. Tile will be used in the kitchens. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor under the direction of Mr. Koenig.

POLICE STATION—2 story, brick and stone, \$35,000. San Francisco. Architect, Architectural Department. Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works show O. C. Holt low on the general construction of the Harbor Police Station at approximately \$31,000. A complete list of all bids opened will be found in this issue under the heading of San Francisco.

HOTEL—7 story and base. Class C

construction. Cost not stated. San Francisco. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner's name withheld. Preliminary plans for a seven-story hotel building, which is to be erected in the fifty Vara District, are complete and working drawings are being prepared. The building will contain in the neighborhood of 170 rooms, a number of which will have connecting baths. Plans will provide for steam heat, elevator service and a vacuum cleaning system. Exterior will probably be faced with pressed brick. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, William Koenig, 750 Parnassus Ave., S. F. Owner, M. Hewitt, Stockton. The dwelling will be erected on 4th avenue near Parnassus and will contain six rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be an open fire place in the living room with tile or brick mantel. Tile will also be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Mr. Koenig is now purchasing all materials.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name withheld. The dwelling will be erected on 45th avenue between I and J streets and has been designed to contain six rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room with tile or brick mantel. Tile will be used in the kitchen. Bath room will be finished with cement plaster. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

BUNGALOW—1½ story and base, frame \$2,500. San Francisco. Architect, none. Owner, Ralph J. Button, 129 Noe St., S. F. The dwelling has been designed for a six-room house and will be erected on 26th street near Noe. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room and dining room. There will be an open fire place with brick mantel in the living room. Bath room will be finished in cement plaster. Tile wainscot will be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath and shingles. Plans are complete and the work will be done by Day Labor.

SCHOOL—2 story and base, brick and steel. Cost not stated. San Francisco. Architects, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids for the construction of the Glenn Park School were opened by the Board of Public Works and show Carnahan & Mulford low at \$82,124. A complete list of the bidders will be found in this issue under the heading of San Francisco.

SCHOOL—2 story and base, concrete and frame. Cost not stated. San Francisco. Architects, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids opened by the

last meeting of the Board of Public Works for the construction of the Columbus School show Carnahan & Mulford low on both propositions as follows: (a) \$72,354 and (b) \$64,883. A complete list of these figures will be found under the heading of San Francisco in this issue.

STORES—1 story and base, brick or reinforced concrete. Cost not stated. San Francisco. Architect, G. A. Applegarth, Call Bldg., S. F. Owners, Bodwell Produce Co., 216 Washington St. The building will be erected on the site of the company's present store and will cover an area of approximately 47x185 feet. The entire building will be used by the owners. Front portion of the structure will be fitted up for office purposes and the rear for wholesale purposes. Interior will be finished in pine with some tile and marble. A cement floor will be used. There will be sidewalk elevators, doors and lights. A pile foundation will probably be necessary. Exterior of the building will be faced with cement plaster. Plans are being prepared.

BUNGALOW—1½ story and base, frame, \$2,000. San Francisco. Architect, O. E. Evans, 2367 Mission St., S. F. Owner, C. Matson. The dwelling has been designed for a five-room house with bath. All interior finish will be of pine. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room with brick or tile mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic. Plans are now complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, P. H. Kelly, 55 Grattan. Owner, Maebelle E. Kelly. The dwelling will be erected on 15th avenue near Judah, and has been designed for a seven-room house with bath. Interior finish will be of pine with some hardwood floors. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor under the direction of the architect. He is now purchasing all materials.

Steel Contract Is To Go To The East.

Board of Public Works Awards City
Hall Steel Work and Opens Bids
For Much Work.

A contract for furnishing and fabricating the City Hall steel was awarded by the Board of Public Works to the United States Steel Products Co. on their bid of \$476,283, which was the lowest of the figures received last week. In awarding the contract the Board of Works followed the charter to the letter and has acted on the advice of the City Attorney. Strong opposition to the award of the steel contract to an Eastern firm was raised by both the Home Industry League and representatives of Union Labor. The bid of the United States Steel Products Co. is some \$75,000 lower than any local bidder.

Bids were also opened at the same meeting of the Board of Public Works for the general construction of the Glenn Park School, the general construction of the Harbor Police station and for furnishing motor generator sets for the Geary Street Car Barns. Carnahan and Mulford were low on the Glenn Park School work, and also on both propositions submitted for the general construction of the Columbus School. O. C. Holt was low on all three propositions submitted for the Harbor Police Station. Allis Chalmers Co. were low for the motor generator sets for the Geary Street Car Barns.

General Construction, Glenn Park School.

Bids For Pile Foundation.**Foundation Work For Main Entrance Tower Will Probably Be Done By Healy-Tibbitts Construction Co.**

Bids were opened on Thursday, June 19th, by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company for the pile foundation for the Main Entrance Tower. Three bids were received as follows:

Pile Foundation, Main Entrance Tower.

Central California Con. Co. \$24 8-10.
 Healy-Tibbitts Constr. Co., \$24 3-10.
 Contra Costa Constr. Co., \$26.
 Contract was not awarded.

Architectural Jury Selects Best Schools In State For Publication.**OVER 400 SCHOOLS SUBMIT VERY GOOD TYPES OF BUILDINGS.****Exhibition of Drawings and Photographs, Thursday and Friday.**

June 18th, and 19th at San Francisco Architectural Club, 126 Post Street.

The Jury of prominent architects appointed by the Honorable Edw. Hyatt, State Superintendent of Schools, to advise him in the selection of the best schools of the State, for publication in a new booklet to be sent out to all school trustees and architects, met last

evening at the San Francisco Architectural Club and were very enthusiastic over the four hundred or more buildings submitted.

From the photographs and drawings exhibited the following schools were declared by the jury to be the best and will be published by the State:

One Room School Buildings—Visalia, plan by N. Y. Davis; Mill Creek, Mendocino County District School, remodeled; Outdoor class room, Pasadena, plan and two photographs by Myron Hunt; Two Room Country School; Plans by C. L. Stiles; Four Room School—Plans and two photographs by Theo. C. Kistner; Eight Room Grammar School, Santa Paula, plan and two elevations; Grammar Schools—Madera, plan and three elevations by Ben McDougall; Artesia, plan and elevations by Withey & Davis; High Schools—Monrovia, plans and elevation showing out of door auditorium by Allison & Allison, Nordhoff, photographs, Princeton, elevation by Parker & Kenyon; Normal Schools—Los Angeles, plans and perspectives by Allison & Allison, San Jose, plans and two photographs by the State Architect, Santa Barbara, plan by State Architect.

The jury of architects was composed of the following members:—Lewis P. Hobart, chairman; Chas. S. Kaiser, J. W. Woollett, J. J. Donovan, C. H. Cheney, and Robert Farquhar (absent). The judgment was held in concurrence with the Honorable Edw. Hyatt, who was present.

The school buildings shown are of an extremely high order, particularly the larger schools. The plans and photographs submitted will be on public exhibition Thursday and Friday from ten to two, and from seven-thirty to nine-thirty in the evening at the San Francisco Architectural Club, 126 Post St., which kindly donated the use of its exhibition rooms.

In speaking of recent developments in school building in California Superintendent Hyatt called attention to the fact that this state has taken very rapid strides in the past five years and that now structures built prior to that time are practically out of date as to convenience and planning.

The purpose of this investigation is to put before the public the best examples erected in the last few years and to this end a jury of architects of high standing was appointed to pick out such buildings as were architecturally good that they might be held up to the community as an example for future work. Mr. Hyatt feels that much good will come of this investigation both in educating the public and in raising the standard of school building of this state and of the country at large.

Constructing Q. M. Awards Contracts.**Three New Buildings Will Be Erected at the Letterman General Hospital in the Presidio.**

Plans are now being prepared in the office of the Constructing Quartermaster at Fort Mason for all the trackage, trolley equipment, etc., for the Army Supply Depot. Funds to carry out this work will be voted at the next session of congress. Plans for the Ocean Boulevard are also being

worked up in the Constructing Quartermaster's office at Fort Mason and will shortly be ready for figures. A report from the same source states that work will be undertaken shortly by the State Board of Harbor Commissioners on the big tunnel project which is to complete the Belt Line Railroad.

Holdings of the Spring Valley Water Company on Lobos Creek are now being appraised by a board of two engineers, Mr. Anderson, of Denver, representing the Spring Valley Co. and Captain Barber representing the Government. Data for the appraisal is being furnished the Government from the Constructing Quartermaster's office.

Capt. Walton, Officer in charge of the Constructing Quartermaster's Office at Fort Mason, has awarded contracts as follows for work at the Letterman General Hospital at the Presidio:

Disinfecting and Sterilizing Building.

OAKLAND AND ALAMEDA

APARTMENT HOUSE—3 story and base, frame. Cost not stated. Oakland, Cal. Architect, none. Owners, Inter Cities Home Builders, 1764 Broadway, Oakland. This company are now erecting an apartment house containing eight suites of two and three rooms at the corner of 40th and Broadway. They are in the market for wall beds, bids on plumbing, plastering, electric work, painting, sash and door work, lumber, mill work and mirrors.

CAMPANILE — Steel and granite. Cost not stated. Berkeley, Alameda Co, Cal. Architect, John Galen Howard, 602 Mission St., S. F. Owners, Regents of the University of California. Bids for the construction of the various parts of the work in connection with the construction of the Sather Campanile, which is to be erected on the university campus at Berkeley, were opened by the Board of Regents on Thursday morning, June 19. The campanile was designed by Architect John Galen Howard. Bids for the work were received as follows: For the elevator work, excavating and concrete work, granite work, marble work, ornamental metal and for the structural steel. The California Construction Co. were low on the structural steel, California Art Metal and Wire Co. were low on the ornamental metal work, Lewis A. Hicks Co. were low on the excavating and concrete work and the Otis Elevator Co. low on the elevator work. The marble and granite work attracted a large number of bidders who submitted alternatives, and the lowest bidder cannot be determined at this time. A complete list of the bids opened by the Regents of the University appears under the heading of Oakland and Alameda County in this issue.

RESIDENCE — 2 story and base, frame, \$8,000. Oakland, Cal. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owner, C. H. Redington. The dwelling will be erected in East Oakland, and has been designed for an eight-room house with baths and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the dining room, living room, den and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. Tile will be

used in the kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE — 2 story and base, frame, \$1,500. Berkeley, Alameda Co, Cal. Architect, Frank S. Forster, 1417 Arch St., Berkeley. Owner, Dr. C. L. Roadhouse. This dwelling, which is to be erected in North Berkeley, has been designed for a seven-room house with all modern conveniences. Interior will be finished in pine and some oak. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and an open fire place. Mantel will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE — 2 story and base, frame, \$1,500. Berkeley, Alameda Co, Cal. Architect, none. Owner, C. B. Crane, 1600 La Loma Ave., Berkeley. The dwelling will contain eight rooms, bath and sleeping porch, and is to be erected at the northwest corner of Cedar and La Loma streets. Interior finish will be of pine with some oak. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Bath room will be finished in cement plaster. Tile will be used in the kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. He is now in the market for all materials.

RESIDENCE — 2 story and base, frame. Cost not stated. Oakland, Cal. Architects, Hutchinson Eros, 470 13th St., Oakland. Owner, B. Axeloulen. The house will be erected in 4th Avenue Terrace, and has been designed for an eight-room dwelling with bath and sleeping porch. Interior will be finished in pine throughout with hardwood floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken for the work.

RESIDENCE — 2 story and base, frame, \$9,000. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, J. Gregory. This house is to be erected on Calmar avenue and has been designed to contain nine rooms, three baths and a sleeping porch. Interior will be handsomely finished in pine and hardwoods. Hardwood floors will be used in the living room, dining room, reception hall and den. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. Cuen stone will also be used for one mantel. An automatic water heater will be installed. Tile will be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken by the architect.

RESIDENCE — 2 story and base,

frame. Cost not stated. Oakland, Cal. Architect, Ivan C. Satterlee, 470 13th St., Oakland. Owner, Mary Schwartz. The dwelling will be erected on Valle Vista avenue and has been designed for an eight-room house with bath. Interior finish will be of pine throughout. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans have been out for figures once and have since been revised. New bids are now being taken.

APARTMENT HOUSE—3 story and base, frame, \$20,000. Oakland, Cal. Architects, National Architectural and Engineering Co., Foxcroft Bldg., S. F. Owner's name withheld. The building will be designed to contain 24 apartments arranged in suites of two and three rooms each. The building covers an area of 50x114 feet. Interior will be finished in pine with some hardwood floors. There will be a central heating system, wall beds and private bath rooms. Entrance will be finished in tile and marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

SOLID FILL—Cost not stated. Oakland, Cal. Engineer, Engineering Department Key Route System. Owners, Key Route System, Contractors, Daniel Contracting Co., 503 Market St., S. F. Contract price, \$500,000. The Daniel Contracting Co. has been awarded a contract for the solid fill from the Oakland Shore line to the bulkhead line, a distance greater than half the length of the present Key Route pier. The contract price is stated to be \$500,000.

HOTEL SUBFIGURES—5 story and base, brick and steel. Cost not stated. Oakland, Cal. Architect, none. Owners, Inter Cities Home Builders, 1764 Broadway, Oakland. This firm are now in the market for lumber, brick work, plumbing, plastering, electric work, structural iron and sheet metal work for a five-story hotel building.

HOTEL—7 story and base, brick and steel. Cost not stated. Oakland, Cal. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owner, H. A. Powell. This building will be erected at the northeast corner of 13th and Franklin streets, and will be arranged for stores on the first floor and guest rooms above. Interior will be finished in pine and hardwood. All rooms will have connecting baths. Bath rooms will be finished in cement plaster and tile. There will be steam heat, elevator service and a vacuum cleaning plant. Exterior of the building will be faced with pressed brick. Plans for the steel work are complete and figures are being taken. Plans will be out for figures on the balance of the work within a short time.

RESIDENCE—2 story and base, frame, \$3,000. Alameda, Alameda Co., Cal. Architect, William Dufour, 2326 Santa Clara Ave., Alameda. Owner, Mrs. M. L. Murray. The dwelling will be erected on Versailles avenue and has been designed to contain six rooms and bath. Interior finish will be of pine with some hardwood veneer. Hardwood floors will be used in the dining room, living room and reception hall. There will be furnace heat and open fire place. Mantel will be of

brick. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

BUNGALOW—1½ story and base, frame, \$2,500. Alameda, Alameda Co., Cal. Architects, Newsom & Dixon, 812 Broadway, Oakland. Owner, J. Lundholm. The bungalow has been designed for a seven-room house with bath. Interior will be finished in pine with hardwood floors in the dining room, living room and reception hall. There will be a large open fire place in the living room with brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

BUNGALOW—1½ story and base, frame, \$2,700. Oakland, Cal. Architect, K. C. Morrison, 413 62nd St., Oakland. Owner, Frank Murdock. The dwelling has been designed for a six-room house with bath. Interior will be finished in pine throughout. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architects, Hutchins Bros., 470 15th St., Oakland. Owner, Mr. Joritz. The dwelling will be erected in Fourth Avenue Terrace, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

STORES AND OFFICES—10 story and base. Class A construction. Cost not stated. Oakland, Cal. Architect, Edward B. Seely, 253 California St., S. F. Owner, Frank W. Bilger. The building will be erected on the north side of 16th street, 50 feet east of San Pablo avenue. Details of the construction have not been fully settled upon and cannot be given at this time. There will be a complete steel frame. Exterior will probably be faced with pressed brick and terra cotta. Further mention of the work will be made as the plans progress.

Thursday morning. The campaign was designed by Architect John Galen Howard and when completed will be one of the finest pieces of architecture on the University grounds. The Sather Campanile is the gift of Mrs. Sather.

Bids for the work were received as follows: For the elevator work, excavating and concrete work, granite work, marble work, ornamental metal and for the structural steel. The California Construction Co. were low on the structural steel, California Art Metal & Wire Co. were low on the ornamental metal work, Lewis A. Hicks Co. were low on the excavating and concrete work and the Otis Elevator Co. low on the elevator work. The marble and granite work attracted a large number of bidders who submitted alternates and the lowest bidder can not be determined at this time. The following is a complete list of all bids opened by the Regents of the University:

Elevator Work.

Otis Elevator Co. \$2,900.
Van Emon Elevator Co. 1,060.

Excavating and Concrete Work.

Clinton Fireproofing Co. \$41,400.
J. L. Brown 45,000.
R. Rolandi 45,170.
Lewis A. Hicks Co. 41,350.
Contra Costa Constr. Co. 49,890.
Foster Costa Co. 44,857.
State Constr. Co. 51,219.
Thurston & Co. 44,900.
Van Sant-Hughison Co. 51,076.

Granite Work.

California Granite Co. (a) \$48,575;
(b) \$43,000 (a and b) \$91,575.
McGillivray-Raymond Granite Co. (a) \$44,695; (b) \$32,325; (a and b) \$77,220.
Raymond Granite Co. (a) \$53,000; (b) \$39,500; (a and b) \$72,500.

Marble Work.

Vermont Marble Co. (a) \$45,000; (b) \$63,000; (c) \$13,500; (a, b and c) \$118,500.
Vermont Marble Co. (a) \$50,600; (b) \$64,500; (c) \$13,800; (a, b and c) \$125,500.
McGillivray Stone Co. (a) \$61,130; (b) \$50,230; (c) \$14,100.

Raymond Granite Co. (c) \$12,250.

Ornamental Metal Work.

Sealmere (probably a mistake) \$ 5,000.
Monarch Iron Works 20,701.
Sartorius Co. 15,650.
Cal. Art Metal & Wire Co. 19,200.

Structural Steel Work.

Pacific Rolling Mill Co. \$46,022.
California Constr. Co. 43,000.
Dyer Bros. 44,000.

Building Contracts Awarded.

Oakland.

**FRESNO, MODESTO, STANIS-
LAUS AND CENTRAL
CALIFORNIA.**

RESIDENCE—2 story and base, brick and frame, \$12,000. Fresno, Fresno Co., Cal. Architects, Starbuck & Clark, Fresno. Owner, Wylie M. Griffen. The dwelling will be erected on Mr. Griffen's country place, just out of Fresno, and has been designed to contain ten rooms, baths and sleeping porch. Interior finish will be of pine and hardwoods with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the dwelling will be faced with cement plaster. Plans are now being prepared.

RESIDENCES—28, 1½ and 2 story and base, frame, \$2,000 to \$4,500. Fresno, Fresno Co., Cal. Architect, none. Owners, Fresno Home Builders' Association. These dwellings will be erected on the property bounded by Jense and San Pablo avenues, La Sierra and Bremer streets. The dwellings will contain from six to eight rooms and bath. Interior finish will be of pine and hardwood with hardwood floors in the principal rooms. The better class of houses will have furnace heat. Open fire places will be used in all of the houses. Mantels will be of brick and tile. Some automatic water heaters will be used. Exterior will be covered with rustic shingles, cement plaster on metal lath and brick veneer. Plans are now being prepared and when complete construction will be carried on by Day Labor.

RESIDENCE—2 story and base, frame, \$5,500. Fresno, Fresno Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Fresno. Owner, J. C. Forkner. The dwelling will be erected near the Country Club and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine and oak with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$2,000. Fresno, Fresno Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Fresno. Owner, C. H. Fowler. This dwelling has been designed for a seven room house with bath and sleeping porch. Interior will be finished in pine and oak with hardwood floors in the principal rooms. There will be a large open fire place in the living room with brick mantel. Bath room will be finished in cement plaster. Tile will be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$7,000. Fresno, Fresno Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Fresno. Owner, F. E. Connelly. The dwelling will be erected on Hayward avenue and has been designed for an eight-room house with baths and sleeping porch. All interior finish will be of pine or white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick. There will be an automatic water heater and probably a vacuum cleaning system. Tile will be used in the bath rooms and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SCHOOL—2 story and base, brick and concrete. Cost not stated. Bakersfield, Kern Co., Cal. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, City of Bakersfield. Plans for the building which is to be erected at the corner of Niles and Williams streets have been completed and are now out for figures. The building will contain eight standard size class rooms and an auditorium. Interior will be finished in pine with maple floors. A central heating system will be installed. Exterior of the building will be faced with pressed brick. Plans can be secured from either the architect or from the Clerk of the Board of Education, A. Celsus Brower. Bids will be opened on July 1st.

**SACRAMENTO, STOCKTON &
NORTHERN CALIFORNIA.**

APARTMENT HOUSE—2 story and base, frame, \$17,000. Sacramento, Cal. Architect, William Willoner, 813 J street, Sacramento. Owner, A. G. Johnson. The building has been designed to contain twelve suites of three rooms each. Interior finish will be of pine, redwood and some hardwood. There will be steam heat, an automatic elevator, dumb waiters, Sim-

plex windows and disappearing beds. Bath rooms will be finished in cement plaster. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and will shortly be ready for figures.

BRIDGES—Concrete and frame. Cost not stated. Willows, Glenn Co., Cal. Engineer, County Engineer Styles, Willows. Owners, Glenn County. The Board of Supervisors of Glenn County have awarded a contract for the bridge on Slough No. 2, a steel and concrete structure to Jenkins & Wells, 36th and Y streets, Sacramento, for \$2,935. Concrete and steel bridge over Slough No. 3 to the Chico Construction Co. for \$1,645. A steel and concrete bridge over slough north of Biggs road on Butte Creek to the Chico Construction Co. for \$1,255.

CITY HALL REMODELING—Brick and steel construction, \$25,000. Sacramento, Cal. Architects, Siedler & Hoen, Forum Bldg., Sacramento. Owners, City of Sacramento. Plans are nearly complete for remodeling the City Hall building. A number of the offices will be enlarged, new plastering, painting and plumbing installed, and the interior of the building generally improved. Bids will be advertised for within the next week or ten days. Considerable cabinet is all to be done.

BANK AND OFFICES—10 story and base, brick and steel, \$150,000. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owners, Commercial Savings Bank of Stockton. This work has been mentioned here before when plans were first prepared. Working drawings have been completed and bids are now being taken. The building is to be erected at the corner of Main and Sutter streets, and will be the most modern office building in the city. The entire first floor and basement will be occupied by the bank. Upper floors will be subdivided into modern offices. Construction will be fireproof. Interior will be finished in pine, marble and hardwoods. Plans provide for steam heat, elevator service, a vacuum cleaning system and mail chutes. Exterior will be faced with pressed brick and terra cotta. Plans can be secured from the architects.

HOTEL—2 story addition, brick and steel. Cost not stated. Placerville, El Dorado Co., Cal. Architect, J. B. Ogborn, Richmond. Owner, J. A. Paffetto, Ivy House, Placerville. The two additional stories will be arranged for a number of guest rooms and baths. Interior finish will be of pine throughout. There will be a central heating system and hot water plant. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

STORE ALTERATIONS—3 story and base, brick, \$6,000. Sacramento, Cal. Architects, Siedler & Hoen, Forum Bldg., Sacramento. Owners, Weinstock-Lubin Co. This work will include new interior fixtures and finish, new plumbing and plastering and some painting. Plans for the work are complete and figures are now being taken.

THEATRE—3 story and base, reinforced concrete, \$80,000. Sacramento, Cal. Architect, A. W. Cornelius, Merchants' National Bank Bldg., S. F. Owners, Turner & Dahken Circuit. The building will be erected on K street between 11th and 12th streets, and covers a considerable ground area. There will be two stores on the first floor besides the theatre. Main audi-

torium will have a seating capacity of 2,000 people. Interior will be finished in pine with ornamental plaster. Plans provide for a central heating system and modern ventilation. The third floor of the building will probably be arranged for offices. Construction will be fireproof. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

THEATRE—1 story and base, brick and frame, \$10,000. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, San Joaquin Bldg., Stockton. Owner, L. A. Irvine. The building will be erected at the corner of Sutter and Channel streets, and has been designed for a moving picture house. Floor will be of cement. Interior finish will be of pine and ornamental plaster. Some art glass will be used. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken by the architects.

LOS ANGELES AND SOUTHERN CALIFORNIA.

MUSIC HALL—1 story and base, reinforced concrete, \$100,000. Los Angeles, Cal. Architect, Myron Hunt, Hilberian Bldg., L. A. Owners, Hilberian College. The building will be erected on the grounds of the Pomona College and will be arranged for a large auditorium seating 1,000 people, ten studios and twenty practice rooms. Construction will be fireproof throughout. Interior finish will be of oak. A tile roof will be used. Exterior of the building will be faced with cement plaster. Plans are also being prepared for an art building, similar in construction,

which will cost in the neighborhood of \$12,000. Plans will be completed and bids will be called for about September 1st.

APARTMENT HOUSES—2, 3 story and base, frame, \$70,000. Hollywood, Los Angeles Co., Cal. Architects, Main Building and Investment Co., Thorpe Bldg., L. A. Owner, H. M. O'Malley. These buildings will be erected on adjoining property and in reality will be one large building and two wings. The main portion covers an area of 36x86 feet. Interior will be arranged for two and three room suites with baths. Interior finish will be of pine and hardwood. Bath rooms will be finished in tile and cement plaster. All suites will have private bath rooms and wall beds. Plans provide for a central heating system, elevator service and a vacuum cleaning plant. Exterior of the building will be covered with cement plaster. Plans are nearly complete and the work will probably be carried out by the Main Building and Investment Co.

APARTMENT HOUSE—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner's name withheld. The building will be erected at the corner of 12th and Figueroa streets and will cover an area of 77x102 feet. Interior will be arranged for a total of 54 rooms divided into two and three room suites with baths. There will be five stores on the first floor. Interior finish will be of pine with some hardwood. Plans include steam heat, a vacuum cleaning system and hot and cold water system. Bath rooms will be finished in tile and cement plaster. Exterior of the building will be faced with pressed brick. Plans are nearly complete.

HOSPITAL—4 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Garrett & Farrell, Currier Bldg., L. A. Owners, Methodist Hospital Association. The building will be erected on South Hope street near Jefferson, and will cover an area of 60x141 feet. This building will be known as the administration building, and it is planned to eventually add two wings, each four stories in height and each 155x136 feet. Construction will be fireproof throughout, with interior partitions of hollow tile and metal lath and plaster. Exterior will be faced with cement plaster. Interior will be finished in pine, marble and tile. There will be steam heat, elevator service, dumb waiters and modern hospital plumbing. Plans are nearly complete.

HOTEL—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Neher & Skilling, Garland Bldg., L. A. Owner, W. H. Wagner. The building will be erected on Hope street near 8th, and will cover an area of 60x125 feet. Plans provide for a total of 95 guest rooms and 60 baths. Interior will be finished in pine and white enamel. Bath rooms will have cement floors and tile wainscot. There will be metal lath and plaster partitions and metal window frames and sash. Steam heat, elevator service and vacuum cleaning will be installed. Hot and cold running water will be supplied to all rooms. Exterior of the building will be faced with artificial stone. Marble and tile will be used in the entrance. Plans are complete and figures will be called for at once.

HOTEL—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, E. C. Thorne. Realty Board Bldg., L. A. Owner, I. I. De Hall. This building has been mentioned here before when plans were first started. The building will cover an area of 60x100 feet, and has been arranged for five stores on the first floor besides the entrance to the hotel. Upper floors will be subdivided into 100 guest rooms and a number of baths. Interior finish will be of pine and hardwood veneer. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Exterior of the building will be faced with pressed brick. Plans are now complete and figures are being taken.

SCHOOL—2 story and base, brick and reinforced concrete, \$10,000. Ontario, San Bernardino Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Ontario City School District. This building has been mentioned here before when the architect was first commissioned to prepare the plans. Working drawings are complete and bids are now being taken. The plans provide for ten class rooms, auditorium, manual training and domestic science departments. Exterior walls, floors and roof will be of concrete and brick. Metal lath and plaster interior partitions will be used. Finish will be of pine with maple floors. There will be a central heating system, program clocks and a vacuum cleaning system. Exterior of the building will be faced with pressed brick.

DAM—Reinforced concrete. Cost not stated. Palmdale, Los Angeles Co., Cal. Engineers, Allin & Allin, 65 North Raymond Ave., L. A. Owners, Palmdale Water Company. The dam will be erected on Little Rock Creek and will be 300 feet long, 60 feet high, and is designed to impound water to irrigate 2,500 acres. Plans are also being prepared for two similar dams which will be erected higher up in the same canyon. Plans for the first dam are nearly complete and figures will be called for shortly.

CHURCH—Class A construction, \$150,000. Los Angeles, Cal. Architects Cram, Goodhue & Ferguson, Boston. Owners, St. Paul's Pro-Cathedral. B. C. Goodhue is now in Southern California with Bishop Johnson and is going over the details for the construction of a new church edifice on Olive street between 5th and 6th streets. Working drawings will be started as soon as Mr. Goodhue returns east. Further mention of the work will be made in these columns.

CHURCH—Class A construction, \$200,000. Los Angeles, Cal. Architects, Imbs & Comes, St. Louis, Mo. Owners, St. Vincent's Catholic Church. This new edifice will be erected at the corner of West Adams and Figueroa streets. It is reported that E. L. Dohy has donated \$130,000 towards the construction and that the balance of the \$200,000 is already assured. Father Glass and one of the architects will make a tour of Europe before the designs for the building are started. Further mention of the work will be made in these columns.

STORES AND OFFICES—1 story and base. Class A construction. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Engineers, Mayberry & Park-

er, Pacific Electric Bldg., L. A. Owner, Mr. Hawley. This building has been mentioned here before. Plans have been revised, providing for a four-story instead of a three-story building. There will be stores on the first floor and a large number of modern offices on the upper floors. Exterior will be faced with pressed brick and terra cotta. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

HOTEL—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, John E. Kunst, Higgins Bldg., L. A. Owner, Henry J. Stevens. Contractor, J. N. Connors, 415 East 8th St., L. A. Contract price not stated.

RESIDENCE—2 story and base, frame, \$22,570. Pasadena, Los Angeles Co., Cal. Architects, Parkinson & Bergstrom, Security Bank Bldg., L. A. Owner, H. O. Ayer. Contractor, E. D. Tyler, 539 South Pasadena Ave., Pasadena. Contract price, \$22,570.

HOSPITAL—2 story and base, brick and steel, \$55,000. Oxnard, Ventura Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Sisters of Mercy. Contractor, Thomas Carroll, Oxnard, general construction only. Contract price, \$12,000.

PORTLAND AND OREGON.

BANK—2 story and base, reinforced concrete. Cost not stated. Bandon, Ore. Architect, Benj. Ostlund, Marshfield. Owners, First National Bank of Bandon. The building is designed in the classic style. First floor will be arranged for one store besides the bank. Upper floors will be subdivided into modern offices. Interior of the banking rooms will be finished in pine and ornamental plaster. There will also be ornamental iron and bronze. Plans provide for safe deposit vaults. There will be a central heating system. Exterior of the building will be faced with cement plaster.

HOTEL—3 story and base, brick and steel. Cost not stated. Portland, Ore. Architect, W. B. Bell, Worcester Bldg., Portland. Owners, Fisher & Thorsen. The building will be located at the southwest corner of Landsdale and Washington streets, and will cover an area of 100x100 feet. Plans are to be prepared for a building with several stores on the first floor besides the entrance to the hotel. Upper two floors will be arranged for single rooms, a number of which will have connecting baths. There will be steam heat and hot and cold water in all rooms. Interior finish will be of pine throughout. Patent store fronts are to be specified. Exterior of the building will be faced with pressed brick. Plans will be prepared at once.

FREIGHT DEPOT—8 story and base, reinforced concrete. Portland, Ore. Architects, Engineering Department Hill System. Owners, Hill System, J. H. Young, President, Portland. The building will be erected on Morrison and Belmont streets and will cover a large area. Construction will be fire-proof throughout, with reinforced concrete walls and floors. The largest freight elevators in the west will be installed in the building together with modern methods for handling freight. Extensive trackage system will be constructed in the rear of the building. Exterior will be faced with cement

plaster. Plans are now being prepared.

PASSENGER STATION—2 story and base, brick and steel, \$50,000. Eugene, Ore. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owners, Portland, Eugene and Eastern R. R. Co. The building will cover an area of 3x855 feet. There will be two waiting rooms on the first floor and upper floor will contain the offices of the company at Eugene. Interior finish will be of pine and hardwood. Steam heat and a hot water system will be installed. Exterior of the building will be faced with pressed brick. A clay tile roof is specified. Plans are complete and figures are being taken. Several large freight sheds will be erected on adjoining property shortly.

APARTMENT HOUSE—3 story and base, brick, \$30,000. Portland, Ore. Architect, D. L. Hogan, Lumber Exchange Bldg., Portland. Owner, A. S. Ellis. The building will be erected on a corner lot and will cover an area of 50x100 feet. There will be 29 suites of two rooms and bath. Interior finish will be of pine with some hardwood veneer and floors. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. Tile and marble will be used in the entrance. Bath rooms will be finished in cement plaster and tile wainscot. All suites will be equipped with wall beds. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

LODGE HALL—2 story and base, brick and steel, \$60,000. Portland, Ore. Architects, Clausen & Clausen, Maclean Bldg., Portland. Owners, Turn Verein Association. This work has been mentioned here before when the architects were first commissioned to prepare plans. Working drawings are now complete and figures are being taken. The building will contain a number of meeting rooms, social halls and a large gymnasium. Interior will be finished in pine and hardwoods. There will be steam heat and a hot water system. Exterior will be faced with pressed brick.

Contracts Awarded.

HOTEL—4 story and base, brick, \$75,000. Portland, Ore. Architects, Root & Hoose, Commercial Club Bldg., Portland. Owner, A. C. Pike. Contractors, Investors Building and Trust Co., Yeon Bldg., Portland. Contract price, \$75,000.

SCHOOL—2 story and base, reinforced concrete, \$75,000. Kenton, Ore. Architect, none. Owners, Town of Kenton. Contractor, John Almeter, Portland. Contract price, \$75,000.

SEATTLE AND WASHINGTON.

DAM—Reinforced concrete, \$800,000. Cedar River, Wash. Engineer, City Engineer, Seattle. Owners, City of Seattle. Bids opened for the construction of the Cedar River Dam show Nettleton, Bruce & Eachbach of Seattle low at \$687,110. The contract for the work will probably be awarded to them.

APARTMENT HOUSE—7 story and base, brick and steel, \$200,000. Vancouver, B. C. Architect, O. R. Lightheart, 2941 Burns St., Vancouver. Owner, O. R. Lightheart. The building is to be erected at the northwest corner of Butte and Nelson streets and will cover a considerable area. Interior

TO PREVENT BIGNESS.

Two methods of dealing with the big corporations, commonly known as trusts, are now before the country.

One method, advocated by Roosevelt and the Progressive party, is to permit them to do business on as large a scale as they may find effective, subject all the time to government regulation. This regulation would prevent unfair practices toward competitors and the public.

The other method is embodied in the La Follette Bill, introduced in the Senate recently, which provides that any concern that controls more than 30 per cent of a business is engaged in unreasonable restraint of trade. The theory of this measure, of course, is that competition can be compelled by the government.

One method assumes that there are economies of business on a large scale which society cannot afford to do without. The other takes it for granted that big business is uneconomical, and that the country will be best served by many small enterprises.

A few years ago there was a third method with a large following. This involved the let-alone policy toward the trust problem. This third method has now been eliminated from all political programs.—Kansas City Star.

A reversible window that cost only
25 cents more than the common double
hung.

Frank Neidick

Carpenter and Builder
Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

The Electric Weld

Automatic Storage Gas Water Heaters.

An automatic gas water heater controlled by a movement temperature thermovalve using gas at the rate of 60 feet per hour when in operation, with no limit to the amount of hot water that can be drawn per minute.

A single extremely simple valve controls the entire heater, insuring permanent service with no cost for upkeep.

This heater is absolutely guaranteed, leaving the decision entirely with the consumer.

Electric Weld

Combination Gas Water Heaters

Over 8000 in daily use in Los Angeles and vicinity.

The entire sale of parts to maintain the above heaters last year was \$68.30, which is $\frac{3}{4}$ of a cent per heater. This showing should command the attention of every person using a gas water heater.

The boiler is made of double extra heavy steel, guaranteed to work under 150 pounds pressure all joints are electrically welded, which guarantees the same tightness as a glass bottle.

Otis Elevators

Sustain Architects' Endorsement

The Architect who specifies Otis Elevators identifies himself and his client with the most thorough Elevator organization in the world---an organization with fifty-seven years' experience and success in building Elevators.

Our Elevators --- of every type---from the simplest Hand-power Elevators to the most elaborate Electric and Hydraulic Installations---are the world's most finished Elevator products

We maintain Branches in eighty-one cities in the United States the distribution of which offers to users of Otis Elevators an inspection and Repair Service unapproached by any other Elevator Company.

Your clients and their engineers who use Otis Elevators will receive the benefit of our broad engineering experience and the unequalled facilities of our "Service Department." We are always glad to co-operate with them and with you to the fullest extent.

We Make

Geerless Traction Elevators. Worm Gear Traction Elevators.
Drum Type Elevators. All Types of Hydraulic Elevators.
Freight Elevators of Every Description. Automatic Residence
Elevators. Electric Dumbwaiters. Incline Railway Hoists.
Blast Furnace Hoists. Escalators. Inclined Freight Elevators
Gravity Conveyors, Etc.

Let us send you our latest books giving detail description of Otis Elevator products.

Nailing BEAVER BOARD to the wall and ceiling-rooms of a new room, quickly and without litter or confusion.

Same room finished in one of many beautiful designs possible with BEAVER BOARD walls and ceilings.

BEAVER BOARD

takes the place of lath, plaster and wall-paper for the walls and ceilings of every type of building, new or remodeled.

It costs less; is more quickly and easily put up; is durable, sanitary and artistic.

It will not crack, chip or deteriorate with age; it deadens sound, keeps out heat and cold, retards fire, and withstands strain or vibration.

Made entirely of selected woods, reduced to fibrous form and pressed into panels of uniform thickness, with handsome pebbled surface.

We furnish all convenient sizes for every purpose, with full directions for application. Can also supply small quantities for making many useful and decorative household articles.

Catarrh Can Be Relieved

THERE is no need for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner.

We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee your satisfaction or we will refund your money.
